

### NEWS FROM THE NEIGHBORING TOWNS

Clipped From Papers Published in Latah County.

#### Will Occupy Property

Lubwig Matthes, who a year or so ago acquired acreage in the north-eastern part of Deary, stated Friday that he expects to occupy his property about Christmas and begin to improve it. Mr. Matthes is a maker of violins, and kindred instruments. After the Great War, in which he served, he entered a cabinetmaker's shop in Spokane and there he learned the rudiments of instrument making. A natural talent enabled him, through experimentation, to make instruments of superb tonal qualities. It is his intention to combine instrument making with his other work.—Deary Press.

#### Spread Mile of Tarvia

Beginning Monday morning, the highway authorities have spread a mile of tarvia surfacing, commencing at the north line of the city and extending northward for one mile.

This is one of the experimental miles of this surfacing that the highway department is putting down in this section of the country, the other two miles being, one to the north of Moscow and the other will start from the Idaho-Washington state line and extend for one mile toward Lewiston.

The road really should be closed to lay the tarvia to the best advantage and get the best results, but that is not always possible. However, a small detour to the north of town is being made, which will give the covering a chance to set and harden, which takes only a short time in comparison to other materials.

If the present experimental three miles prove to be all that is claimed for it, it is likely that the entire highway in this section of the country will later be surfaced, which would give us a real road—equal to that of cement—for many years to come.—Genesee News.

#### A Good Corn Crop

J. D. Carter brought in this week a sample of the splendid corn which he raised on his farm five miles northwest of Troy. The ears measure more than nine inches in length and are well formed and well matured. Mr. Carter says that an Iowa corn raiser who looked over the field estimated the yield at 35 bushels.—Troy News.

#### Bear Ridge Play a Success

The home talent play, "Smith's Dilemma" given on Big Bear ridge last Saturday evening, was exceptionally good according to the unanimous expression of everyone attending. Each member of the cast handled his or her part in a highly pleasing manner, which was demonstrated by the applause of an appreciative audience.

The amount taken in from the play and the candy sale was \$52.45. All of the proceeds will be used for the Taney school.

The cast of characters is given below:

- William Horace Smith, Uncle Bill
- Bill Hecht
- George Smith, his nephew
- Joe Forest
- Richard Keene, a detective
- Milo Slind
- Bob Stanley, a wooer
- Claud Jones
- Mrs. George Smith, Nellie
- Agnes Jones
- Muriel Armitage, her younger sister, Mable Weaver
- Miss Winslow, a spinster
- Bertina Forest
- Hilda, the maid of the Smith's
- Vina Hecht

"Wouldn't you mother be angry if she saw you in the scant bathing suit?" the preacher inquired of the flapper.

"I'll tell the world she would," Miss Flapper exclaimed, "It's hers."—Ex.

#### Triplet-McCoy

The wedding of two popular young people of the Southwick community took place last Saturday afternoon when Miss Blanche Triplet became the bride of Mr. Elmer McCoy. The wedding service was performed by Rev. E. A. Wolfe, pastor of the Methodist church, at his home in Lewiston. The groom is engaged in farming in the Southwick section. The young couple left immediately after the ceremony for a honeymoon trip to Oregon points. The best wishes of the community are extended to them for a happy future.

#### Successful Hunt

The party composed of Capt. G. P. Barnum, Bob Brown, Harley Perryman, O. C. Aiken, Fred Crocker and son, George, Billy May and son, Harley, returned home at 5 o'clock Tuesday morning from O'Hara Bay on the Selway where they concluded a successful deer hunt. They brot home six deer. Mr. Barnum and Fred Crocker not being entitled to one as they each got theirs earlier in the season.

The trip home was made in the Crocker truck and some extremely bad roads were encountered. At one place it was necessary to buck snowdrifts 2½ feet deep.

One of the incidents of the hunt happened last Saturday. Harley May shot a deer across the river on an island. His father was anxious to get the carcass so he stripped off and swam over after it. When he reached the deer he decided the risk was too great to swim back and he couldn't take the deer back with him anyhow. So Fred Crocker made a raft to go across after Mr. May and the deer. In the meantime Billy was over on the island sans clothes and getting colder every minute. When Fred finally got started, in his haste to cross the river, the pole with which he was propelling the raft, knocked him into the water. Harley Perryman, who was standing on the bank watching the proceedings, jumped in to rescue Mr. Crocker. The two finally succeeded in reaching the other side of the river. Mr. May and the deer were brought back, where the former was reinvested with that of which he had been divested and in due time returned to camp, none the worse for the adventure.

#### Keep The Goose Light Burning

Ed Deobald, Ben Cummings and Joe Gardner, the Kendrick duck hunting triumvirate, have their goose light burning over the Kendrick Garage every night when the signs are right. The theory is that the light, furnished by a thousand candle power electric bulb, will attract the geese on their annual pilgrimage to southern climes. When the geese get into the circle of light they lose their bearings and scatter in every direction. They will then perch around on the telephone wires and wait until the light of day gives them an opportunity to regain their sense of direction. They will thus cause several boxes of ammunition to be exploded before they resume their migration.

#### Kendrick Boy Making Good

Arthur V. Janes has a position in the McCune Home for boys in Independence, Missouri, a suburb of Kansas City. This is a vocational school which accommodates 200 boys and there are 20 members on the faculty staff. He is instructor and supervisor of the dairy and playground work on the personnel. He received the position out of 70 applicants, having been chosen for his high physical and moral standing. His present salary is \$100 per month with a promise of advance in salary as efficiency of supervision increases.

#### Wayne Mathes is holding a

Wayne Mathes is holding a goose and duck shoot at the town park this morning.

#### Annual Panhandle Poultry Show

The twelfth Annual Panhandle Poultry Show will be held at Moscow, Idaho, on Tuesday, Wednesday and Thursday, December 14, 15 and 16, 1926. Cash premiums and specials, as well as A. P. A. ribbons and diplomas, will be awarded, and the President's Cup will be given for the first time this year to the largest and best display by any one exhibitor. Pren Moore of Boise, Idaho, will judge the show, which will be a comparison-score card show, using the new A. P. A. cards. Special features will include a poultry institute and a number of poultry judging contests. The Moscow Chamber of Commerce sponsored the show, which is financed by donations and advertising from business houses of Moscow and vicinity. Premium lists are ready for distribution and may be obtained by writing to C. W. Hungerford, Secretary, Panhandle Poultry Association, Moscow, Idaho.

#### Deary Store Hit By Blaze

The store building and contents of the Deary Mercantile company were destroyed by fire at 3 a. m. Thursday. The fire seemed to have originated in the store room, back of the store proper. The loss is estimated at \$25,000 with \$17,000 insurance. Fire fighters had a hard time saving the bank building, which is across the street from the store. Damage to the bank is estimated at \$500, fully covered by insurance.

The Deary Mercantile company was organized about a year ago by J. A. Harsh, president; O. W. Schroeder, secretary; S. E. Anderson, manager; and G. Wylie and Victor Anderson, directors. It is thought that the company will rebuild and continue business.

