

Kendrick News 20 Years Ago

Item Taken from the Gazette Published in 1904

Anent the request of the Potlatch Lumber Co. for a 20 year time extension for the removal of the state timber, which is causing considerable discussion. We hope to give the particulars as near as we can ascertain them, for it is a matter in which each of our readers is either directly or indirectly interested.

J. F. Collins has the roof on his neat brick and hopes to be domiciled therein before the first of the year.

Mr. Osborne has shipped a sample lot of prunes to Indiana, which he expects to follow up with a carload.

Dr. Pemberton has located at Juliaetta where he will practice dentistry in Dr. Powell's old office on Main street.

A branch office of the International Banking Loan & Financing Corporation of Denver, Colorado, was organized in Kendrick last week. The local directorate is characteristic of the company's strong, representative men. They are G. W. Suppiger, D. S. Hunter, J. F. Collins, Fred S. Beckwith and H. E. Wessels, the last named being the local agent of the company.

LOST.—One good size turkey with some few tail feathers gone, where we tried to catch him as he flew the coop. Finder will receive liberal reward (not to exceed the value of the animal) by returning to this office. Bun Penland has the foundation about completed for the Acheson brick.

CAMERON NEWS

The Misses Anna and Hannah Wegner left for Spokane, Saturday, where they have employment.

Mrs. Jack Bechtol is spending a few days with her sister, Mrs. Brunsiek.

The young folks gathered at the home of Mr. and Mrs. Gus Kruger, Sunday afternoon. The day was spent in making candy and popcorn balls for the ladies aid sale.

Mr. and Mrs. Spekker and sons took dinner with the George Ehlers family Sunday.

Mr. and Mrs. Carl L. Wegner motored to Lewiston Thursday of last week.

Mr. and Mrs. August Brammar and Wilbert Brunsiek were the Sunday dinner guests of Mr. and Mrs. Blum.

August F. Wegner left for Lewiston, Sunday, where he will serve on the jury.

The ladies aid sale and supper was held Monday evening. The weather was favorable and a large crowd attended. The sum of \$225 was realized.

Gus Blum left for Spokane, Wednesday, to spend Thanksgiving.

Thanksgiving services were held at the church at 10 o'clock.

The Shooting Match

The shooting match at Kendrick, put on by Ernest Roberts and Paul Manly, Monday, was well attended. Some good targets were made. S. P. Callison made the best shot of the day when he hit the bulls eye dead center at 75 yards. Those who couldn't place a bullet within a spot, the size of a dime at 75 yards didn't have much show to win a turkey.

Mrs. Jones was entertaining some of her son's little friends. "Willie," she said, addressing a six-year-old who was enjoying a plate of cold beef, "are you sure you can cut your own meat?"

The child, who was making desperate efforts with his knife and fork, replied, "Yes, thanks; I've often had it as tough as this at home."

Latah County News Paragraphs

Items of interest Taken From Neighboring Papers

A scare was thrown into drillers in charge of work on the new city well and city officials Friday when the drill suddenly struck a hard granite-like substance at a depth of 355 ft. For a short time it appeared as though hopes to bring in a deep well to supply the city's needs were shattered, because water, it was stated, is never found below a granite bed.

The scare, however, proved cause, for the drill Saturday morning penetrated the hard capping and entered a soft blue clay, with rapid progress being made. The hard strata is thought to have been but a small formation and not indicative of a solid layer. Work of drilling was continued a few days ago after a considerable period being spent in casing the hole through a layer of heavy sand, and almost immediately the granite substance was struck.

The hole has now been sunk to a depth of approximately 365 feet, and progress should be rapid if the present clay formations continue, with hopes of striking a permanent body of artesian water. The contract which the city has with the drillers, however, calls for a continuation of drilling to a depth of 1,000 feet if necessary, and providing formations are not struck which preclude the possibility of water being found below them, mayor Melgard said. —Star Mirror.

Ted Johann suffered a very painful accident to his right hand Wednesday afternoon while he was engaged in working at the rock crusher south of town. He has charge of the crusher and had a stick and was attempting to punch some dirt from some of the gears when the stick became caught and in his attempt to extricate it his right hand was in some manner pulled into the gears and badly mangled. He was brought to town where it was necessary for Dr. Ehlem to amputate a portion of the index finger. The other fingers and the entire hand, in fact, was badly lacerated and it may be necessary to amputate other portions of the fingers.

This was the third accident Ted has had within a month, but the others were of a minor nature compared to this one. —Genesee News.

A famous Scandinavian investigator and archaeologist has started out to prove that the first white men to visit the Northwest were Norsemen, away back in the 10th century A. D. He has discovered much evidence to support his claim, among which are rock writings so old the Indians have no traditions concerning them. He claims to have deciphered these inscriptions and that they tell the story of the visit of the ancient Norse adventurers. Somewhere in the hills of Idaho, this learned investigator says, will be found buried one of these hardy warriors, together with records and other evidences of the expedition. Further and still more marvelous, he claims to have learned the location of this spot, and in the spring is going to guide an exploring party to it. The professor may be right. It is certain that the Norsemen heard of this country some time or other in the past. —Deary Press.

Mrs. W. M. Buchanan, who had the large pumpkin on display at the Pool Mercantile Co. store, received the following letter from the Inland Seed Co. of Spokane this week:

Dear Madam: We have your two letters at hand regarding your pumpkin. We would very much desire one or two of these pumpkins for

Mischievous Old Jack Frost

By Lillian Long
Thanksgiving Day—That's what it was! It was a day that everyone gave thanks to God. There wasn't a person at Farmer Burton's home who wasn't up early and doing their chores like they should.

