

Kendrick News 20 Years Ago

Item Taken from the Gazette Published in 1904

August 5.—Just as the Gazette was going to press this Friday morning, which happened to be 5 minutes of 11 o'clock, a couple of boys cried fire! We glanced out of the door and saw smoke rising from the roof of the Pacific Hotel. Everybody by this time was on the qui vive and a rush was made for the hose cart which was quickly connected to the hydrant and turned on the fire while the hill hose was brought down by the dray with a rush. No water could be found in the main to give any pressure and inside of 5 minutes it was realized that the business section was doomed.

By this time the flames were shooting up a hundred feet in the air and the heat was terrific. The merchants began gathering their books, invoices and records and fled to the hill-sides and so quick was the fire and so swift the destruction that in some instances not even these could be gathered up.

By 11:30 a solid wall of flame, rapidly spreading, divided the town into two parts. At first it seemed that nothing in the town could be saved, but by indomitable energy a line was established where the houses were not thickly located and the was prevented from spreading on either side.

By two o'clock the flames were under control but in this short space of time five blocks, including every business house in town, were actually swept out of existence, not leaving or saving a single article, while some 19 homes, with their contents were gone completely.

It is rather hard to estimate the damage at this time but it will be in the neighborhood of \$300,000, about half covered by insurance.

As we go to press the fires are still smouldering amid a heap of ruins and bleak barren walls—the ashes of a once populous business.

By three o'clock most everyone was at the depot to watch the train come in, there not being much business transacted and most of us too tired to do anything but enjoy a breathing spell.

That the town is not killed by fire can be seen by a glance at the Gazette and we ask you to read the ads—they are all new and set up since 11 p. m. and speak in loud tones of the energy of our citizens. Kendrick is like the phoenix and rises from the ashes, triumphant even in defeat and pressing on to more and greater mercantile victory and supremacy than she has ever enjoyed in the past.

Coal and wood sufficient for the use of the town next winter burnt up when we were not needing it particularly.

The absence of liquor, even beer, worked a hardship on a few who thought they needed it.

The council has just passed the cow ordinance. Confound the cows, anyway. But you know provisions are scarce and milk tastes good.

R. C. Sinclair and bride returned this afternoon. While glad to see them we had not figured on quite such an extensive celebration.

The way the court adjourned a case when the cry of fire was heard opened the eyes of old lawyers even. We might incidentally state that everyone in the court room was lighting out even before adjournment was made. Wonder what was done with that case, anyway.

So far we have not been able to trace the cause of the fire, having been kept busy finding out where we were at.

The evening was spent promenading between the ruins. Full dress was not prevalent but fancy dress was.

(Dr. W. A. Rothwell, now deceased)

Separator Burns on Little Bear

John Johnson Suffers Burns from Smut Explosion

A smut explosion in the John Johnson separator on Little Bear ridge occurred Wednesday afternoon while the machine was threshing on the James Benjamin place. No particular damage was done and within a short time the separator was running again.

Yesterday morning another explosion took place in the same machine on the Ira Gentry place. Mr. Johnson was standing on the separator when the smut exploded. Flames shot up from all over the machine and almost instantly Mr. Johnson was surrounded by fire. Before he could get off the machine he was very severely burned about the hands and face and had to come to Kendrick for medical attention.

The fire did little or no damage to the separator as it is a metal machine. The straw stack was burned but no grain was destroyed. The separator was pulled to another "setting" and threshing operations resumed.

A few hours after the second explosion a third one, worse than either of the other two, occurred. The flames were so intense that the wooden parts inside the separator were burned so that the machine was put out of commission. During the fire the straw stack was burned but no grain destroyed.

Vote for Walker

Next Tuesday you will have an opportunity to vote for G. F. Walker for commissioner of the third district—providing you have registered. If the vote is close to 100 per cent for Mr. Walker in this part of the county, it will indicate that the voters are trying to do their part to further the best interests of this section.

Mr. Walker has had extensive business training along the lines that qualify him to handle the duties of commissioner in a manner that will be satisfactory to the taxpayers of the county. The work of this office would never suffer through his neglect.

Kendrick is not represented in any of the county offices. This is one more reason why a big vote should be cast for the local candidate. There are matters in this corner of the county that have been sadly neglected during the past two years. We may rest assured that with Mr. Walker on the board of commissioners Kendrick will have a better representation than heretofore.

And most important of all, if you haven't registered, you can't vote next Tuesday. Register today and then vote for Mr. Walker at the primary election

Progressives Have Ticket

It is reported by leaders of the progressive party that they will have a complete progressive ticket in Latah county. County Auditor Thatcher was asked to have blank ballots printed so that names might be written in at the primary election. County Attorney Moore gave his opinion that the proceeding would be legal according to the election laws of the state. It is understood that progressive primaries will be held only in the three precincts—North Troy, South Troy and Southeast Moscow.

Edgar Dammarell has taken the position in the Kendrick Store recently held by his brother, Kester.

ed, assisted in the publication of the issue of the Gazette from which the above write-up was taken. The paper was published under a tree near where the city hall now stands. Some of the humorous paragraphs may easily be imagined as coming from Dr. Rothwell's pen.)

Appoint Judges General Election

To Serve in their Respective Precincts in November

Election judges for the November general election have been appointed by the county commissioners for every precinct in Latah county. Following is the list by precincts:

Bear Creek—Wm. Whybark, Ed Lien, King D. Ingle.

Bovill—Mrs. E. K. Parker, Sam Peterson, E. B. Flasher, Delia Crawford, Robert Jones, Mrs. Dave Ellison.

Cora—N. C. Krogh, John Bysegger, S. M. Smith.

Cornwall—Oliver O. Lockard, R. J. Knapik, John Walker.

Deary—J. C. Peterson, C. J. Smith, John B. Kitch, Al LaBolle, George Wiley, Mrs. Grace Faust.

East Moscow—Martha Brown, Mrs. Charles Clark, M. P. Bailey, Nellie Hall, Fred Pitzen, Mary E. Hanna.

Farmington—S. A. Ross, Thomas J. Torpey, Frank Leonard.

Genesee—W. W. Burr, Charles F. Ebel, Glenn Sampson, Fred E. Dicus, Meta Herman, John G. Meyer.

Harvard—J. E. Johnson, Homer Canfield, A. H. Carpenter.

Helmer—J. C. Liner, Mrs. Ella Baker, Marcellus McGarry.

Julietta—Eben Adams, Wm. Cox, M. M. Talbott, Frank Vincent, Orve Pool, S. S. Taber.

Kendrick—Wm. A. Watts, Mrs. W. M. McCrea, George Davidson, A. K. Carlson, E. T. Long Martin Thomas.

Lenville—B. Brigham, Homer Kinyon, Mrs. John Humphrey.

Linden—Eva L. Smith, H. J. Starr, Clarence Fry.

North Moscow—Ralph Naylor, Geo. W. Abel, Mattie E. Marsh, A. J. Simonson, Mae Whitcher, Minnie Curtis.

North Troy—Geo. Saad, Mrs. H. H. Christie, J. H. Felton, Mrs. Martha Chaney, Andrew Hoidal, I. T. Spencer.

Palouse—Everett McClellan, L. E. Kegley, James Milton.

Park—P. A. Enger, Mrs. George Torgerson, George Torgerson.

Potlatch—Gust Danison, E. A. Jones, Wm. Doyle, Walter Fiscus, Peter Clyde, James Gardner.

Princeton—B. T. Thomas, A. L. Davis, Syna Ruhl, Ulrich Lienhard, Frank A. Cochran, Robert Clyde.

