

## Latah County News Paragraphs

### Items of Interest Taken From Neighboring Papers

Dr. W. H. H. Forsyth, superintendent of the Moscow district of the Methodist Episcopal church, was appointed recently at the Columbia river section conference of the church, new superintendent of the Walla Walla district of the church, and the family home will shortly be moved to Yakima. Dr. Forsyth stated Monday in discussing his new field of work.

The appointment of Dr. Forsyth to the Walla Walla district is in the nature of an advancement, as the Walla Walla district is in many ways the outstanding division of the conference, and it was thought best by Bishop Johnson to give the work there into the hands of an experienced man. Within this section there are half a dozen fine new churches. The new edifice at Yakima, built recently, was erected at a cost of \$160,000, and is one of the finest structures of its kind in the northwest.

Dr. and Mrs. Forsyth with Helen, their daughter, returned a few days ago from their trip by auto to the conference meeting at Wenatchee. Mrs. Forsyth and Helen spent several days in Seattle with a sister of Mrs. Forsyth who is on her way to Amsterdam, where she resides.

Helen, a senior in the University of Idaho, will remain to complete her course, living on the campus.—Star-Mirror

Fire, originating between the ceiling and roof from either a defective flue or electric wire, destroyed part of The Troy News plant Thursday morning about eight o'clock. When the fire was discovered by the owner the fire had quite a start, but prompt work by the volunteer fire department soon had the flames under control. No sooner had the siren sounded than people rushed from all corners and began carrying out whatever came handiest, with the result that practically all from the front office was carried to the street. It was necessary to cut holes into the roof to get at the flames right, but by faithful work all was subdued in short order. The damage to the roof and the machinery and type being soaked with heavy streams of water poured into the building will run into several hundred dollars. On account of not being able to secure an adjustment of the insurance, which will cover all loss, and the office being in a badly damaged condition, the News is this week being put out at the Star-Mirror office at Moscow.—Troy News.

The big crusher to be used in the resurfacing of the North and South highway from the Washington state line to a point some three miles south of Genesee, has been put in place and within a short time the work of resurfacing will be commenced and pushed to completion. When finished the road from Genesee to the top of the Lewiston grade will be in fine shape, but the Lewiston hill is in a deplorable condition in many places, especially at many of the sharp turns and from the Washington state line to the altitude post. It is a "hard road" in more ways than one.—Genesee News

Folks eat apples while riding on the railroad and throw the cores out thru the car window. If the cores land in sheltered places the seeds sprout and trees grow along the right of way. Such trees are to be seen every few rods apart along the W. I. & M. tracks. Some of them are bearing.

Being seedlings, many of these trees do not bear good fruit. But now and then there is a seedling that produces finely flavored apples—in fact some of

## Truck Over Grade

While hauling a load of wheat down Wandcheer gulch grade last Sunday evening, Phil Elvy had a narrow escape. One of the rods of the steering gear gave way as he was making a curve on the grade and the truck went over the bank. Phil jumped just in time to save himself. The truck rolled over once and landed at the bottom of the canyon 75 feet below. Monday afternoon Phil had the truck towed to Kendrick and the following morning it was again ready for business.

## Heavy Yield of Smutless Wheat

### Statement Made by E. W. Eaves of Lewiston

Concerning a statement made by Dr. E. F. Gaines, cerealist of the Washington State College, published in last week's Gazette, E. W. Eaves, vice president of the Vollmer Clearwater Co., writes the following information concerning the smutless wheat raised near Craigmont:

We notice in your issue of September 12th, comments from the "cerealists" from the Washington Experiment Station on the smutless wheat that we are putting out. We have also had a visit from the "cerealists" concerning this wheat and we appreciate his position fully.

We have never made any claims that the smutless wheat that we are recommending is the wheat that has been named Redit. He stated to us, however, that this wheat that he refers to as Selection "C" and that has been grown by Mr. Warnicutt for the last five years at Craigmont was practically the same type of wheat as Redit and that he did not think they could be told apart side by side after they had been threshed. He also stated that their experiments had demonstrated that this Selection "C" yielded within two or three bushels on the average as heavily as Redit and that Selection "C" yields on the average the same as 128 Club and Triplett wheat which are two heavy yielding wheats.

A small patch of Redit wheat was grown along side the crop of Selection "C" this year and it was claimed that the Redit wheat ripened a week or ten days later than this Selection "C" wheat. The Washington Experimental Station however claims that Redit ripens fully as early as this other wheat.

The Selection "C" wheat stood upon heavy land with a 41-bushel yield during the season of 1913. The crop this past year went 30 bushels to the acre. Inasmuch as there will be no commercial quantity of Redit wheat on the market for at least two years we can see no reason why the growers should not have the advantage of this smutless wheat that was grown in quantity by Mr. Warnicutt during the last few years. Whenever Redit wheat is on the market in commercial quantities if it is demonstrated that it is superior to this Selection "C" it will be very easy to change over and use the Redit seed.

So far as the qualities of the wheats are concerned, he freely admitted that both of these wheats are entirely immune to smut. As there is an enormous loss in this territory every year on account of smut we feel that even if this selection "C" is not quite equal to Redit wheat that our farmers should have the advantage of a smutless wheat at the earliest possible moment.

Our best varieties were propagated from seedlings that grew "wild" and were accidentally discovered by nurserymen who recognized their value and proceeded to perpetuate the new found fruit by budding or grafting.—Deary Press.

## Bargain Festival Here Next Week

### Three Big Days of Special Price Concessions

For three days next week, Thursday, Friday and Saturday, the merchants of Kendrick will feature Bargain Days, at which time they will make special prices on various articles of merchandise for the benefit of their customers. These bargains will be REAL bargains and will be sold at less than cost prices. In addition to these special marketing opportunities there will be a number of interesting entertainment features.

Thursday morning will open the bargain buying events. Each store will have something worth while as a money saver to you. In the afternoon from 1 to 4 p. m. there will be a free picture show at the New Kendrick Theater. This show is paid for by the business men of Kendrick and they cordially invite you to attend. It will be a good comedy-drama and will furnish entertainment for you and the children. The first reel starts at 1 o'clock sharp.

Friday there will be a lecture at 2 p. m., at which time Dr. W. J. Spillman, Agricultural Economist of the U. S. Department of Agriculture, will speak at the New Kendrick Theater. Other prominent men from the extension department of the university will also be present. You are cordially invited to attend this lecture which is free to the public.

Saturday there will be a free auction sale beginning at 1:30 p. m. Col. N. R. Shepherd will be the auctioneer in charge. He will sell anything you don't want and will get you a good price for it for nothing. Bring anything you have from a Guinea pig to a grand piano. It will be sold for cash and you get the money—all of it. Be sure to bring your stuff in the morning and list it with J. G. Gardner, who will hold forth somewhere near the Fraternal Temple building. He will be the clerk of the sale.

Saturday afternoon at 3:30 Congressman Burton L. French will deliver an address. This will be worth your while. Congressman French is too well known in this locality to need any comment as to his ability as a speaker. He is always entertaining and is a brilliant speaker. Don't miss this lecture.

### STONY POINT NEWS

The Stony Point school opened Monday, Sept. 15, with Miss Dorothy Eoyd as teacher.

Cletis Hoisington and father spent several days last week in the Colton country hunting horses to buy. They returned home Friday afternoon with three head of nice young horses.

Cushman Davis was a visitor in our locality, Tuesday night.

Chas. Hill and John Kite are threshing beans this week. The rest of the Potlatch bean raisers are cutting and piling beans at this date and all report good beans.

Lloyd Eckman and George and Clarence Dygert went by truck to Southwick, Sunday, after a load of pitch.

