KENDRICK, LATAH COUNTY, IDAHO, FRIDAY, JANUARY 31, 1930.

5 ON

GOVERNOR TELLS WHY VIEWS ARE SWITCHED

An explanation of why the Idaho state highway department has switched its views and now favors a construction program financed by tax anticipation notes or bonds instead of the prevailing pay-as-you-go system is given in an official statement issued by Governor H. C. Baldrige at Boise.

In his biennial report, submitted to the governor in November, 1928, Commissioner Woods said, in part: "It is recommended that the pay-as-you-go policy for state highway improvements be continued in Idaho. It has been suggested that perhaps a bond issue for ten million dollars, predicated on the gasoline tax income, would greatly expedite completion of the state system. Such action would hasten completion only about three years. Suggestion is made to continue the present policy of financing, which revenue will have a natural increase of approximately 10 per cent yearly, and to look for a source of additional revenue."

Governor Baldrige gives several reasons why that view is not applicable now. "In the first place," the governor's statement says, "the commissioners did not then foresee the possibility of a special legislative session and the holding of an election within a few months. If the proposal had been submitted to the 1929 legislature the election necessary for ratification by the people still could not have been held until this fall, so that two years would have been lost there."

"Then there is the question of additional federal aid, which has made possible a chance in the form of the completed program from gravel to dirt roads. Now obviously there would be no particular advantage in bringing all the roads of the state to a gravel basis, when the maintenance of our existing gravel roads is a serious annual strain on our resources. Now, however, that the increase in federal aid will make possible the oiling of such a large section of the federal aid system, the savings will justify the measures to increase the speed of the program."

"The plan, in fact, which critics should keep in mind, is that the bond program spoken of in the biennial report as of October, 1928, bears no relation to the speeded up program, covering totally different kinds of work, which is now proposed for submission to the legislature."

Referring to a quotation of Commissioner Wood's testimony before the house roads committee in Washington, in which the commissioner contended (early in December) that Idaho was prepared to match federal aid totaling \$1,300,000, the governor explained that here again a change in conditions has compelled a change in plans.

"We had, in fact, allotted three-quarters of a million dollars of state funds and 200 thousands in local funds for co-operation with the federal government," the chief executive pointed out. "This would have made possible for us to take advantage of the funds mentioned. A survey of our gravel roads, however, brought forcibly to our attention the ruling of the federal bureau of public roads, which is, briefly, 'No maintenance, no more cash.' In other words, if we were to preserve our investment, to say nothing of meeting this ultimatum from the federal bureau, we had to let the construction program go by the board and allocate our three-quarters of a million to reconstructing gravel roads already in existence."

"Now, since we had already exerted ourselves to obtain the additional federal aid, we found ourselves in the embarrassing position of the man who has asked for a bowl of milk and has no jar in which to carry it. The federal government does insist that the man who gets cream from it provides his own jar; in a nut-shell we are endeavoring to provide our jar, while at the same time safeguarding what we already have obtained from the government."

The money which the state was forced by the requirements of the bureau of public roads to withdraw from construction and spend on reconstruction and maintenance would have matched approximately a million, a hundred thousand dollars of federal aid.

Here's a Hot One

"Why do modern girls wear sun-back frocks?"
"That's easy—to catch the sun."

Has Birthday Party

In honor of his birthday, Saturday, January 25, Ivan Craig entertained a number of his friends at his home in Leland. Two carloads of young people attended from here.

The evening was enjoyably spent dancing and playing cards. Those present were: Margaret McDowell, Mac Freytag, Neva Ware, Bessie Blevins, Edna Emmitt, Minnie Craig, Marjory Davidson, Howard Delano, George Bailey, Claud Woody, Carl Davis, Charles Davis, Alva Craig, Clayton Gephart, Woodrow Fleahman, Claud and Clyde Gephart, Jake Daugherty, Gordon Peters and Ivan Craig.

REPUBLICAN LOVE FEAST FEBRUARY 12, IN BOISE

The Rev. Willis Martin, former Boise minister, will be the principal speaker at the annual Lincoln day banquet, republican love feast, which will be held at the Owyhee hotel in Boise, February 12, birthday of the Great Emancipator.

The event is usually the signal for the gathering of republicans from all sections of the state and judging from the advance ticket sale the representation will be better than ever before. Seating capacity is limited to 300, and it is always taxed to the limit. The committee in charge will present a fine program of entertainment, not the least of which is a series of gridiron stunts which bring vividly before the guests the political situation in the state at the time.

Doctor Martin is well-known throughout Idaho and his appearance on the program will, no doubt, bring many to the capital city to hear him.

Farmer Boys Have Discussion

As a new departure this year at the Spokane Young Farmers' conference, a room was studded over to the boys of high school age and they were assigned a leader to help them in thrashing out their problems. It quickly developed that they had definite ideas on specialization, on the value of agriculture, and that they firmly believe that it is going to take more money to become established than it took their fathers.

"Should a boy study agriculture in high school, whether he intends to be a farmer or not?" came up for debate. Vigorous divergences of opinion were expressed. Some of the boys held that agriculture was so fundamental that a knowledge of it would be valuable to a man no matter what his later profession. Another boy held, "A fellow should study it if he's going to be a farmer alright, but if he's going to be a doctor—say if he's going to be a quack doctor or a poor farmer he might as well not be anything. He ought to specialize and know all he can about one line."

Kendrick State Elects Officers

At the regular annual meeting of the stockholders of the Kendrick State Bank, held January 21, the following officers were elected for the ensuing year: Martin V. Thomas, president; K. D. Ingle, vice president; H. B. Thompson, cashier and E. H. Emery, assistant cashier—all of whom were elected to succeed themselves.

The following board of directors were also elected to succeed themselves: Martin V. Thomas, K. D. Ingle, Wm. A. Watts, Mrs. Kate Galloway, E. W. Lutz, H. B. Thompson.

While no specific statement was given out as to the bank's business, the officers stated that the year had been good and that the bank is on a splendid basis, regardless of the prevailing shortage of surplus cash.

Entertained at Bridge

The weekly Bridge club was very pleasantly entertained Wednesday afternoon by Mrs. George Leith, when the game was played at three tables. High honors were won by Mrs. Helpman while the consolation went to Mrs. Cook. Dainty refreshments were served during the afternoon.

Mrs. W. L. McCreary was an invited guest. Mrs. R. M. Spencer of Moscow, daughter of Mrs. Leith, was also present.

Estate Valued at \$14,000

The estate of the late Henry Hull has been appraised at \$14,000 by W. J. Carroll, E. H. Dammarell and R. H. Ramey and the appraisal filed with the probate court. The estate consists of notes, stocks and bonds and residence property in Kendrick.

LOCAL WATER QUESTION IS A BIG ONE—NOT SOLVED

The water question in Kendrick is still a "burning" one, but not so much so as the coal question—which is supposed to burn. The town is not out of coal, nor has it been, but many residents are certain that it could not cause much more grief than being out of water. Sometimes there is water, and sometimes there isn't. And it would seem that not much can be done toward relieving the present situation until the weather moderates sufficiently to allow the thawing and tracing of the trouble.

A large pump has been secured from the town of Troy and a motor has been borrowed from the Barnum Lumber company, while water is being taken from the railroad tank to supply the present needs of the town. This became necessary when a break was discovered in the main leading from the reservoir and a serious break in the main in the west end of town.

The town authorities are doing all in their power to relieve the situation and the large pump will be kept going until repairs are made and the water system is again in normal condition.

Just be patient and everything will turn out all right.

The leadpipes to many residences are still frozen and it is no unusual sight to see residents going with buckets, boilers and other vessels to their more fortunate neighbors to get water.

INTEREST KEEN IN FEDERAL FARM MARKETING ACT

Additional impetus was given the 1930 annual conference of Young Farmers when over 200 assembled last week in Spokane, by the increasing interest shown in the new federal marketing act. The rooms assigned to the meetings of the wheat farmers were crowded beyond capacity, and with W. A. Schoenfeld, of Portland, northwest representative of the federal farm board presiding, questions came quickly and the discussion was keen.

It seemed the consensus that the question of how the small cooperative group can fit in with the national becomes a local one not difficult to solve, and that when fully functioning the national board will have the implements to stabilize the wheat market for the benefit of the grower.

Ohgegosh!

Just think, a fellow over at Oakland, California, has been sentenced to be hanged twice, because convicted of a double murder. The judge said it was the first time in the history of English or American law that such a sentence had ever been passed. The next question is, how is he going to do it? If he were like a cat, it might be possible. The only other way we see out of the dilemma is for the hangman to do as they used to do down in Missouri when the law was dealt according to the way they saw it in that part of the country. They would sometimes hang a fellow until he became unconscious and then let him down until he came to consciousness again and then they would draw him up again. Sometimes this was repeated several times.

That is the only solution we can see for the hangman to pursue and fulfill the mandates of the law.

W. W. P. Buys More Plants

The Washington Water Power company of Spokane has purchased the Kootenai Power company and the Consumers company of Coeur d'Alene and certain property of the Inland Power and Light company of Lewiston and Grangeville, Idaho, according to an announcement of M. W. Birkett, vice president and general manager of the Washington Water Power company. The details of the transfer have not been entirely worked out, but after this is done the Spokane company will directly serve the Lewiston and Grangeville areas the same as it now serves other districts in ten counties of eastern Washington and six counties of northern Idaho.

Cupid Is Busy

Milford Armitage of Southwick and Miss Melvina Rowton of Kootenai and Kirk Wilson and Hazel Bartlett, both of Kendrick, were united in marriage Monday at Lewiston by Probate Judge E. L. Parker.

"YIMMIE YONSON'S YOB" BE GIVEN SATURDAY EVE

"Yimmie Yonson's Yob," a rollicking Swedish play, will be given by local talent under the auspices of the ladies aid of the Methodist Episcopal church in the Kendrick theater, Saturday night, February 1—which means this coming Saturday night—commencing at 8 o'clock.