Southeast Moscow—Emma Urquhart, Mason Cornwall, Retta Holman, Frank Slater, Mrs. O. C. Carrow, Carrie B. Westover.

South Troy—R. S. Mushlitz, August Hedeon, Ole Boman, Walter Driscoll, Mrs. Leo Vance, Lawrence Johnson.

Southwest Moscow—E. K. Kroh, Laura A. Branson, Mrs. S. A. Hill, Edna Rogers, Charles E. Browers, Pearl E. Tyrrell.

Texas Ridge—Thomas LaBolle, Carl Drury, Gus Birchmeir.

Thorn Creek—Oscar M. Anderson, Arthur Carpenter, Adolph Grieser.

Viola—A. W. Bowles, Cora Randall, R. Ball, George Chaney.

West Moscow—Carl S. Barton, Perry W. Carter, Glenn Sanders, Addie V. Rodgers, J. R. Collins, Mrs. James Canham.

Sheep Prove Profitable

Archie May has demonstrated to his own satisfaction that a small herd of sheep on a Potlatch ranch, properly managed, will pay handsome returns on the investment. Two years ago he bought a small bunch of registered Shropshires at \$14 a head. Some of his neighbors were not impressed with his good judgment. Mr. May now has 36 head of registered sheep and he says they have paid the original investment three times over. He gets \$20 a head for the ram lambs. The sheep live practically on what would otherwise be wasted and require but little attention.

New Buick Car Damaged by Fire

Gasoline was Ignited in the Vacuum Tank

Guy Hillman and Lawrence Groves of LaGrande, Oregon, had an accident while driving down Brady gulch that almost proved the ruin of a new Buick car. They were coming down the steep hill, something over half a mile up the gulch from the Raby ranch, when, according to Mr. Hillman, one of the front wheel brakes "grabbed." The car swerved to one side of the road and by the time it was brought to a standstill the front wheels were over the edge of the grade.

According to the story as told by Mr. Hillman, owner of the car, as soon as the car stopped, flames shot up from under the hood. He ran to the Raby place for help and by the time he returned to the car the fire under the hood had practically burned itself out, but had spread to the top and parts of the front seat. This was soon extinguished by throwing on water and dust.

The car was quite badly damaged, the vacuum tank being completely ruined, the wiring system practically burnt up and the varnish on the outside of the hood and cowl badly scorched. One side of the top was ruined and the front seat quite badly damaged.

The vacuum tank and carburetor are located close to the exhaust and it is presumed that gasoline leaking from the tank or carburetor was ignited by fire from the exhaust.

Banker Drowned in Salmon

Grangeville—William Bucholz a representative of the Spokane & Eastern Trust company of Spokane, who was in charge of the Salmon River State bank at Whitebird during the absence of the regular cashier, was drowned at 5 o'clock Wednesday evening at the bathing beach on the Salmon river, west of Whitebird. His body was recovered about 6 o'clock.

Mr. Bucholz in company with Mrs. Margaret Howard, bookkeeper at the bank, and Miss Nepon, and others, went to the regular bathing beach at the river shortly before 5 o'clock. He plunged into the river with others of the party and is believed to have been seized with cramps going under before others could reach him. Mr. Bucholz was a young man, about 30 years of age. E. J. Behrens, regular cashier, arrived in Grangeville today, expecting to be away for a few days and Mr. Bucholz was working at the bank during his absence.

The body will be brought to Grangeville during the night and will probably be shipped to Spokane Wednesday morning.

Dokies Want a Queen

The management of the Dokey Water Carnival, to be held August 7-8-9, at the famous White Sand Beach at Clarkston, is anxious that a candidate for carnival queen be entered from this section. It will be a pity if none of the young ladies from the Potlatch are entered as there is no other spot in the world where there are more beautiful girls than in the territory surrounding Kendrick. To name one of these as a candidate should be equivalent to electing her queen. It might be interesting to prospective candidates to know that the ability to swim is not a requirement of a bathing beauty.

Many interesting water stunts will be put on by the Dokey management during the three days of the carnival. Log rolling, high and fancy diving, swimming races, etc. will prove attractive events. A pavilion dance with Mann Bros. Orchestra will be a feature of the carnival.

Latah County News Paragraphs

Items of interest Taken From Neighboring Papers

Harvesting has been in full swing in the Genesee section for the past week or more and many are the surprises when the fields are entered and cutting begun—some are getting much more than they had anticipated, while others are not getting as much as they had hoped for. However, taking the crop all in all, the farmers are going to be in pretty good shape—much better, in fact, than they have been for the past several years—from the fact that their cost of production will be much smaller than heretofore and those who have grain to sell will receive a much higher price than they have received since the government guarantee was withdrawn.

There are still many much worse places to be in this old world than in the Palouse country.—Genesee News.

Walter Cochran, one of the most extensive melon growers of the Julietta section, is rejoicing over a streak of good fortune which came to him in a rather unexpected way. He had a small plot of ground that he "figgered" would be excellent for tomatoes. After procuring seed of the earliest maturing tomatoes he could find, he planted the seed and subsequently gave the plants the most careful cultivation throughout the long dry season. The result is that Mr. Cochran has sold several hundred pounds of tomatoes before his neighbors had even one ripe tomato—and the demand was such that had he had ten times as many tomatoes as he did have he could have sold them all. And the part of the story that is most pleasing to Mr. Cochran is that instead of receiving the \$12 a ton the contract price with the local canner, Mr. Cochran is receiving 10 cents a pound or \$200 per ton for his tomatoes. Had Mr. Cochran put in five to ten acres of these tomatoes this year—all planted at the same time, and given the same care and cultivation—they would have netted him a snug fortune. To be able to take two ordinary sized water pails out to one's garden and fill them with vegetables that are worth four dollars for the two pails is certainly out of the ordinary, but if it were not out of the ordinary they would not bring anything like so much. This is another exemplification of the truth contained in that well-known poem, "It couldn't be done—but he did it."—Star-Mirror.

For some time there has been talk of the probability of a new grade being built from Kendrick to Big Bear ridge as a part of the trunk line leading from this territory into the Lewiston country.

While no definite action has been recorded, sentiment strongly favors such a road, and it will probably be a development of the next year or so. Should a five per cent grade be built out of the Potlatch canyon at Kendrick to the top of Big Bear ridge it would mean something more than a good community thoroughfare. With the construction of a highway from Lewiston up the Clearwater to the mouth of the Potlatch and thence up the latter stream to Kendrick, an easy grade up the hill, would mean that the north and south route through Latah county would be shortened many miles, and consequently a large amount of tourist travel would be diverted at Lewiston by way of Kendrick and Bear ridge to the Moscow-Bovill state highway at Deary and to the federal highway at Bovill, to St. Maries and the north. The idea of getting a five per cent grade from Kendrick this way should be

Grain Wagon Over the Grade

Wesley Lowe Injured When Team Ran Away

Wesley Lowe received very painful injuries yesterday about noon when his team became frightened and when over the grade at the top of the steep hill above the watering trough in Waundcher gulch.

Some tourists coming down the grade in a Ford had to bank their car as their brakes wouldn't hold. The car was parked at the side of the road and when the team driven down the grade by Wesley, started to pass, one of the horses shied and plunged over the edge of the grade, dragging the wagon and the other horse with it. The wagon was kept right side up for 50 or 60 feet and then dropped thirty feet or more, bottom side up over a cliff, with Wesley and the load of wheat under it.

