KENDRICK TEAM LOSES ONE MORE GAME

Defeated by Clarkston Last Sunday by 7 to 4.

The local ball team was unable to get off on the right foot at Clarkston last Sunday in the seventh game of the valley league schedule. Too many errors at critical stages of the game were responsible for their defeat.

Features of the game were two double plays pulled off by Kendrick and two three-base hits by Kuliek. Munden for Clarkston stretched a two-base hit into a home run.

Following is a resume of the game in detail:

| Kendrick | Ab | R | H | SO | E |
|-----------------|----|---|---|----|----|
| Armitage, 3b. | 5 | 0 | 0 | 2 | 0 |
| Kuliek, 1b. | 5 | 0 | 2 | 1 | 1 |
| Anderson, c. | 5 | 0 | 0 | 1 | 0 |
| T. Eichner, 2b. | 5 | 0 | 2 | 0 | 0 |

Results Valley League Sunday

Clarkston 7; Kendrick 4.
Pomeroy 6; Genesee 0.
Uniontown 7; Juliaetta 2.

Central League Game Results

Nezperce 2; Lapwai 1.
Orofino 3; Lewiston 1.
Grangeville 2; Cottonwood 1.

Schedule for Sunday, June 12

Clarkston at Uniontown.
Pomeroy at Genesee.
Juliaetta vs. Kendrick, non-league.

Orofino at Lewiston.
Lapwai at Nezperce.
Cottonwood at Grangeville.

Juliaetta vs. Kendrick Sunday

A non-league ball game will be played Sunday afternoon at Juliaetta between Kendrick and Juliaetta. This will be the third time this season that the Bean Pickers and Cherry Pickers cross bats. There is every reason to expect an interesting game.

Sunday School Rally

A Sunday school rally and picnic will be held at Bethel church on American ridge next Sunday, June 12th. Those interested in Sunday school work from other schools are asked to attend. There will be morning and afternoon sessions, with a picnic dinner at noon. A. M. Locker, secretary of the Inland Empire Council of Christian Education, will be one of the speakers.

Steel Gang Working Here

A crew of approximately 80 men started work laying heavy steel on the line between Kendrick and Troy this week. They are expected to be here between three and four weeks. The heavier track s being put in to handle the heavy loads to be hauled over this line in the future.

Vacation Bible School

There will be daily vacation bible school for the junior grades at the Presbyterian church, starting next Monday, June 13th. All the children between 9 and 12 years of age are invited to attend. Bring your bible and be on time at nine o'clock for a good time.

Cameron News

The clinkings of bean planters were quite numerous Monday and Tuesday, but Wednesday's rain has entirely hushed them.

A daughter was born June 6th at St. Joseph's hospital, to Rev. and Mrs. Rein.

A large group of Camerons attended the Gifford Luther League entertainment at Leland last Friday evening. They have some splendid musical talent, both vocal and instrumental.

Rev. and Mrs. Burgsloff were Friday night guests of Mr. and Mrs. Carl L. Wegner.

Mr. Renken of Gifford has been visiting at the Henry Brammer and Carl L. Wegner homes.

Rev. Ehlen of Lewiston accompanied Rev. Rein home Monday evening and spent a few days visiting on the ridge.

Henry Mielke and family and his mother-in-law, Mrs. Potter, started on their return trip to San Francisco, Wednesday morning.

Miss Helen Mielke will visit here for several more weeks before returning to San Francisco.

Mr. and Mrs. Henry Mielke were Sunday evening guests of Mr. and Mrs. Aug. F. Wegner.

Mr. and Mrs. Gus Kruger were Lewiston visitors Monday.

Mrs. Bunstine, Mr. and Mrs. Herman Lohman, Sr. and Mrs. Elsie Renfrew of Lewiston attended the funeral of Grandma Lohman last Friday.