It is said to be a real mystery comedy and you are asked to come and see for yourself the embarrassing situation in the Kent household and how they, with the aid of a real detective, restore peace and happiness.

The ladies will insure against tears, but not so of laughter. It is rated at 60 laughs per minute—a little beyond the speed law, but it just can't be helped.

The cast of characters is as follows: Mr. Kent, the father, Wm. Watts; Mrs. Kent, the mother, Mae Ramey; Belle, the foster daughter, Blanche Wood; Sylvia, the niece, Earline Stump; Micky, the farm hand, Claud Groth; Peg, the cook, Emma Walker; Kittie, the helper, Marjorie Davidson; Pal, the detective, Wm. Jones; Frank, the clerk, Roy Ramey; Yimmie, from Mannasota, Norris Walker.

Time—The present.
Place—Farmer Kent's home.

Synopsis of Acts

Act I—Living room of Farmer Kent's home, late afternoon in August.

Act II—That night.

Act III—Late the next day.

Blanche Wood and Edna Kayser, directors.

NO SUCH THING AS A SURPLUS OF WHEAT

There no such thing as a surplus of wheat, it is needed in some part of the world," said R. E. Shepherd, chairman of the Federal Land Bank, speaking before the weekly luncheon meeting of the Spokane Chamber of Commerce. The problem is one of storage until the wheat is needed.

Mr. Shepherd continued, adding that storage is the most vital question in grain marketing today, and that wheat should be stored as near to the point of origin as possible; that no more money than necessary need be involved in handling. "Keep your dollar west of the continental divide if you can," Mr. Shepherd concluded—"build up the West."

Rev. Taber Assisting at Meetings

The following from Corvallis, Washington, will be of interest to the many friends of Rev. L. E. Taber of Juliaetta:

"Revival meetings in progress at the Methodist church have been well attended during the week just past and will continue throughout the remainder of this week and possibly longer. Rev. L. E. Taber, brother of the pastor, Rev. C. J. Taber, has come from Juliaetta, Idaho, to conduct the services, and his outspoken sermons are gaining him a good audience. Large posters, 'Corvallis for Christ,' have been placed about town to attract attention to the meetings. Rev. Taber was accompanied here by his wife."

Horses Frozen Standing Up

A news dispatch from Laramie, Wyoming, under date of January 25, says: An awesome monument to the most severe cold wave the Rocky mountain region has experienced in a quarter of a century, three horses, frozen in their tracks on the plains east of Laramie, has been discovered by motorists taking the open road after last week's heavy snowfall.

James McCoy, University of Wyoming student, advised friends at Laramie that he had taken pictures of the horses which were frozen to death standing up.

Sleighting Party

Johnny Kite entertained a group of his friends Saturday with a sleigh-ride party. After riding about the better part of the afternoon the young people went to the home of Athol Pearson where light refreshments were served.

Word From the Hartungs

A postcard from Aug. W. Hartung, asking us to change his address to No. 7 Eleventh street, Richmond, Calif., also says: "Everybody well and happy," which means a lot. It would indeed be nice if everyone could say as much.

Another Correspondent

In answer to our appeal for assistance in making the Kendrick Gazette a better country paper by having more communities represented in its columns, we have secured a correspondent from American ridge, items from which place will appear as a weekly feature.

We hope to hear from other communities where there is no correspondent. Just drop us a line signifying your willingness to send in items and we will at once forward the necessary supplies. Do it today, please.

4-H CLUB MEMBERS MAKE \$35,185.33 PROFIT IN 1929

Two thousand, eight hundred and fifty-nine 4-H club workers in 35 counties in Idaho realized \$35,185.33 in profit on their projects; last year reports J. H. Reardon, state county agent and club leader with the University of Idaho college of agriculture extension division. This number of 4-H club workers represented 278 club units.

Dairy calf clubs recorded the largest profit, \$12,868.77. Sugar beets ranked second with a profit of \$4,405.18. Sheep and swine clubs were close contenders for third, swine showing a profit of \$4,916.71 and sheep \$4,454.31.

Members of livestock clubs owned 1638 head of stock. Other divisions of club work contributing to the year's profits were home economics clubs and garden groups. Bannock county led the state in number of 4-H club workers, having 393. Canyon county was second with 266. Nez Perce county came in third, with 188; Bonner county, fourth, 186, and Ada county fifth, 185.

A substantial increase in 4-H club enrollment in the state is expected during the next two or three years. It is hoped, says the state club leader, that during this period club work can be extended into every one of the state's 44 counties.

Weather Moderates

So much has been said about the various kinds of weather, here and elsewhere, that it has ceased to be news or even to command passing interest. Anyway, we can boast of a climate that is at least a few degrees warmer than it was last week at this time. The coldest point reached so far this week has been three degrees below zero and Monday morning it was 16 degrees above zero. Tuesday morning it was not quite so warm, but not so cold, either.

On Wednesday the mercury reached 40 degrees and the coldest point reached Wednesday night was 12 degrees above zero.

We're Not Jealous

Nothing surprises us these days, and when we read an item from Boston to the effect that Massachusetts is planning to build sidewalks alongside her main-traveled roads we take it as just another turn of the wheel of progress. Already Michigan has shown that it is practical to place electric lights along rural highways, so if sidewalks are added, thus saving the lives of many pedestrians, it will serve as a double blessing. It may be a long time before we get electric lights and sidewalks along rural roads around Nezperce. But we are not envious of other sections. We're glad they are paying the expense of the experiments. If our state will just give us decent roads, and spend our tax money in keeping them decent—we're willing to let the other fellows have the sidewalks and electric lights for the time being.—Nezperce Herald.

Train Demolishes Truck

Their truck, struck by a train coming into the depot at Troy, carried 100 feet down the tracks and totally wrecked. Charles and Laurie Payne, brothers, and Charles Payne's small son, escaped, almost without injury, last Friday. The train was behind schedule and they thought it had passed when they drove onto the tracks.

The little boy was tossed into the air to one side and made a soft landing in a huge pile of snow as the engine hit the truck with a crash. The youngster was not even scratched. Laurie Payne received the only injury, a dislocated shoulder. He and his brother rode the cab of the truck until it stopped.

Let a want ad sell your surplus stuff. The cost is small.

MUST CARRY IDENTIFICATION CARD IN CAR

For the first time in the history of automobile registration in Idaho automobilists are being furnished this year with paraphernalia for displaying the registration information in the car. Fred E. Lukens, secretary of state, is sending to each owner whose car is registered in 1930 a light aluminum frame, which has a non-breakable, transparent glass. The registration information is inserted behind the glass for preservation. This frame, and the information it contains, Mr. Lukens points out, is required by law to be kept in the car at all times, preferably affixed to the interior at some point where it can readily be seen.

The secretary has also prepared for distribution a digest of the motor vehicle laws. A copy of this publication is included with each registration sent out by the office. Each law affecting motorists is reduced to a short form readily understandable and quickly read.

Both of these new features are for the protection of the motorist. With the digest of laws he is able quickly to acquaint himself with the major provisions governing the operation and regulation of motor vehicles. The visible posting of the registration information is also a protection to the motorist, particularly should his car be stolen, because the operator of a motor vehicle who is unable to show these registration notices when they are asked for might have difficulty explaining how he came into possession of the car.

Mr. Lukens calls attention of the motorist to the fact that the use of 1929 license plates after February 1 is unlawful and urges that new plates be obtained before that date. Reports indicate, he said, that less than one-third of Idaho's cars are registered.

It's Cherryblossom Time In Lewiston

It's cherry blossom time in Lewiston and Clarkston.

Yesterday, the second mild day since the sub-zero temperatures gripped the valley, three Bing cherry trees on the Edward Anderson property on West Libby street, Clarkston, were noted to be blooming in scattered branches of the trees. One apricot tree is also blooming.

Saturday Mrs. W. A. Yochum, residing on Preston avenue in Lewiston, Orchard, captured a beautiful, yellow cream butterfly as lively as if spring time and summer were already here.

The Bollinger hotel yesterday was exhibiting a sprig of one of the Anderson cherry trees, 100 per cent buds and blossoms. There are 27 clusters of new growth visible, by actual count.

George Nelson reported yesterday that pussy-willows on his property at Eighth street and Vineland, Clarkston, were in bloom Sunday.—Lewiston Tribune.

No information is given out as to how the "banana buds" are faring down there.

Will Feed Elk

It has been decided by those in charge to keep and feed the carload of elk recently unloaded at Beavill for a few weeks. They have been placed in a corral, it being thought that the barn in which they had been housed since their arrival was too warm.

One cow, the first to be unloaded, which jumped the corral fence and was injured as soon as unloaded, died last Friday night from the injuries, received, leaving 29 of the original shipment of 30 animals.

Records Left Out

Owing to the fact that much of our advertising and local matter came in late it was impossible for us to get the county records in type without making the paper late—and this we refuse to have. They will appear next week and, we hope, each week thereafter.

The Gazette must go in the post-office Thursday evening, therefore it is necessary that all material be in the office as early as possible.

Honor Class Elects Officers

The Honor class of the Presbyterian Sunday school held a meeting in the Lohese class room of the church Tuesday evening of last week. The following officers were elected to serve for the next year: President, Kathryn Ramey; vice president, Jane Plummer; secretary, Roy Long; treasurer, Jessa Ramey.

Every Purchase a Delight!

There is a certain satisfaction when you make your purchases at home---an air of quality about each and every item that is gratifying to the man or woman who knows good values.

Many items in the marketing basket too, represents a saving that cannot fail to mean much to careful homemakers who like to see larger and more worthwhile returns for their fixed amount of expenditure.