A woman who was staying near the Ford while her husband went for help, tried to aid Mr. Lowe but he was under the wagon with wheat sacks piled over and around him so that just his head and shoulders were visible. About five minutes after the accident Henry Bramer, who was hauling a load of grain to Kendrick, arrived on the scene and after half an hour of hard work succeeded extricating Mr. Lowe from his painful position. He had fallen across a large rock which was pressing into his side and hip with part of the weight of the wagon and load of wheat resting upon him.

Dr. Seeley was called and administered first aid after which the injured man was brought to Kendrick for further medical attention. He had some deep cuts on his legs and was apparently injured in his side and hip but to what extent could not be ascertained as he was too weak after the accident for an immediate examination. He did not lose consciousness but directed Mr. Bramer how to get the weight of the load from his legs and side. The wheat sacks were wedged so tightly under the wagon that it was necessary for Mr. Bramer to reach under and rip them open with his knife before they could be removed.

Mr. Bramer states that one of the horses was evidently killed as soon as it struck the bottom of the gulch but the other was not injured to any great extent. This is the second accident Mr. Lowe has had on this grade. Several years ago he went over with a truck and was quite badly injured.

The Primary Election

Owing to the fact that there are no contests in the primary on the democratic ticket, there will be no democratic primary election in Kendrick precinct. It is understood there will be primaries held in Moscow to cast sufficient votes to nominate the candidates on the democratic ticket.

The republican primary election will be held at the city hall in Kendrick for this precinct. The polls will open at 1 o'clock p. m., and remain open until 7 o'clock.

Democrats are not supposed to vote at the republican primary. If their votes should be challenged it would be necessary for them to swear that they were republicans and that would be very unpleasant for a democrat.

The Best Show

A man from the south was talking to a swede in Minnesota. "What do people up here think of LaFollet?" "He bane pretty good feller." "Well, what do they think of Coolidge?" "He bane pretty good feller." "How do they like Davis?" "He bane pretty good feller, too." "Which one do you think has the best show?" "Ay bane tink Ringling Brothers."—Ex.

encouraged.

Treat Cabbage Seed to Prevent Disease

Very Simple, Essential and
Low-Priced Insurance.

(Prepared by the United States Department of Agriculture.)

Cabbage-seed treatment for the prevention of blackleg and black rot, two seed-borne diseases which cause heavy losses to the crop each year, is a very simple, a very essential and low-priced insurance, says the United States Department of Agriculture. Most cabbage seed is grown at points remote from the place where it is used and passes through many hands before it reaches the planter. Usually very little is known by the planter as to the prevalence of disease on the plants from which the seed was secured and there is no practical method of determining offhand whether or not a given sample of seed is infected. Treatment of the seed therefore should be resorted to as an insurance against loss.

The methods of treating cabbage

seed for these two very prevalent diseases is told in Department Circular 811, just issued by the United States Department of Agriculture. Mercuric-chloride seed treatment is by far the simpler of the two treatments recommended. There is practically no injury to the seed. Its only limitation is that blackleg fungus, though greatly reduced, is not entirely killed, although black rot is almost completely controlled. The hot-water treatment will completely control blackleg, but will reduce somewhat the percentage of germination.

A copy of the circular may be secured, as long as the supply lasts, from the United States Department of Agriculture, Washington, D. C.

THE AMERICAN PRESS ASSOCIATION

It doesn't make any difference which party claims the credit of boosting the price of wheat, it's too early for political purposes.

A young lady in these parts is becoming ambidextrous. The reason is a sparkler on her left hand.

With gasoline at a dollar a gallon in Australia poor men don't drive cars there. A dollar a gallon wouldn't stop a poor man's car in this country.

The new proposed grade from Kendrick to the top of Big Bear ridge, mentioned in last week's Deary Press, has been a subject of considerable interest and speculation in this section for some time past. The story from the Press is re-published on the front page of this issue of the Gazette.

It seems highly probable that this grade will, when built, become a part of the North and South Highway. Figures from a responsible engineer indicate that a saving of approximately 40 miles might be made from Spalding to St. Maries by changing the route through Kendrick instead of its present roundabout location through Lewiston and Moscow. From Spalding to Arrow Junction and then up the Potlatch to Kendrick, over Bear ridge to Deary would make almost a water grade and the country through which this highway would pass is scenic in the extreme.

A direct road from St. Maries to Lewiston would divert much of the traffic from the East to the coast, through Lewiston instead of Spokane. The saving in mileage would be sufficient object to make it worth while to travel this road.

The Bear ridge grade might be built in the very near future providing the people of the ridge would get together and definitely decide upon a location for the grade that would best serve the ridges and also come up to specifications for a state highway.

SOUTHWICK NEWS

Frank Cuddy and wife returned home from Marshfield, Oregon, Tuesday, where they have been since last March.

Word was received from Mabton, Wash., that a 9½ pound son was born to Mr. and Mrs. Don Powers of that place, July 22. Mrs. Powers will be remembered here as Miss Mable Smith.

Mr. and Mrs. J. E. Hoppe, Mae Grant, Jeanie Maxwell and Nadine McCoy went to Orofino last Friday, returning the same day.

Mr. and Mrs. Gurlic of Spokane were the guests of Mr. and Mrs. Dan Betts for a few days last week.

A. M. Calvert has moved from the Ziemann property to the residence owned by Mrs. Wm. Kauder.

Jap Triplett is quite ill. Dr. Seeley was called to attend him last Tuesday.

Grandma Harris spent the day last Wednesday at the home of Mrs. R. M. Wright.

Mr. and Mrs. Dan Betts spent one day last week at the home of Mr. and Mrs. Wm. Berriman.

Mr. and Mrs. Ross Hoffman of Kootenai visited with their daughter, Mrs. Harold Whittinger Saturday and Sunday.

The Primary election will be held at the hall, next Tuesday, the 5th. The ladies aid is planning to serve ice cream that day.

Mrs. Homer Hayward served dinner at her home to the M. E. Sunday school last Sunday.

Mrs. Calvert is enjoying a visit with her sister, Mrs. Luce, who is here from the Hawaiian Islands.

Walter Triplett has moved from the east end of town to Mrs. Carrie Smith's residence.

Fire caused by smut explosion burned the straw stack and about 25 sacks of grain on the Pete Stump place about 4 o'clock Tuesday. For a while the house and barn were in danger of being burned but by hard work of the threshers and neighbors the fire was brought under control so that no further

damage was done.

Mr. and Mrs. Ben Presnall and Mrs. Kime went to Lewiston Tuesday evening.

Mrs. Maud Best is ill with scarlet fever.

BIG BEAR RIDGE

The Primary election will be held August 5th from one o'clock to seven o'clock p. m. at the Community hall instead of the Steele school house as formerly announced.

Jack Whybark has recently returned from a military training camp in Utah.

Mr. and Mrs. James S. Nelson and children autoed to Clarkston, Sunday to attend the Golden wedding anniversary of Mrs. Nelson's parents, Mr. and Mrs. August Anderson. Mr. and Mrs. Anderson were among the early pioneer settlers of Bear creek.

Miss Anna Lien entertained the Girls' Sewing Club Thursday afternoon.

Mr. and Mrs. George Larson of Cameron were Sunday visitors with Mrs. Larson's mother, Mrs. Kate Galloway.

Mr. and Mrs. Pete Halseth and children of near Deary were visiting at the Ed Halseth home last week.

TEXAS RIDGE

Mrs. Jake Alber accompanied her father, Mr. McGraw, on an auto trip to Oregon where Mrs. McGraw is visiting. They expect to be gone a couple of weeks.

Mr. and Mrs. Al LaBolle and Mrs. Tout spent Sunday at the Thomas LaBolle home.