#### Want Road Completed

The completion of the road from the east end of the graveled road near Spalding bridge to the east end of project 33, a distance of three miles, was a matter discussed by the directors of the Commercial club at their meeting Friday. The matter of awaiting an allocation of money from the Indian department amounting to approximately \$2,500 is understood to be the determining factor in the state's program for undertaking this work. In order to secure a commitment from the state department of public works as to the time this work would be undertaken, a committee composed of E. A. White, E. A. Cox and Lloyd Harris was appointed to take the matter up with Commissioner W. J. Hall.—Tribune.

#### Confidence in The Town

More towns die for the want of confidence on the part of its inhabitants and lack of co-operation than any other cause. When a man in search of a home or a business location goes into a town and finds everything brim full of hope and enthusiasm of the prospects of the place, and all earnestly at work to build it up he soon becomes imbued with the same spirit, and as a result he drives down stakes and goes to work with the same interest. When, however, he goes to a town where everyone expresses doubt and apprehension for the future prosperity of the place, moping about and indulging in mournful complaints, he naturally feels that it is no place for him, and he at once shakes the dust off his feet while he pulls out with all possible speed for some other place. Therefore try and make a live, enterprising town out of the town in which you live. When you are working for or say a good thing for your town, you are accomplishing all the more for yourself.—Ex.

The Methodist Ladies Aid have set December 11th as the date for their annual chicken dinner and bazaar. Watch for further information.

#### Kendrick School Notes

The second grade finished the story reader "Jack and the Beanstalk" and is now reading "Gorden Reader."

The primary room learned the poem "The Land of Counterpane" and a typed copy and a picture has been given to each child to paste in his poem booklet.

The first and second grades are making large cardboard elephants for Christmas.

Coleman Dick of Lewiston, who visited his sister, Miss Dick, over Armistice Day, enjoyed meeting the children in the primary room, and thought that they were very smart for their grade. For opening exercises, the children gave a short program which was greatly enjoyed.

The fifth and sixth grade art class is making school song books. The covers were constructed in the art class and new songs will be added each week.

The children's monthly weights were taken this week and it was found that every one had gained at least a half pound and a number had gained as much as five pounds over the records a month ago.

The Freshman gave a General Assembly, last Friday, as follows:

- Bible reading, General song, two songs by the girl's quartet "Al through the Night" and "O'er the River."
- "Morning Bells", song by Freshman girls.
- General song.

The girl's quartet was composed of the following girls: Soprano, Neva Ware; Alto, Josephine Wilkins; Tenor, Pearl Johnson; Bass, Lois Johnson.

Mr. Lynch has given a few written reviews in General Science, lately. This covered the last two chapters, which they have studied, and were mainly concerning electricity.

The English IV class has been spending considerable time on brief reports, concerning the early American authors. As English IV is a study of American Literature, these reports are very valuable. They have been taken from reference books, designated by Mr. Lynch.

#### JOKES

On the margin of a certain boy's report card, a teacher wrote: "He is a good student, but he talks too much."

The father of the boy signed the report, and added the following remark: "You ought to hear his mother."

#### In Trouble

One woman is in a dickens of a fix. She can't buy her coat until she gets her hat and knows what it is to be like. She can't buy her hat until she gets her dress and knows its color. She can't buy her dress until she is sure of her shoes. She can't get her shoes because they must match her coat. She can't make up her mind about that. In the meantime the Old Man is drawing 4 per cent interest on the time certificate and offering befuddling suggestions.... Ex.

#### Hypocrits

A very well dressed lady said at a bridge party: "The church is full of hypocrits." But the church contains no higher percentage of hypocrits than does a bridge party or any other gathering. This day, who was trying to keep up with a financial class far beyond her means, had about reached the peak of hypocrisy. Her every movement was the imitation of someone higher up on the social ladder, her language and gestures were borrowed and her face was buried so deep in powder and paint that no one really knew what she looked like. All the hypocrits are not in the church, not by a million miles.—Ex.

The members of the Presbyterian church enjoyed a supper in the church dining room last night. Dr. James Thompson of Seattle was present and gave a very interesting talk.

#### Schupfers Buy Theatre Stock

A deal was concluded last week whereby Otto and Herman Schupfer became the owners of the controlling interest in the Kendrick Theatre Co. Seventeen shares were purchased from G. G. Oldfield of Pullman, former manager of the New Kendrick Theatre. Nine shares were secured from E. B. Bechtol of Moscow, who had the contract of building the theatre a number of years ago.

The theatre is now operated by O. E. MacPherson who has it leased until April 1.

#### Thanksgiving School Program

Tuesday evening, Nov. 23, the grades from first to the eighth, will give a Thanksgiving program at the New Kendrick Theatre, beginning at 8 o'clock sharp. The usual admission will be charged. All taking part in the program will be admitted free.

The proceeds are to go toward paying for a set of reference books, "The World Book," purchased this year for the 7th and 8th grades. Come and help the children pay for their books. The program follows:

- (a) "Greetings."
- (b) "O, Come, Come Away," "The Land of Counterpane" by Frank Young.
- "Granny's Story", Alberta Sparber.
- "First Thanksgiving," 5th and 6th grades.
- "Mother Goose Play"

Mother Goose, Jewel Cummings  
Jack, Donald Carlson  
Jill, Evelyn Brown  
Bo Peep, Phyllis Thomas  
Tom Tinker, Bill Schulze  
Tom Tinker's Dog, Frank Young  
Singing by 7th and 8th grades  
(a) "The Old Familiar Place"  
(b) "Out Where the West Begins."

"When She is Thankful" Rosebud Brown.  
"Getting Ready for a Visit" by 5th and 6th grades.  
"The Noble Hero," 7th grade.  
"Father Time's Thanksgiving," 3rd and 4th grades.  
"The Rain", Cleota Bolon  
"The Train to Lewiston," 7th and 8th grades.  
"Women's Rights," 8th grade.  
"My Opinion and Betsy Babbitts" (a)—John  
(b)—Samantha  
Singing by 7th and 8th grades,  
(a) "The Linden Tree".  
(b) "Good Night".

#### Five More Weeks To Go

The Hope Chest Contest has but five more weeks to run, after which time the prizes will be awarded. The standing of the contestants is still indefinite as a goodly number of votes have not been turned in. The final wind-up promises to be very interesting.

Following is the standing of the contestants:

- Miss Leland Houck ..... 505
- Miss Edna Southwick ..... 935
- Miss Henrietta Blum ..... 7570
- Miss Thelma Perryman ..... 920
- Miss Bonnie Craig ..... 2910
- Miss Amy Tupper ..... 750
- Mrs. Eddie Galloway ..... 4130
- Miss Clarice Leith ..... 480
- Miss Beryl Harrison ..... 540
- Mrs. Walter Benscoter ..... 1445
- Miss Leora Aiken ..... 610
- Miss Corrine Snyder ..... 760

#### Turkey Shoot Saturday

Paul Manly will hold his annual turkey shoot at the town park tomorrow morning. Everybody is invited to attend.

Mrs. Axel Swanson returned yesterday afternoon from Pullman where she visited relatives.

#### Juliaetta Epworth League Play

The Epworth League of Juliaetta will stage a play at the I. O. O. F. hall at Leland, Friday evening, November 26. The play will be held under the auspices of the Leland Epworth League and the proceeds equally divided between the two leagues, to be used for missionary work.

### ITEMS OF INTEREST FROM SOUTHWICK

Written for Gazette by Special Correspondent

Mr. and Mrs. Roy Southwick spent last week in Lewiston.