Their relatives, who lived in a nearby city were coming out for the day. There was such a merry fire blazing in the friendly old fireplace that I was nearly chased away from the window. It was a good thing I wasn't for if I had I couldn't have enjoyed that happy Thanksgiving Day with the Burtons.

Already, breakfast was over and the dishes were washed. Farmer Burton's kind wife, Nancy was stuffing the old turkey gobbler. Farmer Burton, the hired man and the boys were working in the stable. Nancy and the girls were busy in the kitchen, the pictures on the wall, the fireplace, the piano and I were busy with a friendly chat. As we were gayly talking, I glanced toward the kitchen, here came Mary with a small stick. "Oh Dear, I do hope she won't scrape me off of this window pane." She came over to me and was drawing pictures on me, when just then her mother came in with a new log for the fireplace.

"Mary, what are you doing? That just blotches up the windows and makes them harder to clean."

When Mary and her mother left us to ourselves again, fireplace called to me and said, "Well Jack Frost aren't you glad Nancy Burton came in just then?" Our conversation was suddenly interrupted by the taps of the knocker at the front door and the laughing of merry children.

Everybody was excited exchanging greetings, we sat up and gave them our greetings by being cheerful but somehow we feel as though they were not noticed. Mary and her three cousins went out to play until they would be called to dinner.

When Mary Burton called the children to dinner everyone of those children were thankful for that big gobbler and cranberry sauce, and pumpkin pies, and everything that children like. Oh how I wish that I could eat some of those good things too, and I believe that the tapers, the fireplace, the flowers and the pictures thought so too.

After dinner the children popped pop-corn over the blaze in the fireplace, while the older folks sat around and talked. I know that Old Fireplace was proud to have the children play around it for I would have been.

At last everyone went into the living room and I decided I was going to have some fun. Nancy had left some of her nicest plants on the window seat, so I thought to myself, "I'll just freeze the tops good so it won't bloom anymore this year," and I did. I froze the tops so they soon wilted and turned black. When Nancy came in and found her plants frozen she felt so badly she didn't know what to do. When I saw poor Nancy feeling so badly about her pretty plants I felt sorry for what I had done.

That night everyone of that family went to bed tired but happy. Everyone but Nancy and she soon forgot her troubles.

show purposes for our window. At the present time we have a large cabbage, measuring a little over four and a half feet around. We also have three very large hubbard squashes and this pumpkin of yours would be a decided curiosity, especially for people living in apartment houses.

Hoping to hear from you favorably at once, we remain, Yours very truly,

Inland Seed Co.
Juliaetta Record.

Discontinue Local Freight

Beginning last Monday the local freight through Kendrick was discontinued, owing to the fact that business is slack at this time of year. The highball from Spokane to Lewiston is giving daily freight service both to and from Spokane and Lewiston. The local on the Pullman branch was also taken off.

It has been rumored that one passenger train each way would be discontinued but Mr. Ramey, local agent, stated that he had not received notice of such a change. Usually about once a year this rumor is started but it does not materialize. It is likely that the passenger service will not be interrupted.

Berries Under the Snow

J. A. Barthles, a farmer of the Moscow Mountain district, eight and one-half miles east of Moscow, was in the city Monday and brought a branch loaded with loganberries, which ripened under the snow. The berries were red and luscious, and had been green when the snow fell on them some two weeks ago. The leaves on the branch were green, proof of Mr. Barthles' statement that there has not yet been a killing frost this fall on the mountain. He states that the potato vines are still green in his field. —Star-Mirror.

Turn Hitched Team Loose

Last Sunday night while the members of the Raby family were at church, someone evidently turned their mule team loose. The team was tied with halter chains at the hitch rack not far from the church. After church the team turned up missing. The following morning the mules were tracked to the Dave Gentry place. They were standing with the halter chains snapped up to the hames, showing that some one had unsnapped the chains at the hitch rack. The wheel tracks of the buggy indicated that the mules had wandered around on the hill before taking the American ridge road. It is too bad the guilty parties are not known as they deserve severe punishment.

Idaho's Bonded Debt

Boise — Idaho's bonded indebtedness increased \$5,500,000 from January 1, 1922, to January 1, 1924, a check made by the bureau of public accounts, department of finance, shows. The state reduced its bond load \$283,000, while each class of political taxing district voted in creases over 1922 of from 4.5 to 37.96 per cent. The average increase was 9.46 per cent.

The greatest increase was in the case of irrigation districts where \$1,905,700 bonds were voted in 1924. The school districts follow closely with a \$1,832,096 heavier bond load. Next in line come the highway districts, voting bonds of \$852,500; counties loaded themselves up during the two years to the extent of \$412,824; cities and villages \$278,414, and drainage districts, \$250,052. These increases in the bonded load are not made by state or county officials, but are voted at special bond elections by the taxpayers of the units.

Wants New Court House

A Kendrick man stated this week that in his opinion one of the most needed improvements in Latah county is a new court house. He said that when the housing facilities of a court house are so limited that the commissioners have to meet in the woodshed, it is beneath the dignity of any self-respecting county to put up with such conditions. He favors a new court house with the jail and the apartments of the jailer in the third story.

Billy Wilmut went to Spokane, Wednesday to be with his aunt over Thanksgiving.

Good Program at M. E. Church

Community Meeting Draws Big Crowd

It is not exaggerating to say that the community meeting, held at the Methodist church last Tuesday evening, was one of the most successful affairs of the kind ever held in Kendrick. The community spirit was present in every phase of the meeting and was in a measure responsible for the pleasing nature of the occasion. But to those who sponsored the meeting credit must be given for the fostering of this spirit and for the delightful manner in which the program was carried out.