Born to Mrs. and Mr. Cletis Hoisington, Friday morning, Sept. 12, an 8 pound son.

Mrs. George Dygert spent the first of the week with her mother, Mrs. P. M. Johnson of Juliaetta, who was quite sick.

George Frederickson was a Kendrick visitor, Sunday.

Clarence Dygert dug spuds for Fred Johnson, on the I. H. Evans place, Friday.

Fred Johnson and Jess Oylear of Lenville, made a flying trip by truck to the Bill Zumhofe home, Sunday evening.

A number of Masons from this locality attended the meeting of the Idaho Grand Lodge at Lewiston this week. The meeting was held Tuesday, Wednesday and Thursday. M. B. McConnell represented Kendrick Lodge No. 26.

## Farm Experts Here Next Friday

### Will Speak on Agricultural Problems of the Day

Appointments of community chairmen, announcement of farms where "farmyard" meetings are to be held and the traveling schedule of the agriculture tour featuring Dr. W. J. Spillman, agricultural economist with the U. S. department of agriculture, for northern Idaho, has been made by E. J. Iddings, dean of the University of Idaho college of agriculture and director of the university extension division, who is in charge of the Idaho division of the northwest tour. Cooperating with Dean Iddings is the U. S. department of agriculture and the agricultural bureau of the Spokane chamber of commerce, the organization sponsoring Dr. Spillman's western trip.

Since first announcement of Dr. Spillman's coming was made several weeks ago, numerous communications have been received by Dean Iddings, all expressing praise for those responsible for the tour. These communications, together with other manifestations of interest, make those in charge of the Idaho tour feel it will be one of the most important agricultural events in many years.

The party will include, in addition to Dr. Spillman's and Dean Iddings, the following heads of departments of the university college of agriculture: F. W. Atkeson, dairying; J. E. Nordby, swine; R. T. Parkhurst, poultry; also J. W. Bradley, chairman, agricultural bureau of the Spokane chamber of commerce; C. E. Arney, Northern Pacific Railroad company; F. W. Clemens, assistant to the managing editor of the Idaho Farmer; W. P. Romans, secretary of the Spokane chamber of commerce agricultural bureau.

The party will leave Spokane Sunday morning, Sept. 21, to be joined at Moscow by the University delegation. Cottonwood and Grangeville meetings will be held Monday. The party will stop overnight at Grangeville, continuing to Craigmont and Nez Perce Tuesday, stopping at Nez Perce the third night. Winchester and Lapwai are on Wednesday's program, bringing the party back to Lewiston Wednesday evening. Thursday's meetings will be at Lewiston and Genesee, Moscow will be reached late Thursday evening. Friday the party will visit Kendrick and Troy, again returning to Moscow for the night. Saturday meetings will be held at Moscow and Potlatch, closing the tour for Idaho.

A. H. Daubenberg is community chairman for Kendrick and the "barnyard" meeting will be held at the Wm. Cox farm in the morning at 9:30.

In a recent letter Dr. Spillman said:

"I hope in this series of lectures to give the farmers of the Inland Empire my ideas as to the future of the various farm enterprises that are adapted to that country. I want to tell them what they may expect in the matter of prices for wheat. I want also to show them what the probable future is for fruit growing enterprises, truck farming and the various livestock enterprises, such as dairying, beef cattle and sheep, also poultry. I shall deal with the adaptability of these enterprises to deal to some extent with the problem of maintaining soil fertility, for unless that is done the agriculture of any region must ultimately fail."

Mr. and Mrs. C. H. Sparber and little daughter, Vera, of Centralia, Wash. who were here last week to attend the funeral of little Herbert Sparber, left Saturday morning for their home, accompanied by Erma Sparber, who will attend school there.

## Bought Juliaetta Record

Wm. Turner of Juliaetta has taken over the Juliaetta Record and will have charge of its publication, beginning this week. Mr. Turner is an invalid but it is thought that with the help of his oldest son he will be able to handle the work necessary to put out a local paper. The print shop will be located in Mr. Turner's home. About 15 years ago Mr. Turner worked in the Gazette office for a year or two for Geo. Hancock.

## Newsy Notes From Southwick

### Written for the Gazette by Special Correspondent

Mr. and Mrs. Leslie Triplett and Aldon McCoy attended the fair at Lewiston, last Thursday.

Miss Ivy Triplett returned home from Spokane, Sunday, where she spent the summer.

Mr. and Mrs. Hoppe went to Pomeroy, last Thursday, to visit Mr. Hoppe's mother, returning home Saturday evening. Miss Nadine McCoy accompanied them as far as Clarkston, where she visited with her grandmother, Mrs. Locke.

Mr. and Mrs. Asa Calvert, Miss Eleanor Dick and Miss Claussen went to Lewiston, Friday, returning home Sunday.

Scarlet fever has again broken out. Mrs. McIver and two children and Floyd Reece and wife all have it.

Mr. and Mrs. Longeteig and son, Johnny, are quarantined with small pox.

Frank Daggett's mother, sister and nephew of Passadina, Calif., arrived Sunday, for a visit. They left for home Tuesday morning.

Homer Hayward threshed his beans the first of the week. They averaged five and one half sacks to the acre.

Mrs. Ray Southwick visited with her parents, Mr. and Mrs. King, Sunday.

J. R. King went to Lewiston, Tuesday, having been called as a jurymen.

Amos Mathews has gone to Moscow where he expects to attend high school.

John Stalnaker and Frank Wilmot have come home from Mason Meadows, where they have been stationed on the fire patrol all summer.

Mrs. Wm. McClelland visited in Spokane last week, returning home, Sunday.

Murray Benjamin visited at the home of Wm. McClelland, Saturday and Sunday.

Mr. and Mrs. Hoppe and Kurt Davis were callers at the Ben McCoy home Sunday afternoon.

### TEXAS RIDGE

The Union church caught fire last Friday and burned to the ground. When the fire was discovered it was too late to even save the organ.

Mr. and Mrs. Al LaBolle were Sunday guests at James Miller's.

Henry Morris came up from Clarkston, Sunday and is spending the week at the T. LaBolle home.

Mrs. Andrew Abram and children are visiting her parents, Mr. and Mrs. John Eatmon.

Chas. Carlson spent the week end in Lewiston.

Mrs. Carl Gustafson is at a Lewiston hospital, where she is recovering from an operation.

Miss Kidney of Pullman took up her duties as teacher in the Elwood school, Monday. Miss Gladys Halpen accompanied her here for a few days stay.

Mr. and Mrs. John Eatmon mourn the loss of their infant boy. He was buried in the Elwood cemetery, Monday.

Mr. and Mrs. Walter Pierce visited at the George Drury home, Sunday.

Bean threshing has started on the ridge.

Mr. and Mrs. Jake Alber and family were business visitors at Potlatch, Saturday.

The Union church building south of Deary on Texas ridge was burned the first of the week. It is thought the building caught fire from a brush fire nearby.

## Kendrick News 20 Years Ago

### Item Taken from the Gazette Published in 1904

Messrs. Shultz and Grasser of N. Dakota unloaded two carloads of goods here this week and moved them to Cameron where they have located.

J. F. Brown is sick with typhoid fever.

John Hutchison has leased his farm and orchard to C. G. Compton for five years and will shortly start for California where it is hoped he will recover his health.

County Attorney Stillinger was in town Wednesday with his bride (nee Miss Olson). Will is looking after his political fences and doing it thoroughly.

Miss Pearl Davis left Monday morning for Viola where she has been engaged as teacher of the school this winter.

Pete Thompson has sold his magnificent ranch on the brakes of the Clearwater. The consideration we believe was \$23,000.