CHURCHES

Kendrick Methodist Church
Rev. Claude W. Groth, Pastor
10:00 a. m. Sunday school.
11:00 a. m. Sermonette for children and morning worship.
Wednesday at 7:30 p. m. midweek prayer service.
Let's increase the attendance at these services. Your presence will do good to both the church and to you.
Remember the play given by the Ladies Aid on Saturday, February 1, at 8:00 p. m. sharp.

Kendrick Presbyterian Church
N. E. Franklin, Pastor
Sunday school every Sunday at 10 o'clock. Classes for all ages.
Preaching at 11. Everybody cordially invited.
Christian Endeavor at 6:30 p. m.
We wish to announce at this time that Mr. Pearson has kindly accepted the leadership of our young people, and we urge all of our young people to turn out and help to make our Christian Endeavor one to be proud of. We extend an invitation to the young folk of Kendrick who are not enrolled elsewhere.

Julietta Baptist Church
A. E. Jones, Pastor
Sunday school at 10 A. M.
Preaching Services at 11 A. M. every Sunday morning except the fourth Sunday of each month.
B. Y. P. U. at 6:30 P. M.
Prayer meeting 7 o'clock Thursday evening.

The Lutheran Church
Cameron, Emanuel
Otto G. Ehlen, pastor
Divine Services at 3 p. m. in German.
Sunday school at 2:30.
Saturday school at 9.

Julietta Zion
Otto G. Ehlen, Pastor
Divine Services at 10:30 a. m. in the English language.
Sunday school at 10.

LINDEN NEWS

Mrs. Sylvia Jenks arrived from Clarkston Wednesday for a visit at the home of Louie Alexander and family.
Aunt Carrie Allen visited at the Smith home Thursday afternoon.
Mrs. C. H. Fry and children spent Sunday evening with Mrs. Weyen.
Mrs. Carr spent the day Sunday with Annie Morrison.
Mrs. A. V. Craig and Miss Eva Smith called on Mr. and Mrs. Grayson and Mr. and Mrs. H. J. Starr Sunday afternoon.
Elsie Whybark was a Sunday guest of the Harris girls.
W. H. Weyen was a Moscow visitor Monday.
Ben Presnell held meetings Sunday morning and evening at the Community church. They were well attended. The young people hold meetings every Sunday evening and preaching will be held on the second and fourth Sundays of each month.

Death of Mrs. W. J. McConnell
Mrs. Wm. J. McConnell, aged 84 years, widow of former Governor McConnell, died at her home in Moscow Monday morning from a heart attack. In her passing Idaho loses another of the early pioneers.

Holsteins To Italy
As an example of what commerce and transportation mean today, recently seven head of Washington-grown purebred Holsteins valued at \$7,000, left Spokane for Rome, Italy. They will be traveling 60 days.

Dr. Simmons to Come
Dr. Charles Simmons, Eye-sight Specialist of Lewiston will be in Kendrick, Friday, February 7th. The doctor plans on making professional visits to Kendrick about every six weeks throughout the year. He has a permanent office over Schaffer's Store in Lewiston, where he or his associate are on duty six days a week.

SCHOOL NOTES

Commercial Students Organize Club
Continuing the G. T. S. Club, organized last year, the commercial students of the High school have reorganized into a Commercial club. All the students taking commercial subjects are eligible to be members, and to go on the contest trips, they must belong to the club.
The officers chosen are as follows: President, Eldwa' Jones; vice-president, Bessie Blevins; secretary-treasurer, Eleanor Herres; roll-call clerk, Marjory Davidson.

Semester Honor Roll
For the past eighteen weeks only six students have maintained an average grade of 90% to gain a place on the Honor roll. Two of the six are freshmen, two sophomores and two seniors. They are as follows: Freshmen: Mary Johnson and Jack Bailey; sophomores: Edna Bolon and Nona McAllister; seniors: Doris Emery and Daniel Lyons.

New Courses Offered This Semester
The new courses that are being offered in High school this semester are: Civics, commercial law and sociology.

The sociology class expects to study many interesting subjects. This week they are preparing for a debate to be given Friday, of which the topic is, "Resolved: That Immigration Should Be Restricted."
They will prepare two other debates in the future: "Resolved: That the Eighteenth Amendment Should Be Abolished," and "Resolved: That Capital Punishment Should Be Abolished." Other topics for study in addition to those included above are: Population, Child Labor, Labor Organizations, Poverty and Conservation of Natural Resources. This course promises not only to be very interesting but instructive as well.

Seniors Win Five Dollars
As an incentive for the pupils to pay their student body dues, Mr.

Jones offered five dollars to the class whose members first paid their dues. The Senior class were the lucky ones and their treasury is thus enriched by that sum.

Eighth Grade Exam Returns
Those that passed the mid-year exams are as follows: History, Kenneth Brocke, Oscar Onstott, Margaret Schulze, Effie Aiken; Grammar, Ralph Blevins; Spelling, Rowena Ramey; Arithmetic, Rowena Ramey.

Girls Play Tie Game at Lapwai
In an evenly-matched game against Lapwai, played on the latter's floor, the Kendrick Girls' team was unable to score the extra point needed to break the tie. At the end of the first half the score was 9-4 against them, but in the second half they "pepped up," keeping Lapwai down to only three points and making eight themselves. The lineup was as follows:

Lapwai—	—Kendrick
Whitman	F..... McDowell
B. Chapman	F..... Freitag
Taney	C..... Jones
Fleming	G..... Emery
Steele	G..... Blevins
Chapman	G..... Ware

Kendrick Boys Lose 33-20
The Kendrick boys suffered their second defeat against Lapwai Friday, January 24, on the latter's floor. Lapwai gained a lead at the beginning of the game that they never relinquished, the score at the half being 10-3 and at the end of the third quarter, 19-12. All the squad played a good game, but were unable to keep the Lapwai hoopsters from scoring, the game ending in a score of 33-20 in favor of Lapwai.

The line-up was as follows:
Kendrick—

Making English Muffins by Raising With Yeast

Haven't you often wished you knew how to make the delicious English muffins served by tearooms and restaurants? The secret of them is that they are raised with yeast, and if you are accustomed to making light bread and rolls, you will have no difficulty in making English muffins. They are baked on a griddle instead of an ordinary pan. They can be eaten hot when freshly baked or split and toasted after they are cold. Use plenty of butter with them. The method in this recipe is given by the bureau of home economics.

- 1 cup scalded milk, yeast cooled.
- 4 cups flour
- 1/2 cup lukewarm water
- 1 1/2 teaspoon salt
- 2 tbs. butter
- 1 cake compressed melted.

Soften the yeast in the lukewarm water. Make a sponge of the milk, yeast liquid, butter and 1 1/2 cups of the flour. Mix well. Cover, and put in a warm place to rise. When this sponge is very light, add the remaining flour which has been sifted with the salt. Beat this soft dough to develop the gluten in the flour. Again cover, put in a warm place to rise. When double in bulk toss the dough out into a sheet about one inch thick, cut in large rounds, and let them rise for about one hour. Bake slowly on both sides on a lightly greased griddle. After they are cold, split, toast, and butter the muffins and serve hot; or if preferred split and butter them when freshly baked and serve at once.

Chocolate Custard Most Delicious as Dessert

Soft custard flavored with chocolate is a more delicious and richer dessert than the chocolate cornstarch pudding which is the only kind of chocolate pudding many people know. It is not necessary to serve cream of any sort with this custard, but a little whipped cream on top is undoubtedly good. The directions below are from the bureau of home economics.

- 1 quart milk
- 1/2 tsp. salt
- 3/4 cup sugar
- 4 eggs
- 2 squares unswartened chocolate
- 1 tsp. vanilla

Heat the milk, sugar, chocolate and salt in a double boiler. Beat the eggs slightly and pour some of the hot mixture into the eggs. Mix well and add to the remaining milk. Cook, stirring constantly until thickened. When cool, stir in the vanilla and chill thoroughly. If left overnight the custard becomes thicker. Serve plain or with a little whipped cream over the top.

Today? Yesterday? Tomorrow?

Letter received at the office of the Railway Mail service at Boston: "Dear Sirs: The Evening Bulletin has not been coming regularly. Today I got yesterday's paper and when I get yesterday's paper today the next day I get the paper of the day before the day of the paper I got the day before. Last year I received the paper of the day before, and never once, was there a misc. Please fix it."

POULTRY FACTS

SOY BEANS USEFUL IN LAYING RATION

Vegetable Protein Concentrates Used in Test.

Recent experiments with the use of vegetable protein concentrates have shown that a complete or at least a partial substitution may be made. The work has been largely with cottonseed and soy bean meal with little if any work on ground soy beans. The success of these vegetable protein concentrates depends upon two factors. First a larger amount is necessary in the mash because they do not run as high in protein as do meat scrap and tannage. Second, since they are low in mineral, additional mineral must be added to make up for this deficiency. The Missouri agricultural experiment station has fed the following mash to laying hens:

- Bran 22 lbs.
- Shorts 22 lbs.
- Corn meal 22 lbs.
- Cottonseed or soy bean meal 30 lbs.
- Bone meal 4 lbs.
- Salt 1 lb.

The above mash constituted about one-third of the ration. It was kept before the hens all the time and in addition a moist, crumbly mash was fed once daily. No meat or milk was employed in the diet. The balance of the ration consisted of corn and oats and regular methods of feeding hens were employed. Oyster shells or limestone rock was before the hens all the time.

Such a ration produced as many eggs per hen as did similar rations in which the mash contained 20 per cent meat scrap or tannage. Instead of the cottonseed or soy bean meal. The results were not satisfactory unless the bone meal and salt was added. A year's test with ground soy beans failed to produce quite as many eggs as did cottonseed meal. This may be due to the fact that the ground beans were higher in fat and as a result the ration was not properly balanced. A partial substitution may be made and the following mash is recommended:

- Bran 24 lbs.
- Shorts 24 lbs.
- Cornmeal 24 lbs.
- Ground soy beans 15 lbs.
- Tannage 10 lbs.
- Bone meal 2 lbs.
- Salt 1 lb.