The spacious seating capacity of the church was taxed by the large crowd present. It was not strictly a church meeting, but a social get-together meeting for the purpose of bringing the people of the community in closer touch with each other. The number present proved the idea to be a popular one.

Rev. Bell presided over the meeting and after a few remarks the following interesting and well-arranged program was rendered:

Doxology, audience, orchestra accompaniment.

Piano solo, Mrs. Robert Brown.

Governor's Thanksgiving proclamation, read by Prof. McLain.

Song, male quartet.

Talk, Mayor Dammarrell.

Talk, Superintendent Strauch.

Flute solo, Harold Thomas, piano accompaniment by Mrs. Thomas.

Talk, Miss Joy Bell.

Piano duet, Mesdames Ramey and R. Brown.

America, audience.

Address, Dr. Norman McKay.

The address by Dr. McKay, pastor of the Methodist church of Pullman, was brief but intensely interesting. Dr. McKay is a Canadian by birth. When a young man he came to this country with nothing but his health and his ambition to secure an education. He succeeded remarkably and his eulogy of the wonderful opportunities that the United States presents to the young man who has a desire to succeed, was very forceful and was aptly illustrated by his own success.

At the conclusion of the program the audience proceeded to the Epworth Hall where refreshments of punch and waters were served.

The effective decorations of the Epworth Hall and the church room were a pleasing feature of the evening.

Profitable Yield of Spuds

D. M. McPhee of Cedar Creek ridge secured a yield of potatoes on the Arthur Bohn place that testifies to the productivity of the soil of that community. From two acres of land Mr. McPhee dug over 200 sacks of fine potatoes. They are of the Burbank variety. One selected sack of 70 potatoes weighed 100 pounds. They say there is nothing in a name, but we feel that it is safe to say that these potatoes raised by Mr. McPhee are genuine Irish spuds.

Open Confectionery Saturday

The new confectionery will be open for business Saturday, according to a statement by Mr. Halseth, who has been spending the past month getting the interior of the building in shape for the new business. The place presents a very attractive appearance. The walls are a soft rose color with grey decorations. At the front is a spacious rest room for the convenience of customers. It is attractively furnished and is cozy and comfortable.

The balcony at the side is divided into booths and on the floor below is a space utilized for tables. The fountain and candy cases are along the east side of the room. Mr. Halseth has his stock of confectionery and fountain supplies and will be in shape tomorrow to look after the wants of his customers.

News Notes From Kendrick School

Student Activities as Told by Special Correspondent

The Kendrick high school basketball team tallied its fifth straight victory last Friday, when they outplayed the strong Troy aggregation on the local floor. Score 18 to 25. By flashing team work and an effective offensive formation the locals rolled up a score of 20 to 7 during the first half, Troy being continually on the defensive.

However, the last half proved a near Waterloo for Kendrick. Troy broke into an offensive that was difficult to counteract, scoring 11 counters to Kendrick's 5. William Brown, safety guard for the locals proved to be a stonewall for many of Troy's attempts. Brown is expected to be an important factor in Kendrick's future defensive work. E. Flaig, H. Flaig, F. Brocke, R. Sparker and C. Bell worked in a creditable fashion for Kendrick while Troy was represented by, Todd, Harland, Johnson, Trout, Spencer, Parr, Shepherd.

The usual ten minutes between halves of the basket ball game was taken up by a stunt by the high school students. Bud Carlson represented Kendrick while Thomas Blevins played the part of Troy in a boxing match, with Elizabeth Carlson and Marjorie Newton as assistants and Clarence Bell as referee, the stunt was very successful. After this, by the aid of the high school students, they gave a serpentine, followed by their yells.

The 5th and 6th grades will be rewarded with a silk flag from the Orphans Home for having received the most money in their drive. Following is a list of the amounts received by each room: 1st and 2nd, \$6.61; 3d and 4th, \$8.55; 5th and 6th, \$9.35; 7th and 8th, \$5.00; High School, \$2.50; total, \$32.01.

A. W. Longfellow

A. W. Longfellow, one of the early pioneers of this ridge, died November 18th at St. Lukes hospital in Spokane, after an illness of several weeks from cancer of the stomach.

Mr. Longfellow was born in White Hall, Maine, November 23, 1849, coming to Idaho over thirty-five years ago and was one of the early homesteaders here.

He was a man of sterling character, upright and honest, and was ever interested in the upbuilding and advancement of the community. He leaves to mourn his loss a wife and one son, Al Longfellow, of Eugene, Oregon, and a host of friends.

Funeral services were held at the Gold Hill community church, Friday morning at eleven o'clock by Rev. Pressnal.

Jury for Thurston Trial

The trial of Darrell Thurston began Monday of this week, at Lewiston. Evidence was heard Tuesday after the jury had been selected.

The jury selected to try the Thurston case is composed of the following:

A. E. Stoner, piano tuner, Lewiston.

Dan Lyle, merchant, Peck.

E. M. Becker, farmer, Rimrock.

Thomas Buckingham, farmer, Gifford.

Glenn McIntosh, farmer, Tammany.

A. F. Wegner, farmer, Cameron.

Enoch Harrison, farmer, Leland.

Nels Longteig, farmer, Southwick.

Leonard Cole, farmer, Snow.

William Bozarth, farmer, Culdesac.

Ernest Gage, farmer, Rimrock.

Joseph Thornton, farmer, Leland.

Wm. Meyer left Kendrick Wednesday to eat his Thanksgiving dinner at the homestead with his son, Frank.

LINDEN LOCALS

Mrs. Ernest Goodnight of Nampa, Idaho and Al Longfellow of Eugene, Oregon, arrived Thursday to attend the funeral of A. W. Longfellow.

Mr. and Mrs. Louis Alexander and L. E. Foster were dinner guests at the A. Alexander home, Friday.