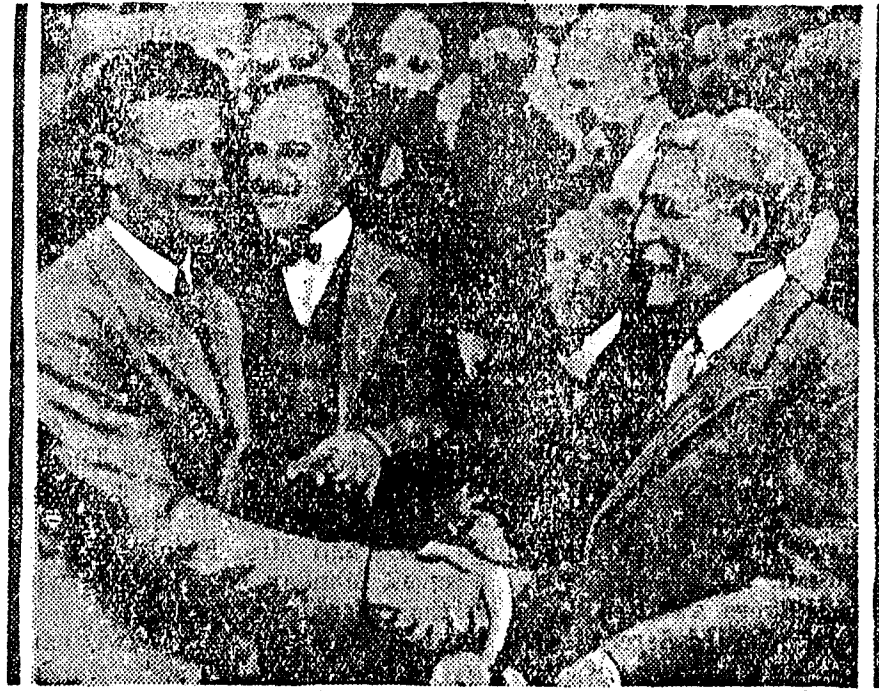

Mrs. Henry Meyer's children met at the Henry Brammer home Monday afternoon to celebrate their mother's birthday.

HIGHLY HONORED

Miss Ethel L. Taggart, native of the national capital, and a graduate in law at George Washington university, has received the distinction of being the first woman to be elected a member of the Bar Association of the District of Columbia. She is the daughter of the late Hugh T. Taggart, who for fourteen years was special assistant to the attorney general of the United States.

Ambassador Herrick Greets Flyer

Capt. Charles A. Lindbergh being congratulated by Ambassador Herrick at the conclusion of his wonderful nonstop flight from New York to Paris. Photograph was rushed from Paris to London by airplane and transmitted to New York by cable.

Clover Seed Profitable Crop

Economic studies of the clover industry, conducted by the university of Idaho experiment station and extension service, show that the trend of clover seed has been upward for the last five years. Prices for seed this spring are still higher due to the crop shortage in 1926, according to a report published by C. B. Ashlon, state seed commissioner. The total United States clover seed acreage in 1923 was 775,000; in 1924 820,000, and in 1926, 550,000. Idaho's harvest in 1923 was 15,000 acres; in 1924, 14,000; and in 1926, 16,000. She ranks first in value of seed per acre and second in yield per acre.

Practically all Idaho-grown seed is shipped east. Growers who have a clean, high-quality seed, usually find ready market. The commissioner declares, but those who have seed adulterated with dodder, sweet clover, alfalfa and inseparable weed seeds must sacrifice, generally, from 4 to 15 cents per pound on their product.

"Farmers in the middlewest or non-irrigated sections have fewer obstacles to contend with in producing clean seed than have the Idaho farmers," the investigator declares. "One of the principal sources of weed seed distribution is through the irrigation system."

Dr. Moorhead on Vacation

Dr. Moorhead and his mother left last Tuesday morning for Iowa in the doctor's new Buick coupe, which he purchased the first of the week. They will make the trip over the southern route by way of the North and South Highway. Dr. Moorhead expects to return in three weeks. He found it impossible to secure a physician to look after his practice during his absence.

Celebration Committee Met

The executive committee in charge of the celebration to be held here July Fourth, met at the town hall last Friday evening and outlined plans for the program of the day. The committee, under the direction of E. T. Long, have their work well in hand and it is believed that everything will be ready for the big day. Practically all concessions are already sold.

You Knew It.

He ponders long what he will wear and thinks it's time to shave; he is careful how he combs his hair and he has begun to save; his face is bright, free of dirt and spots are in a whirl; his lazy brain is now alert for Willie has a girl.—Ex.

Jones—"Sorry, old man, that my hen got loose and scratched up your garden."

Smith—"That's all right; my dog ate your hen."

Jones—"Fine! I just ran over your dog and killed him."—Ex.