The Kettenbach Co., so agent Bibb informs us, will shortly install a cleaner in their warehouse, and have practically ceased shipping until the same is in operation.

The organization of the Fraternal Temple Co. insures the town of an up-to-date lodge room and public hall. It cannot help but be a paying investment, a fine lodge home and a monument to the enterprise and public spirit of the societies and their members.

Clarence Bechtol, while driving a livery team for Stanton & Hill, from Cameron here Thursday night went over the grade, buggy and driver, rolling some 15 feet. The result was a cracked arm and a broken buggy, the horse escaping uninjured. Mr. Bechtol attempted to jump and catch the horses heads, but his foot slipped, caught in the wheel and he was thrown down with the rig. While a bad hurt has ensued it might easily have resulted in a more serious one.

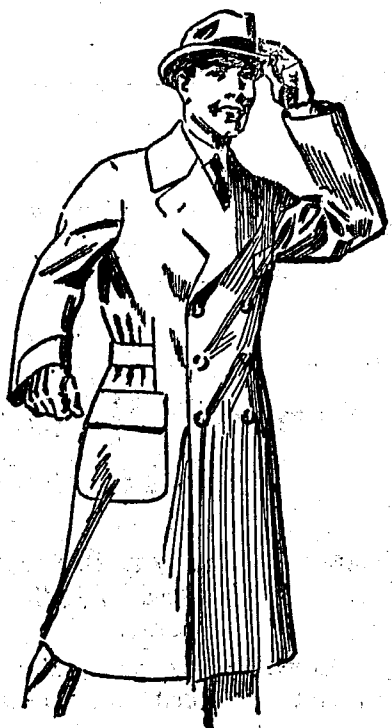

At the home of the brides mother, near Leland, Mrs. Bertha Koch and George Lenz were united in the holy bonds of matrimony by Rev. George Finke. After the ceremony, which was very impressive, an appetizing dinner was served.

The afternoon was spent in merry-making and in the evening a dance was given the young people. Mr. Lenz is one of the Potlatch's most enterprising young farmers, and the young couple will make their future home near Kendrick. Following is a list of the prizes given the bride and groom: G. E. Talko and wife, china set; Fred Gehre, nursing bottle; Mr. and Mrs. Flays, table linen and bedspread; Ed Gertje, dozen napkins; A. W. Lee and wife, counterpane; R. Rineheart, glass set; Henry Schrebe, half dozen towels; Mr. and Mrs. Gehre, glass set; Mr. and Mrs. Johns, set tinware; Mr. Vetter and Dr. Lenz, a rocker; Chris Maier, \$5 gold piece.

### Goes Back to China

Ah, Gng, the aged Chinaman, who for the past 34 years has resided here, is now on his way back to China. He was taken to Seattle last Friday by George Mong, a Chinese resident of Lewiston. Gng will spend his remaining years in China where he has a wife and family. Gng's eyesight failed about a year ago and he was unable to look after his truck garden and poultry. He disposed of most of his possessions and gave up his garden work. Money was furnished by the local Red Cross and business men of Kendrick to send him to Lewiston where his eyes were treated by a specialist and his sight somewhat improved. The old shack, where he lived, was torn down last week and the landscape thereby beautified to some extent.

## Now Showing Latest Styles in Black Bear Overcoats

These coats are made of the best of materials and the tailoring is the best. Make your selection from our brand new stock.

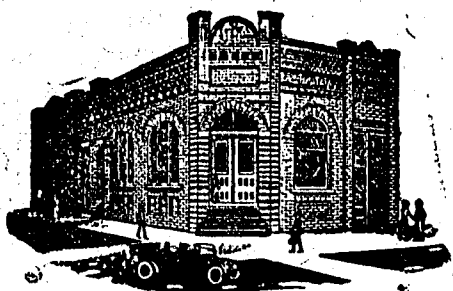

We didn't carry over a single coat last season. Prices at  
**\$18.50 \$22.50 \$25.00**

A. H. Daubenberg, Cashier  
**Kendrick, Idaho**

### Garget Often Is Cause of Great Loss in Herd

Garget often causes considerable loss in the herd. When an animal is found to be suffering from this trouble she should not be milked till the last as the disease may be carried on the hands. After milking the hands should be washed with a good disinfectant. Milk from the diseased quarters should not be milked on the floor but milked into a pail and disposed of. Cows suffering from it may be treated with the following mixture: Mix eight ounces of a good lubricant, eight ounces of wool fat, two

fluid ounces belladonna, two fluid ounces extract pokeweed. Warm and mix. Massage udder thoroughly. Feed one tablespoonful of powdered pokeweed and one tablespoonful of saltpetre three feeds, stop three feeds and continue again if necessary. Diseased cows should be isolated from the rest of the herd.

### To Mend Pots Quickly

If you have a pot with a pin-hole leak take the protruding end of an old snap fastener, push it through the hole and hammer it flat on the other side and it will lengthen the life of your pot or pan.

### THE KENDRICK GAZETTE

Published every Friday at Kendrick, Idaho, by

Ralph B. Knepper

Subscription price.....\$1.50

Entered at the post office at Kendrick as second class mail matter.

Foreign Advertising Representative  
THE AMERICAN PRESS ASSOCIATION

### CAMERON ITEMS

Mrs. H. Plomer and sons, Will, Erwin and Arthur spent Sunday at the Oldag and Blum homes.

Mr. L. Oldag left for Lewiston, Tuesday, where he will serve on the jury.

Wilbert Brunsiek and Charley Harris motored to Lewiston on Wednesday, where they attended the fair.

John Lettenmeyer is moving the old school house to the Will Black place this week.

Born to Mr. and Mrs. Fred Newman, Thursday, a big boy.

Mr. and Mrs. Herman Meyer and the Blum family were Sunday evening callers at the Ernest Schmidt home.

Rev. Wittrock of Walla Walla left for his home, Sunday evening, after preaching the Missionary sermons at the Lutheran church.

### LENORE LOCALS

Everybody on the ridge is busy threshing beans.

Mr. and Mrs. W. J. Green and family spent a few days in Lewiston last week.

Misses Alice and Lois Tarry, Cleo Southwick and Eunice Brown took in the fair at Lewiston last week.

Mrs. J. P. McAdden has gone to Orofino where she is sending her children to school.

Mrs. W. E. Tarry of Cavendish is going to move to Orofino the last of the week where her daughters, Alice and Lois and Cleo Southwick will go to school.

Miss Fern Green and Opal Yates were married, Monday, and a charivari was given them Monday evening. A large crowd was present and a good time reported.

Mrs. I. Hetton of Southwick has been visiting her mother, Mrs. F. S. Daggett.

Mr. and Mrs. U. F. Hersey were Lewiston visitors last week.

### BIG BEAR RIDGE

A large number from here attended the Lewiston fair last week.

Miss Agnes Jones began teaching on American ridge, Monday.

Miss Betsy Kleth was a Moscow visitor the first of the week.

Taney school began Monday with Miss Opal Jones as teacher.

Mrs. Katherine Kelly of Kendrick is spending the week with Miss Johanna Hooker.

Mrs. Ralph Griffith of Ontario, Oregon, is visiting at the home of her sister, Mrs. Leonard Davis, near Leland.

Ida and Elsie Morey, Lizzie Jones Allie and Claribel Moore Gerald and Dwight Ingle and Lloyd Ware have entered the Kendrick high school.

Miss Johanna Hooker entertained the Ladies Guild, Wednesday afternoon.

Preaching services at the Lutheran church, Sunday, Sept. 21st, at 10:30 a. m.