Miss Alice Wagner spent the week end with Eva Smith.

W. M. Sadler has raised the roof of the porch and is building a show window on the front of his store building which will add greatly to the appearance.

Mr. Mounts of Pine Creek moved

his hay baler on the ridge and is baling on the Smith place. There is considerable hay to be baled on the ridge.

Mr. and Mrs. Clem Israel and children and Frank Starr spent Sunday afternoon at the Smith home.

STONY POINT

Miss Dorothy Body visited Sunday at Juliaetta with her sister, Edith, who is still quite ill. We understand that she was taken to Portland for medical treatment, Monday.

Frank Stevens of Moscow is visiting at this date with his daughter, Mrs. Leonard Fairfield.

Lloyd Eckman returned home Sunday from Myrtle, where he has taken his two little sons to spend the winter with his sister, Mrs. Albert Beckman. Mr. Eckman is working for Cletis Housington.

John Schetzle spent the week end with home folks.

Elsie and Walter Zumbach were Sunday visitors at the Al Heim-gartner home.

LELAND NEWS

A fine eight and a half pound girl was born to Mr. and Mrs. Claud Craig, Tuesday.

Mrs. McGhee was here from Clarkston last week visiting friends.

Mr. Porter moved his family to Leland last week to send the children to school. He is farming the Winegardner place.

Mrs. Russell Smith and little daughter, Alene, returned from Palouse, Tuesday where they were visiting with her brother and his family.

Mr. Robbins, left for Seattle the first of the week where he will make his home for the winter. He will be missed by his many friends.

Rev. C. J. Toner and family and Ben Hoffman and family took dinner at the Arthur Locke home, Sunday.

Some of the boys attended the "Covered Wagon" show at Kendrick, last week.

The pie social and literary at the Leland school house was a success last Friday night. Little Miss Neva Craig was chosen the most popular girl by vote, receiving 990 votes against 895 for Lizzie Hoffman.

The ladies of the church are planning on a cistern for the parsonage in the near future.

Dr. Brooks was called to Denver, Col., on account of the illness of his wife. We are all hoping she is much improved so he can come back to our town again.

TEXAS RIDGE

The snow is nearly gone on the ridge and some of the farmers are getting their beaus threshed, and some little plowing is being done.

Mrs. Chas Ross left today for her home in Chehalis, where Mr. Ross has been for some time, building and furnishing a new home. Her daughter, Mrs. Claire Babcock, accompanied her as far as St. Maries, where she will spend some time visiting friends and relatives.

The Texas Ridge Ladies Guild gave a chicken supper, Saturday evening at the Elwood school house. Quite a crowd assembled notwithstanding bad weather and roads, and spent an enjoyable evening, luncheon and listening to music by the local orchestra and mandolin club, also a short program by the pupils of the Elwood school. The affair netted \$28.25 for the local church.

Grandma Adams, who has been sick for a couple of months, is able to sit up some now and it is to be hoped she will soon be around again.

A few of the local people are planning on attending the high school play in Deary, Wednesday evening if weather is favorable.

A turkey-shoot was held at Clarence Anderson's, Sunday afternoon, which seemed to be well patronized.

Mrs. John Gustafson who has been on the sick list for some time, is reported improving.

James Miller has moved to his winter home in Deary again where his children are attending high school.

Worm-Free Pigs Bring Top Prices on Market

Hog raisers of Clay county, Nebraska, have built more than 1,000 movable hog houses during the past two years, according to reports to the United States Department of Agriculture, in order to keep their herds on clean ground and prevent roundworm infestation. Farmers of the county became interested in hog-lot sanitation in 1922, when the county agricultural agent arranged with two hog raisers to carry on demonstrations of the method and the results obtained by following the system. The litters which were farrowed and kept on clean pastures were in both cases much more thrifty than those kept in old, infested quarters. In one case, where 35 litters were farrowed in clean quarters and kept on clean pasture, 228 pigs were weaned without a runt. These pigs topped the market in six months, when they averaged 185 pounds each. Litters on the same farm which were kept in old hog lots soon developed runts. A farmers' automobile tour was organized to visit the demonstrations and a number of individual visits were also made by farmers from all parts of the county. The economic advantage of hog-lot sanitation was so evident that farmers throughout the county are successfully following the practice or are building movable hog houses and completing other arrangements to adopt the system.

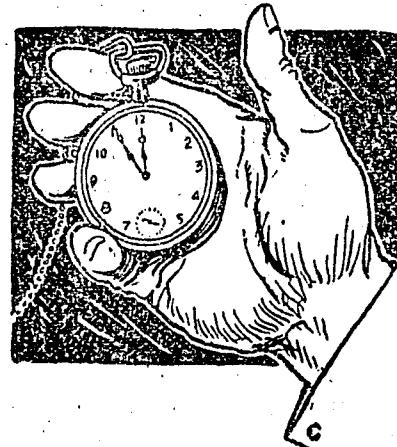

Keeping Off the Mud

By curling the edge of mudguards of automobiles to form a trough which conducts the mud downward beneath the running boards English manufacturers have succeeded in eliminating the creeping of the sticky dirt around the wing of the protector.

THE THANKSGIVING DINNER

By Alice M. Bell

I like to think of Thanksgiving, For it only comes once a year. The children who are out in the cornpatch, Are happy and full of good cheer. Oh! the turkey they will have for their dinner, Oh! how happy, how happy they'll be. The turkey that gobbled so merry, They will gobble so fast, don't you see? When they had all eaten their dinner, The children went out to their play; They coasted so long they got weary, so They came in at the end of the day. They were so tired and sleepy, That their mother put them all in their beds, They tossed and tumbled fretfully, Till to sleep went five little heads. Next morning the children woke early, Shrill laughter came from the stairs, They were so eager to get to their play, And soon had forgotten all cares. From the house to the end of the barnyard, The children were scattered at play, Mother was washing the dishes, And father was piling the hay, God's thankfulness stayed with the family, From that happy Thanksgiving Day.