Poglianich Found Not Guilty

Verdict of not guilty was returned by the jury in the retrial of Dominico Poglianich, charged with the murder of Harry Wells near Pierce, February 15, 1926, at Orofino at 9:30 o'clock Wednesday evening. The jury was out six hours and fifteen minutes. The case was given to the jury at 3:15 o'clock Wednesday afternoon. In his instructions, Judge Johnson outlined the possible verdicts that could be returned—murder in the first degree either with the death penalty or life imprisonment; murder in the second degree, manslaughter or acquittal.

After being out since 3:15 o'clock, the jury reported at seven o'clock and asked Judge Johnson to read his instructions again. This was done and the jury returned to its deliberations at 7:30.

The Poglianich case was a retrial ordered by the state supreme court after the defendant had pleaded guilty to first degree murder and had been sentenced to life imprisonment. The order for a new trial followed an appeal to the state supreme court filed January 7, 1927, by Tannahill & Leeper of Lewiston.

As grounds for the appeal motion, the defendant alleged that he had never had a preliminary hearing, was never advised as to his right to have an attorney, did not have one, was ignorant and uninformed as to the meaning of a plea of guilty to murder in the first degree and that such plea was obtained through fear, menace and duress.—Tribune.

Crescent Clippings

Mr. and Mrs. Wm. Zimmerman visited at the Wm. Kauder home, Sunday.

Mr. and Mrs. A. Dorendorf left Friday for a visit with their children at Waverly and Kellogg.

The Clarence Fry family spent Sunday at the Ben Rusten home. Alice Cramer returned Thursday from Lewiston where she has been attending the Normal.

Mr. and Mrs. Fred H. Darby of Moscow and the Mueller brothers from St. Maries visited at the C. L. Trail and John Darby homes, Monday.

Mrs. M. L. Robeson returned home Wednesday from Texas ridge, where she has been visiting her daughter, Mrs. Vester Evans. Mr. and Mrs. Evans and little son accompanied her home and stayed for a short visit.

Mrs. Axel Ekman visited with Mrs. Frank Souders, Saturday.

John Darby was in Lewiston a couple of days the first of the week to have his neck doctored up. The vertebrae had slipped out of place.

Work is to be started soon on the reconstruction of the Vollmer-Clearwater tramway. All new towers will be built and all working parts of the tram put in first class shape. A. C. Deeter has charge of construction.

Peck Picnic Today

A fine program has been arranged for the annual picnic to be held at Peck today, under the auspices of the Peck Community Club. Band concerts, parade, public speaking, picnic dinner, sports, dancing and ball game will feature the program for the day. This annual affair at Peck has been highly successful in the past and has never failed to draw a big crowd. A number of people from Kendrick and the surrounding country plan to attend today.

Council Met Tuesday

Three members of the town council met last Tuesday and transacted the month's accumulation of business. The ordinance fixing the levy was read the first time and will be passed at the next regular meeting.

The board requested that property owners have weeds and grass cut on the parking strips and around their premises to minimize the danger of fire during the coming dry season.

Big Bear Ridge News

The Lutheran Ladies Aid will give a musical entertainment under the direction of Mrs. Carl Drury at the Community Hall, Saturday evening, June 11th at 8 o'clock. Following this baskets will be sold and supper will be served. A cordial invitation is extended to all.

Mrs. A. Kleth returned home last week from an overland trip to Pasco and Walla Walla.

Mr. and Mrs. Isaac Lien spent last week with Mrs. Lien's parents, Mr. and Mrs. C. J. Munson at Avon.

Mr. and Mrs. Wade Keene were Sunday visitors at the Frank Benscoter home on American ridge.

Mr. and Mrs. A. W. Jones and daughters, Misses Dorothy, Opal and Lizzie, went to Lewiston, Wednesday to attend the Lewiston Normal graduating exercises. Miss Agnes Jones was a member of the graduating class.

Mr. and Mrs. Zack Aas were Bovill visitors Saturday.

Mrs. Everett Fraser and Mrs. A. W. Ahl of Kendrick spent Tuesday at the Hooker home.

Clarence, Margaret and Clifford Sandberg spent Wednesday at the A. Kleth home.

Dewey Galloway was a business visitor in Bovill last week.

Mrs. A. W. Jones and son, Claud, and two daughters, Dorothy and Lizzie, left yesterday morning for south Idaho to visit relatives near Weiser. They will make the trip in their car by way of Pendleton and over the Blue Mountains and plan to return over the North and South highway.