This should be kept in open troughs before the hens all the time and fed the same as any regular laying mash. It may be that a larger percentage of the beans may be used but it is advisable to await further investigation before following this practice.

Direct Sunlight for Layers Is Essential

A simple, inexpensive and effective way to secure direct sunlight for the layers is to fill in about ten square feet of space at the south side of the house with an eight-inch layer of cinders. The space may well be enclosed to keep the fowls from contaminated soil. In exposed locations it may be necessary to provide a wind break of some kind. Chickens dislike wind and will stay inside to avoid it.

Cinders are especially effective. Because of their dark color they absorb heat from the sun, causing any snow or ice to melt with the first appearance of sunshine. This permits the birds to get out on the warm, dry cinders and bask in the direct sunshine even though the ground is still wet and cold.

Feeding New Corn

Where there is a shortage of corn that is dry enough to grind, a mash that will serve quite well for a short period of feeding can be made up of the following ingredients: 100 pounds of ground oats, 10 pounds of tannage or meat scraps and one pound of salt. If barley is available, 50 pounds barley and 50 pounds of oats are better than using oats alone. This mash should not be fed as a permanent laying ration, however, but just as an emergency ration.

Pullets Begin Laying

As a rule, pullets lay more eggs during their first laying season than during any subsequent season. Consequently, if hatches are correctly timed so that plenty of pullets will be brought to maturity some time during the latter part of September, a banner winter egg season is bound to follow. Pullets hatched during February or March, according to breed, should begin laying just about the right time for winter eggs when prices are highest.

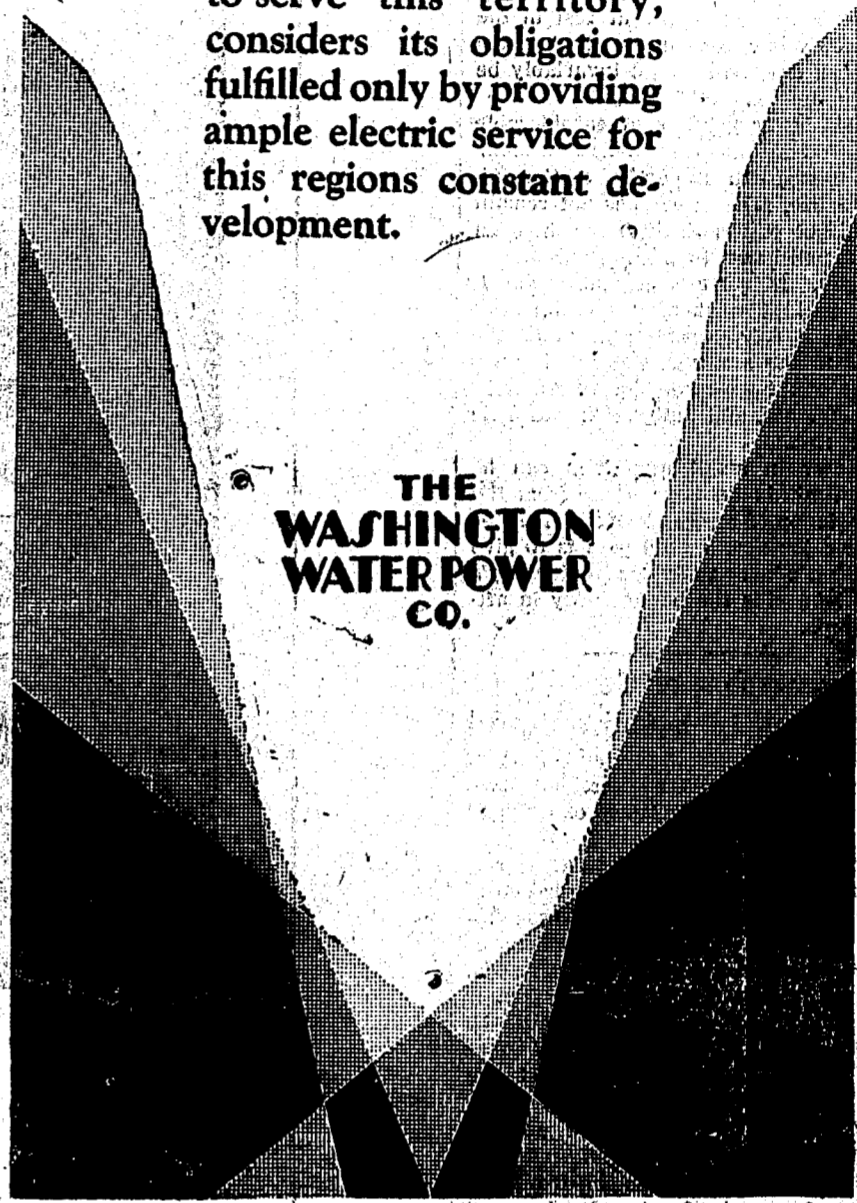

Gapeworms Kill

A poultryman in Washington, D. C. lost 75 per cent of several hundred chicks from gapeworms. Investigation showed that this loss resulted from the use of one of the poultryman's fields, for about 24 hours, as a resting place for a flock of turkeys being driven overland. The chickens became infested by gapeworms left by the turkey flock. In addition to producing the noticeable symptoms of gaping, by obstructing the windpipe the chicks did not thrive.

ABUNDANCE

Abundance of electric service is an important resource of the Inland Empire.

This company, privileged to serve this territory, considers its obligations fulfilled only by providing ample electric service for this regions constant development.

THE WASHINGTON WATER POWER CO.

Increased Profits From Smut Control

Disease Reduces Crop Yield and Market Prices.

Thousands of farmers know that wheat smut reduces yields and sometimes the selling price of wheat, and have learned through their county agents how to control this disease by treating the seed before planting. The copper carbonate dusting method is now generally used for killing stinking smut in wheat because it is the simplest, cheapest, and the most effective method known.

The seed should be placed in a tight container, such as a barrel, churn, or box, provided with a tight-fitting opening, and arranged so that it can be revolved on an axis. Two or three ounces of copper carbonate per bushel is sprinkled on the wheat and the container then revolved so that every seed gets coated. It is best to wear a mask of cloth over the mouth and nose to prevent irritation or nausea.

Stinking smut changes the grain into masses or spores called smut balls. Since the chaff is not destroyed the disease is not easily observed, except for the odor. E. A. Miller, agronomist in the Texas agricultural mechanical college extension service, warns farmers that seed from fields that were entirely free from smut last season may develop the disease next year unless the seed are treated. The reason for this lies in the fact that the smut spores are given wide distribution through threshing machines.

The copper carbonate treatment is recommended only for stinking smut of wheat and kernel smut of grain sorghums and sweet sorghums. For oat and barley smut the formaldehyde treatment should be used.

Rabbit Is Troublesome When Not Restrained

In regions where the common rabbit is unusually abundant garden and truck crops may suffer quite severely. Melons, beans, cabbage, and similar crops are usually more attractive to the young rabbits than grass or clover. Where it is not possible to protect the crop with a wire fence, some relief may be had by carefully utilizing bits of poisoned vegetable, apple, or small quantities of poisoned grain. On a small area, however, by watching just at dusk and shooting the young rabbits is perhaps a quicker and more satisfactory and safer method. Besides the young rabbits make very good eating. By spending a little time each evening after the day's work is over one can usually kill or drive away rabbits from the garden or from exposed track patches.

My Favorite Stories

by Irvin S. Cobb

A Little Story for Husbands to Read

JONES, who had been married a considerable number of years, took counsel with one of his bachelor friends.

"It seems to me," he said, "that my domestic affairs are slipping into a rut. I'm afraid my wife is getting bored. There don't seem to be any of the romance left that we had in our early married life. I wish I knew what is the matter."

"I can make a guess," said his confidant. "Do you still pay your wife those little attentions that you used to pay her when you were courting her?"

"Well," confessed Jones, "I can't say that I do."

"I thought as much," said the wise counselor. "The trouble with you is that you're like that other married man who said under similar conditions that when you'd run to catch a car you didn't need to run any more after you have caught it. Now, this is my advice to you: Turn over a new leaf. Start this very day. Begin paying your wife a little attention. Pass over her just as you used to do when you were first engaged. Try to be a sweetheart to her instead of just a husband."

"By gum, maybe you're right," said Jones. "I'll do that very thing."

That evening, when he burst in the front door, his arms laden with parcels, he planted a warm kiss upon the cheek of the astonished Mrs. Jones and in tones of a well-worked-up enthusiasm he cried out:

"Dearie, this is going to be a big night for us! Here's a ten-pound box of candy for you and here's a dozen American Beauty roses. Now I want you to slip into your best frock. I've got a table reserved at the Ritz-Carlton for dinner and I've ordered two seats for the opera. Why—what's the matter?" he added, seeing that her lips trembled.

"Well, to begin with," she said, "the cook quit today. Your Aunt Clara arrived unexpectedly for a visit and there's no telling how long she'll stay, both the children were sent from school, sick with bad colds, and now—" she burst into tears—"and now to cap the climax, you come home drunk!"

Boost — don't knock.

JOB PRINTING

That Pleases

We have just received and laid a complete new series of beautiful new job type and are now prepared to turn out as fine job work as money can buy. Remember: Good Printing Sells more merchandise for you, and that your envelopes and letterheads as well as other printing is an index to your firm or personality.

Booklets, folders, programs, letterheads, envelopes, statements, remittance sheets, invoice blanks, wedding announcements, birth announcements, posters, broadsides, dodgers, in fact anything, and everything in the printing line. Then too, don't forget that absolute satisfaction is guaranteed. Once you try us we are sure that you will come back for repeat orders.