Herbert Holmes is visiting with friends in and around town for a few days.

Frank Wilmot received word of the death of his father at his home in Salem, Oregon. Mr. and Mrs. Wilmot left Saturday for Salem. After a few days there they will go to Marshfield where they expect to make their home for sometime.

Mrs. Attlee Mustoe slipped and fell Monday, striking her arm on a rock and dislocating her elbow. She was taken to Kendrick for treatment.

Mrs. Wm. Berriman had the misfortune of falling one day last week and breaking one of the bones in her ankle. Miss Pearl Couger is assisting with the house work.

The eldest daughter of John Lettenmaier is ill with scarlet fever.

Mrs. Grant Bateman is quite ill with scarlet fever.

Wm. Whiting and wife spent Sunday at the home of their daughter, Mr. Frank Thornton.

Mrs. Mel McFadden is here from Lewiston helping care for her daughter, Mrs. Leslie Triplet, who has been quite ill with scarlet fever.

A party of men consisting of Vester Whiting of this place and Roy and Alva Craig went hunting Monday, returning Tuesday evening. However they were not lucky in getting any game.

Harold Whiting and family spent Sunday at the home of N. C. Longeteig and wife.

Isa Luce, who has been working for Roy Southwick, left for Aberdeen, Monday morning, having been called by the serious illness of his father.

Fred Whiting and family were the Sunday guests of his brother, Vester and wife.

Howard Southwick and wife went to Lewiston, Saturday, returning home next day.

Wm. Henderson and family, Nellie and Nadine McCoy were guest of Mr. and Mrs. Milton Benjamin, Sunday.

Zoel Fairley and wife are moving to the Frank Wilmot property this week.

Mr. and Mrs. C. F. Grant and two children, who have been visiting relatives at Leland and Southwick, left last Thursday for their home at North Bend, B. C.

George Iseman drove to Lewiston last Saturday, returning Sunday.

Mr. and Mrs. J. E. Hoppe left last Thursday for Portland to visit for a couple of weeks with their daughter, Mrs. James McFadden and family. They will drive thru in their new Dodge sedan.

Miss Penny was the guest of Mr. and Mrs. Wm. Stump, over the week end.

While riding horse back Sunday, Charles Harris had the misfortune of having his horse fall on him. His foot caught in the stirrup and badly twisted his ankle. However he is able to get around some with the aid of crutches.

Miss Bessie and Veta Ferguson spent the week end at the home of their parents on Freeman creek.

J. R. King is building an addition and remodeling his residence throughout.

Mr. and Mrs. Russel Rodgers are spending a few days in Lewiston this week with relatives.

#### Mighty Hunters Return

The deer hunting party composed of Ernest Clem, Joe Gardner, Ed Deobald and Ralph B. Knepper returned home last Saturday evening from a week's deer hunt in the Selway country. They bagged four deer and report a very pleasant trip.

Born to Mr. and Mrs. Leo C. Raaberg, Sunday, Nov. 14, a nine pound son.

DON'T LOSE YOUR NERVE

In all parts of the country there is developing a stronger sentiment for graded, surfaced highways. In every section of the country where any sign of progress is evident, better highways are being built, not only the main trunk lines, but lateral roads to serve the various parts of the community. In practically every instance where these roads have been built, the main trunk lines are started first and then the lateral feeders to the main highways built as fast as funds are available.

It is an accepted fact in this community that the Potlatch country, taken as a whole, is farther behind on road construction than any part of the northwest country. This condition is not the result of lack of funds with which to build roads, as this is an extremely rich agricultural region. It is largely due to the fact that the people refuse to unite on a road-building program. Individual opinions are put ahead of the main issue. Selfish motives block every project that is put up for decision.

Unless the people of the Potlatch take a different attitude toward highway building, this section will continue to slip farther behind the good roads procession from year to year.

There was some opposition displayed at the meeting of the Kendrick Commercial Club last week, to the present road program that is being outlined for Kendrick highway district. Opposition developed from a source that might least be expected. This should not be discouraging to those who favor public improvements and are willing to devote their time and money to make them come to pass. Opposition to every form of public work is to be expected. It is well to look to the selfish motive that prompts this opposition. One man may be opposed to the project because the road fails to pass his farm. Another opposition may be inspired by the fact that the road cuts through his farm, while still others are chronically opposed to spending any of their own funds for public improvements.

The project that has been discussed for the past year or more, of building a new grade on Bear ridge and improving and surfacing the American ridge grade, is a sound one in spite of any opposition that may crop up against it. To put this project through requires a bond issue.

Eight years ago the village of Kendrick put through a sidewalk and sewer improvement district and a few years later a street improvement project. These three projects required a bond issue of over \$75,000. Every cent of this amount was taxed against the property of the village. In less than two more years the two first projects will be paid off. The street improvement work, which cost approximately \$45,000, was half paid in cash before the bonds were issued. The balance due is being paid without any fuss by the people here who realize that the improvement was the best thing that ever happened to the town. There is no one here who would be willing to go back to the old condition.

Some time within the not far distant future the people of Kendrick highway district are going to be given a chance to show their nerve. They will be given an opportunity to vote "yes" or "no" on a bond issue to start building better highways. Brisbane says that men fight with their nerve. When they lose their nerve they are through. Henry II, of England, turned his face to the wall and said, "Shame on a beaten king" and died. It's up to the people of Kendrick highway district to keep up their nerve and build roads.

Big Bear Ridge

Mr. and Mrs. T. H. Rognstad of Clarkston spent last week on the ridge.

Mr. and Mrs. Hiram Galloway and daughters, Jeanette and Laddonia, and Mrs. Florence Hupp of Little Bear ridge were week end visitors at the K. D. Ingler.

## SWINE SANITATION MOST PROFITABLE

(Prepared by the United States Department of Agriculture.)

Lack of thoroughness in using the modern system of swine sanitation results in a corresponding decline in its effectiveness. This assertion by the United States Department of Agriculture is based on the experience of 180 Indiana farmers, some of whom followed official directions completely while others, for comparison, used only parts of the system. The test was directed by Indiana extension workers with the following results:

Swine owners who cleaned farrowing pens before sows were put in raised an average of only 5.05 pigs per litter.

Owners who cleaned and also disinfected the farrowing pens raised an average of 5.67 pigs per litter.

Owners who cleaned and disinfected farrowing pens and also washed sows before putting them into the pen raised 6.85 pigs per litter.

Owners who followed all of the practices mentioned and in addition put their pigs on fresh pastures during the suckling period raised an average of 8 pigs per litter. The last method is the complete method.

It thus appears that any "cutting of corners" in using the system of swine sanitation reduces its effectiveness considerably. Department officials point out that the complete method, however, is simple and easily followed and urge that it be used in full.

Showing that from one to three more pigs per litter were raised when owners followed modern methods of swine sanitation, a report received by the United States Department of Agriculture on results in Illinois is of special interest to hog men. The system of sanitation used was based on investigations of federal scientists in the control of roundworms and other parasites.

"In most cases," the report states, "as many pigs as usual were raised from one-third fewer sows, and over 95 per cent of the pigs saved at farrowing time were marketed."

More than 600 Illinois farmers used the method of swine sanitation last year and its popularity is spreading.