NEW DRY CHIEF

Dr. J. M. Doran, who has been chief chemist of the prohibition unit, has been sworn in as prohibition commissioner to succeed Roy A. Haynes. Doctor Doran has advanced from the ranks, having entered the government service in 1907 as a chemist in the bureau of internal revenue. He became head of the industrial alcohol and chemical division in 1920.

ITEMS OF INTEREST FROM SOUTHWICK

Written for Gazette by Special Correspondent

Mr. and Mrs. J. E. Hoppe left Wednesday for Portland for a week's visit with their daughter, Mrs. James McFadden. They drove thru in their car.

Mr. and Mrs. Wm. McClelland and daughter, Lillian and Mrs. Betts and son, Russel, drove to Lewiston and return Monday.

Mr. and Mrs. Orville Best and children of Olympia are visiting her parents, Mr. and Mrs. Jap Triplett for a few days.

Mr. and Mrs. J. R. King and son, Ray, and Floyd Russell and family attended the ball game at Juliaetta last Sunday.

Sunday guests at the Elmer McCoy home were Mr. and Mrs. Jap Triplett and family, Mrs. Tough and Mrs. Chester McIver and children.

Mr. and Mrs. Elton McCoy spent Sunday at the home of Jim Cook and wife, south of Leland.

Mr. and Mrs. John McIver left Friday for their home in Saskatchewan, Canada.

Mr. and Mrs. Harland Hewitt spent Sunday at the home of Pete Stump at Crescent.

Opal Southwick of Lenore is staying with her sister, Mrs. Attlee Mustoe, and assisting with the house work.

Mrs. Jake Berriman and children and Mrs. Doc. Betts were in town Tuesday.

Mr. and Mrs. Roy Blankenship and Mr. and Mrs. Ray Blankenship of Bed Rock spent Sunday with Mr. and Mrs. John Hewitt.

Herman Stalnaker and wife of Ahsahka spent the week end with her sister and family, Mrs. Fred Whittinger.

Mr. and Mrs. John Phillips drove to Deary and back Sunday.

Mr. and Mrs. Shoemaker of Clarkston and Mr. and Mrs. N. E. Ware of Bear ridge spent Sunday at the home of Jake Berriman.

Newt. Heath and family of Fix ridge, Mrs. Brunick and son, and August Brammer of Camerons were Sunday guests of Mr. and Mrs. Russell Rodgers.

Eva McCoy is spending this week at the home of her sister, Mrs. Harry Smith at Leland.

Miss Alta Phillips has returned home from Lewiston, where she attended the Normal.

Mr. and Mrs. Spekter and son, Raymond of Lewiston, were Sunday guests of Wm. Stump. Raymond remained here where he will visit with relatives for some time.

Mr. and Mrs. Wm. Whittinger returned home from Clarkston where they have been for some time past.

George Douglas left last week for Portland.

Mr. and Mrs. Milton Benjamin were the guests of Mr. and Mrs. A. W. McCoy last Sunday.

Rev. Calvert preached his farewell sermon last Sunday at the U. B. church.

Car Rolls Over

Miss Mable Eichner had a narrow escape while driving near Garfield with a party of friends last Monday. One of the rear wheels of her father's sedan broke and the car turned turtle, landing rightside up. Three of the occupants of the car were thrown thru the top, while the fourth was hurtled through a door and landed face first against a high embankment. Miss Margaret Cox received a slight scratch but aside from that no one was injured. The car was taken to Spokane for a general repairing.

Heat it Again

Two stuttering blacksmiths had finished heating a piece of pig iron, and one placed it upon the anvil with a pair of tongs. "It-h-h-it," he stuttered to his helper. "Wh-wh-wh-wh-where?" asked the other. "Aw, h-h-h-hell, we'll have to h-h-heat it again now."—Ex.

Planning a Greenland Expedition

Left to right, Paul C. Oseanyan of the University of Michigan, Radio Operator, Ted Ostman and Dr. Constantin Dunbrava, director of the Rumanian Greenland expedition which is to join with the University of Michigan Greenland expedition in making a year's exploration of the east coast of Greenland. The expedition will carry a short-wave length transmitter which will enable them to keep in constant touch with Ceyman's station in New York.