Don't be afraid to say, "Rush that job, I'm clear out," for we'll get it out for you!

Kendrick Gazette

Water Is Essential for Working Horses

Should Be as Pure as Possible and Free From Odors.

Horses require from five to fifteen gallons of water a day, the quantity depending on the temperature and the amount of work performed. The water should be as pure as possible, clear in appearance, and free from taste, color, or smell. Pure water is just as essential to a horse as it is to a man, and it is a mistake to suppose that a horse can drink badly contaminated water with impunity.

Water obtained from pools or shallow wells contaminated with surface drainage, or containing decomposing organic matter, frequently causes diarrhea, and generally predisposes to colic. Water that contains a large amount of sediment causes a mechanical irritation of the membrane of the stomach and intestines, i. e., sand colic.

When the horses are at rest in the stable, water should be given three times a day, and should invariably be given previous to feeding.

This latter point is of considerable practical importance. A horse's stomach is small in proportion to the animal's size, and water does not remain in it, but passes through the stomach and small bowel to the caecum, or water gut. If water is given after feeding, besides weakening the digestive juices, a considerable portion of the food in the stomach and small intestines will be washed out in an undigested state, and indigestion and colic may result.

Water in small quantities can be given within an hour or so from the completion of feeding if desired. After a long journey, a good plan is to give water a mile or so before the journey's end, and take the horse slowly in afterwards.

Whitewashes of Cement and Lime Quite Useful

The following lime and cement whitewash recipes are recommended by the Illinois agricultural experiment station.

"A whitewash formula that is recommended as being very satisfactory for new surfaces is as follows: 2½ gallons of finishing lime, 2 gallons of white cement, 2½ pounds of sal soda, 2 pounds of table salt and 3 pounds of powdered alum. These should be mixed dry and then enough cold water added to make five gallons of the wash.

"For old surfaces a good mixture can be made from 2½ gallons of finishing lime, 2½ gallons of white cement, 1 pound of sal soda, 1 pound of table salt and 3 pounds of powdered alum. As in the case of the other formula, these ingredients should be mixed dry and then enough water added to make five gallons of the wash. This wash should be applied in the usual way after the loose particles and scales have been cleaned off.

The caution that should be kept in mind in whitewashing is to be sure that the surface on which the wash is applied is entirely clean before the application is made."

Dairy Herd Improvement Reflected in Milk Pail

Wisconsin leads all other states in the number of dairy herd improvement associations. It has 154 out of a total of nearly 1,100 in all the states, according to reports compiled by the bureau of dairy industry of the United States Department of Agriculture.

These associations give dairymen information as to the profitableness of their cows. On the basis of such information, association members have been weeding out the less desirable animals and retaining heifers from the more productive cows. The value of this practice is reflected in the steady increase in the average production of the cows under test in these associations. In 1920 the average production per cow in these herds was 247 pounds of butterfat. In 1924 this had increased to an average of 279 pounds. According to the bureau's records the production figures for the years from 1925 to 1928 were 284 pounds, 283 pounds, 293 pounds, and 295 pounds.