### Markets for Poultry

Farm people are always a busy people, but they are not usually so busy that they cannot spare the time to find good markets for their poultry and poultry products. You can often realize a few cents per pound more for the cockerels by selling to some hotel, restaurant, or cafeteria than by disposing of them on the regular market. Of course, if you live close

to a city this will be a very simple matter, but you can often find places in even a small town where you can receive premiums for quality produce.

### Operation of Threshing Machine Is Important

Several things may be wrong with a standard threshing machine when it fails to separate all of the grain from the straw. As a rule the thresherman is not so much interested in getting every bushel of grain from the straw as is the farmer whose grain he is threshing. It is a good thing for the crop owner, however, to be versed on the operation of the machine enough to know when the machine is doing good work.

There are four main causes when the grain comes through into the straw: (1) The machine is not being run at its proper speed, (2) the cylinder fails to thrash all of the kernels out of the heads, (3) the separating mechanism is not level, or (4) the blast is not adjusted properly.

### Inexpensive Fly Spray

A spray commonly used by Iowa dairymen and recommended by the dairy section at Iowa State college, is made by mixing four and one-half quarts of coal tar dip, four and one-half quarts of fish oil, three quarts of coal oil, three quarts of whale oil and one and one-half quarts of oil of tar. Dissolve three pounds of laundry soap, add the spray mixture and dilute the whole to thirty gallons with lukewarm soft water. This spray is not very expensive.

### CARD OF THANKS

We wish to thank our friends and neighbors for their kindness during our sad bereavement, also the choir for their assistance and for the beautiful floral offerings.

Mr. and Mrs. H. H. Sparber  
Walter, Erma and Orville Sparber  
Mr. and Mr. C. H. Sparber.

### METHODIST CHURCH

Miss Joy Bell will hold services at 11:00 a. m. at American ridge, Sunday, September 21 and at Kendrick at 8:00 p. m.

## International Made-to-measure Clothes

are not expensive, though one would naturally think so when they see the quality of the fabrics

### Trees as Reservoirs

Travelers' trees in Madagascar, where there is little rain, have thick leaves, which form reservoirs that hold a quart or more of palatable water.

### NOTICE OF ASSESSMENT

Office of the Stapleton Oil Company, Kendrick, Idaho, August 25, 1924.

Notice is hereby given that at a meeting of the directors of the Stapleton Oil Company, held in Kendrick, Idaho, August 12, 1924, an assessment of 5c per share was levied upon the outstanding stock of the corporation, payable on or before September 25, 1924, to G. F. Walker, Secretary, Kendrick, Idaho.

Any stock upon which this assessment remains unpaid, on September 25, 1924, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold at 7:30 p. m. at the office of G. F. Walker, October 25, 1924, to pay assessment thereon together with the cost of advertising and expense of sale.

G. F. Walker, Secretary.

### Columbia Old College

Columbia college, which was first known as King's college, was established in the middle of the Eighteenth century, and save for a few years during the Revolutionary war, it has carried on its work in the city of New York. It was the college of Alexander Hamilton, John Jay, Robert R. Livingston, De Witt Clinton, Hamilton Fish and many other outstanding figures in the history of this nation.

## Treat Your Wheat Dry With Copper Carbonate and Save

10 to 25 Per cent of your Seed and a Large Portion  
of Your Dockage for Smut

The difference between one per cent smut dockage and no dockage on approximately 34 acres of 40 bushel wheat would pay for a Calkins Improved Wheat Treating Machine in one year.

Twenty-five percent of the ordinary seeding rate of 1½ bushels with wheat at a dollar a bushel would pay for a Calkins Improved Wheat Treating Machine in one year on a seeding of 180 acres.

Dry treatment is now the standard method in the big wheat producing areas of Oregon and Washington to the west of us.

Do not make the mistake of treating your wheat any other way than with the Calkins machine.

We are distributing this machine over a wide territory and our representative in your territory is

**POULTRY****TURKEY RAISING ON  
DECLINE ON FARMS**

(Prepared by the United States Department of Agriculture.)

Turkey raising in the United States has been on the decline during the last 20 years especially as an enterprise on the general farms of the country. Formerly large numbers were raised in New England, but in recent years there has been a decided decrease in this section as well as in other parts of the country. Several causes have been assigned by the United States Department of Agriculture for the decrease in the numbers now raised. The rearing of the young stock, in some respects at least, requires more detailed attention than is the case with most other classes of poultry and turkeys have given way to these other classes. The prevalence of blackhead has been a dominant factor and responsible for the discouragement of many raisers. The birds range widely and frequently trespass upon the property of neighbors, the vexation tending to discourage turkey raising. Finally, little attention has been given the most important problems of the industry by investigators.

On the other hand, there is, according to the United States Department of Agriculture, good opportunity for further development. Turkey raising is profitable, particularly where conditions are suitable and where proper methods of management are followed. The department has issued a new bulletin on turkey raising, Farmers' Bulletin 1409, which discusses the important points of the business and offers suggestions for making the industry a more profitable enterprise.

The bulletin sums up some of these fundamental factors as follows:

To be successful in turkey raising, one must give the most careful consideration to certain fundamental factors. The turkeys, especially the growing stock, must be kept under the best possible conditions.

Free range seems indispensable, although there are a few who have made a success in raising turkeys in confinement. A more thorough test of this method is necessary, however, before it can be advocated. Certainly abundance of free range on clean soil is greatly to be preferred. Every effort should be made to keep the soil sweet and clean. This is particularly true of the ground on which the birds are fed and where they roost.

Another fundamental essential is to keep healthy and vigorous breeding stock in the best possible breeding condition. The breeding birds should get plenty of exercise and should not be fed too heavily on fattening rations. The great difficulty is to get stock that is free from blackhead, but one can at least select breeding stock based on constitutional vigor. By breeding from the most vigorous birds every year, a flock of healthy birds may be developed and maintained. Certainly much more care should be exercised in the selection of male breeders each year.

Both old and young turkeys should

be protected from dampness. In sections of the country where dampness is prevalent or where rainstorms are frequent the birds should be provided with suitable protection.

It is very important not to feed the poults too heavily, especially the first few weeks. Keep them just a little hungry.

A copy of this bulletin may be secured, as long as the supply lasts, from the United States Department of Agriculture, Washington, D. C.

**Coccidiosis Is Cause of  
Loss of Baby Chickens**

One of the serious diseases which causes the loss of baby chicks, is an intestinal disease known as coccidiosis. This disease is contagious and many chicks die as soon as they get into the flock. The best means, of course, is to prevent infection by keeping a clean place for the chicks to feed and run. The brooder should be disinfected and all sick chicks separated from the well ones, feeding bran mash and providing fresh drinking water. Destroy the dead chicks by burning.

The feeding floors, houses and brooders should be cleaned with lye and water, using one pound of lye to 40 gallons of water, and spray with a 3 per cent compound solution of cresol or some other reliable disinfectant. Medicines are of little value in the treatment of coccidiosis, but epsom salts may be added to the feed of the flock if the disease has been found. A pound of salts for each 300 to 400 chicks, four to six weeks old, can be mixed in a bran mash for one feeding. Repeat every third day until results have been secured. Pulletts require larger doses.

**Capons Are Profitable**

To the average farmer capons mean more actually than appears on the surface. Given free range, after caponizing time, and allowed to grow until conditioning time, there is no other class of chicken that can produce the same profit; corn is the principal diet for these meat producers, a cereal most available as poultry food. A hundred young cockerels can be transformed into money makers in about three hours—the resultant profit is threefold the broiler profit.

**Infertile Eggs Favored  
for Shipping to Market**

Thousands of dollars' worth of eggs are needlessly lost during hot weather. It is the farmer and poultryman who bear the cost of spoiled eggs. It is not unusual for cases of eggs to contain a few hatched chicks when they reach the produce house, and for other eggs to be well on the way toward hatching.