New Anesthetic Used in Tests in Germany

Berlin.—The German medical world is watching experiments with a new anesthetic evolved in the laboratories of the German Dyestuffs federation, for which advantages over ether or chloroform are claimed.

The chemical composition of the preparation, known as E 107, is withheld for the time being. But its manner of working and effects upon the patient, both during the period of its potency and afterward, have been described by Prof. Ernst Unger, who with other prominent German physicians and surgeons has used it in numerous clinics after a series of experiments upon animals.

The anesthetic, introduced into the intestine, causes the patient to lose consciousness within five minutes and come fully under the influence after seven or eight minutes have elapsed. Professor Unger asserted in a lecture.

The after-effects, in a majority of cases, are declared to be nil, there being no stomach sickness, while the system absorbs the anesthetic so quickly that within an hour no traces are left.

Soviet Changes Even Chess of Royalties

Helsingfors.—News from Moscow that the Soviets have changed the names of the king and queen pieces in chess because of the government's objection to terms of sovereigns has aroused curiosity among chess players here as to what the royal "men" are to be called in future.

In abolishing the chess titles it is recalled that some years ago the name of the queen bee also was abolished, a Russian word meaning quite the contrary being substituted.

Chess is one of the world's oldest games, John de Vigne assigning its invention to a Babylonian philosopher, Xerxes. Others have attributed it to Chilo, one of the seven sages of Greece. Gibbon believed the Indians conceived the game, and that Persia perfected it. Earlier dates have been suggested, however, by the depiction of chess in the paintings of the ancient Egyptians and the descriptions of it in the Chinese books of wisdom.

Must Help Himself

Heaven ne'er helps the man who will not act.—Sophocles.

JULIAETTA COMMUNITY NEWS

Juliaetta To Have Doctor

The people of this community feel quite fortunate in securing a doctor to come here and practice. Dr. Smith of Bovill comes well recommended. He not only has had a number of years practice in different places, but has had hospital experience as well. He intends to open up the drug store here and carry a complete line of drugs. The drug store alone is a great help to the town. He needs only the support of the Juliaetta people now.

4H Club Girls' Exhibit

The Junior Club Girls gave an exhibit of their past six months sewing work, Saturday at the Heacox confectionery. The work put on display constituted their first course which they completed last week.

The members of the club are: Thelma Spray, Alice Cochran, Dorothy Bowen, Flora Perry, Gertrude Gruell, Mabel Nigh, Helen Halliday, and Jeweldine Hutchison.

Prizes were awarded to each girl on the different articles which they had made. Their work was judged according to workmanship, neatness, age of girl and former sewing experience.

The judges were: Mrs. R. O. Howard of Grangeville, Mrs. A. W. Behrens of Juliaetta, and Elmer Clark of California.

The girls will attend the summer short course at the University of Idaho, June 12 to 16 inclusive, accompanied by their leader Mrs. W. J. Cochran.

The club girls wish to thank the business men of Juliaetta for their donation of prizes, also the Heacox confectionery for the use of their window for the display.

Baptist Missionary Meeting

The monthly meeting of the Baptist Missionary Society was held in the church Thursday afternoon. Quite a number of the Methodist Missionary ladies attended the meeting. Mrs. L. W. Houck and Mrs. G. H. Hutchison sang a splendid selection. Mrs. E. E. Buchanan and Mrs. Davis were hostesses and they served a very nice lunch.

Juliaetta Local News

Mrs. Kate Crutchfield went to Lewiston for a few days visit last week.

Mrs. Floyd Millard visited for a week with her parents, Mr. and Mrs. John Bulen in Coldspring. Mrs. Charlie Little was a business visitor in Lewiston, Wednesday.

Mrs. F. L. Grannis of Clatskanie, Oregon, came last Wednesday and spent a few days visiting old friends.

Clay Albright went to Troy last Wednesday, returning in the evening.

Charlie Ross was a Lewiston visitor one day last week.

Miss Bessie Woody of American ridge went to Moscow last Thursday.

Mrs. Sophie B. Taylor was a Kendrick visitor last Thursday.

Mrs. W. P. McWilliams, who has been here visiting with her parents, Mr. and Mrs. D. A. Bishop, left last Thursday for her home at Arco, Idaho.

E. R. Carlson was a Moscow visitor Saturday.

Miss Susan Giese of Fix ridge went to Lewiston last Saturday where she is attending the Normal.