## Selecting Swine Breed on Personal Preference

Three points should be taken into consideration by farmers who have to choose a breed of hogs to raise, or who desire to change breeds, according to the animal husbandry department at the New York State College of Agriculture at Ithaca.

The first of these is personal preference, they say, for if a farmer has a breed which he likes he will take better care of them and will feel better satisfied.

The second factor is community preference. The most popular breed in a community usually has been selected because of its adaptability to the locality or suitability to the market needs. Then, too, a uniform product in a locality usually makes marketing easier and frequently brings higher prices.

The adaptation to local conditions is the third factor to take into consideration. This can be illustrated by the white hog which is popular in this section but which suffers from skin scald in the South.

The department says, however, that there is often more difference between individuals of a breed than there is between the breeds. From this standpoint, they advise that it would be more profitable for a farmer who already has a herd to practice careful selection and judicious culling than to try to find a better breed.

## Best Plan to Vaccinate Pigs When Quite Young

Dr. Robert Graham of the veterinary department of the University of Illinois recently reported the results of the experimental work conducted by him, which results agree closely with the recommendations of the United States Department of Agriculture, and show that it is good practice to vaccinate pigs at least a month before they are weaned, so they may have time to recover from the effects of vaccinating before weaning.

Doctor Graham indicates further in his report that it is best to give plenty of virus, in order to secure lasting immunity. The results of these experiments also indicate that it is not always possible to secure 100 per cent immunity under all conditions; that is, you may find a few hogs that do not become permanently immune by vaccination, but the per cent of permanent immunity does not seem to bear any relation to the age of the pigs when vaccinated.

## Live Stock Necessary

With the majority of farmers now realizing that the keeping of live stock is necessary for successful farming, there has been need of a crop which would take the place of bare summer fallow and, at the same time, produce plenty of good feed for either horses, cattle, sheep or swine. Corn will do this better than any other crop which we grow. The combination of corn and live stock puts the production of wheat on a basis which does not mean ruin if the wheat crop fails.

## Winter Feed for Farm Work Horse

### Idle Animals Do Well on Roughages Supplemented With Grain.

(Prepared by the United States Department of Agriculture.)

The ideal method of wintering idle or light working farm horses to one that will bring them through to spring with normal weight, renewed vitality, and increased energy. Obviously the winter ration should be different from that for the other seasons.

The liberal use of roughage, supplemented with the right amounts and kinds of other nutritious feeds, will maintain a horse properly during the winter. Idle farm horses, except brood mares and growing stock, ordinarily do well on a ration composed largely of the coarser hays, straws and corn fodder. Cornstalk fields, grain-stubble fields, or pastures which have not been closely grazed during the summer are very desirable sources of a large part of the winter maintenance feed for such stock. It is often advisable to supplement the coarser roughage with a moderate supply of legume such as alfalfa, clover, vetch, sorghum, soy-bean, or cowpea hay. These hays are not only rich in protein and mineral matter, but, being somewhat laxative in effect, they also help to keep the digestive tract in good condition. They are especially valuable when fed with straw and similar feeds, for when so used a supplemental ration of grain is unnecessary. The drinking of an abundance of pure water by the horse will tend to increase the utilization of dry roughage. If impracticable to feed a legume hay, a small quantity of grain, preferably oats, or, if more economical, corn or barley, will serve to maintain the horse in thrifty condition. One or two bran mashes a week or a little linseed meal each day will help to keep the system in good condition and prevent impaction resulting from consumption of large amounts of coarse roughage improperly supplemented.

### Salt for Horses.

An average of about three-fourth ounce of salt daily is sufficient for most horses, except those doing heavy work or when on dry feed. The condition of the horse that has been properly cared for in the open through the winter is usually better than that of the stable horse. In some sections of the country, however, weather conditions do not permit wintering horses outdoors. Where the animals must be kept in stables, these should be made as sanitary and comfortable as possible. An abundance of light and proper ventilation of the stable throughout the entire year are essential for complete sanitation and the health of the horse. A system of ventilation with floor-outlet ventilators will tend to carry off foul air and regulate the temperature, especially in colder climates. It is important that the horse be protected from direct drafts. Where windows are relied upon for both light and ventilation they should be high up from the floor, and open inwardly from the top. Stalls must be bedded, and cleaned daily, in order to keep them dry and sanitary. Clay floors are doubtless the best if correctly built and properly attended to. They must be kept smooth, with slightly more slope for drainage than is required for other types of floors, however.

### Grass Paddock Helps.

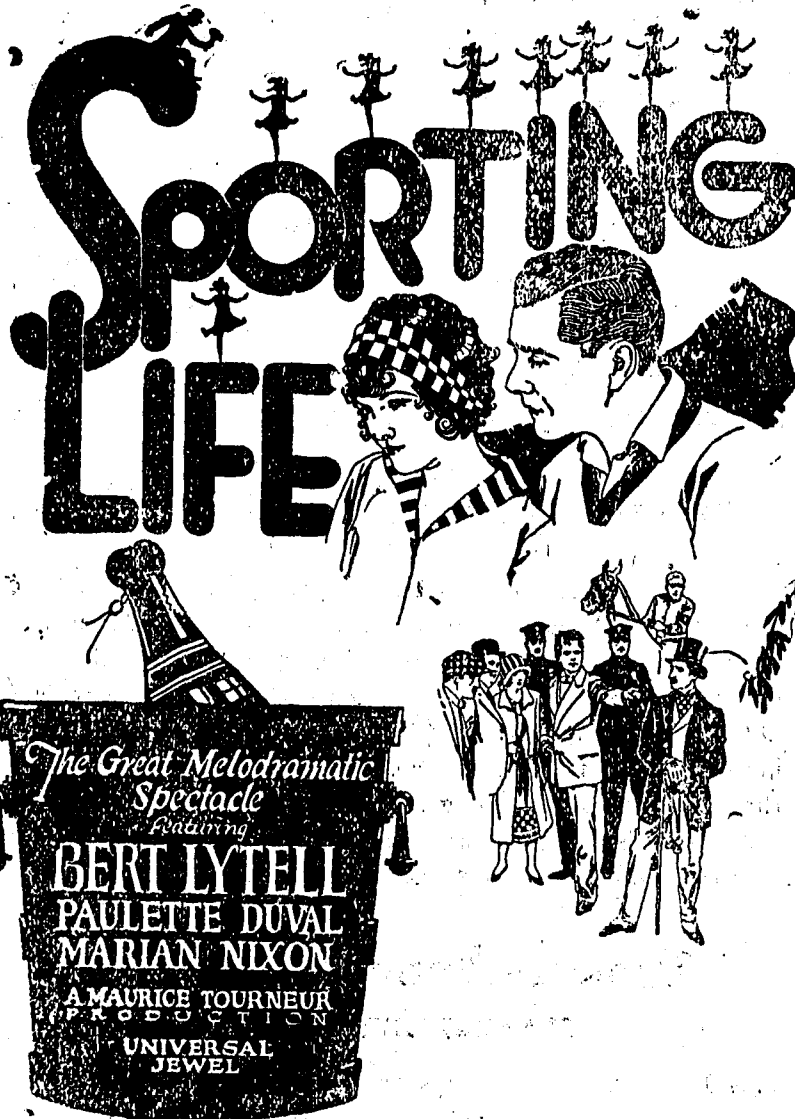

In connection with the stable, a large paddock or inclosure, especially a sodded one, helps considerably to keep horses that are worked irregularly in fit condition. The exercise and grass thus made available are both beneficial. This exercise in the open will help to guard against filled hocks, azoturia (so-called Monday morning sickness) and other troubles. A further aid to the health consists in thorough grooming.