POULTRY

HUMAN ELEMENT FOR SUCCESS IN POULTRY

Three big factors enter into success in poultry work. These are: Finance, location and the human element.

A large amount of finance does not always contribute to the success of a commercial poultryman. He should have finances enough to carry him through the first year but one should remember that a hen knows nothing of marble halls. Some people get just as good results from straw sheds as they would in houses costing much money, providing the premises are kept clean.

Location is important with regard to arrangement of flock and closeness to a market. If at a distance from a market you have to buy higher feed and pay more for labor, but it is not necessary to live too close to a market. You can develop retail trade and will not necessarily have to sell your eggs on the market.

The remaining factor is the human element that enters into the work. The human element in anything is the controlling element. Something in the human element spells failure or success. The ability to do is one factor. Into ability enter the physical and mental elements. Some people are mentally incapable. Mental ability does not always mean lack of power, but lack of concentration. You must be capable of concentrating your mind upon the work. The world is full of people always trying to find something better. The quitter in life is going to be put out of business even before he gets a good start. Honesty is another of the human elements that enter into the work. Some people are notable liars and are unscrupulous in their dealings.

Roup Can Be Eradicated Only With Difficulty

Fowls suffering from roup in such mild form that its presence passes unobserved and frequently unsuspected often introduce the disease into a flock, from which it can be eradicated only with great difficulty, according to Dr. C. C. Lipp, director of the animal health laboratory at South Dakota State college. Three types of roup are common—the comb, the nasal and the mouth types. The symptoms include small scabby swellings on comb and wattles, nasal discharges and difficult noisy breathing, and small scabby areas on the tongue, mouth lining and throat. There is also reduced vitality and egg production, and frequently death in from one to three weeks.

Corn Stover Silage Is Good for Winter Feed

The custom of raking up and burning corn stalks is considered a huge waste. While somewhat depending upon local conditions and the feed supplies, the destruction of corn stover is rightly regarded as a loss. Corn stover, plowed under, has a theoretical value in fertility of about \$2 a ton, but this can hardly be figured on the acre basis of tonnage grown because stalks are hard to handle in plowing under. The feed value is far more than \$2 a ton.

Feeding tests have shown that corn stover silage—made from the dry stalks by the addition of water—has a value of about two-thirds that of corn silage for wintering beef breeding cows, and probably is worth 60 per cent as much as corn silage for feeding dairy cows. By corn stover we mean, of course, cured shock corn minus the ears. A considerable percentage of the feeding value of a crop of corn is located in the stalks and leaves. In trials at four northern experiment stations, the mature ears weighed 4,415 pounds an acre, while the stover weighed 3,835 pounds an acre. About 25 per cent of the digestible crude protein of the corn crop is in the stover and about 37 per cent of the total digestible nutrients.

By destroying the stover we actually throw away a good portion of labor and expense, to say nothing of the soil fertility elements going into the make-up of the corn crop.

Lay Poison for Borers in Fall

Most Serious Pest of Trees and Must Be Combated to Get Good Fruit.

(Prepared by the United States Department of Agriculture.)

Throughout much of the peach-growing district east of the Rocky mountains from Canada to Florida, orchardists are troubled with the damaging work of the peach borer, the most important and serious pests of these trees and one that must be combated relentlessly if the peach is to be grown. Its injuries each year, including the cost of control measures, amount probably to not less than \$3,000,000, says the United States Department of Agriculture.

This pest has been known for more than 150 years. Is a native American insect, and has demanded the attention of horticultural men continuously. Many methods have been tried for its eradication and control, but not until 1915, when the bureau of entomology began experiments in the use of various toxic gases as a possible means of control, was any very practical method found.

Use Paradichlorobenzene. In these experiments it was found that the chemical paradichlorobenzene, for which the abbreviated name "paradichlor" is suggested when referred to as an insecticide, could be used successfully in control of the insect. This chemical is a white crystalline substance having an etherlike odor which, while harmless to persons and domestic animals under ordinary conditions, is poisonous to insects.

Application of this chemical to peach trees for the control of the peach borer should be made in the fall after most of the moths have finished their egg-laying activities, to avoid late infestation of the trees. The method consists simply of applying the chemical to the soil around the base of the tree in a circular band an inch or two wide, care being taken that the inner part of the band is about two inches from the tree trunk. As soon as the chemical has been applied, cover it carefully with several shovelfuls of dirt, making a cone-shaped mound around the tree trunk by packing the earth with the back of the shovel.

Remove Dirt Mounds. Under average fall weather conditions most of the chemical under the soil covering will have evaporated in four to six weeks, killing from 90 to 100 per cent of the borers. It is a good practice to remove the mounds of dirt some five or six weeks after application of the chemical.

The "paradichlor" in the experience of the bureau of entomology, can be used without danger of injury on trees four years of age and over—the dose on four and five-year trees being three-fourths of an ounce per tree, on trees six years of age and older one ounce per tree, or, if the trees are unusually large one and one-quarter ounces may be used.

Make Stack Silage When No Silo Is Available

Andrew Boss, vice director of the Minnesota experiment station, says that farmers without silos can preserve green and immature corn by the stack method of making silage.

C. L. McNelly, a Minnesota county agent, has made stack silage for four seasons on his farm at McIntosh, Minn., and recommends it in preference to bundle fodder corn. He makes the stack about 20 feet in diameter and 20 feet high, keeping the center lower than the outside until the top is reached when it should be filled full. The bundles must be distributed evenly over the surface with the butts laid to the outside.