Incubators and broody hens are not necessary to start the process of incubation. Fertile eggs will begin to develop chicks at a temperature of 70 degrees Fahrenheit.

The way to do away with fertility in eggs is to remove all males from the flock for two or three weeks previous to shipping eggs. An infertile egg will not hatch and will keep much longer than a fertile one.

**Poultry Hints**

Swat the males and produce infertile eggs.

Sour skim milk is one of the best feeds for small chicks.

Watch for lice and mites and get rid of them as early as possible.

Inbreeding has ruined many a flock or family of turkeys. Use strong, unrelated toms every year.

Don't crowd too many poults in a coop or in a brooder—and keep them warm and dry the first few weeks. Drafts and dampness cause most losses among young turkeys.

Ground that the adult fowls and early chicks have been running over gets foul and sour. It is of special importance that young stock as well as the old birds be gotten onto new ground or on renovated ground from time to time.

Eggs contain a large proportion of water. If you want your hens to lay heavily, see that they have all the water they can drink.

It is as easy to overfeed fowls as it is to underfeed them. The happy medium can be learned only by experience and close observation.

The best way to kill off lice is to prevent them from getting a start. This is much easier than it is to give them a chance and then fight them afterward.

**Quality of Clover  
Seed Is Rated Poor****Early Offerings Are From  
Last Year's Product.**

(Prepared by the United States Department of Agriculture.)

Because the demand for crimson clover seed precedes the arrival of the new crop seed by several weeks, the early offerings are all from seed held over from the previous year.

In order to obtain direct information regarding the quality of crimson clover seed on the early market, the seed testing laboratory of the bureau of plant industry of the Department of

Agriculture has obtained from representative dealers over one hundred samples of crimson clover seed and tested them for germination. Ten per cent of the samples obtained during June of this year contained less than 65 per cent of live seed, as compared to 40 per cent of the samples similarly obtained during June, 1923.

Although the quality of crimson clover seed offered this year is better than it was last year, nevertheless, this year there is one chance in ten of getting poor seed. Crimson seed should not be planted without a previous germination test.

These samples which tested less than 65 per cent are of such poor quality that they would not be permitted entry into the United States under the seed importation act. In a sample which germinates poorly, even the live seed has not the vigor of seed of higher germination. Therefore, the planting of seed of this quality reduces the chances of getting a good stand of crimson clover seed.

**Salting Down Soft Corn  
Has Beneficial Effect**

While salting soft corn is not considered a "cure-all" the use of from 1/4 to 1 pound for 100 pounds of grain is recommended for preventing molds and to forestall heating. Tests at the Iowa experiment station indicate that the use of salt has a beneficial effect on soft corn.

After placing a layer of corn 1 1/4 or 2 feet thick in the crib, the salt should be scattered over it in the proportion indicated. When another 2 feet of corn is added, the process should be repeated.

The possibility of using salt on soft corn was suggested in 1917 by Sam Sampson of McCallsburg, Iowa. His son had used salt in a crib of soft corn and he was convinced that the corn would have spoiled had it not been for the salt. The corn was fed to hogs with very satisfactory results. Mr. Sampson told the writer that the salted corn did not freeze as hard in the coldest weather, as the unsalted corn. This was a great advantage as the corn could be fed with ease at any time.—H. D. Hughes, Iowa Experiment Station.

**Famous English Society**

The Royal Geographical Society of England was founded in 1830. Its object is to collect, register, digest and print in a cheap and convenient form such useful and interesting facts and discoveries as the society might from time to time acquire. It has always welcomed to its fellowship those anxious to further this object by their interest and support as well as those able to take a more active part in their work of discovery and explorations.

**Warrior on Motorcycle**

In a parade during celebration of the birthday of the first king of England recently, during which notable episodes of Saxon history were given one Saxon warrior and his lady rode a motorcycle.

**Right Must Prevail**

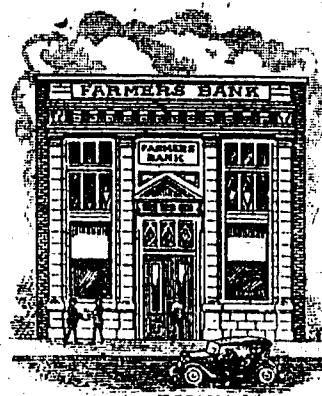

Right is the eternal sun; the world cannot delay its coming.—Wendell Phillips.

**More Play in Small Towns**

More toys are sold in towns of 25,000 or less population than in larger places and a greater number of games and puzzles are used west of the Mississippi than east of it.

**In Lieu of Screwdriver**

So often the screws in eyeglasses become loose and we have no screwdriver small enough to tighten them. A steel pen or the end of a cuticle knife will answer the purpose.

**Are You Aware**

That money in your pocket is half spent? To guard against this phase of extravagance you should maintain two accounts—a checking account for daily use and economy, and a savings account for surplus funds. This bank welcomes checking accounts in any amount and pays four per cent compound interest on savings deposits from one dollar upward.

**PUBLIC AUCTION**

I will sell at Public auction at my place on Little Bear ridge, the following described property: Sale commences promptly at 10:00 a. m. on

**TUESDAY, SEPTEMBER 30****8 Head of Horses 8**

Bay horse, 10 years, weight 1400  
Bay mare, 11 years, weight 1300  
Black horse, 10 years, weight 1400  
Black horse, 9 years, weight 1350  
Black mare, 9 years, weight 1150  
Grey mare, 13 years, weight 1400  
Bay mare, 9 years, weight 1200  
Brown mare, weight 1000

**5 Head of Cattle 5**

Jersey cow, fresh Sept. 25  
Thorobred Shorthorn cow, age 7 years, giving milk  
Guernsey cow, age 8 years, giving milk 2 months  
Jersey-Holstein cow, age 2 years, with Jersey calf.  
Red cow, giving milk one month, fresh in June

**6 Head of Hogs 6**

Male Pathfinder Sensation No. 2  
Young gilt subject to registration  
3 hogs weight 200 pounds each  
Poland China brood sow.

**Chickens**

Several dozen White Leghorns, Hanson strain  
Buckeye chick brooder, 1000 capacity

**Harness**

Set heavy breeching harness  
2 set heavy field harness  
Set light lead harness

**Farm Machinery**

8-foot McCormick binder, A 1 condition  
9-foot Peoria Drill  
John Deere land roller  
John Deere 14-inch gang plow  
Flying Dutchman 14 inch gang plow  
18 inch P. & O. sulky plow  
18 inch John Deere walking plow  
P. & O. summer fallow cultivator  
3 section John Deere harrow  
2 section John Deere harrow  
John Deere side delivery rake  
John Deere pivot axle cultivator  
John Deere Wiggle-tail cultivator  
Rock Island Wiggle-tail cultivator  
John Deere one-horse cultivator  
John Deere bean planter  
Universal bean cutter  
John Deere 7-foot disc  
John Deere wagon, army type, heavy capacity  
John Deere iron wheel farm wagon  
Buggy Light sleigh Bobsled  
Doubletrees, singletrees, log chains and other numerous articles.

**Blacksmith Outfit**

Post drill, anvil, vise, forge and other small tools.

**Household Goods**

DeLaval cream separator  
One gallon Daisy glass churn  
Four gallon Daisy glass churn  
Hoosier kitchen range  
Bay State refrigerator  
3 Iron bedsteads Heating stove  
Book case Kitchen chairs  
Kitchen table Washing machine  
Gas lamps, oil lamps and other things

**Terms:** All sums under \$20.00 cash. On sums over \$20.00, bankable notes will be accepted bearing ten per cent interest, due October 1, 1925

Check Soil Erosion  
by Bench Terracing

Gives Best Results Used on  
Any Steep Slope.