S. A. Hammond went to Moscow, Saturday.

Charlie Little was a visitor in Lewiston, Friday.

Minnie Glenn of Potlatch ridge went to Moscow, Saturday.

Frank Neel was a Lewiston visitor, Saturday.

Amanda Alexander of Lewiston came Tuesday to visit at the Eben Adams home.

Miss Margaret Griffith and Mr. R. Johnson of Lewiston were Sunday guests at the A. W. Behrens home.

Mr. and Mrs. J. H. Millard went to Lewiston, Monday, where Mrs. Millard is having some dental work done.

George Bowen of Elk River visited home folks here Sunday.

John Glenn, Mrs. E. E. Buchanan and Loren Houck motored to Moscow, Sunday.

Mrs. J. O. Carr and son Anthony of Cedar creek were Tuesday afternoon visitors at the

Amos Nigh home.

Mrs. G. H. Hutchison was a visitor in Clarkston, Sunday.

Mr. and Mrs. Elmer Clark and Miss Minnie McGlenn of California arrived here last week to visit friends and relatives.

Mrs. Willis Buchanan went to Moscow one day last week.

Bun Beard and Charlie Leivett transacted business in Lewiston, Monday.

Bill Nigh left Tuesday for the Bungalow Rangers Station on the forest reserve, where he will be the funky for the summer.

Bill Zumhofe of Potlatch ridge went to Lewiston, Monday.

Miss Margaret Pierce is employed at the Heacox confectionery for the summer.

Mrs. Ida Aldrich went to Lewiston, Monday.

Mrs. McGlenn of Moscow came down this week to visit with her children.

The bank received a new coat of paint last week. Also Thomas Stinson and Jack Taylor homes were repainted this spring.

Mr. and Mrs. Frank Vincent spent Monday in Moscow with their daughter.

Mr. and Mrs. D. Lewis and family of Kendrick spent Sunday with Mr. Lewis' mother, Mrs. W. G. Lewis.

There will be no Sunday school services at the Methodist church Sunday as that Sunday school will attend the Children's Day picnic at Bethel.

Mrs. Roy Metcalf spent several days last week in Troy with her parents.

Dr. Law has rented the rooms above Noble's store and is having them fitted up for his chiropractic work.

Finds Way to Utilize

Neglected Cornstalks

New York.—Cornstalks, the largest single item of waste of America's largest industry, farming, have had their challenge answered not by an American scientist but by a Hungarian. Dr. Bela Dornier, head of the laboratories of the Royal Hungarian railways, has recently come to this country with a process which he states is commercially practicable for the utilization of the stalks in the manufacture of paper, rayon, auto finishes and many other products for which wood pulp at present is the only satisfactory basis.

A number of New York capitalists have become interested in the possibilities of Doctor Dornier's method, and a prominent consulting chemist retained by them has reported favorably on it, after a series of large-scale tests.

It has long been known that cornstalk substance is chemically and physically suited for the needs now met only by wood pulp, but certain practical difficulties prevented the development of a stalk-pulp industry. One of the chief obstacles in processes hitherto tried has been the necessity for cutting out the hard cross-plates at the joints, which made too great an expense for commercial development. In the Dornier process, however, the whole stalk is ground up, and it is claimed that the hard parts make no trouble in the later manufacturing stages.

MODERATOR

Frank J. Harwood of Appleton, Wis., moderator of the National Council of the Congregational Churches in the United States, which opened its biennial meeting at Omaha, Neb. The council represents 5,600 churches with 914,000 members in this country.

Preparing!

Visitor—Why are you plugging your ears with cotton? Got an earache to night?

Jones—No, but the baby has.

Great Jewish Scholar

Malmonides, a native of Cordova, Spain, who lived from 1135 to 1204, was the most celebrated Jewish scholar, writer and philosopher of the Middle Ages. He was chief rabbi of Cairo, where he probably died.

THE KENDRICK GAZETTE

"The Pulse of The Potlatch"

Published every Friday at Kendrick Idaho, by
Ralph B. Knepper

Subscription Price, \$1.50

Entered at the Post Office at Kendrick as second class mail matter.

It is said that women have no sense of humor, that they cannot take a joke. After looking at some of their husbands, we know differently.—Ex.