During the winter the top of the stack is kept covered with a foot or two of wild hay which can be thrown back as the silage is taken off. In order to prevent extreme freezing this covering should be replaced after the day's feed has been thrown down.

Corn preserved in this way will rot in for about eight inches on the outside of the stack, but as the butts of the stalks only are affected the loss is not serious. According to Messrs. Boss and McNelly the silage cures somewhat differently from the common corn silage in that it seems to develop less acid. There is a sweet molasses odor and flavor which make it palatable for all kinds of live stock.

Improve Marketing Plans

More farmers adopted improved practices in marketing their products in 1923 than in any other single phase of farm activity in which better methods established by experience and experiment were demonstrated by cooperative agricultural extension workers. The number of farmers adopting improved marketing methods through the influence of extension work during the year, according to the United States Department of Agriculture, was 939,200.

Dress Turkeys for Market

Farmers near the city markets, and particularly those in the middle Atlantic and New England states, often dress the turkeys and either sell them direct to the consumer or to city dealers. In some sections shortly before Thanksgiving there is held what is known as turkey day. On the day before this event every turkey grower in the neighborhood kills and dresses his turkeys and the following morning brings them into town.

LIVE STOCK

SEPARATED MILK IS VALUABLE FOR PIGS

The Michigan experiment station has recently reported an interesting experiment in growing pigs on corn and water as compared to corn and separated milk. Two pigs that got milk gained 221 pounds each in five months. Those on corn and water gained only 9.5.

At the end of five months the milk-fed pigs were marketed and the two stunted pigs put in separate pens. Pig No. 4 got shelled corn, water and a good mineral mixture. Pig No. 3 got corn and separated milk and though he only weighed 43 pounds at seven months old he weighed 350 pounds at a year old, a gain of 307 pounds. Number 4 gained only 28 pounds, weighing 70 pounds at one year. Then No. 3 was marketed and No. 4 got separated milk and corn for five months. At the end of this time he had gained 274 pounds, weighing 350 pounds, showing that separated milk can bring out even a stunted pig to make good gains. The gains with separated milk cost 6.7 cents per pound, with skim milk at 35 cents per 100 pounds. Gains without milk cost 10.7 to 39 cents per pound.

Although separated milk contains valuable mineral matter this was evidently not what was lacking in the corn. The main deficiency was in protein and in the growth-promoting vitamins, both of which were supplied abundantly by the separated milk. Many people try to feed pigs on corn alone, while others who have dairy cows separate the milk and throw the skimmed milk away. Both are making a serious mistake. If separated milk is not available one should use alfalfa pasture, tankage or some other protein supplement along with corn.

Some will say that they get better results on corn alone than were obtained by the Michigan station. This is probably true where pigs are getting some grass or weeds to supply them with mineral matter and vitamins and with some of the supplementary proteins. The main thing to remember is that corn is not a complete feed for growing animals.

Separated milk should be considered as a supplementary feed, not as a complete feed in itself. Where fed in moderate quantities, two or three pounds of separated milk may take the place of one pound of corn. In large amounts count eight or ten pounds of milk equal to one pound of corn. A good rule is to count 100 pounds of separated milk worth half the price of corn per bushel.—Charles I. Bray, Colorado Agricultural College.

FARMER MUST KNOW PRODUCT OF COWS

That utensils exert the greatest single influence on the bacterial count of fresh milk has been shown many times by experiments, says F. C. Button, professor of dairy industry at the New Jersey State College of Agriculture. Professor Button points out that hav-

ing clean, sterile utensils is the most important of the "Big Four" in clean milk production. Clean cows, small-top pails, clean utensils, and prompt cooling. Utensils may be clean so far as the eye can discern, but unless they are thoroughly sterilized they may contribute enormous numbers of bacteria to the milk coming in contact with them.

Utensils should first be rinsed in water that is clean and cold or lukewarm. This will remove any milk that might otherwise be cooked to the sides of the utensils later when hot water is used. They should then be washed in hot water containing an alkali or washing powder. Scrubbing with a stiff brush is necessary to get into the cracks and seams. Wash rags, soaps, and greasy powders should not be used in the dairy. A final rinsing in clean water prepares the utensils for sterilization. Steam is the best sterilizing agent. Live steam should play upon the utensils for five minutes. After that the utensils will dry quickly when inverted on a rack. Boiling in water for five to ten minutes is next best to steaming. The drying of utensils after sterilization should not be overlooked, and protection from dust, flies, and chickens is important.

The importance of washing utensils immediately after using them is very great. Experiments showed that when utensils were washed directly after milking, the average bacterial count of the subsequent milking was 600,000 in 25 drops of the milk. When some of the utensils were left unwashed for eight hours and then washed in the same manner as the other utensils, the subsequent milking had an average count of 1,677,000 bacteria in 25 drops of the milk.

Poultry Facts

Clean, infertile eggs will bring a better price on the open market.

Hens are heavy feeders and will lay more eggs if you give them a light so they can see to eat.

Chicks hatched from weak parents never make as good growth under the same conditions as those produced from healthy stock.

Old geese should only be plucked when the feathers are ripe. Breeding geese cannot be reasonably expected to yield a crop of feathers and lay vigorous, hatchable eggs.

Hens under lights, giving them 14 feeding hours each day, made an extra profit of ninety cents per hen above those having only normal daylight hours, find poultry workers of the North Carolina State college.

A pinch of sodium fluoride applied on the neck, under the wings, region of the vent, fluff, breast, etc., will kill the body lice on the hens. The hens should be treated so as to keep the lice from getting on the young birds.