Mrs. Perry Tout of Deary is visiting Ruth Alber for a few days.

Mrs. Babcock visited with Mrs. M. L. Pierce, Sunday.

Mr. and Mrs. Roy Webster and baby of Post Falls and Virgil Bogar of Spokane are here visiting relatives and friends.

Mr. and Mrs. Orval Miller and James Miller of Cheney, and Albert Dahlgren of Spokane arrived Friday and are at the L. K. Dahlgren home.

Mr. and Mrs. Love who have been visiting at the home of their daughter, Mrs. James Baker, returned to their home in North Dakota, Friday.

Mrs. Sian, son and daughter, are spending a few weeks at the home of her sister, Mrs. Viola Baker.

Mrs. I. W. Swan passed away at her home, Monday night, the 21st. She had not been well for sometime and a few days before her death

she had a paralytic stroke. Funeral services were held at the U. B. church, Wednesday afternoon at 2 o'clock. Rev. Martin of Cornwell had charge of the service. She was laid to rest in the Elwood cemetery. Mrs. Swan is survived by her husband and nine children.

Thrashing has started on the ridge and the wheat is turning out fairly well.

Card of Thanks

We wish to thank our many friends and neighbors for their kindness and assistance during the illness and death of our wife and mother and for the beautiful floral offerings.

Docked Lambs Bring High Market Price

In Warm Weather Pine Tar Should Be Put on Tail.

Failure to dock and trim lambs costs New York sheep growers a tidy sum every year, for lambs that reach the market without this having been done bring a lower price.

"When the lambs are from one to two weeks old they ought to be castrated," says R. B. Hinman of the state college at Ithaca. "Select a bright day. Have the lambs on clean dry bedding, or if on pasture, have them on clean, dry grass. Provide some warm water containing a disinfectant. Wash the hands clean. Have a sharp knife, dip both hands and knife in this solution.

"It is well when there are a number of lambs to be castrated to sort them from the flock.

"Have someone catch a lamb and hold it up against his chest with its four legs together. The operator takes hold of the scrotum and cuts off one-third of the lower end. The testicles, now being exposed, are pulled out slowly, one at a time. After this, drop some of the disinfectant into the holes and put the lamb with its mother.

"A week after the buck lambs have been castrated and are almost healed, all lambs, ewes, and wethers should be docked. This work is commonly done with a chisel and block. A sharp knife is also used. The regular docking pinners, however, are better, as their use prevents loss of blood. They should be heated till they are red hot. In warm weather, when flies are troublesome, pine tar should be put on the stub of the tail to prevent attack by maggots. This operation can be performed by anybody exercising a little care."

SUMMONS

IN THE DISTRICT COURT OF THE SECOND JUDICIAL DISTRICT OF THE STATE OF IDAHO, IN AND FOR THE COUNTY OF LATAH

Eva Luella Smith (Sometimes written Eva L. Smith), Plaintiff, vs-Jordan P. Smith, the unknown heirs of James E. Fisher, deceased, the unknown devisees of James E. Fisher, deceased, the unknown heirs of Leah Smith, deceased, the unknown devisees of Leah Smith, deceased, Mena P. French, the unknown heirs of John Weisgerber, deceased, the unknown devisees of John Weisgerber, deceased, and all unknown owners of and unknown claimants to the following described real estate situated in Latah County, State of Idaho, to-wit: The NW 1/4 of the NW 1/4 of Sec. 6 and 2 1/2 acres in the NE corner of the NE 1/4 of said Section 6, the same being in a square 20 rods each way from said corner, all in Twp. 38 N. R. 1 W. B. M., Defendants.

THE STATE OF IDAHO SENDS GREETING To the above named defendants:

You are hereby notified that a Complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, the nature and general terms of which is to require each and all of the above named defendants to appear in the above entitled cause and to set forth any right, title, or interest that said defendants or either of them may have or pretend to have in and to the above described real estate, and to quiet the title thereto in the name of the plaintiff, and to reform a certain deed of record in book 73 of Deeds at Page 27, and to reform a certain deed of record in book 79 of Deeds at page 535, of the records of Latah County, State of Idaho.

And you are hereby directed to appear and answer the said Complaint within twenty days of the service of this Summons, if served within said Judicial District, and within forty days if served elsewhere; and you are further notified that unless you so appear and answer said Complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said Complaint.

WITNESS MY HAND AND SEAL OF SAID DISTRICT COURT, This 14th day of July, 1924.

HARRY A. THATCHER,
Clerk of said District Court,
(Seal of Court Affixed.)

By ADRIAN NELSON,
Deputy Clerk.
A. H. OVERSMITH, Attorney for plaintiff, residence and Post Office address at Moscow, Idaho.

Decline in Prices
of Dairy CattlePure Bred Aged Bulls Bring
More at Private Sale.

(Prepared by the United States Department of Agriculture.)

Average sale prices of pure bred dairy cattle for the year ending December 31, 1923, ranged from \$133 for bulls under one year to \$268 for bulls over three years of age, according to reports submitted by breeders to the United States Department of Agriculture. The breeds included were: Ayrshire, Guernsey, Holstein, Jersey, and Brown Swiss. More than twice as many animals were disposed of at private sale as were sold at auction. Auction prices, however, averaged from \$25 to \$50 per head higher than those realized in private sales. Aged bulls were an exception, such animals bringing more in private sales than at auction.

The following comparison by ages shows that prices in 1923 were somewhat lower than in 1922:

Ages	1922	1923
Bulls under one year of age.....	\$156	\$133
Bulls over one and under three years of age.....	221	206
Bulls over three years of age.....	435	268
Heifers under one year of age.....	184	153
Cows and heifers over one and under three years of age.....	211	223
Cows over three years of age.....	336	261

The top bull and cow each brought \$7,500. The number of animals represented were: Calves, under one year, 4,845; bulls, over one year and under three, 947; bulls over three years, 156; heifers and cows over one year and under three, 2,470, and cows over three years of age, 2,977.

Make Good Silage From
Different Legume Crops

Some farmers have reported excellent results in making silage from alfalfa, clover, and other legumes, while others report that their legume silage was so poor the cows would not eat it.

The great extremes in the results reported as to the palatability of legume silage led Professor Eckles to investigate this question. He found that the difference in quality was apparently due to the amount of water in these legumes when ensiled. For two years they had made good alfalfa silage at the Missouri station, but the next two years the silage was practically worthless. In going over this experience, it was noted that the first two years were dry years and the analysis of the alfalfa when ensiled showed a high percentage of dry matter. The next two years were wet years and the analysis those years showed that the dry matter content was considerably less at the time the green alfalfa was ensiled. Further investigations showed that if alfalfa were made into silage when green and succulent, as it is at the usual time of making hay, it contains about 20 pounds of dry matter to the hundred and, under these conditions, would not make good silage. If it were drier and more mature and contained approximately 40 pounds of dry matter to the hundred, then it makes good silage.

Clover Is Helpful

The growing of clover in a three-year rotation, especially if the second crop of clover is plowed under, would keep many soils in splendid condition for a long term of years, although many other soils would be benefited by a dressing of one to two tons of limestone per acre once in each rotation period and also by the addition of acid phosphate for one of the crops in each rotation. The plowing under of the second crop will add considerable nitrogen.

FARM NOTES

Spray tomatoes and melons with Bordeaux mixture to prevent disease.

Make sure to plant enough hay crops to supply hay for next year.

As small grain matures, look out for chinch bugs and use barriers if needed to prevent migration.

Persons desiring to start into the growing of alfalfa for seed should secure the most hardy strains of seed.