(Prepared by the United States Department of Agriculture.)  
Soil erosion, which annually results in enormous losses to the farmers of the United States, is most effectively prevented or controlled by terracing. There are two distinct types of terraces, the United States Department of Agriculture points out in Farmers' Bulletin 1386, Terracing Farm Lands, just published. For use on moderate slopes the ridge terrace is best adapted, it says, while for steep slopes the bench terrace gives the best results.

The ridge terraces are divided into the narrow-base and the broad-base types. The broad-base terrace can be cultivated and can be readily crossed by modern farm machinery without injury to the terrace; the narrow-base terrace does not possess either of these advantages, and under ordinary circumstances is less desirable than the broad-base type.

The broad-base, level-ridge terrace is laid out absolutely level. This more nearly meets the requirements of an ideal terrace than any other type. Its distinct advantage over the terrace with fall is that practically none of the fertile parts of the soil are removed from the field. It is particularly suitable for use on open, permeable soils. When used in connection with tile drains on any type of soil it unquestionably is the most effective method employed to stop erosion. The broad-base, grade-ridge terrace, generally known as the Mangum terrace, possesses all the advantages of the broad-base, level-ridge terrace with the exception of the one just stated. It may be used on any type of soil, but is recommended for use only on soils where the broad-base, level-ridge terrace without tile drainage cannot be used successfully. Copies of the bulletin may be had free, as long as the supply lasts, upon request to the United States Department of Agriculture, Washington, D. C.

Liming Treatment Will  
Increase Yield of Corn

Liming for legumes has become such a common practice that the idea is often held that these crops are the only field crops that will respond to this treatment. It is, of course, true that sweet clover, alfalfa and red clover will not grow profitably on sour soils, and lime is often necessary to establish them. Few other field crops are so sensitive that they fall without lime, but though they may not fall utterly without this treatment there are some that profit by it. Among these crops is corn.

On 18 fields of the Missouri experiment station where one and one-half tons of lime were used every six years in the rotation of corn, oats, wheat and clover, the increases in bushels of corn per acre as a result of liming go as high as 7.0 bushels with an average of 3.02 bushels. With a conservative price of 60 cents for corn, this gives a net profit of 81 cents per year on a dollar invested. Surely at the rate of 81 per cent profit, one need have no great hesitation in calling attention to liming for corn as well as to liming for legumes, especially when the effect from lime may be partly lost, since it goes on to the ground ahead of the wheat and two years pass before the corn comes round in the rotation.

## Farm Hints

Vegetables for vitamins, vigor and vitality.

Save toll and time by spending some mental effort.

Summer rations for laying hens need not differ greatly from winter rations.

A dairy cow is a good "middle man" through which to market forage crops and farm by-products.

Milking machines must be cleaned and kept clean if the milk that passes through them is to stay clean.

If your local fair was not as good last year as it should have been, start now to make it better this year.

Unless you "commune" with your neighbors in promoting the general welfare you are not a worthy member of the community.

Peat makes a mighty good barn litter, and can be prepared at a very small cost when a drained bog is accessible.

Speaking of co-operation; why not co-operate community orders through home merchants instead of sending away thousands of dollars to the mail order house?

Pure bred rams give offspring with six and one-half pounds wool clip, as opposed to two pounds from common native sheep. A word to the wise is sufficient.

Now the savory perfume of the preserving kettle, the soft gurgle of the boiling canner, and the dappled whiteness of the drying screen should be foretelling of good things to eat this winter.

The Y  
DAIRYSUDAN GRASS MAKES  
VALUABLE COW FEED

That sudan grass makes an acceptable substitute for alfalfa when the latter cannot be had is shown by the results of a recent feeding test with dairy cows at the Fort Hayes branch of the Kansas experiment station. Two lots of four Holstein cows each were fed through three twenty-day periods with ten-day transition periods between each of the experimental periods. During the first twenty-day period one lot was fed alfalfa hay and the other sudan grass hay. The hays were reversed for the two lots during the second twenty-day period and again during the third period. In addition the cows received thirty pounds of kafir silage daily and a grain mixture in proportion to their production.

When the cows were fed alfalfa hay they produced 2.5 pounds or about 13 per cent more milk than when they were fed the sudan hay. The weights of the cows showed no significant changes as a result of the change in rations. The cows seemed to prefer alfalfa to sudan as there was less waste of the alfalfa hay. Their production, however, did not fall a great deal when sudan hay was substituted for alfalfa.

Sudan grass is used a great deal as a hay and pasture crop in Kansas and the southwest. It withstands a dry summer much better than most forage crops. It is a very useful emergency hay crop in the corn belt. Under Iowa conditions fifteen to twenty pounds of seed per acre are used and the crop is seeded in early June. Farmers who have no hay ground this year can make very good use of sudan grass. Yields are from one to two tons per acre.

Flies in Summer Cause  
Considerable Annoyance

Flies cause considerable annoyance to dairy cows during the summer and not only does the irritation caused by these flies tend to lower milk production, but the restlessness of the animals is a frequent cause of inefficient milking. A good fly spray can be made from 4 1/2 quarts of coal tar dip, 4 1/2 quarts fish oil, 3 quarts coal oil, 8 quarts whale oil and 1 1/2 quarts oil of tar. Dissolve 3 pounds laundry soap in water, add ingredients of the spray and bring the whole up to 30 gallons with lukewarm soft water. This spray is guaranteed to keep off the flies and prevent the coats of the animals from becoming harsh, according to agricultural extension department specialists at Iowa State college.

Spray twice a day, in the morning after milking and in the afternoon when in the barn for silage or green food. With a portable cart, made from a half barrel with wheels attached, and a spray pump and nozzle, two men can spray 40 cows in five minutes. Thirty gallons of this mixture will spray 40 cows twice a day for ten days at a cost of one cent a cow a day.

Watch Cream Separator  
to Save All Butterfat

Cream separators that have not been tested for some time may be cheating their owners out of considerable butterfat every time they are used, warns C. A. Iverson, of the dairy department at Iowa State college. This is an avoidable loss which can be prevented by testing the skim milk and then regulating the separator to skim more closely.

Farmers who have the apparatus for the Babcock test can test the skim milk at home. A double-necked test bottle should be used and 20 cubic centimeters of skim milk used instead of 17.5 cubic centimeters as in the case of whole milk. Farmers who cannot do their own testing can have it done by their local creamery or can send a four-ounce sample to the dairy section at Iowa State college. A charge of 10 cents for the testing is made by the college.

## Dairy Facts

Keep the barn clean.

Ship cream the quickest route.

Wash the cow's udder before milking.

Use a brush instead of a rag for washing utensils.

Add fresh water to the cream cooling tank frequently.

Ship cream at least three times a week in summer and twice a week in winter.

Give cows on pasture access to salt every day. They need about one ounce per day.

A year-old dairy calf has cost its owner about \$50. If it is a scrub the owner has lost money.

From the standpoint of value, dairy animals are the most important class of live stock on the American farm.

## Auction Sale

I will sell at Public Auction at the C. E. Carlson ranch, 5 miles Northwest of Juliaetta and three miles east of Linville, the following described property: Sale commences promptly at 10:00 a. m.

Thursday, Sept. 25

### NOTICE TO CREDITORS

IN THE PROBATE COURT OF LATAH COUNTY, STATE OF IDAHO.