Friendship's Qualities

Friendship hath the skill and observation of the best physician, the diligence and vigilance of the best nurse, and the tenderness and patience of the best mother.—Clarendon.

The Pleasure of Drawing Interest

On the semi-annual interest days there is a happy throng of savings bank depositors who come here to have their interest added.

There is a pleasure in drawing interest—to know that your money is making more money for you.

Receiving an income from your savings is just one of the many satisfactions connected with a growing savings account. Your funds are safe from fire and theft, you watch your saving grow week to week and month by month and as your account increases your interest payments increase also.

Why not open a savings account and lay by some money for the future? One dollar or more opens an interest bearing account at this bank. We welcome the accounts of children. Let the children learn early how to do business at the bank.

GLEANINGS

Mrs. J. W. Gilmore is visiting her sister, Mrs. Wm. T. Seeley. Her husband is engineer of the Lolo Pass highway. He expects to join Mrs. Gilmore here soon and they will then go to Portland, which is their home.

Mrs. Peterson and little daughter of Spokane spent the week end at the Newton home. Mrs. Peterson is a sister of Mr. Newton.

Miss Mildred Seeley, local high school teacher, was a Moscow visitor last Saturday.

Axel Swanson started last week to build a new house where the other one burned last summer. He is building it a story and a half high on a cement foundation.

Lewis Otnis of Moscow was transacting business in Kendrick last Saturday.

Halvor Nelson of Farmington, Wash., was a Kendrick visitor last week.

Mrs. R. H. Ramey took her little son, Junior, to Lewiston last Friday to have his tonsils removed. Mrs. MacPherson accompanied them. Junior is making a good recovery from the operation.

Jeff Buckles of Agatha was transacting business in Kendrick last Saturday.

Charles Lewis of Clarkston was a Kendrick visitor Saturday afternoon.

L. A. Grinolds and son of Lewiston Orchards spent Sunday in Kendrick at the home of Mr. Grinold's mother.

E. T. Long left the first of the week for Cheney, Wash., where his sister, Beulah, is attending the normal. From there he and his sister went to Leavenworth, Wash., to visit at the home of Mr. and Mrs. F. A. Varo over Thanksgiving.

Tony Eichner came up from Lewiston, Wednesday, to stay over Thanksgiving at his home on American ridge.

The 1925 automobile license plates for Idaho will be white with black letters and numerals. Sixty thousand sets were purchased and cost the state over \$9,000.

Martin Thomas returned Tuesday afternoon from a business trip to Lewiston.

Roy Florence of Lewiston arrived Wednesday morning to spend Thanksgiving with friends.

Mr. and Mrs. H. P. Hull left Wednesday morning for Spokane where they will remain over Thanksgiving with relatives.

If you have rats in your cellar try this method of trapping them. Place an ordinary steel trap in a shallow box and cover it with a thin layer of feathers. You will get results. Billy Meyers is responsible for the above method of rat trapping. We tried it and it works.

Mrs. H. P. Hull spent the week end in Moscow with friends.

Ray Hill of Weippe arrived Wednesday to visit friends. Mr. Hill was in business in Kendrick a number of years ago and has many friends in the community. He is a brother of Charles Hill of Potlatch ridge.

Miss Mable Eichner and Miss Margaret Cox arrived from Moscow Wednesday to spend their Thanksgiving vacation at their homes on American ridge.

The Gazette has seriously considered giving a prize for the most beautiful baby in Kendrick. The only reason we have hesitated is that every mother in town except one would be indignant over the unjust decision of the judges. There are more pretty babies than usual in town this winter. One of the prettiest is the little three months old daughter of Mr. and Mrs. John Halseh.

Please keep in mind that on December 6, the Ladies Aid of the M. E. church of Kendrick, will have their chicken dinner at a bazaar. This dinner and sale will be in the new confectionery, the use of which the proprietor, John Halseh, has kindly offered. Sale of fancy work, etc., afternoon and evening. Dinner 6 to 7:30 o'clock. Children 35 cents, adults 50 cents.

Miss Edith Dammarrell, who is attending the Lewiston Normal, arrived Wednesday afternoon to spend the Thanksgiving vacation with home folks.

The morning after the robbery of the two Kendrick stores last week revealed the fact that there were half a dozen brave men in town who could have captured the burglar, but he had only been given the opportunity. Post mortems are told most convincingly in the light of Guy.

The Gazette went to press a day early this week in order to make it possible for the office force to have a day in which to be thankful. The news columns naturally have to suffer to some extent.

M. O. Raay left last week for Long Beach, Cal. His health has been failing for some time and his physician advised a warmer climate and a lower altitude.

Mr. and Mrs. L. S. LaHatt are moving from the former Henry Hill residence across the Bear Creek bridge, to the Hartinger building next to the G. F. Walker block.

Roy Plummer left Wednesday afternoon for Colfax to spend Thanksgiving with his mother and sister.

Mr. and Mrs. Walter Thomas went to Lewiston Wednesday where they will spend Thanksgiving at the home of Mr. Thomas' parents, Mr. and Mrs. E. G. Dirks.

FAIRVIEW NEWS

Will Hechtner of Lapwai visited his sister, Mrs. Mary McCall, Sunday.

Mr. and Mrs. Raymond Blankenship called Sunday at the Richard Blankenship home.

Mr. and Mrs. Virgil Freshman spent Sunday afternoon at the T. H. Daugherty home.

Miss Nellie Woodward spent Saturday and Sunday with Georgene Smith at Leland.

Miss Minnie Glenn and Miss Dorothy Boyd returned from Moscow, Sunday.

Mrs. Mary McCall and sons attended the bazaar at Cameron Monday evening.