Excellent results are being secured with alfalfa seeded on rye and wheat provided the ground is fairly fertile and not in need of lime.

Cowpea hay contains 2.6 per cent more digestible protein than soy bean hay, but soy bean hay contains a larger total amount of nutrients.

Looking over the tile drain outlets in drainage districts and clearing out those that need it is a good spring or early summer job that may save money later.

Good barnyard manure makes the very best onion fertilizer, but it is best applied to the crop before the onions are planted so it will be in best form for them.

Sometimes alfalfa grows so rank that it lodges and becomes very coarse if left to reach full bloom. Here earlier cutting is essential, but with the first crop of one-year-old stands or the second growth of older seedlings, the stems are generally much finer and leafier and can be cut in or near full bloom without serious impairment of quality.

POULTRY

WATER GLASS BEST
TO PRESERVE EGGS

Preserving eggs in water glass has become a general practice, and is meeting with perfect success wherever tried, provided it is properly carried on. Remember that if you put in a poor egg, you are going to take out a poor one.

Eggs to be put in water glass should be fresh, sound and clean. They should be gathered daily and preserved the same day on which they are laid. Infertile eggs are conducive to the best success.

The method of preservation is as follows: Take one quart of water glass, which can be secured at any drug store at about \$1 per gallon, and mix with ten quarts of water that has been boiled and then cooled. Stir thoroughly and place in a crockery vessel, never using galvanized or tin vessels. Place in a cool, well-ventilated cellar, and add eggs as you gather them from day to day, always keeping the solution one inch above the eggs, and keeping the crock covered with a lid of some kind to prevent too much evaporation.

Eggs preserved in this manner will keep perfectly for one year.

The water glass solution will not injure the hands, so do not be afraid to handle the eggs in the solution. Do not use the solution more than one year.

It is hard to tell a water glass egg from a fresh egg, if the former is properly kept. But by considering the price now and in winter, you can afford to eat three water glass eggs next winter where you could eat only one fresh one, and still have some money left. It will be found hard to boil water glass eggs, but by puncturing the large end with a needle, to allow the air to escape, and allowing the water to come to a boil gradually, you will not experience much trouble. —J. A. Helmreich, Colorado Agricultural College, Fort Collins, Colo.

Increase Yield of Eggs
by Destroying All Mites

Poultry men and farmers sometimes overlook a very important fact. It is that the best of feed, plenty of it, well balanced ration, etc., will not induce hens to lay eggs if they are compelled to roost in houses infested with mites.

The little red insect saps the vitality of the hen by sucking her blood. Hens have actually been killed, virtually eaten alive, by mites. Chickens cannot lay except when their vitality is maintained. Vitality and mites cannot exist in the same hen roost.

Guard against mites by giving all woodwork inside the poultry house a coat of hot whitewash well carbollized.

The roosts and their supports should be painted all over with carbolineum, zenoleum, carpoline, or kresol. These are all similar products, called by different names by different manufacturers. They are cresol or tar oil disinfectants, and are death to mites, while in no way injurious to the chickens.

The time and cost of carrying out these suggestions will be amply repaid by the hens who will show their appreciation by an increased yield of eggs.

Infertile Eggs Contain
Some Important Elements

Feeding of infertile eggs that have been candled out of an incubator was mentioned in a recent issue of the Orange Judd Farmer. It was suggested that these be cooked and ground up to feed baby chicks. Some complaint is made about the odor of these eggs. Don't let that frighten anyone. If they are thoroughly cooked there is no danger to the chicks. Even the eggs containing dead germs if candled out before they are too far along, make good feed.

The chicks thrive on these ground eggs, and they furnish some important feeding elements. The shells can be ground up with the eggs. Frequently the number of eggs tested out of incubators is small. In such a case, market eggs are usually profitable as a feed for the first two weeks.

Poultry Notes

Head lice kill chicks and poults.

Sell the males and produce infertile eggs.

Keep brooding baby chicks until they are fully feathered.

You can count your chickens before they hatch if you observe carefully the correct principles of egg selection and incubation.

Wood floors for poultry houses are a little cheaper in first cost, but rot easily and are difficult to keep clean and free from vermin.

The location of the poultry house requires very careful consideration, as it has a great deal to do with the convenience of handling and the success with which the work is carried out.

The half-monitor type of poultry house is much used, being very similar in construction to the same type of hog house.

Farm Hints

The protein content of sudan grass hay is not high and for that reason it is not very satisfactory for a dairy herd.

A pint of formalin on the seed oats may mean a gain of 500 pounds of grain.

Home gardening pays in health as well as produce.

No legume-growing farmer is likely to go bankrupt, for he is constantly adding to his bank account; that is, his soil reserves.

SOY BEAN SUPERIOR
FOR DAIRY CATTLE

One of the best home-grown feeds that can be grown anywhere is soy beans, a crop that should be known on every dairy farm. The soy bean may be combined advantageously in many systems of crop rotations. It is especially adapted to short rotations that take either an entire season or a part of a season following some grain crop. In the Southern states the crop is adapted to practically the same places as cowpeas, says W. J. Keegan, dairy husbandman at Clemson college, who believes that soy beans should have a prominent place on every dairy farm in the state.

The feeding value of soy-bean seed, which contain from 30 to 46 per cent protein, is very high and compares favorably with other concentrated feeds. The growing of soy-bean seed will enable the dairy farmer to produce at a moderate cost at least part of the high protein concentrates necessary for milk production. Soy-bean seed contain a higher percentage of digestible nutrients than cottonseed meal, linseed meal or wheat bran.

Soy-bean seed ground into meal has been found a most excellent feed for dairy cows. The Massachusetts agricultural experiment station compared soy-bean meal and cottonseed meal, using the same ration otherwise. The quantity of milk produced from the soy-bean ration was slightly higher. At the Tennessee station in a similar comparison of the two feeds, the yields both of milk and butterfat were about 5 per cent greater for the soy-bean meal.

In the South, as a feed for dairy cows, perhaps soy beans in hay form is the most valuable. As compared with hay from other leguminous crops, soy-bean hay is equal or superior to any, not excluding alfalfa. Soy-bean hay can be much more readily and easily cured than cowpea hay. The chief value of soy-bean hay lies in its high content of digestible protein. In feeding value it is superior to red clover or cowpeas, and as indicated by comparative feeding tests, is equal to alfalfa for milk production.

Spring Freshened Cows
Are Not Meeting Favor

Custom says, "Freshen your cows in the spring." Her arguments are: Feed is cheap in the spring; cows will go out on luxuriant pastures, take care of themselves, produce a lot of milk and all their owners need to do is to milk them and make money.

Custom argues that it costs too much to feed cows and raise calves during the winter months, and that expensively equipped barns, ventilating systems, etc., are necessary where winter dairying is followed.

These are all the arguments custom advances and she refuses to listen to the many objections to spring and summer dairying, a few of which are as follows:

Although it is true that it is much cheaper to produce milk in April, May and June, so is it true that the price secured for milk in those months is extremely low—not once in a while, but always.

Spring-freshened cows have only three good months to work.

July and August bring droughts, dry pastures, heat, flies and busy harvest. If there are any worse factors for turning cows dry, they are not readily apparent. These factors do turn cows dry, rob them of flesh and condition and they are largely accountable for the very low average production of milk.

Spring-freshened cows are dry when fall comes along with high prices for milk and its products, or they are so nearly dry that all that can be afforded is just to winter them as cheaply as possible and look forward to spring freshening when they will again give a lot of milk for three months when milk is cheapest.

Dairy Hints

Provide covered salt boxes in the shade and easily accessible.