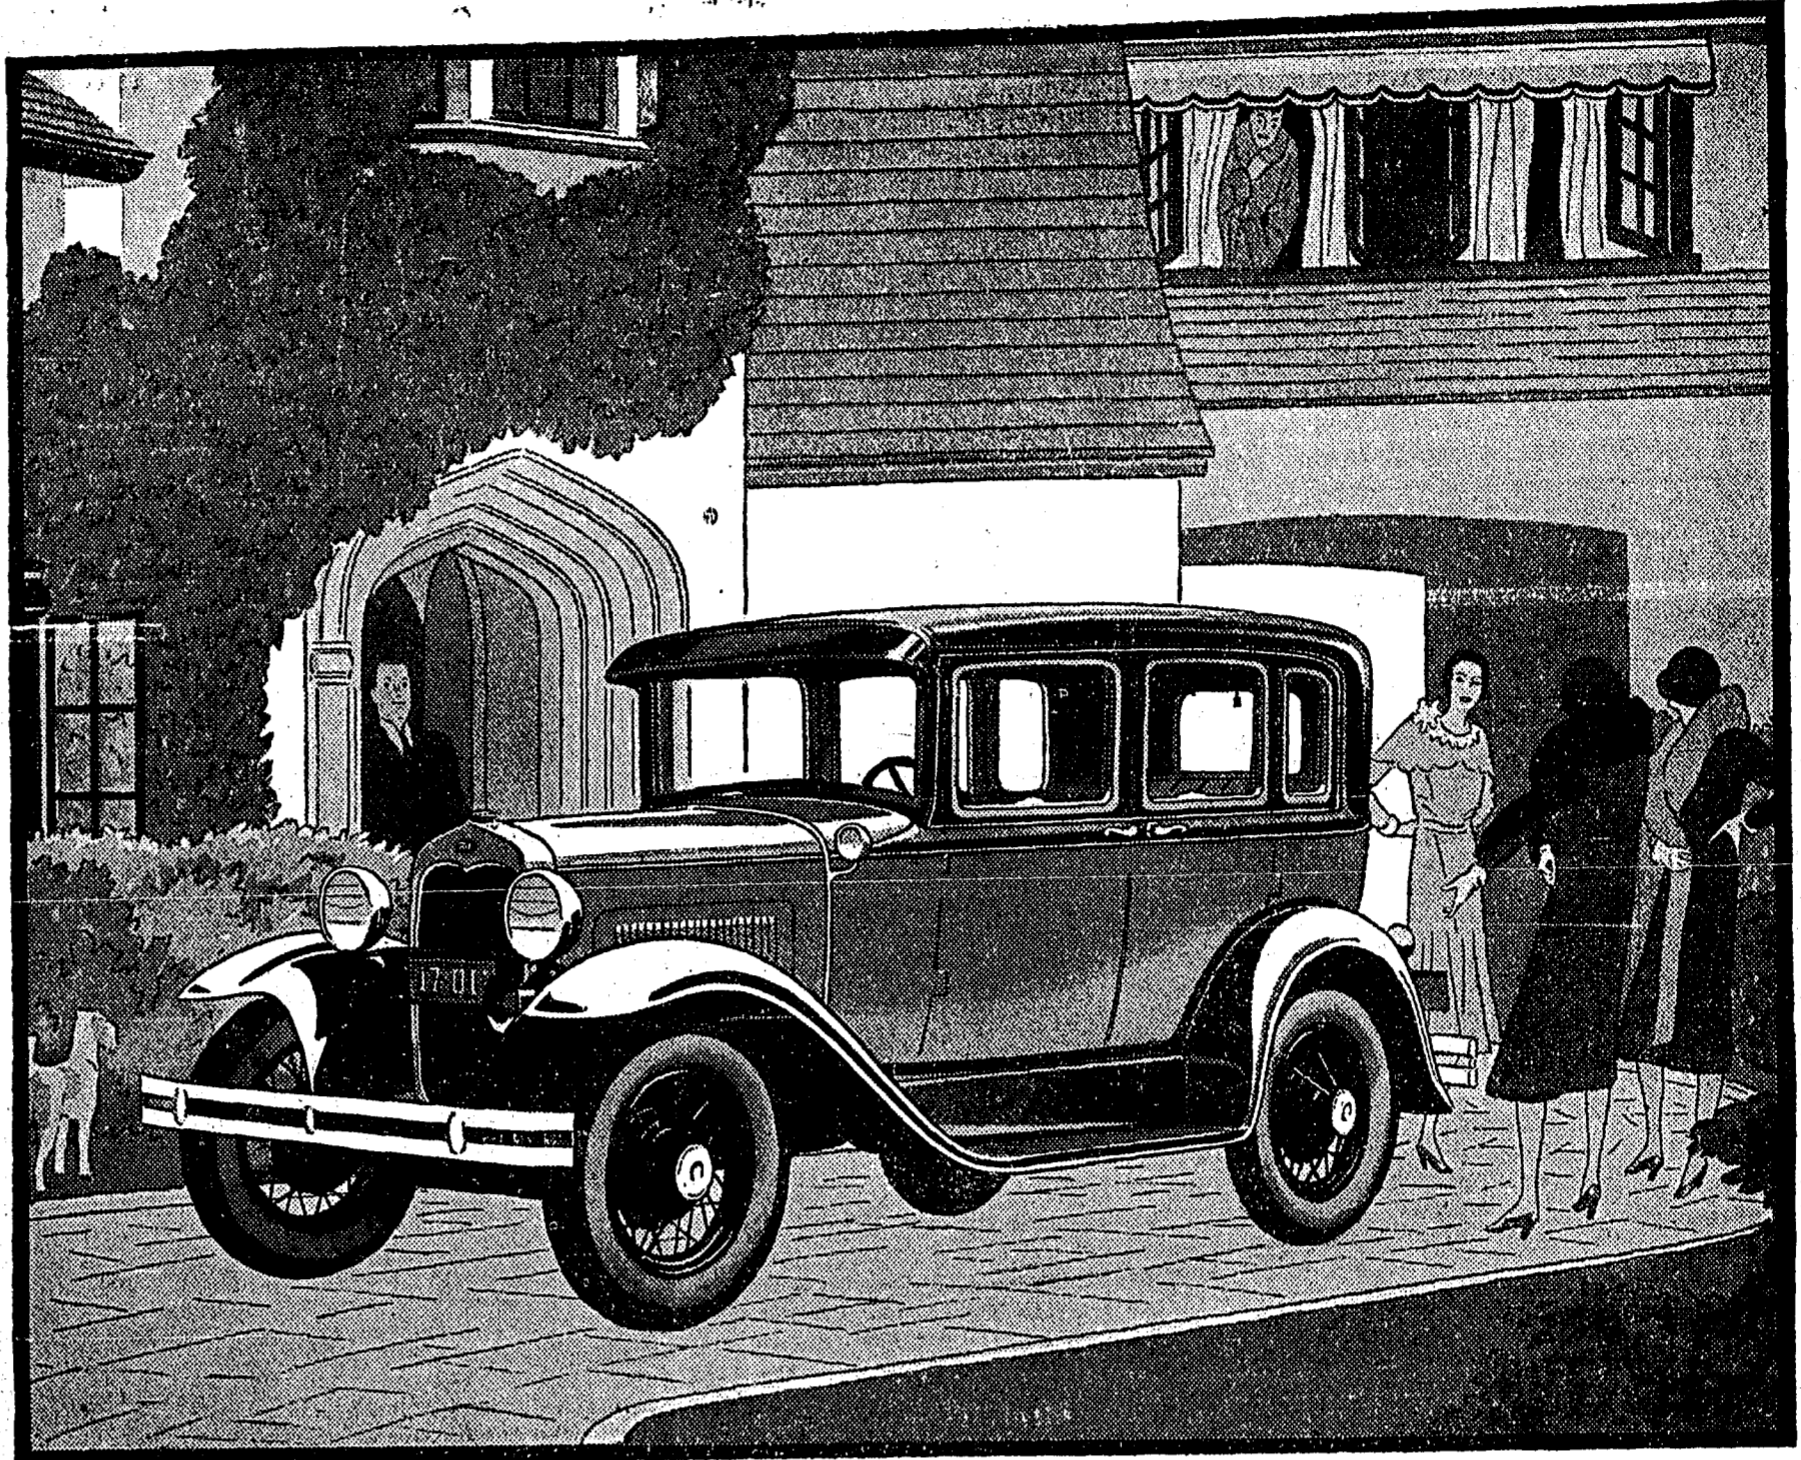

Present Production Can Be Doubled by Feeding

A careful study of the tens of thousands of herd averages and of the hundreds of thousands of yearly individual cow records, has shown that present production can be doubled by keeping better cows and by feeding them 50 per cent more feed. Through soil improvement, through use of better seed, and through the more general production of corn silage and alfalfa hay as feed for our dairy cows we may, when the need arises, be able to double the production of milk and butterfat with the same number of cows. To accomplish this, these cows must be bred and selected for high production.

Prune in Winter

Tree fruit plants and hardy grapevines may be pruned any time during the winter, December 1 to March 1, says R. J. Barnett of the Kansas State Agricultural college. The particular date within these boundaries is not important except that the work may be more accurately and comfortably done during periods of moderate temperatures. Circular No. 102 contains concise directions for the work.

New Beauty for the New Ford

THE NEW FORD TOWN SEDAN

In the Town Sedan you see a distinguished example of the unbroken sweep of line which adds so much charm to all the new, roomy Ford bodies. Radiator, hood, cowl, lower roof line, fenders, wheels — every point of design reflects the new style and beauty that have been placed within the means of every one. All of the new Ford cars are finished in a variety of colors.

ANOTHER STEP FORWARD

The introduction of the new Ford bodies has set a high standard of motor car value.

From the new deep radiator to the tip of the curving rear fender, there is an unbroken sweep of line—a flowing grace of contour gaining added charm from the rich and attractive colors.

You will take a real pride in the smart style and fresh new beauty of the Ford just as you will find an ever-growing satisfaction in its safety, comfort, speed, acceleration, ease of control, reliability and economy. In appearance, as in mechanical construction, craftsmanship has been put into mass production.

New beauty has been added to outstanding performance.

A feature of unusual interest is the use of Rustless Steel for the radiator shell, head lamps, cowl finish strip, hub caps, tail lamp and other exposed metal parts. This steel will not rust, corrode or tarnish and will retain its bright brilliance for the life of the car. Here, as in so many other important details, you see evidence of the enduring quality that has been built into the new Ford.

- Roadster, \$435
 - Phaeton, \$440
 - Coupe, \$500
 - Tudor Sedan, \$500
 - Sport Coupe, \$530
- Two-window Fordor Sedan, \$600 Three-window Fordor Sedan, \$625 Convertible Cabriolet, \$645 Town Sedan, \$670
- (All prices f. o. b. Detroit, plus freight and delivery. Bumpers and spare tire extra.)

Government Pay Dividends

Brigadier General Frank T. Hines, director of the United States veterans bureau, announces the apportionment of \$7,300,000 for payment of dividends in United States Government life insurance policies during the year 1930. This is an increase of \$1,050,000 over the allotment for the year 1929.

Premium on Government insurance are the net rates, according to the American experience table of mortality and interest at three and one-half per centum per annum, and include protection against total and permanent disability without limit as to the age before which disability must occur, for which there is no additional premium charge. Considering the benefits granted, this premium rate affords protection at a low cost which is still further reduced by the dividends allotted, and

should be gratifying to the holders of Government life insurance.

95 Elk Reported

A recent compilation of the kill of big game during the past open season, made by the forest service and game department for Clearwater county alone, shows that 95 Elk were killed and 70 deer. Most of the latter were blacktailed deer killed during elk hunts. The number of elk reported probably comes much nearer being the total kill than does the number of deer. It is certain that many white tail deer were not reported. Of the 95 Elk 46 were bulls and 49 cows; of the deer 37 were bucks and 33 doe.

Reports from game wardens, forest service officials and hunters all indicate that the big game is increasing rather rapidly and the increased kill of Elk, larger than for-

mer years, is not at all out of proportion with this increase and no alarm need be felt, according to officials, but it would be better if the officials had a complete report on all kills, as these are used only for statistical purposes and by the legislature for basing the law every two years.

It is probable that the two game preserves, one on the Clearwater forest and one on the Selway are largely responsible for the increase in the big game, for there they are undisturbed during all seasons of the year and are large enough so that there need be no fear that the animals will become extinct. Mr. Warrath added.—Orofino Tribune.

What Is "Reasonable" Gas Tax

Invention of a new tax is always a dangerous thing, however necessary it may be at times. Only a short

ten years ago the state of Oregon led off with a tax of a cent a gallon on gasoline. Today every state in the Union and the District of Columbia has such a tax and in 30 states the rate is four cents or higher. It was not until 1925 that all state revenues from this source exceeded \$100,000,000, but in 1927 they were about \$250,000,000. Last year they were \$305,000,000 and oil authorities estimate the total for 1929 at \$450,000,000. The average gas tax per motor vehicle has considerably more than doubled since 1925.

Taxation of gasoline was originally justified and has since been easily extended and increased because of the sound argument that users of the public highways should pay for them in proportion to use. These tax proceeds, however, are not everywhere confined to construction and maintenance of roads and it is doubtful if such a principle can be maintained

against the temptation political officers are always under to raise the revenue in the easiest possible way. But it affords some measure of reasonableness to consider that under the minimum rate of two cents gasoline is now subject to a sales tax of something like 10 per cent of retail value and that in many states the tax is 20 to 30 per cent of value.

Declining prices for gasoline no doubt explain the public acquiescence so far in so startlingly rapid an increase in the taxation laid upon its use. A reversal of market conditions or even a period of stability, especially is coupled with a tighter grasp of the tax collector, would tell another story.—Wall Street Journal.

On account of sickness, the high school play, "The Little Clodhopper," had to be postponed until a later date. Watch for the announcement of the new date.

Denzil Kuykendall and family were Sunday guests of Fred Arnolds.

E. Schmidt and family visited with Herman Meyers Sunday.

Woodrow Fleschman, Maxine Fleschman and Wilhelmina and Corene Goudzard were Sunday dinner guests at the A. G. Peters home.

Mr. and Mrs. Turnbaugh were Lewiston visitors over the week-end.

Elma Moten left for Pomeroy, Wash., on last Thursday.

Jesse Thornton and family were Sunday dinner guests of Mrs. Minnie Blankenship.

James Helton and wife, Virgil Fleschman and family and T. J. Fleschman were Sunday visitors of Mr. and Mrs. O. A. Walker.

Mrs. Angus Fry and children visited her sister at Southwick over the week-end.

Mrs. Wm. Wolf was a passenger to Lewiston last Tuesday to consult a doctor about their little daughter.

Those giving parties the last week were Florence Walbeck, Saturday afternoon; Ivan Craig, Saturday night; Lovick Walbeck, Monday evening; Fred Zimmerman, Monday night, and Wilhelmina Goudzard on Tuesday evening.

Mr. and Mrs. James Helton and T. J. Fleschman were callers at the B. F. Fleschman home Saturday night. T. J. Fleschman staying over night with them.

Mildred Craig visited with Mrs. Charles Hoffman last week.

Alice and Maud Hunt are visiting with their sister, Mrs. Fred Zimmerman.

Mr. and Mrs. Chas. Huffman and family were Sunday guests of Mrs. Hoffman's mother, Mrs. Eliza Thornton.

Mrs. E. Harrison and Mrs. Wm. Clem left Monday to visit with friends at Stites.

The ladies met with Mrs. A. G. Peters for work on Thursday.

Announcement—The ladies of the Missionary society will serve oyster and noodle soup, chili, pie and ice cream, at the I. O. O. F. hall, Saturday evening, February 1, commencing at 5 o'clock.

Mr. and Mrs. Clyde McGee were called to Clarkston Monday on account of the death of Mr. McGee's father, W. A. McGee. Mr. and Mrs. Ralph Smith are looking after their chores while they are away.

Mr. and Mrs. Jesse Hoffman were Lewiston visitors on Wednesday.

A Correction

In writing up the golden wedding anniversary of Mr. and Mrs. A. H. Smith last week, the Gazette made it say that the entire wedding suit of Mr. Smith had cost \$5.00, when it should have read \$50.00 for having it made. The error was entirely on the Gazette man and not our informant.