The modern farmer, we are told, successful farmers, must be scientists, mechanics, botanists, geologists, physical experts, veterinarians, weather prophets, biologists, fruiters, expert salesmen. The successful old-time farmer has been all of these things without knowing that he was.

Those Farmers' Friends

Several years ago, a so-called publisher from a nearby town canvassed the Potlatch country to secure subscriptions for his paper. In his travels he ran across many farmers who were taking the Kendrick Gazette. To them he stated that the Gazette was not friendly to the farmers interests and in some cases, made his argument stick. When he had covered the territory thoroly, he faded from this vicinity and hasn't been seen since.

The Gazette has been published for over 35 years and has never missed an issue. It is published in the center of a farming community and has always been a

farmers' paper and ready to do anything to boost the farmers' interests.

And so it goes with most of the agents who pose as the friend of the farmer. They are transients who, under the guise of friendship for the farmers, are putting over some scheme for their own benefit.

Hubbie—"This is the tenderest steak we've had in a long time."

Wifie—"I thought you'd find it that way!"

Hubbie—"What have you done changed butchers?"

Wifie—"No dear, I merely had the knives sharpened!"—Ex.

Kendrick - Idaho

McCormick-Deering Tractor Power---for All Work!

EVERY YEAR McCormick-Deering Tractors stand stronger with local farmers. The name McCormick-Deering has become the symbol of reliable power farming because it stands for carefully built, practical, many-sided, long-lived farm power—and the kind of service cooperation we are able to offer our customers.

Men who have used International Harvester tractors—for months or for years—are steadfast friends of McCormick-Deering farm power. They will recommend McCormick-Deering when you come to buy. Other men, who risked using cheaper, lighter tractors, found themselves underpowered. They fell short of reaching full production with the least possible labor and in the shortest possible time. After this experience they were ready for new and better power. There are many like these, too, who will recommend McCormick-Deering when you make your power investment.

Kendrick Hardware Co.

Kendrick, Idaho

TO RAISE BEAVERS ON A LARGE SCALE

Plan to Have States Set Aside Regions.

Walla, Walla, Wash.—One hundred and fifty years ago beavers teemed on every lake and waterway throughout the United States. The animals were counted in the millions, the Indians depended on them for food in the winter, and to the early settlers the pelt had a constant market value that made it a standard for prices on merchandise and supplies.

But the time is not far distant when the fur trade must look to the fur farmers for certain kinds of skins; the beaver is one of these.

The question of the beaver, which includes its propagation, conservation and the breeding of the animal in captivity or under control, has been receiving attention from government sources. Attempts to rear beaver in captivity have met with success, but dearth of accurate information concerning their habits and peculiarities has prevented really serious efforts to increase the supply.

Now it is planned to have states set aside regions on a big scale where beaver may multiply. Thousands of acres of lake, river and woodland is necessary for a beaver preserve and the constant protection of the fur bearers from poachers. But once the land is available nature can be counted upon to do the rest.

Beaver skins have and doubtless always will command big prices in the fur trade. Once Sam may yet be able to dispose of beaver skins as he now deals in fur seal pelts.

Plays With Current

of Two-Million Volts

Stanford University, Calif.—Lightning hurling, heroic art of mythology which lapsed with the advent of coldly calculating science has been revived. The modern Jupiter Fulminator is not a giant with flaming red beard, toying with the wrath of the heavens, but a university professor, smooth shaven, frail and slightly deaf, who has a practical purpose in calling nature's tremendous forces into play.

The ultimate object of Prof. Harris J. Ryan's research is to make possible the transmission of electricity for greater distances so that metropolitan markets for power can be hooked up in a single system with power reserves as far apart as the Columbia and Colorado rivers.

After producing current of a voltage of 2,100,000, the highest ever attained by man, Professor Ryan and his assistants closed the doors of their immense workshop to the public and began new phases of transmission experiments. The seclusion is not due to a desire for secrecy, but to the fact that outside inquiry resulting from the scientific and commercial world's interest in the spectacular experimentation became so great it interfered with the work.

Chinese Wallpaper Is Increasing in Value

London.—Old Chinese wallpaper is becoming more valuable as the Chinese get further away from settling their differences among themselves.

It is already nearing the stage of being worth its weight in silver and has become one of those luxuries which owners move along with their jewelry, silverware, furniture and personal effects when changing from one house to another.

Prince George of Russia, son of Grand Duchess Xenia, who is with a decorating firm here, has on exhibition in his studio many specimens of old Chinese wallpaper.