To prevent being overrun with flies, clean the premises daily in summer if possible.

Select new dairy animals to be shown at fairs next fall and begin fitting them.

The young spring calves should be placed in lots or pastures which have abundant shade and clean fresh water. They should also be provided with salt the same as the milking herd.

"Hard times" is a meaningless phrase to farmers who keep cows, sows, and hens and a good garden.

Consumption of dairy products in this country has increased 17 per cent in the last seven years.

Kindness may be sentiment, but it pays in handling cows. It may not cause them to produce more abundantly but it surely makes the job of getting what they do yield more pleasant.

Durum Wheat Not
in Good Demand

Farmers Are Being Urged to
Meet Needs of Domestic
Market for Grain.

(Prepared by the United States Department
of Agriculture.)

Because the foreign demand for durum wheat is falling off and the domestic demand is on the increase, farmers are urged by the United States Department of Agriculture to modify their durum-wheat production to fit the needs of the domestic market. It appears that almost half of the durum wheat offered on the market during 1912, 1920, and 1921 contained over 10 per cent of wheat of other classes, and was graded as mixed wheat. Firms engaged in the milling of durum wheat find it difficult to obtain sufficient pure durum wheat of high quality.

Certain durum wheats, chief among which is the Pentad or red durum variety, have been grown quite extensively, and while absorbed on the foreign market should be discontinued and replaced with varieties suited to domestic milling for macaroni manufacture. Two varieties of amber durum, the Acme and Monad, also are not desired by the domestic trade because of the grayish color of macaroni they make.

Choice of Varieties.

When making a change of seed, careful consideration should be given the choice of varieties to be used. The Kubanka is the best-adapted variety for all the varying conditions in the durum-wheat sections. It is a high-yielding wheat, considerably resistant to rust, of good milling quality, and well liked for the manufacture of macaroni, the principal use of durum flour. The new Nodak variety recently developed in North Dakota as a selection from Kubanka is a distinct pure strain of that variety, which is equal or superior to it in yield, rust-resistance, and macaroni-making qualities. Other durum varieties have been found more productive than Kubanka in certain sections. Mindum is the best-yielding variety of durum in Minnesota. It is about as resistant to rust as Kubanka and makes macaroni of excellent light yellow color. Pellus is the best-yielding variety in the higher and dryer sections of Montana and Wyoming, where rust does not occur. It also gives a good color in macaroni manufacture.

Nodak Variety Promising.
In order to meet the requirements of the domestic market, durum-wheat growers should obtain and maintain purer and better seed and replace the Pentad, Acme and Monad varieties with other rust-resistant varieties as soon as possible. For this purpose the Nodak appears the most promising new variety at this time.

Feed Value of Mixture
Superior to Oats Alone

Many farmers are substituting a mixture of oats, barley and peas for oats grown separately. They are doing this because very often they have found oats alone to be an unprofitable crop, and yet they feel that oats has an important place in the rotation.

As a result of investigation about the state, the New York college of agriculture at Ithaca reports that this mixture of oats, barley and peas is satisfactory as a nurse crop and gives a yield of grain usually higher than of oats alone. The feeding value of this mixture, further, is much superior to oats. Another advantage is that the peas in the mixture, being a legume, will help maintain soil fertility by utilizing nitrogen in the air.

An objection the college workers find to the combination is the slight additional cost of the seed.

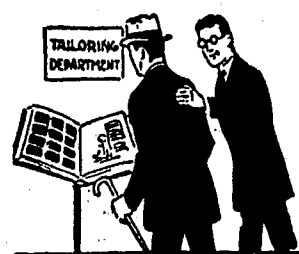

In making the mixture, a bushel of

oats, a bushel of barley, and a half-bushel of Canada field peas have produced good results. This mixture should usually be sown at the rate of about two and one-half bushels to the acre, although on rich soils one and one-half to two bushels may be enough.

Obtain Greater Yields
From Smaller Acreage

It would seem foolish to have to cultivate five acres of potatoes, row after row of them, to get the same number of bushels that some men get on a single acre, wouldn't it? But that is a frequent occurrence. The fact that a man grows five times as many rows of potatoes does not promise him five times as many bushels each season. Rather plant fewer hills, and put the extra time in manuring and mulching and weeding, and get bigger yields from smaller acreage. Instead of growing the 40 bushels on an acre, with some special care, those 40 bushels are being grown by many farmers on a quarter of an acre. That leaves more garden space, and is nothing else than "good business and good farming."

The lettuce patch may be utilized for root crops as it is a leaf crop and into the lettuce patch may go early turnips, a second or third planting of carrots, beets or swiss chard.

SUMMER FEEDING OF HENS IS IMPORTANT

Nature will not supply enough animal protein in the form of bugs and worms during the spring and summer to supply the laying flock of poultry with what is needed to insure good egg production, says A. G. Phillips, head of the poultry department of Purdue university. In the spring when birds get onto free range and in the summer when they utilize the entire farm for exercise, it is a common practice to reduce the amount of mash containing protein and depend upon the grain as the large part of the feed to be supplied by those who keep poultry.

As the weather warms up, birds do not need as much heat supplied by the grain as they do in the winter. Consequently the grain consumption should naturally be reduced and mash consumption increased. In order to see that the birds eat more mash as the season progresses it may be necessary to feed practically no grain in the morning. If the Purdue mash of 50 pounds bran, 50 pounds middlings and 30 pounds tankage is used, the proportion of grain to mash in the spring should be two to one and in the summer one to one, or equal parts of grain to mash.

As a rule egg production begins to slump as soon as warm weather arrives, but if the mash consumption increases the slump will not be so great. The summer production can be very high and consequently very profitable. On farms where much waste grain is available it may be wise to confine the birds until about ten o'clock in the morning, thus compelling them to eat mash before they are permitted to roam over the farm. High mash consumption is absolutely necessary to insure summer egg production.

Green Feeds and Water Essential for All Hens

It is absolutely essential that layers be furnished green feed of some kind. The question of how to supply this green feed must be decided by the individual. For maximum egg production the bird must have access to fresh clean water at all times, which should neither be too hot nor too cold. One hundred hens in good laying condition should consume from 12 to 24

quarts of water daily, and in extremely hot weather even more. When properly fed, milk makes an excellent feed for laying hens. Skim milk or buttermilk are economical feeds and when available should be used instead of the higher-priced protein feeds such as meat scraps. Skimmed milk not only contains the valuable food nutrients, but it is in the form that is easily digested. Sour milk is preferable to sweet milk, since sweet milk when fed may not all be consumed before it sours, thus causing the fowl to have sweet food at one time, and then sour immediately following, which is not advisable. Furthermore, sour milk contains an acid that is said to be a benefit in controlling bowel troubles.

Grit in some form is very essential to the health of a flock and also means economy in feeding. It is also to be remembered that shells are just as important as any other part of the egg. A large amount of lime is used in building these shells. Unless some form of lime is supplied, hens laying heavily will not secure a sufficient amount to manufacture the shells.

Corn Gluten in Ration

Corn gluten feed makes an excellent addition to the ration, and may be procured through almost any feed store. It is highly palatable and may be fed to advantage in the dry mash with other feed, such as follows: One hundred pounds of cornmeal, 100 pounds of bran, 100 pounds of white middlings, 100 pounds of ground feed, 100 pounds of corn gluten feed, 100 pounds of meat scrap, 6 pounds of charcoal, 6 pounds of salt.

Poultry Hints

Keep a good, strong padlock on the hen-coop door.

Six roosters with each 100 hens should give good fertility and hatchability with Leghorns.