As spring approaches the horse must be put into condition for the heavy work ahead. This fitting period varies with the condition of the animal, ordinarily lasting from two to four weeks. A young horse, especially one just broken, requires longer than the mature animal. At this time the winter ration, consisting largely of coarse roughages, should gradually give way to a smaller feed of finer-quality hay and a small quantity of grain three times daily. This ration should be slowly increased until, with the beginning of light work, a 1,400-pound horse will receive daily about fourteen or fifteen pounds of fine-quality hay. This gradual change from coarse roughage to good quality feed will have prepared the digestive tract for handling eighteen to nineteen pounds of grain and sixteen to eighteen pounds of hay, which the horse will need when doing heavy work. Along with the more nourishing ration the work of the horse must be increased by degrees until he can, without overexertion, do a full day's work.

## Waste of Plant Food by Management of Manure

On many farms much of the plant food in manure is wasted by careless methods of handling. Not every farm can afford a covered manure shed, but it takes little additional labor to place manure from the barns in compact piles where the losses from leaching are minimized. Then it does to allow it to spread in a shallow open pile all over the barnyard. The most efficient way to handle manure is to haul it out to the field in a spreader as fast as produced but this practice is not always feasible.

## Cheap Gains Made With Heifers During Summer

Every day that a heifer does not grow is time wasted as well as feed lost, according to W. J. Fraser, University of Illinois. Cheap gains can be made in the summer months and farmers should keep this in mind in the management of their herd.

The same thing is true of young dairy calves. A grain ration fed with pasture and skim milk will push them along rapidly. A good ration is composed of 83 pounds each of ground, corn, ground oats and wheat bran with 10 pounds of linseed oil meal. Legume hay should be fed with this ration when the calves are old enough to eat it. When good pasture or legume hay is not available the linseed oil meal should make up one quarter of the grain mixture.

## BUILDINGS MUST BE COMFORTABLE

A poultry house which is dry, light, clean and free from drafts or sudden changes of temperature is essential for success with poultry. Hens must be comfortable if they are to be good producers.

It is not always the showy house that produces the best results. Conservatively built houses that provide comfortable quarters are often as good from a practical standpoint as more expensive houses. In fact, at the present time, the small house which can be moved from place to place is rapidly gaining in popularity on account of the benefits derived from moving the chickens to fresh ground in order to avoid diseases by germs that may be lurking in soil long occupied by poultry.

Poultry investigators agree that lack of vitality which has resulted in loss of birds when shipped is the indirect result of increased size of our flocks without a corresponding increase in housing facilities. This is another reason for added attention to poultry buildings.

From the standpoint of satisfactory returns poultry pays as well as any other class of live stock and no other live stock, unless it is the dairy stock, responds so readily to good housing conditions as does poultry. Good locations are essential in order to make good houses give results.

Poultry houses should be located conveniently to the other farm buildings and so that the chickens will range toward the house. If possible the ground should slope toward the south and face in that direction in order to give the birds the maximum amount of sunshine on short winter days. The house should be protected from a windbreak. If no natural windbreak is available some trees or shrubs should be planted to afford shelter.

A good many of the experiment stations have excellent bulletins in poultry-house construction. This is a

good time of the year to build a house and get the benefit of it this winter.

## Improper Feeding Will Cause Bowel Disorders

This is a time of the year when a good many bowel disorders come from improper feeding or from feeds that are not in first class condition. During warm weather it is very easy for some of the mixtures to spoil and if feeds of this type are fed to the chicks the results are usually diarrhea and sometimes death.

The commercial feeds of the large manufacturers are usually kept and sold under conditions which protect them from spoilage, but if large amounts are stored on the farm they should have a dry place.

Another danger at this season of the year is dead animals. Dead rats, mice, rabbits, and often chickens are allowed to lie where the chickens may pick at them. During hot weather such carcasses often develop ptomaine poisons with the result that a heavy loss of both chicks and mature fowls occur before the cause of the trouble is discovered.

## Instinct Strong in Weasel

Instances are on record of a weasel having killed and buried half a dozen birds, but, although it goes to the trouble of storing food like its distant ancestors did, it seldom goes back to the store. It is just carrying out a habit that has been handed down through the ages.

R. D. Newton, Prop.

# The DAIRY

## DAIRY LOSSES CUT BY MILK COOLING

A large proportion of the loss from sour milk, high bacteria counts, and low quality butter and cheese, might be avoided through prompt and thorough cooling of milk at the dairy barn, asserts the dairy department of the College of Agriculture, New Brunswick. All milk should be cooled to 50 degrees F. or lower and should be kept at that temperature until delivered at the receiving plant.

In the matter of dairy temperatures one should never guess. A good thermometer will always pay for itself in a short time. One cup of rejected milk will cost more than four or five good thermometers.

To cool milk to 50 degrees F. or below, ice is nearly always necessary. If ice cannot possibly be had, only the coldest water should be used. This means water direct from the well or spring unless a colder source is available. Running surface water or tank stored water is never very cold. If ice is not to be had, it is desirable to arrange the equipment so that spring water may run constantly through the milk storage tank, or so that all water pumped for farm stock passes first through the tank.

The cooling of morning's milk is the important problem just now. A surface cooler will save time and ice, and will enable the farmer to cool it at the farm.

Once the milk has been cooled to 50 degrees F. or below, if it is to be held, a cooling tank in the milk house becomes a necessity for final cooling and storage. Milk plant operators can advise farmers as to the best types of coolers, cooling tanks and milk houses to meet the requirements of their respective companies and boards of health.

## Bloody Milk Caused by Ruptured Blood Vessel

When a cow gives bloody milk it is due to the rupture of a small blood vessel in one or more of the quarters. This condition usually leaves as soon as the cause is removed.

Immediately after freshening this condition is caused by the inflammation in the udder and leaves as soon as the inflammation leaves the udder. When it takes place later in the lactation it is usually caused by an injury of some kind to the udder. It may be due to lying on a cement floor or by bumps from calves or other cows in the herd. To effect a cure the cause must be removed. Watch the cow carefully to find how she injures the affected quarter and then remove the cause and you should have no further trouble with bloody milk.

FOR SALE: A bargain, massive oak library table. Inquire 39-2 Gazette.

### Some Grain Is Essential When Pasture Gets Short

To keep up the milk flow of his herd the dairyman who has no sudan-grass pasture must increase the grain fed when natural grass pasture gets short. Due to the exertion a cow may actually require more feed when on a sparse pasture than when shut in a dry lot. All cows giving over three gallons of milk daily should get a pound of grain for each five pounds of milk while on pasture. Cows nearly dry and not due to freshen within two months can economically go without grain at present. The chore of milking cows in fly time can be avoided by breeding in late December.

### Dairying More Popular

Whenever one half finds dairying profitable, the other half fears that it may be overdone. Hence the warnings

now being broadcast that dairying is up in the clouds and due to come down soon. But folks go right along paying their bills by means of a few good cows and hens just as they have for many years past. Quite the opposite, there are now many signs indicating that dairying will have even more popularity before it has less.