In the matter of the Estate of Fred O. Petzrick, Deceased. Notice is hereby given by the undersigned, executor of the last Will and Testament of Fred O. Petzrick, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within four months after the first publication of this notice, to the said executor at the office of A. H. Oversmith, in Moscow, Idaho, the same being the place for the transaction of the business of said estate in Latah County State of Idaho.

OTTO SCHUPFER,

Executor of the estate of Fred O. Petzrick, Deceased.  
Dated at Moscow, Idaho, September 17, 1924. 38-5t

### Vermin Reduce Flocks

Common red mites, which infest hen houses and kill many chicks, can be done away with easily. First clean up all filth around the hen house and let plenty of sunshine into the building. Often the quarters become overcrowded. Where mites are found, paint the roosts and spray the walls with a solution of two parts of oil to one quart of stock dip. If lime-sulphur is on hand, a solution made with five gallons of lime-sulphur to 40 gallons of water will be effective.

### Cow Is Quite Sensitive

Milking has much to do with securing a heavy and persistent flow of milk. The dairy cow is an extremely sensitive piece of animal machinery. Any changes are quickly registered on the milk-flow regulator and the yield is cut down. In order not to jar the cow's sensibilities she must be milked in the same place at regular times and by the same milker.

### Old-Age Compensations

Among the undoubted compensations for being older than you were is that you don't get so excited about saving the world by passing a law designed to accomplish that desirable end.—Ohio State Journal.

### SUMMONS

IN THE DISTRICT COURT OF THE SECOND JUDICIAL DISTRICT OF THE STATE OF IDAHO, IN AND FOR LATAH COUNTY

RUFUS W. UTT, Plaintiff, vs. EDWARD ANDERSON, RUFUS J. ANDERSON, ENOS ANDERSON, GEORGE W. ANDERSON, RUTH R. CHAPIN, AMELIA DEGOWIN, and all unknown heirs and unknown devisees of Rufus Anderson, deceased, and all unknown owners of or claimants to, any right or title to, or interest in or lien or claim upon the Southwest Quarter (SW $\frac{1}{4}$ ) of the Northwest Quarter (NW $\frac{1}{4}$ ) and the West one-half (W $\frac{1}{2}$ ) of the Southwest Quarter (SW $\frac{1}{4}$ ) and the Northeast Quarter (NE $\frac{1}{4}$ ) of the Southwest Quarter (SW $\frac{1}{4}$ ) of Section Twenty-three (23) in Township Forty-one (41) North, of Range Four (R4) West of the Boise Meridian, in Latah County, State of Idaho, Defendants.

THE STATE OF IDAHO SENDS GREETINGS TO Edward Anderson, Rufus J. Anderson, George W. Anderson, Enos Anderson, Ruth Chapin, Amelia Degowin, and all unknown heirs and unknown devisees of Rufus Anderson, deceased, and all unknown owners of or claimants to, any right or title to, or interest in or lien or claim upon the Southwest Quarter of the Northwest Quarter and the West One-half of the Southwest Quarter and the Northeast Quarter of the Southwest Quarter of Section Twenty-three (23) in Township Forty-one (41) North, of Range Four (4) West of the Boise Meridian, in Latah County, State of Idaho, the above named Defendants.

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named Plaintiff, of the nature in general terms as follows: To quiet title to the following real property situate in Latah County, State of Idaho, to-wit:

The Southwest Quarter of the Northwest Quarter (SW $\frac{1}{4}$ NW $\frac{1}{4}$ ) and the West One-half of the Southwest Quarter (W $\frac{1}{2}$ SW $\frac{1}{4}$ ) and the Northeast Quarter of the Southwest Quarter (NE $\frac{1}{4}$ SW $\frac{1}{4}$ ) of Section Twenty-three (23) in Township Forty-one (41) North, of Range Four (4) West of the Boise Meridian, in Latah County, State of Idaho.

And you are hereby directed to appear and answer the said complaint within 20 days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 30th day of August A. D. 1924.

## DAIRY

### DEVICE STIRS MILK WHILE IT IS COOLED

Fresh milk is often stirred in order to cool it, and this is usually done by hand, which is a slow and tiresome task. A simple device for doing the work automatically by water flowing into a tank, as shown in the drawing, can be made by any farmer from materials that are available everywhere.

The device consists of a shallow box, made of one-inch pine boards. The ends are sloping and the box is divided into two equal parts by a

A Simple Rocking-Box for Stirring Fresh Milk Automatically by Water Flow.

board extending vertically in the center about eight or ten inches above the sides. The box is mounted at its center on a wooden axle, and a stirring paddle is attached to each end as indicated. These paddles are made from laths, planed smooth, and having a number of short crosspieces nailed on. In use, the milk cans are placed in the water tank and the stirring device arranged as shown in the drawing, the rocking-box being located under a water pipe so that the water first flows into one side and then into the other side alternately. As soon as one side of the box is filled the weight of the water causes the box to tilt over, and the other side of the box is then filled.—Popular Mechanics Magazine.

# SALE DAYS

AT

## KENDRICK

Thursday, Friday, Saturday

SEPTEMBER 25, 26, 27

Special Bargains at the Stores all Three Days

To the people of Kendrick and surrounding territory: The merchants of Kendrick wish to extend their thanks for your past liberal patronage and to show our appreciation in a material way and to merit a continuance of your business we are putting on this three days market and bargain sale.

In the various advertisements of the folder, which we take pleasure in mailing you, you will find special concessions on various lines of merchandise sold in Kendrick. This is not a general money-raising sale but a Real Cut Price in a number of lines for the benefit of our customers.

In addition to the substantial reduction in prices on merchandise we want you all to come in and enjoy the three days with us. Below are listed the special features of entertainment for the three days and you are cordially urged to come and enjoy them whether you spend a dollar or not.

## THURSDAY

General market day all day

Free picture show from 1 to 5 P. M., New Kendrick

## FRIDAY

Bargains all day

Lecture at 2 P. M. featuring Dr. W. J. Spillman  
Agricultural Economist, U. S. Dept. of Agriculture

## SATURDAY

General bargains all day

Free auction sale at 1:30 P. M.  
Col. N. R. Shepherd in charge

Bring anything you want to sell and list it with the clerk, J. G. Gardner, any time Saturday morning before the sale. Livestock, farm machinery and household goods will be sold at auction without cost to you.

Address by Congressman Burton L. French at 3:30 P. M. Everybody cordially invited to attend.

### Help your Moulters Moul

Moulting time is the time that a hen needs assistance. It is the off-season in the life of the hen.

Think of the amount of a hen's energy, vitality and red blood that's required to reproduce a thousand feathers! (which is only an average plumage).

A moulting hen needs good health, good appetite and digestion. That's just what Poultry Pan-a-ce-a does for a moulting hen—gives her appetite and good digestion, so that she'll eat more and digest more.

### Dr. Hess Poultry PAN-A-CE-A

Helps your poultry through the moult. And starts your pullets and moulted hens to laying.

It contains Tonics that produce appetite and good digestion—Tonics that tone up the dormant egg organs—Iron that gives a moulting hen rich, red blood and a red comb. It contains Internal Antiseptics that destroy disease germs that may be lurking in the system.

### No disease where Pan-a-ce-a is fed

Pan-a-ce-a helps your poultry to stay at par during the moult. They don't become run-down, pale and thin.

### Red Cross Pharmacy

Tell us how many chicks you have. We have a package to suit.

**Dr. Hess Instant Louse Killer Kills Lice**

Dr. Hess Stock Tonic keeps hogs healthy, drives out worms.

## GLEANINGS

For sale: Ford touring and a Buick 4 touring; with considerable trade. Juliaetta Cannery. 38-2t

Fred Sillow Jr. of Cameron harvested a splendid crop of beans from a 45 acre field last week. His average was 7 sacks per acre or approximately 980 pounds per acre. This is considered a very good crop for a dry year.