Ground where last year's chicks died isn't good ground for this year's chicks. Move the coops and brooders.

The Orpington is an English general-purpose breed that is winning quite a place in America. Orpingtons have white skin and produce brown eggs—an unusual combination.

A. A. Holberg, assistant poultryman at the Minnesota college farm, saves himself work in cleaning dropping boards by keeping them covered with a layer of fine sand. He says it keeps the boards more sanitary, too.

Feeding the chicks too soon causes diarrhea. The egg yolk enters the chick's body shortly before the chick hatches. The chick should have time to use up this yolk before it is given any other feed.

Soy Bean Hay and Corn Good Feeds for Horses

Soy bean hay and corn, or soy bean hay with corn and oats, are good rations for work horses and mules, Illinois experiment station finds. Soy bean straw is a good winter roughage for idle horses and mules. A small amount of beans fed in the spring helps to make a glossy coat on horses. Soy bean hay has been found to be an excellent roughage for fattening mules. Mules fed on this hay finished with exceptionally smooth coats of hair. Fattening mules also gained well on soy bean pasture.

The following varieties of soy beans were grown on the central Illinois farms that were visited: Midwest (Mongol), Ebony (Black Beauty), Peeking (Sable), Illinois 13-19, Virginia, Wilson and the A. K. Most of these varieties were selected for hay or pasture rather than for seed. Other varieties might be better adapted to other localities.

No bad results have been reported to this station from the feeding of soy beans in any form to horses or mules.

Sudan Grass Is Popular for Temporary Pastures

Sudan grass is the most popular plant we have for a temporary one-year pasture or hay crop. It is a warm weather plant and should not be seeded until the soil warms up well. Usually it can best be seeded a week or 10 days after corn planting time.

Sudan may be drilled or broadcast at the rate of about 20 to 25 pounds of seed an acre. It makes an excellent crop to seed in old feedyards, in the hoglot, or in waste corners. Hogs and cattle relish it as a pasture and where properly cured it makes good hay.

Sudan grass stands dry weather well and so is a good crop to supplement the native pastures as it will be green when other pastures are brown. Sudan grass is not a soil builder and will not improve the soil as will sweet clover and alfalfa. It makes a fairly quick growth and ordinarily is sure to make a stand. Its heavy growth and drought resistance make it a popular crop.

Add Some Timothy Seed in Sowing Sweet Clover

Sweet clover may be sown as a single crop, but better results would be obtained by using 2 pounds of timothy and 20 pounds of sweet clover seed per acre. The sweet clover seed should be put through a scarifying

machine, in order to increase the percentage of germination. The clover and timothy seed may be sown with two bushels per acre of an early variety of oats. A light top-dressing of manure, when preparing the ground for oats, will ensure a better crop of grass and will not injure the oats, unless the soil is very rich. The white clover may be pastured moderately during the fall, but should not be pastured too closely late in the season.—C. F. Curtiss, Iowa State College.

Wet Feeds for Chicks

A few breeders say they have good results with wet feeds for baby chicks. Since many breeders fall with this system, we do not recommend it. Clean dry grains after the rolled oats becomes offensive to the chicks is the safest feed. Sour milk is very important in the feeding rations of baby chicks.

Origin of Pekin Duck

The Pekin duck is of Asiatic origin, and was imported to this country from China, about thirty years ago. A traveler who saw them about the streets of Peking mistook them for small white geese at first, but upon finding them ducks, was so impressed with their snow white plumage and noble carriage that he secured some of their eggs. They were brought to Hong-Kong and hatched, and in due time the birds were shipped to New York.

Pesky Little Beetle Is

Cause of Immense Loss

Can you imagine that a little insect pest called the cucumber beetle could cause a loss of \$3,000,000 to \$5,000,000 annually to the cucumber crop of the United States. This insect not only injures the plant by feeding, but carries bacterial diseases which are injurious to many other plants.

Do you want this loss to go on in the future? Your answer would be "No." You can become best acquainted with its control by reading bulletin 355—"Nicotine Dust Kills the Cucumber Beetle," by J. E. Dudley of the Agricultural Experiment Station, Madison, Wis.

This bulletin explains how nicotine dusts are made and used in the most efficient and profitable way. It will also tell you how much of the dust to apply to the acre, and the manner in co-operating with your neighbors in using it. Now is the time to send for this free bulletin and learn to kill the most dangerous enemy of the cucumber, the striped cucumber beetle.

FARM NOTES

The velvet bean works well in double harness with corn.

Clean, fresh water is essential to the proper growth of animals.

Yes, a real dirt farmer loves his dirt and protects and improves it.

Make garden work easier by the use of a good wheel-row cultivator.

Spring is a good time to peel bark from young trees which you want to use for fence posts.

Nitrate of soda is advisable as a fertilizer which will keep the grass growing rapidly.

Whatsoever a man soweth probably won't come up well unless the ground is properly prepared.

Potatoes require much work and attention and, like other worth-while things, pay back most when they receive it.

One sure method of building up the soils now in small grains is to follow with a crop of cowpeas or soy beans, or even velvet beans.

The roots of any plant set should be given plenty of room. Be sure that the soil over the roots is firm, but leave the top soil loose.

The Ootootan variety is the best soy bean for hay except on land infested with cowpea wilt. In this case the Laredo variety should be used.

CREAM RIDGE NEWS

Rolland Southwick went to Lewiston, Tuesday, on a business trip.

Darwin Tarry was a visitor at the H. Southwick home, Saturday.

Mr. and Mrs. J. Hoppe of Southwick visited at the F. S. Vaughan home, Sunday.

Mrs. F. S. Daggett and son, Glen, went to Southwick to visit her daughter, Mrs. I. Helton.

Mr. and Mrs. R. Bonner of Cavenish have moved to Teakean.

Mr. and Mrs. Ed Bloom and family and Mr. and Mrs. E. C. Graw of Orofino, were dinner guests at the W. J. Green home, Sunday.

LINDEN LOCALS

Dr. Watts of Nezperce was called to see Mrs. Farrington, Thursday. He was accompanied from Southwick by Mrs. Farrington's father, Wm. Berriman.

Mrs. Stuart Wilson and son, of Long Meadow, spent last week at the home of her parents, Wm. Zimmerman.

Mr. and Mrs. A. W. Longfellow

were shopping in Kendrick Friday.

Mr. and Mrs. Linderman visited at the Gus Farrington home, Thursday.

A large crowd gathered at the Zimmerman home, Saturday evening to charivari Mr. and Mrs. Oscar Torgerson, who returned that day from Lewiston. They were treated to cigars, candy and nuts and spent a very pleasant evening, after which they departed for their respective homes, wishing the happy couple a long and happy wedded life.

Aunt Carrie and Arley Allen and Eva Smith spent Sunday at the Kelberg home near Troy.

Mr. and Mrs. Claud Pippenger and family, Mr. and Mrs. George Garner and family and Mr. and Mrs. Edgar Bohn spent Sunday at the McPhee home.

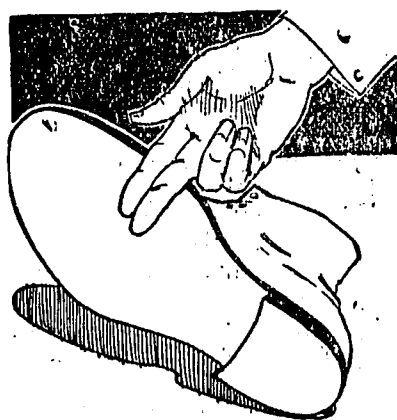

C. E. Harris, Lester and Clarence Weaver went to Troy the first of the week to work in harvest.

The ladies of the sewing club met at the home of Eva Smith, Friday afternoon and organized a club to carry on the community club work of the extension division. Mrs. Winegardner was elected president and Eva Smith, secretary-treasurer. Those present were Mesdames Fry, Weyen, Lou and Addie Alexander, Whisler, Bohn, Lyons, Harris, Vaughan and Sylvia Jenks.