### "Jeddart Justice"

The term "Jeddart justice" comes from a custom of the old border town of Jedburgh, England, where the alleged culprit was hanged first and his trial held afterward.

### Why Congregation Tittered

English Vicar (making announcement)—Next Sunday being egg day on behalf of our cottage hospital, will the congregation lay their eggs in the font as they come into the church?—New Haven Register.

## POULTRY

### BALANCED RATION NEEDED FOR HENS

Students of hen science believe that an ordinary bird should be able to produce a thousand eggs, if we knew how to give her a fair chance.

She is a wonderful machine, with the embryo of more than a thousand eggs in her make-up, but so many things combine to prevent her from doing her best that she generally falls away short of such production during her few years of life.

If you like to count eggs before they are laid, you may figure the matter out to suit yourself—so many pounds of grain, meat, lime, fat, fiber and water to each dozen eggs—and there you are.

All would be well, and you could begin at once to count your eggs, if it were not for the fact that "something always happens" to prevent the regular, machine-like production desired.

Certainly we must be careful to supply the needful ration so that fat, protein, nitrogen, fiber, ash or mineral and water will be fed. This is necessary, because no eggs can be produced if one of these elements is lacking.

The fowls must be kept in condition or they will not "shell out." This is one of the most difficult parts in our whole plan of egg production.

The grains are high in nitrogen and protein. Meat scrap, bone and meat meal are high in fat and protein. When the flock is out on the range, young and old pick up what they instinctively seek as needful.

Some of the prepared feeds are mixed so that just about the right proportion of each needed element is in the ration. Sometimes the birds do not seem to like the ration as mixed for them, so the plans of the scientists do not work out.

## The DAIRY

### KNOW YOUR COWS, URGES DAIRYMAN

Co-operation in selling dairy products, when properly developed and managed will aid the dairy industry and will increase its returns, but efficient production of milk is the most important factor in successful dairying.

Efficient production is still within the control of the individual dairyman," says John A. Arey, dairy extension specialist at the North Carolina State college. "This factor is not dependent on group action. If all the dairymen knew exactly what it was costing them to produce milk, the danger of overproduction would be greatly reduced. There would be no surplus at any of our large milk markets if the unprofitable cows were slaughtered."

Mr. Arey states that the benefits of a cow-testing association in showing which cows are profitable and which are unprofitable cannot be overestimated. He states that a striking example of this was seen in the case of a Virginia dairyman who was milking 86 cows and found that he was not making money. As a result of cow-testing work, the herd was divided into two groups of 18 cows each. The results of the testing showed that one group of 18 cows was returning a profit while the other 18 animals were not paying for the feed consumed.

A further study of the records showed that these 18 unprofitable cows produced 71,000 pounds of milk for a city which already had an over-supply of market milk and the price of milk produced by the 18 profitable cows was thus depressed by the poor producers. The problem of the dairyman was then simple, but he did not know about it until the records made it clear, states Mr. Arey. The remedy was not merely to put in more efficient methods of marketing but also to dispose of the 18 unprofitable cows.

Mr. Arey states that a large number of dairymen could get much more profit from their herds if they had accurate records such as are kept by cow-testing associations.

### Dried-Apple Pomace for Milk Cows Meets Favor

There are many people interested in feeding apple pomace to stock and some results secured by the Virginia experiment station will be of interest. The people at that station compared dried apple pomace with dried beet pulp and with corn silage in rations for milk cows. They came to the following conclusions:

(1) The results of this trial in milk production check closely with the conclusion that the values of these feeds are approximately in proportion to their total digestible nutrients, that one ton of dried beet pulp is about equal to four tons of corn silage and that one ton of dried apple pomace is about equal to three tons of corn silage.

(2) The milk flow produced by both the beet pulp and apple pomace groups indicates that these two feeds are valuable feeds for cows producing large quantities of milk and experience in this trial showed also that apple pomace was highly relished by the cows and should be considered as an important appetizer in dairy cow rations.

(3) The experimental results place the value of dried apple pomace at 75 per cent that of dried beet pulp, but indicate also that the present price of dried beet pulp is far too high in comparison with silage.

### Plan Tank Heaters for Cows in Winter Season

In making plans for the approaching winter season, figure on a method of warming the water for the cows during the cold weather. Just imagine how it would seem if you had to get up on a winter morning and start the day's work with cold bread and butter and a glass of ice water. It is hardly required that the cow have anything resembling the hot coffee and the steaming flap-jacks that are on your own table, but it is not too much that she be supplied with drinking water with the chill taken off. Many a cow has to stick her nose down through ice crystals or even has to break a thin sheet of ice on top of the tank, in which case she probably drinks just as little as she can get along with, and even then she shivers for a couple of hours on account of the cold drink. There is no more certain method of increasing milk production and maintaining good health in the herd than by supplying drinking water with the chill taken off by means of some kind of a tank heater.

### Molting Period Is Good

#### Index of Value of Hen

Hens that are in the midst of molting do not, as a rule, lay. The time of the year when molting takes place is, therefore, a reliable index of the value of the hen to the flock for the reason that a hen molting in wrong season, when she should be laying, can deprive the flock of more profit than would be the case had she molted early enough to be laying at the peak of high prices.

The "early molter" is not, however, a good layer, as a rule. Molting usually starts with the neck, then the body and finally the tail and the wings. It takes, usually, three months for the molting process to be fully completed. While it would seem that the early molters would be the best winter layers, actual experiments have proved that such is not the case.

These texts held by various experiment stations have brought out the fact that egg production controls the molt rather than the molt controlling the egg production. So long as laying is continued the molting will be postponed. And it is quite universally conceded that the late molter is the best layer. In fact, it seems to be a standard rule on commercial farms now and in the experiment stations to discard the hens which have completed the molt in late September and are in full feather and to hold those molting in October and November.

### Soy Bean Meal for Hens Is Most Excellent Feed

A number of feeding tests at various experiment stations have shown the value of soy-bean oil meal as a poultry feed. From these tests it was concluded that soy-bean oil meal could replace rolled oats in chick feeding. Poultrymen in the Pacific coast states have used soy-bean oil meal for several years and consider it a most excellent feed for growth and egg production.

Another series of experiments showed that soy-bean oil meal when fed with a suitable mineral mixture is a better supplement to corn meal than scraps and is nearly as good as condensed buttermilk when fed to chickens for short-time intensive feeding periods.

### Way to Make Hens Sick

Feeding moldy cornmeal is rather a sure way of making hens sick. Spoiled feed will ruin either young chicks or ducklings in a short time. Always sort carefully any corn containing moldy or decayed ears and discard all that are not fit for food. Dogs can disgorge material that proves harmful to them but when a hen or chick eats spoiled grain or decayed meat it must pass through the entire digestive system and often it kills the bird.

### Feed Value of Chess

There are no feeding tables giving the food analysis of chess. But it is safe to say that it has a fair feeding value. Many times it has been fed with satisfactory results. It is best to grind it and mix it with other grain. Chickens are shy about eating any new grain. If you bring your chicks up on wheat, and then suddenly change to corn, they will at first refuse to eat the corn, but in a short time they learn to eat the corn readily.