We are always glad to correct errors, whenever possible to do so and we take this opportunity of making the above correction.

Roost — don't knock.

SOUTHWICK ITEMS

Wm. McIntire returned to his home in Montana after spending the past month with his aunt, Mrs. Yeagler.

Mr. and Mrs. J. E. Hoppe visited at the John Stalnaker home Thursday.

Helen and Jene Winegardner entertained fourteen of their friends at a party Saturday night. Games were played and refreshments served and all had a jolly time.

Gordon Harris and Wm. Lawrence visited friends at Dent from Friday till Sunday.

Mr. and Mrs. Homer Betts spent the day Thursday at the Wm. Kande home.

Lois Dygert was a guest of Verla Thornton Sunday.

Mr. and Mrs. Wilmer Hanks, Eva McCoy and Russell Baker were supper guests at the George Jones home Friday evening.

Mr. and Mrs. Virgil Harris entertained at a pinochle party Saturday evening. Those present were Jane and George Ziemann, Emma Lou and Alice Wegner, Irene and Walter Meyer, George, Roy and Carlton Douglas, Edna May, Mable Murry, Mr. and Mrs. Cox, Charlie, Bill, Cecil and Earl Harris. Refreshments were served by the hostess and all had a very pleasant time.

Mrs. Elton McCoy returned home Saturday evening from Leland, where she has been staying with Mrs. Harry Smith.

Mrs. Joe Kadda returned to her home Monday, after being in the St. Joseph hospital, Lewiston, nine days. We are glad to report that she is so much better. Mrs. Math Kazda, who went to Lewiston Friday, returned home with her.

Mr. and Mrs. Roy Southwick spent the day Wednesday at the Walter Terry home in Cavendish.

Hank Bleck entertained the following families at his home at a combination pinochle and dancing party Friday evening: Russell Rodger, Dave Schoeffler, Nels Longeteig, Earl Whitinger, Virgil Harris, August Meyer, Ed Gertje. Also Mrs. Cox and Charlie Harris.

Mr. and Mrs. J. E. Hoppe were Sunday guests of Mrs. Eva Wright.

Mr. and Mrs. Elton McCoy and Ben Baker visited with the Ben McCoy family Sunday.

Gordon Harris and Mr. Schessler went in to Elk creek Monday to see Julius Steiner, who has been ill for some time.

The Tom Armitage family visited at the Charlie Hayward home Sunday.

Mrs. Angus Fry and two children were week-end guests of Mrs. Howard Southwick.

Mr. and Mrs. Homer Betts visited Friday at the Ben McCoy home.

Fred Hassinger from Gifford was a visitor at the Wm. Bereman home from Wednesday till Friday.

Josephine Stump was an over-night guest of Jene Winegardner Monday night.

Mrs. Walter Terry of Cavendish was an over-night guest of Mrs. Howard Southwick Thursday. She left Friday for Spokane to visit her daughter.

Twenty-two friends and relatives gathered at the Homer Betts home Sunday to help him celebrate his birthday anniversary. Mrs. C. A. Betts contributed a big roast goose and a large decorated cake to the dinner, prepared by Mrs. H. Betts. Those present were Mr. and Mrs. Wm. Bereman, Mr. and Mrs. Wm. Kauder, Mrs. Yeager, R. Winegardner, John Lettenmaier and family, Dick Winegardner and family and C. A. Betts and family.

Mr. and Mrs. Elmer McCoy from Linden spent Saturday night and Sunday at the Jap Triplett home. Mrs. Chester McIver and children spent Sunday there also.

The pupils in Mr. Cook's room gave a party in honor of his birthday Monday night. It was held in the gym, where games were played and refreshments served.

Wm. Cowger had the misfortune of hurting his leg while decking logs Monday. Dr. Field was called and he decided there were no broken bones, but the ligaments were torn and the flesh bruised, which makes it very painful.

Mr. and Mrs. Wilmer Hanks were over-night guests of Mr. and Mrs. Elton McCoy Monday night.

John Dammarell at Weiser

A short note from John H. Dammarell asking us to change his address on the Gazette from Baker, Oregon, to Weiser, Idaho, says "I was transferred from Baker on the first of the year to manage the Weiser store of Trotter's, Inc."

The many Kendrick friends of Mr. Dammarell will be glad to learn of his promotion and wish he and his family prosperity and contentment in their new home.

Farmers Bank Audit

H. M. Emerson, assistant cashier of the First National Bank of Lewiston, was in Kendrick Tuesday auditing the books of the Farmers Bank, and attending the meeting of the Board of Directors.

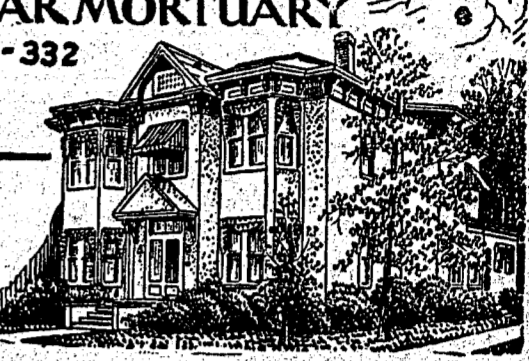

SERVICE MEASURED NOT BY GOLD BUT BY THE GOLDEN RULE

Ambulance Service The Golden Rule Ideal extends to our ambulance service. Our attendants care for the ill or injured just as carefully and tenderly as though they were attending their own nearest and dearest.

JULIAETTA NEWS

Mrs. George Miller and children have returned to their home in Moscow, after spending several weeks at the home of Mrs. Miller's parents, Mr. and Mrs. T. O. Greene.

Two new parlor furnaces have been installed in the primary and intermediate rooms at school.

Miss Wilma Vincent is ill with the mumps.

Clarence Perryman of Kendrick spent a few days with his grandmother, Mrs. M. A. Perryman.

The Needle Club was entertained by Mrs. Cecil Gruell last Wednesday. The afternoon was spent in needlework and visiting, followed by a six o'clock dinner. The members present were Mesdames Arnold Behrens, Walter Cochran, Claud Clark, Creighton Biddison, Will Noble, Leland Houck, E. V. Adams, M. Nutt, Mary Jones, Amanda Alexander, Mrs. Everett Custer and Mrs. S. Gruell were the invited guests. Mrs. Claud Clark will entertain the club next.

Charles Noble of Moscow has been spending a few days visiting Mr. and Mrs. Will Noble.

An infant son arrived at the home of Mr. and Mrs. Arthur Johns on Wednesday, the twenty-second.

Mrs. Ed. Grant received some painful burns one evening last week, when their service station caught on fire, due to an overheated stove.

Mr. and Mrs. Claud Clark entertained the Pinochle club Friday evening at the home of Mr. and Mrs. Walter Cochran. Following a delightful evening of cards a dainty luncheon was served. High scores were won by Mrs. Cecil Gruell and Creighton Biddison. Those present were Mr. and Mrs. Horace Gunther, Mr. and Mrs. Cecil Gruell, Mr. and Mrs. Creighton Biddison, Mr. and Mrs. W. Cochran, Mrs. M. Nutt, Gladys, Alice and Fay Cochran.

Harold Gruell drove from Astotin Sunday and spent the day visiting relatives.

Mrs. Celia Garrison came over from Orofino last Wednesday and spent a couple of days visiting at

the Ed. Taylor home. A son was born to Mr. and Mrs. Cass Clark of Fix Ridge on January 27.

Buster Houck has been quite ill with an attack of the flu.

Returns of the state examinations in physiology showed that each of the seventh graders passed with a grade over 85.

Herb Millard received a carload of coal in plenty of time to avoid a "fuel famine," as reported in the Spokesman-Review. He was also able to supply coal to outside points, who were out. More is due to arrive soon.

Mrs. S. A. Hammond has been suffering severely with heart trouble.

AMERICAN RIDGE NEWS

Mr. and Mrs. Carrol Cox were Sunday dinner guests at the Frank Benscotter home.

Geo. Davidson, Carrol Cox and Clarence Daugherty have been putting up ice this week.

J. L. Woody was in Moscow Saturday finishing a session of the county commissioners.

Mr. and Mrs. Warney May were dinner guests at the Geo. Davidson home Sunday.

The Old Corbin Home Minstrel show will be presented by the American Ridge school and the people of the community Saturday night, February 8 at eight o'clock. The show is presented in three acts, the first a plantation scene, the second a negro camp-meeting, the third the old Corbin orchestra, see the picanninies and incidentally help the school secure a piano. A small charge will be made.

Walter Q. Taylor, assessor, was on the Ridge Sunday.

Ira Havens was a Moscow visitor Saturday looking after the interests of the Kendrick highway district.

Pa Kent rules his house with an iron hand, but fiery Peg tries hard to have the last word.

THE STATE WE LIVE IN
By Byron Defenbaugh
IDAHO'S FIRST IMMIGRANTS

While the origin of the Idaho Indian is the subject of as much speculative theorizing as that of the earth itself, there are some points upon which nearly all students agree. It is quite certain that he was an immigrant. Whether he was originally created or evolved, his beginnings were not in what is now Idaho. He came to our country from some other place, full grown. He had not been here long, comparatively speaking. Ruins, remains, relics of ancient humanity are found in various parts of the world. In Mexico, Central and South America, the eastern continents, but not in Idaho. Near Arrow, on the Clearwater, highway builders dug bones of huge extinct animals out of age-old sediments, but found no evidence of pre-historic man. The third point on which most students agree is that the Indians of Idaho were inferior in character and intelligence to their ancestors. They were a degenerating people. The plane of their lives was a descending one; their progress tended

downward. A race rises by conquering its environment; our Indians were surrendering to Nature. The white man makes a way; the Indian followed the way provided. Not that a civilized race is entirely independent of its environment; not that that we are a great people is due in a certain degree to the fact that we live in a great country. The white man is influenced by the savage submits to, his surroundings. This submission to environment was shown in an interesting way by the differences among the various tribes. The Nez, Perces occupied a well watered country, with timber for homes and fires, comparative abundance of fish and game, a fertile soil. They were the highest in the scale of Idaho Indians, and are still among the most advanced of western tribes. The Snakes inhabited the deserts of southern Idaho, living in constant hunger, nakedness and fear, and were degenerate and depraved. Ethnologists divide the American Indians into forty-five families, the distinction being mostly on the lines of language. Of these, only four were represented in Idaho. Beginning at the north the ywere the Kitunahan, Salishan, Shaphtan and Shoshonean. These were divided into a number of tribes, and these again into bands.