Mrs. Frances Stevens spent Thursday and Friday at the Gus and Frank Farrington homes.

Mrs. Oat Stone and children arrived from Lewiston, Sunday to visit at the A. Alexander home.

Mrs. Sylvia Jenks returned to Lewiston, Sunday after a weeks visit with her daughter and family.

GLEANINGS

A. C. Deter will be busy for the next few weeks installing a bean and pea cleaner for the Farmers Union at Moscow. The cleaner will be shipped from the Byrne's warehouse in Kendrick.

Mr. and Mrs. G. G. Oldfield and son, Max, drove down from Pullman to visit at the home of Mr. and Mrs. Joday Long. Miss May Seals of Portland accompanied them from Pullman to visit at the Long home during her vacation. She has a position with one of the big department stores at Portland.

F. Corish, local tailor, received the equipment for his shop the first of the week and is now ready for business. He has all the necessary machinery for tailoring and for cleaning and pressing clothes. It is the best equipped tailor shop that has ever been installed in Kendrick. It will be a great convenience to have the shop here and the best way to keep it here is to patronize it.

Mr. and Mrs. S. P. Callison went to Spokane Monday where Mr. Callison will take medical treatment for some time.

N. E. Ware and A. W. Jones of Bear ridge bought the Beriman & Hewitt threshing machine, which has heretofore been operating in the Southwick community. Ware & Jones will use the machine for threshing their own crops this season.

If you don't register on or before August 2, you can't vote at the primary election.

Mr. and Mrs. John Nankervis of Moscow visited a short time Sunday afternoon at the Geo. E. Knepper home.

If you wish to vote at the coming primary election you must register on or before August 2. Do it now and you won't forget.

The afternoon Spokane train, due here at 1:20 was nearly three hours late, Monday. The engine was derailed at Bovard.

Billy Behrens broke one of the wheels of his Ford truck this week. He wanted to bring a load of wheat to Kendrick without delay so he made a disc wheel from a double thickness of pine boards. He brot a load taxing the capacity of the truck and the wheel stood up as well as a "boughten" one. He is considering the advisability of building three more disc wheels to match the one he made.

Kester Dammarell has accepted the position at the Farmers Bank which has formerly been filled by Delbert Riggie. He started on his new duties the first of this week. Mr. Riggie gave up his position here as he expects to leave Kendrick in the near future. He has another position in view.

Miss Dora Vincent, local telephone operator, purchased a new Overland runabout from the Kendrick Garage Co. this week. It is a Light Four model.

The Garner threshing rig was brought through Kendrick last week from Cedar Creek and will be used this season to thresh the grain on the Martin Thomas and Wm. Cox ranches. It will be started Monday of next week.

Mr. and Mrs. Ira Gentry and Henry Emmett returned last Saturday afternoon from Craig Mountains, near Forest, where they secured 14 gallons of huckleberries. They reported that berries in that section were quite plentiful.

Mrs. E. E. Bechtol and children of Moscow are visiting at the home of Mrs. M. A. Deobald on American ridge. Mr. Bechtol took his Sunday School class to Elk River for a few days camping and fishing trip.

Dick Fenton, who left Kendrick about four years ago, visited here with friends Tuesday afternoon. He has been spending the past two weeks with his uncle, A. E. Wilcox, at Orofino. Dick was in the marines for three years and received his honorable discharge last June. Since that time he was in California and expects to return there soon. His brother, Ralph, who had a good position in a New York bank for a number of years, is now a bond salesman and is doing well.

Henry Mielke, who is with the U. S. internal revenue department and has been stationed at Chicago for some time, has been transferred to Philadelphia. He is making a good record in his department.

The Benscoters on American ridge are threshing fall grain with their combine this week. One field of Jenkins Club fall wheat on straight summer fallow ground made a yield of between 30 and 35 bushels to the acre. Frank Benscoter stated Wednesday that there was much less

smut in the wheat raised on straight summer fallow than on that which was raised on ground that had been in beans last year.

K. D. Ingle brought a sample of oats to town that looked promising for a good yield on the Ingle ranch. Five heavy heads had developed from the one stool, the longest measuring 15 inches. Mr. Ingle stated that the field showed rather a light stand but on account of the heavy heads he expected a fair yield. Before the recent rain he said he did not expect to get the seed back.

Arthur Wegner of Cameron suffered a badly injured hand the first of the week while leading a horse. The horse became frightened and pulled back, causing the end of a snap to tear its way across the palm of Mr. Wegner's hand clear to the bone. It is hoped that the wound, tho a very painful one, will not impair the use of the fingers of the injured hand.

A. Wilnot returned the first of the week from a business trip to Wallace.

Mr. and Mrs. James Kayler of Peck visited Mrs. Kayler's parents, Mr. and Mrs. F. P. Benscoter on American ridge, Tuesday.

Register today or tomorrow so you can vote for G. F. Walker for commissioner. Tomorrow (Saturday) is the last day to register.

A report came from Fairview on Potlatch ridge yesterday morning that 125 acres of wheat on the Robert Heimgartner place averaged 40 bushels to the acre. This is the heaviest yield so far reported.

The school board at Deary let a contract last week for the construction of a new high school building costing \$18,114.00. The building is to be completed by November 1.

It has been reported that parties are known who have been shooting birds out of season. If this practice is not discontinued names will be reported to the deputy game warden of the county and prosecution will follow.

A number of Kendrick people drove to Lewiston Wednesday evening to take in the circus. Judging from comments expressed the following day the snow wasn't up to standard.

Charles McKeever drove down from Coeur d'Alene yesterday

afternoon for a brief visit with his son, Dr. McKeever. He came by way of Lewiston and spent a day with his daughter, Mable.

Mr. and Mrs. J. W. Davis and daughter drove to Spokane last Friday to consult a specialist regarding Miss Opal's condition. Mr. and Mrs. H. P. Hull accompanied them to Spokane.

Miss Etnel Custer and Miss Helen Mielke left yesterday afternoon for Spokane where they have employment.

Mrs. Leeper arrived from the coast the first of the week to visit friends in the Cavendish section. She spent Wednesday in Kendrick with Mrs. Rowe at the George Wright home.

Frank May of American ridge was able to be up for a while yesterday morning. He has been quite seriously ill for some time.

Lester Crocker bought two hound pups recently to take the place of "Old Ben", who is slowing up, on account of old age. Ben has chased many a coyote to his death in years past and has a good many scalps to his credit.

Pete Stump got quick action on his fire insurance this week after the loss of part of his grain, Tuesday when the separator which was threshing on his place caught fire from a smut explosion. He phoned the Kendrick State Bank at 5:30 the evening of the fire and had the check covering the loss at 6:30 the following evening.

CRESCENT CLIPPINGS

Mrs. Axel Ekman, Mary and Ida Forest were Southwick visitors one day last week.

Mr. and Mrs. F. A. Burke and family were in the neighborhood, Friday, looking after their property here.

Mr. and Mrs. Frank Souders and family were in Southwick on business, Saturday.

Mr. and Mrs. Fred D. Hamond of Orofino were Sunday visitors at the John Darby home.

Marion Souders was quite ill last week but is better at this time.

Lodge stationery attractively printed at the Gazette office. tf