### Using Drinking Cups

Dairymen are using drinking cups more and more every year, because it pays them to do so. The man who milks but a few cows may not be able to see his way clear to fit up his barn with these modern conveniences, but he can at least keep his water tank in a sheltered place in the barnyard and maintain the water at the proper temperature. Ice in a stock tank, and especially in one from which dairy cows must drink, is an expensive proposition.

### Dairymen Waste Leaves of Alfalfa and Clover

Thousands of dollars have been wasted by New York state dairymen who have swept alfalfa and clover leaves out of their cow's mangers, says W. T. Crandall, of the state college of agriculture at Ithaca, N. Y.

The reason for this is that with good legume hay only 15 to 18 per cent of the total protein is needed in the grain mixture. Cows getting heavy feeds of higher protein mixtures lose their appetite for protein, explains Mr. Crandall, and so they refuse to eat the legume hay leaves, which are highest in protein content. Alfalfa leaves have 22.5 per cent total protein, while the stems have but 7 per cent.

Dairymen should never have to sweep these valuable leaves out of the mangers, says Mr. Crandall, as they are thereby sweeping out some of the best feeds they can give their cows. "Cut down on the high protein grain," he advises, "and feed the cows the cheaper and better home-grown hays. If you swept leaves out of the mangers, you were feeding just that much more protein than was necessary, and next fall you should cut the amount so that the cows will clean up all the good alfalfa and clover hay."

### Feed Cows Liberally to Make Dairy Profitable

The average dairy cow consumes about 15 pounds of feed per day of what we call maintenance ration—that is, the food required to keep the cow alive, and to replace waste. We might say it is the board bill of the cow.

Now, if the cow can consume 30 pounds of feed, then we are interested in the 15 pounds which is not used for maintenance, but rather for production. If the cow consumes 45 pounds, then we are interested in the 30 pounds that she consumes and uses for production.

Such a cow, as a rule, will make twice the profit of the one that consumes 30 pounds, so it is very plain

to see what we need is an animal that will consume large quantities of food and turn it to profitable use.

Would it not be wise to market more of our corn by feeding it on the farm and retaining the valuable product of fertilizer thus equalizing farm labor and altogether making a more economic and dependable line of production? With the present high value of land, strict economy in production must be studied carefully if the land is made to return a fair earning on its value.

### CAPITAL VISITOR

Chief Crazy Horse of the Sioux tribe, one hundred four years old and one of the few survivors of the Custer massacre, was an interesting visitor to the national capital. He arrived from Philadelphia by airplane.

### China Enjoys Firecrackers

China consumes more firecrackers in a year than any other nation. They are used in connection with social, religious and military functions, as well as births and funerals and peace demonstrations after quarrels.

### Holding Ourselves in Readiness

This is a friendly establishment, with a personnel who always hold themselves in readiness to serve you. Skilled in the art of funeral directing, through intelligent study and experience, we can give you service that is both tactful and efficient. You may entrust us with all details of the funeral arrangements with the assurance that everything will be given our personal supervision. This relieves relatives and friends of trying responsibilities and insures maximum satisfaction.

Laws, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers within four months after November 19, 1926, the first publication of this notice, to the said administrator at the Kendrick State Bank, Kendrick, the same being the place for the transaction of the business of said estate, in Latah County, State of Idaho.

A. H. DAUBENBERG,  
Administrator.

Dated at Kendrick, Idaho, November 15, 1926. 47-5

**Linden Items**

Clem Israel and F. C. Lyons left last Monday for the Selway in search of big game. Clem secured a nice deer.

Miss Grace Dahl of Park was a guest of Mrs. Edgar Bohn over the week end.

Mrs. Carr spent Tuesday with Millie Abrams.

Mrs. S. H. Fry and son, Clarence, were Moscow visitors last Tuesday.

Mr. and Mrs. Forest Combs of Lewiston are guests of Mr. and

Mrs. Louie Alexander this week. Lloyd, the little son of Mr. and Mrs. Clem Israel was very sick Sunday evening, but is better at this writing.

Mr. and Mrs. Edgar Bohn took their little daughter, Alfreda, to Moscow to consult a physician, Saturday, as she has been ill with indigestion the past week. She is some better at this writing.

Mrs. John Travis spent Sunday at home, returning to her work in Lewiston, Sunday.

The dance given Friday evening by five Kendrick young men, was well attended in spite of the rain and everyone seemingly had a very nice time.

Seventy-five friends of Duncan McPhee gave him quite a surprise, Sunday, when they came with well filled lunch baskets, to help him celebrate his seventy-third birthday.

Mr. and Mrs. A. G. Wilson of Kendrick, Mr. and Mrs. Claud Pippenger and family of Cavendish and Axel Bohn of Park attended the birthday dinner given for Mr. McPhee, Sunday.

W. Weyen finished threshing beans Wednesday on the George Garner place.

Several people from our ridge attended the radio demonstration at the Cedar ridge school house, Wednesday evening.

C. E. Harris, Albert Dorendorf and Tony Kirehknopf returned Monday evening from the Selway where they were deer hunting.

Mrs. H. J. Starr spent Sunday with Mrs. S. H. Weaver.

Ben Smith and Arthur Bohn made a trip to Three Bear Sunday.

Mr. and Mrs. Edgar Bohn purchased the Mary Vaughan ranch and are moving on to it this week.

**Crescent Items**

Too late for last week.)

Little Cecil Trail is visiting at the home of his grandparents, Mr. and Mrs. C. L. Trail.

Bill Dorendorf and wife, J. T. Kimbley and family, Bill Riley and wife, C. L. Trail and wife, J. M. Kyle and wife, spent Sunday afternoon at A. Dorendorf's.

Mr. and Mrs. J. M. Kyle will soon leave for Washington, Iowa, where they expect to make their home. Their many friends here will miss them but wish them prosperity in their new home.

Mrs. A. Dorendorf has been on the sick list.

Clarence and Charley Trail left Monday morning for Genesee, taking with them, their cattle which they have pastured here during the summer.

Mrs. Louise Taylor and little

daughter, Jean, spent the week end at the home of her parents, Mr. and Mrs. H. W. Wright. The occasion being a birthday party given by little Bobby Taylor.

**Texas Ridge News**

Mr. and Mrs. Otto Beyer of Clarkston, Wash. were week end visitors on the ridge.

Mr. and Mrs. Orval Miller and little son, Dale, are visiting Mrs. Miller's parents, Mr. and Mrs. L. K. Dahlgren.

Mrs. Martin Frantzieh returned from Clarkston, Saturday, where she spent a week visiting her mother, Mrs. Randall, and her little son, George Frantzieh, who is attending school at that place.

John Eatmon and W. P. Quesenberry are on a long hunting trip up in the Elk River country.

Mr. and Mrs. Arthur Bengston and wife were recent visitors in Clarkston.

**Praying Plants**

Sir Jagadis Base, a Hindu plant specialist, tells of a "praying plant" that each evening prostrates itself about the hour that the temple bells call the people to prayer. The plant is like a tree and twice the height of a man. It is said.

**GLANINGS**

The fire siren sounded Tuesday morning about 10:30 in response to a call from the G. P. Anderson residence, where smoke was issuing from the roof. After a hole had been torn in the roof it was found the smoke had probably come from a crack in the flue. The hose cart, under the direction of Fire Chief Ed Deobald, was at the scene of action just three minutes after the alarm sounded.