To illustrate; Chief Tendoy was a member of the Lemhi band of the Snake tribe of the Shoshonean family. While Idaho Indians differed in language and plane of life, the best of them had fallen back to the early stone age. They had some primitive picture writing, but no alphabet. They used the lever and the inclined plane, but knew nothing of the wheel or the screw. Their architecture was as primitive as that of the squirrel or crow; many of them burrowed in the ground. They knew nothing of the use of metals; the bow and arrow was their most highly developed mechanism; they could tie only one form of knot; if they had ever known of the use of a barbed fish hook they had forgotten it. Their history was a mass of absurd traditions, and their religion a mess of dim and dark superstitions. Auditor Here Mr. Kemper of Lewiston, auditor for the Vollmer-Clearwater company, was in town Monday making the annual audit of the company's books. Presbyterian Aid Will Meet The ladies aid of the Presbyterian church will meet at the home of Mrs. R. H. Ramey Friday, January 31.

Sleighting Party Mr. and Mrs. W. J. Carroll were sponsors for a sleighting party Sunday evening when they invited a few friends to enjoy the evening with them. The party was made up of Mr. and Mrs. Arnold Behrens and son, Dickey, of Juliaetta; Mr. and Mrs. Wm. Jones, Mr. and Mrs. W. L. McCreary, Dr. G. W. McKeever and little daughter, Paula, and Mr. and Mrs. Carroll and little daughter, Lida Jane. **Is Getting Along Nicely** Wayne, the eight-year-old son of Mr. and Mrs. P. A. Lind of Longview, Wash., and granddaughter of Mr. and Mrs. M. O. Raby, who recently underwent an operation for the removal of his tonsils and adenoids, is reported by his parents as getting along nicely at this time. **Will Give Dance** Kendrick Circle 456, Neighbors of Woodcraft, will give a dance Wednesday night, February 12, in Fraternal Temple. Music will be furnished by Dr. Parr's orchestra from Troy. Tickets, \$1.00; spectators, 25c. Dance starts at 8 o'clock. 4-1 **Well, if Sylvia and Frank had only kept the Golden Rule this mystery would never have been known.** 4-1

Another Addition to the Already Large Cletrac Family—The New 60-80. Now 12-20-20 - 30 - 40 - 60-80 - 100

W. F. Behrens, Cletrac Dealer, Writes:

DEAR FRIEND:

You may have in mind buying a tractor in the near future. If so, here are a few Honest facts: With my personal experience in the past four years selling Cletrac Tractors; I am well acquainted with every make of tractor, therefore I can give you facts from the bottom up.

I have personally worked the first Cletrac 20, which came to this part of the country five years ago. This same machine has over 700 working days on it and is still good for that many more. Our 20 is the most trouble-proof machine ever built. I know this for I have sold over 100 Cletrac 20s during the past four years, and today the New 20 is completely gone-over; new lower track wheel construction, more power, more speed, more weight, and many other improvements. You know, or perhaps have heard, that the Cletrac won't stand up. Well, friends, it is true that our old 30 just simply had too much power for the rear-end. Many shafts broke. The only way the factory could do was to throw out all the 30 forms and build a complete new 30, with a rear end that will hold a dozen motors. The old 30 is no more. The New 30, built a year ago, has not given us the least trouble. With the wonderful powerful 6-cylinder motor, the one-shot oil system, the Cletrac is ready in a few minutes. Oil as you go. The electric lights, electric starter, the power, the speed, the easy steering and handling, the low up-keep, the low gas and oil consumption—all make the Cletrac the outstanding Tractor of today. Many dealers will tell you the Cletrac is too light in weight—that they sell a much heavier tractor for the same money. Yes, so it is with most Italians. When they first come to the United States they buy a pair of shoes, usually a No. 14, to fit their No. 8 foot—just because they get more leather for their money—only to their sorrow. It takes power to pull these big shoes around, and the same applies to tractors.

The Cleveland Tractor Company says NO. Do away with weight. Put in a large engine, go in high gear, and stay there; don't pack the soil. These are facts; for just show me a 30 of any make that will haul a larger load than the Cletrac. Cletrac has lots of traction, low down on the ground, well balanced, with flexible side springs; rides like an auto over any rough soil. Many experienced tractor drivers tell me Cletrac is the champion of them all.

The New 30 of 1930 has many improvements. And here is the powerful 40; built just the same as the 30, and the latest of them all, the 60 Cletrac. Special arrangement has been made to make the Cletrac turn much shorter. And the Cletrac 100 is just a young locomotive.

And here we are ready for the big drive this spring to put the Cletrac over 100 per cent. With our New Models, all electrically equipped, which we will have on Main street in Lewiston in the very near future. Our headquarters will be in Lewiston for Nez Perce, Latah, Clearwater, Idaho, Lewis and Asotin counties. All repairs will be kept in Lewiston. We will maintain our Kendrick shop for carrying a full line of machinery and for reconditioning used tractors. Also for building the famous Four-Row Bean Cultivators and Bean Cutters for attaching to Cletrac 20s and 30s. Also will have the new Case Farmall Wheel Tractor, with Bean Cultivator.

Think, folks, a real 23-horsepower tractor pulling a 3-bottom plow, for the price of a tractor pulling a two bottom.

In addition, we will handle all repairs and parts for the Case Combine, which we will sell out of Lewiston. The New Case 5-bottom plow will also be on hand.

On the farm, or whatever you may want the tractor for, just ride a Cletrac, drive one, work it, pull it. Hook it to a plow and run it five miles an hour; then try others—be your own judge. Tractors can't lie, but agents can. Let the tractor talk. Then if you don't choose a Cletrac, even if they were much higher in price than others, it will be because you already have bought another make and did not give Cletrac a try-out.

If I had in my own mind that the Cletrac Company were not squarely behind us, building a better tractor and continuing to improve their product; if I did not like the Cletrac above all others, I would certainly not sell any more. But I am here to stay. I will give the best of service at all times; keep repairs and service men on hand. Service should be your first thought. We hope we never have to be called upon, but if we are, we are ready.

Prices at this writing are: 12-20, \$1260.00; 20, \$1750.00; 30, \$2760.00; 40, \$4700.00; 60-80, \$5625.00; 100, \$8000.00. With the factory going full blast, we will be able to supply all needed this spring.

Above prices are CASH, F. O. B. Spokane. Terms, add 7 per cent to price.

Owing to our many sales of Cletracs in the past, and the many orders already on hand for spring delivery, I will make a special price: I will deliver a tractor on your ranch at Spokane prices—a saving to you of from \$30.00 to \$60.00, according to size of machine.

We will be glad to hear from you. We would send specifications but we are very short of new literature and specification on new models.

We will call on you in the near future. All we ask is, give us a chance. The Cletrac will talk for itself.

Yours very truly,

W. F. BEHRENS, Dealer.

Present Address: Kendrick, Idaho.

PERSONALS

Nick Brocke was a Monday passenger for Moscow.
Mrs. Wm. Clem was a passenger for Kamiah Monday.
Marvin Long made a business trip to Lewiston Tuesday.
Henry Galloway went to Lewiston Thursday on business.
C. G. Compton went to Moscow Wednesday on business.
L. J. Pearson was a Lewiston visitor Tuesday on business.
W. A. Perryman was a business visitor to Lewiston Tuesday.
W. L. Morgan of Lewiston was a business visitor in Kendrick Sunday.
Perk Cox spent Sunday here with friends, returning to Lewiston in the evening.
J. W. Thomas of Peck is spending a week with his brother, Martin Thomas.
Joe Cardinal returned from Colfax Sunday, where he had been for a few days.
Miss Emma Glenn of Juliaetta spent Friday and Saturday at the home of Mr. and Mrs. J. W. Davis.
Mr. and Mrs. R. M. Spencer from Moscow spent the week-end at the home of Mr. and Mrs. George Leith.
Miss Hazel Stanton went to Reubens Monday to spend a few weeks at the home of Mr. and Mrs. Kester.

V. E. McKinney and H. S. Thomas of Clarkston were in the Kendrick section from Saturday until Tuesday buying cattle.
Walter Thomas was up from Lewiston Thursday of last week looking after business matters connected with the Kendrick Hardware company.
Mrs. John Bobbis and son, Jimmie, and Misses Nicatii and Nellie Baugh of Lewiston were visitors at the home of Mr. and Mrs. J. W. Davis Saturday of last week.
Mrs. F. E. Griffith and daughter, Marjorie, came down from Spokane Saturday afternoon for a visit with their daughter and sister, Mrs. W. L. McCreary, and family. They were joined on Sunday by Mr. Griffith, who is a conductor on the N. P.

Truck Over Bank
Julius Hoppe of Cavendish had a narrow escape from serious injury Monday when the truck he was driving swerved and left the road, going over a steep embankment, said to have been caused by the steering gear going wrong. He was uninjured. It will take quite some power to hoist the truck back onto the road. The accident occurred at the head of the Welcher grade.

Poor dear Mrs. Kent is deeply grieved about her boy, but cheer up, mother, the worst is yet to come! 4-1