Mr. and Mrs. Ralph Corkill took Sunday dinner at the Wilford Corkill home.

Mr. and Mrs. Hugh Parks and family spent Sunday at the Ford Parks home.

The pupils of the Fairview school sent \$5.00 as a thanks offering to the Orphan's Home.

FAIRVIEW ITEMS

..(Too late for last week.)

Mr. and Mrs. Virgil Freshman and family spent Sunday with the Philip Daugherty family.

Kenneth Hund spent the week end with Claud Cook.

Glen and Floyd Freshman purchased a new radio the first of the week.

Mr. and Mrs. Hugh Parks and children, Frances Hund and Roy Glen were dinner guests at the Roy Morgan home, Sunday.

Emma Glen spent the week end at home and was accompanied back to Moscow by her sister, Minnie, who expects to stay until the Thanksgiving vacation.

Mr. and Mrs. Jess Cox, Miss Dorothy Boyd, Prince Carlton, Walter and Clair McCall, Mr. and Mrs. Roy Morgan and son, Hugh Parks, Jesse Heffel and Melva Walker called at the Glenn home Saturday night to "listen in" and drink cider.

Clifford Woodward is absent from school on account of illness.

Lou Daugherty is visiting at the home of his brother, Tom, this week.

SOUTHWICK NEWS

Mrs. Tough was an overnight guest of Mrs. Wells, Monday night.

Mrs. George Jones and son, Henry, left for Lewiston, Monday. They expect to visit Mrs. Jones' daughter, Mrs. Benson of Rockford, before returning home.

Austin McCoy and three children left for Mohler, Oregon, where he has work in a sawmill.

Floyd Russel and wife were Kendrick visitors, Thursday.

Mrs. Ben McCoy went to Clarkston last Friday for a visit with her mother, Mrs. Locke, returning home Monday.

Chas. Guernsey is here from Roadline, Saskatchewan, visiting his sister, Mrs. Wm. Jones.

Mrs. E. E. McGuire of Cavendish returned home Monday after a few days visit with her sister, Mrs. Mitch Balckburn of Lewiston.

Dr. Lyle of Lewiston came up Friday and vaccinated about sixty of the school children for smallpox.

Word was received Monday of the birth of a son to Mr. and Mrs. James McRadden of Portland.

Mr. and Mrs. J. E. Hoppe left Monday for Portland where they expect to visit with their daughter, Mrs. James McRadden. Link Tator is staying at their place during their absence.

Wm. Whittinger, Wm. Henderson, Jim Stalnaker, Atlee Mustoe, Mr. Neuman and Mr. Graham left for Lewiston, Sunday, to report as jurors.

Clarence Henderson is freighter for Ziemann Bros. having made his

second trip, Monday.

A number of the young people of Southwick attended the dance at Leland, Friday evening.

Grandma Wells spent the day Sunday, the guest of Mrs. Kime.

The DAIRY

IT IS POSSIBLE TO
REDUCE FEED BILLS

The high price of commercial feeds indicates that farmers can well afford to give more attention to more and better home-grown feeds.

This statement comes from the New York State College of Agriculture with the suggestion that the dairy farmer might well turn toward the production of those roughages which will reduce feed costs.

Protein in the form of high protein feeds, they say, is extremely expensive. The amount of gluten feed, cottonseed meal, and linseed oil meal ordinarily purchased can be reduced by the production of roughage rich in protein, such as alfalfa and clover. Heavy grain feeding is also expensive, and the quantity of grain fed can be lowered by growing roughages of high feeding value.

Alfalfa and clover will produce more protein and more total digestible nutrients to the acre—that is, more milk or meat to the acre, for example—than will timothy.

Experiments show that lack of mineral matter may frequently be the limiting factor in growing young stock, and in milk production. This applies especially to lime and phosphorus which are essential elements of both bone and milk. Phosphorus can be obtained in large quantities from wheat feeds, cottonseed meal, and linseed oil meal. Lime, however, must be obtained from roughages, and here again roughages rich in lime enable live stock to make more efficient use of all the grain fed. Timothy has 2.5 pounds of lime in 1,000 pounds, red clover has 16 pounds, and alfalfa has 19.5 pounds.

The production of legumes means an increase in the feeding value of home-grown feeds, and where feed is given to the greater content of digestible nutrients in rations, reduction in feed costs results.

Lime in fairly large amounts is usually required to produce legumes successfully, but the cost and trouble of applying lime is more than counter-balanced by the increased fertility the legumes add to the soil.

Alfalfa Valuable Feed
in Production of Milk

The value of alfalfa hay in dairy feeding has had a striking illustration in Cortland county, according to a report from the state college of agriculture at Ithaca, N. Y.

The college says that if more dairymen realized how the feeding of legumes decreases the cost of milk production, there would be an even more noticeable increase in the acreage of alfalfa. As it is, the growth of alfalfa increased in this state from 35,843 acres in 1909 to 119,783 in 1919.

The Cortland county test to which the college refers was made unwittingly by a dairyman. During the early part of the winter, his cows were being fed good alfalfa hay and a 20 per cent protein grain mixture. He had no silo.

The middle of January, the alfalfa in the mow from which he was feeding gave out and he started feeding

Kendrick Store Company

The Quality Store

Immediately milk production per cow began to decline at the rate of three pounds a day. Then the dairyman began feeding more grain, but even this did not check the decline. Not until the alfalfa was again reached in the mow did he succeed in getting his herd back to normal production.

Author of Famous Poem

The correct name of the poem "The Night Before Christmas" is "A Visit From St. Nicholas." This was written by Clement C. Moore, an American poet and educator, at New York city in 1822. He wrote it for his children, but afterward it was published in a New York paper and later in a book of his collected poems.