Paul Schulze has rented the Halseth residence on the school house hill and moved there this week.

Carl Hartung of Cameron returned home Sunday from California, where he went some time ago to build a house for Herman Koepf.

Born to Mr. and Mrs. Everett Frazer, Sunday, Nov. 14, a son.

Earl Roseborough of Winchester spent the week end here with his uncle, J. G. Gardner.

Mr. and Mrs. Paddy and Mrs. L. E. Pearson drove down from Spokane the first of the week to visit relatives for a short time. Mrs. N. C. Thomas, mother of Mrs. Paddy, returned to Spokane with them.

Frank Benscoter came up from his home in Clarkston the first of the week to visit his sons, Franke, Harry and Walter, returning Tuesday afternoon.

Mr. and Mrs. Kenneth Hunter of Spokane visited at the home of Mrs. Hunter's parents, Mr. and Mrs. Caus Eichner of American ridge, and at the Wm. Watts home in Kendrick over the week end. Mr. Hunter has charge of the automobile section of the Spokesman-Review.

Ben Callison and son, Norla, Ernest Roberts and Harry Ameling left Wednesday morning for the Craig Mountain country to hunt deer. The season is open there until the first of December.

Mrs. Glenn Stamper and baby arrived last Sunday from Melrose, Idaho. M. Stamper, son of E. F. Stamper the auctioneer, is employed at the Main Street Garage. The Stamper family have their home in the second story of the Grandma Stanton residence.

The DeLuxe barber shop has added another chair to its equipment this week. Fred Kidwell, son-in-law of E. E. McDowell will be employed at the shop to learn the trade.

Mrs. A. Onstott went to Lewiston on the Wednesday afternoon train to visit relatives for a few days.

Clyde Daugherty, who hauls freight for the Leland stores, has moved from Leland to the Kelley residence in Kendrick where the family will spend the winter.

Born to Mr. and Mrs. Melvin Proennier of American ridge, Sunday, November 14, a son. Mrs. Proennier and son are at the home of Mrs. George Savage at Moscow.

Ernest Davis spent several days last week in Lewiston.

G. W. Brown, better known here as "Buster," came down from Moscow last Saturday to spend the week end with his parents.

Miss Virginia Boyd, sister of Frank Boyd of this place, spent the week end here.

Donald Miller received the appointment of rural carrier on Route No. 1 out of Kendrick, which is the route that serves American ridge. He will begin carrying the mail tomorrow.

Mrs. Edgar Long was a Spokane visitor Friday, where she spent a short time with Mrs. Beulah Seeley who is recovering from recent operations at St. Lukes hospital.

Miss Dresser of Orofino spent the week end in Kendrick at the home of her aunt, Mrs. Harold Thomas.

Word comes from Moscow that T. P. Fisher, who recently underwent a major operation at the Inland hospital, is recovering at the home of his sister, Mrs. E. M. Eakin.

**Great Years in Nation's History**

Interesting things have happened in 1926. Commander Byrd in a Fokker airplane, circled the North Pole. Photographs taken in Europe were transmitted on radio waves to America, and published in newspapers a

few hours later. Gertrude Ederle, daughter of a New York butcher, swam the English Channel one hour faster than any of the five men who had swum it before her.

Is anything interesting going to happen in 1927?

For on thing, the Youth's Companion on April 16, will celebrate its HUNDRETH BIRTHDAY. During 1927, the Companion will contain more interesting reading than ever before during its century of successful life. Consider what you will get for \$2.00: 52 issues, containing 9 book length serials, 260 short stories by the most popular authors, more than 100 special articles, a weekly section for ingenious boys called the "Y. C. Lab," a thorough girls' department, and 52 pages for children. Also in each issue, an extensive survey of current events, making it easy for you to follow the affairs of this busy world.

Don't miss the greatest year of a great magazine. Subscribe now, and receive:

1. The Youth's Companion—52 issues in 1927, and
2. The remaining issues of 1926. All for only \$2.00.
3. Or include McCall's Magazine, the monthly authority on fashions. Both publications, only \$2.50.

**Chicken Raisers Trying Canaries as Side Line**

Chicken raisers and poultry fanciers in increasing numbers are interesting themselves in canary breeding. The man who raises chickens finds that he has enough spare time and experience on his hands to breed canaries, and the large profits in this business have attracted poultrymen in surprisingly large numbers.

One new reason for rising demand for canaries, according to the trade, is the fact that interior decoration methods now make such wide use of the bird cage in the average American home. That this is possible is due to the new type of cages, made of pyralin instead of brass, which come in a score of colors and soft, harmonious blends. Many are finished in the duco process. Tests are now being made to determine the amount of the favorable effect which such cages exercise on the canaries' singing.

**Julietta Methodist Aid Bazaar And Dinner**

On or about December 4th, an important community occasion, will be the annual bazaar and dinner that will be held in the Odd Fellows hall by the Ladies Aid of the Methodist church of Julietta. The ladies are meeting Tuesday of each week and will have a large assortment of useful fancy work ready for this sale, which will gladden the hearts of Christmas shoppers.

The dinner menu will be most

tempting. Watch next week's paper for further particulars of this sale and dinner.

**Did You Know This?**

The Clearwater river has the distinction of being the largest and longest river in the United States confined wholly within the boundaries of one state. It has its source in the Bitter Roots of eastern Idaho and flows into the Snake at the state's western boundary. It is quite possible also that the natural scenery along its route is unsurpassed by any river of a like length.—Kamiah Progress.

**Free Primrose Separator Service**

Mr. Neysmith, factory representative for the Primrose cream separator, will be in Kendrick, Monday, November 22, at the Kendrick Hardware Co. to service your Primrose separators in this territory. This service is absolutely free of charge to all Primrose owners, no matter how old the machine is. The Kendrick Hardware Co. wishes all Primrose owners to bring their machines in and have them put in first class shape.

**Will Hold Public Sale**

George Ehlers is advertising a public sale to be held at his place near Cameron, Tuesday, Nov. 23. He has an especially good bunch of young horses to sell. They ought to attract considerable interest as young horses are not very plentiful these days.

The Kendrick Hardware Co. will have a factory representative here next Monday to service your Primrose cream separator free of charge. Bring it in. 47-1

**BIG PICTURE HERE THANKSGIVING NIGHT**

Greatest Film Since "The Covered Wagon" Here Next Week.

Picture fans who prefer their film seasoned with plenty of thrills, will find "The Thundering Herd" the greatest thing they ever witnessed. This picture is coming to the New Kendrick Theatre next Wednesday and Thursday nights, November 24th and 25th.

"The Thundering Herd" is not only one of the greatest productions of the industry but is a tribute to that race of Americans too often forgotten in the hustle and bustle of this jazz age.

Everyone should plan to see this masterpiece as it is a credit to the motion picture industry. You will see something really worth while by attending. 47-1

## Carlson Hardware Company.

**One Easy Prophecy**

"There are few things you can prophesy about women with absolute certainty," writes Eileen Bourne in Liberty, "outside of the facts that she will be born, may marry, and will some day quietly lead a procession of mourners."

**Freshmen on Job Early**

Freshmen of about forty colleges and universities report a week in advance of the formal opening in order to receive preliminary instruction intended to acquaint them with the life they are to lead in the institution, according to School Life.