Mrs. S. W. Bigham left last Friday for Seattle to visit her daughter.

Mrs. S. H. Knepper of Moscow arrived Monday afternoon to visit relatives here.

Harry Hupp is advertising a public sale for September 30. Mr. and Mrs. Hupp will leave some time next month for Sandpoint where Mr. Hupp will be associated with his father-in-law in the garage business. Mr. and Mrs. Hupp have a host of friends in this community who will learn with regret of their decision to leave. Mr. Hupp is one of the best farmers on Little Bear ridge.

E. T. Hong went to Spokane the first of the week and returned with a dandy new Oldsmobile coupe.

Harry Benscoter, who is ill at a Moscow hospital with typhoid fever, is reported to be recovering as rapidly as could be expected.

This is the time of year when a large number of Gazette subscriptions fall due. It is just as well to keep it in mind—which is the reason we mention it.

Claud Stanton left the first of the week for Moscow where he has entered the Freshman class at the university.

The usual large number of hunters were out early Monday morning, the opening day of the bird season, but contrary to expectations the birds proved to be rather scarce than otherwise. Among the Kendrick sportsmen Charles Crocker is the only one so far reported who secured the limit of six birds. The general average was about one each. China pheasants are more plentiful than grouse or natives.

Two Dodge cars collided at the sharp curve in the highway east of the old McCrea place, Sunday morning. One car, a runabout, was going about 25 miles an hour, according to a statement by the driver. The other was almost stopped when the cars came together, head on. The runabout was badly damaged but the other was apparently not damaged to any great extent.

Fred Bolon of Greer was visiting his folks here Wednesday and Thursday. He has a position in a store at Greer.

Word was received yesterday from Rush Chamberlain, who underwent an operation at a Pendleton hospital some time ago, that he is getting along nicely and making a good recovery.

There will be services at the Presbyterian church Sunday morning at 11 o'clock. Rev. Vicar of Clarkston will preach. Everyone is cordially invited to attend.

Milo Slind, formerly of Bear ridge, has bought an interest in a restaurant at Colton, Cal., which is located near Los Angeles. He has an experienced restaurant man as a partner and writes that he is doing well.

G. F. and N. E. Walker made a business trip to Peck early Wednesday morning.

Mr. and Mrs. H. P. Hull were Lewiston visitors this week.

Holbrook & Emmett bought six hogs from Harry Langdon the first of the week that weighed a total of 3165 pounds, or an average of 535 pounds each.

Harry Langdon of American ridge topped the Potlatch this season with the largest wheat yield. He also has 30 acres of white dent corn that bids fair to make a record yield this season, judging from sample ears that were brought to town this week. Some of the ears are a foot long and proportionately large in diameter.

F. C. Choate pleaded not guilty to the charge of arson before Judge Johnson, Tuesday, and his case was set for trial, September 25.

Mr. and Mrs. Earl Zessiger of Lewiston were Kendrick visitors a short time Tuesday.

## Agatha Items

Mrs. Julia Flesman visited Mr. and Mrs. Joe Piper last Wednesday.

Mrs. R. J. Hoskins spent a few days last week with her daughter, Mrs. M. R. Vincent.

Miss Nellie Buckles, accompanied by her sisters, Bertha, Lulu and Roena, and the Stephens children, Irma, Irene and Eugene attended

the fair at Lewiston, Friday.

Miss Nellie Buckles departed for her school near Troy, Saturday. She was accompanied by her mother.

George Flesman and family were Sunday guests at Joe Piper's.

Charles Hoffman and family, Mrs. Lucy Hoffman, Art Thornton and family spent Sunday at the Walter Hoffman home.

We are very sorry to hear that Walter Hoffman had to go to Lewiston for medical aid. We hope to hear of his improvement soon.

Miss Edith Stephens spent the week end with her parents, Mr. and Mrs. A. P. Stephens.

There are seventeen boys and girls attending school. So far there has been only two absentees.

Dean Wright and Ralph Vernon spent several days in the mountains.

W. T. Wright is making his home with his son, Dean. He celebrated his eighty-seventh birthday, Tuesday.

The Idaho Marble quarry has employed two shifts. They are getting another car load of crushed marble ready.

Mrs. E. A. Johnson of Agatha, who has been visiting in Clarkston last week returned home Monday.

Lloyd Brown is preparing to build a new silo.

Some of the people who attended the Lewiston fair are Lloyd Brown, Nellie Dean, Ernest and Alvin Steigers, Montie and Edith Stephens, Mary and T. J. Buckles.

A. P. Stephens made a business trip to Leland last week.

## Corn to Mature in Short Season

## We Already Have Varieties Requiring High Temperatures While Growing.

(Prepared by the United States Department of Agriculture.)

The "synthetic" development of a variety of corn that will grow and mature under conditions of short season and cool weather will be attempted by the corn investigators of the United States Department of Agriculture from a collection of 200 sample varieties of corn brought to the department by Frederick D. Richey, agronomist in charge of corn investigations, who has

just returned from an exploration trip through the Andean highlands of South America in company with R. A. Emerson of Cornell university.

Varieties Mature in Short Season. "We already have varieties of corn in this country that will mature in short season," said Mr. Richey, "but they require high temperatures during the growing season. They are suitable for certain localities along the northern edge of the corn belt, but there are other places in the Northwest, as in Idaho, Montana and Wyoming, where the temperatures are low as well as the seasons short, and we hope to be able to develop a variety that will make corn growing in these sections a safe enterprise. This will have to be done, not by the mere introduction of foreign varieties, but by crossing and combining the ability of our native corn to mature in a short season with the ability of the South American corn to mature at low temperatures."

Most of the samples brought back by Mr. Richey were found growing at altitudes of from 7,000 to 11,000 feet, and some as high as 12,000 feet in the mountains of Bolivia and Peru. Corn matures in these altitudes in a climate which is 20 degrees colder than that of this country. Thus, Mr. Richey found native varieties growing and maturing in spite of an average temperature for the year of 50 degrees F., while the average minimum temperature during the growing season was as low as 39 degrees. In our corn belt an average minimum of 55 degrees night temperature is considered the limit. The average temperature during the entire growing season is 72 degrees. The season for the corn crop in these southern countries is from 120 to 180 days, while a few varieties in the northern edge of our own corn belt mature in 80 days.

Experiments in Peru. On the trip through Peru Mr. Richey had the opportunity to observe varieties of corn from our own country growing in comparison with native corn. These experiments were on the farms of the Urso mission near Calca, Peru, under the direction of T. E. Payne, who is in charge of the mission. All of the United States varieties there were of a yellowish-green color, and did not look healthy, said Mr. Richey, while the native varieties were dark green and healthy. Likewise varieties from Peru which have previously been tried in the United States have not done well here. It is not possible, therefore, to introduce these South American sorts as such and expect them to be adapted to the conditions of our corn belt. The problem is rather one of crossing and breeding, in which the characteristics

of the varieties instead of varieties as a whole are considered. The development of the desired varieties will be a long time proposition, but the investigators are encouraged to believe in the ultimate success of the venture by the results obtained in other experimental work with corn at the department.

The development of a variety of corn that will grow and mature at a low temperature in short seasons will enable many areas in the United States to grow corn, where the crop will be of value not only for itself but because of its use in rotation.

## First Real Pantomime

In December, 1723, the first real pantomime was produced in London, at the Drury Lane theater, as part of the Christmas celebrations of that year. The name of this magical piece was "Harlequin Doctor Faustus."

## METHODIST CHURCH BULLETIN