One ninety-year-old piece of eighteenth century hand-painted Chinese paper, enough to paper a small room, is considered such a treasure that an offer of \$1,750 has been refused for it.

ABORIGINE SHORN OF FANTASTIC MYTH

Liked Fine Raiment and Could Fight.

Columbus, Ohio.—The mound-building aborigine of America, stripped of the fantastic myths which have hovered above him, is revealed as a savage who loved fine raiment and ornamentation, paid great attention to ceremonials, trafficked with distant tribes, and could fight when he had to.

This appraisal has been reached by the Ohio State Archeological and Historical society after more than two decades of exploration in the great mounds of earth and stone built as ceremonial sites, and found in their greatest completeness in Ohio.

A patient striving for beauty is depicted in the remains of mound-building civilization, uncovered in recent months in the Selp mound, scene of "The Great Pearl Burial of Ohio." In this primitive but recent regal tomb of the red man were unearthed five kinds of cloth, leather finely tanned and dressed, and thousands upon thousands of pearls.

Within the mound, 250 feet long, 150 feet wide and 27 feet high, explorers found under a layer of cobblestones an interior mound built of puddled loam, inclosing four burial cribs of logs, 16 feet square.

Two men, two women and two children were the skeletal occupants of the tomb, the men resting on copper breastplates. Around them were myriads of fresh water mussel pearls, some the size of small seeds and others big as hazelnuts. All had been worn as necklaces, armlets, anklets or stonemakers.

Beneath the copper plates was disclosed evidence of the splendid burial robes on which the dead were laid. They were beautifully woven, in conventional designs with concentric circles and curving bands, and colored with vegetable dyes in red, maroon, orange, yellow and black. In the moment of their finding, archeology's estimate of mound builder culture was lifted to a new plane.

Five pipes carved from steatite, a dense dark stone flecked with crystal, were found—all highly polished, one weighing more than seven pounds. They were ceremonial council pipes, two carved to resemble dogs and others fashioned after an owl, a bear and a whippoorwill.

Delving again into the mound this summer, President Arthur C. Johnson, Sr., and the society, and H. C. Shetrone, curator of its museum, expect to find new treasures at its heart. Even if the mound yields nothing more, its exploration has added a fascinating chapter to the century-long search into the unwritten history of America's ancient peoples.

Woman Sells Time to

London Watchmakers

London.—One of the most unusual businesses in the world has been conducted for years by a London family. It is the business of selling the time to watchmakers.

The present owner of the business is Miss Belleville, daughter of its founder. Once a week she visits the Greenwich observatory and sets her watch by the delicate time-determining instruments there.

The business was founded in 1831. The then royal astronomer suggested to the elder Belleville that there were people in need of the exact time who were willing to pay to obtain it. He followed the suggestion and soon had a thriving trade with all the watchmakers of London as customers.

The business brings its owner an annual income of about \$2,500.

Small White Ants Cost U. S. \$20,000,000 Yearly

Urbana, Ill.—Small white ants with a ravenous appetite for any kind of wood are causing the country a \$20,000,000 yearly loss, says H. Carl Oesterling of the Illinois State Natural surveys.

Termites is the scientific name for the insects, and Oesterling said their spread has been most rapid in the last quarter of a century. The sur-

vey has devoted several years of study to methods of eradicating termites by use of various disinfectants, but is not ready to announce its findings.

Termites get into the supports of buildings and chew their way along, unknown and unnoticed, until the wood is weakened.

As an example of the widespread infestation of termites, Oesterling said his investigation showed that 50 per cent of the buildings in Pasadena,

Calif., were infested, and that 80 per cent of buildings in New Orleans were damaged to some extent.

Contrary to some beliefs, the insects were introduced into central Europe from this country about a century ago, Oesterling said.

One remedy is to construct buildings so that no untreated wood comes in contact with the earth.

Listen Folks---This is Some Picture

BEBE DANIELS in

THE PICTURE YOU DIDN'T GET TO SEE!

This is the picture that was supposed to play here several weeks ago, but owing to the fact that the local electric light line was put out of commission by a wind storm, we were unable to show it. This is a cracker-jack comedy drama and one that we can highly recommend because we saw it ---that's why we're bringing it back because we know it's good. It is full of pep and laughs. Folks, This is a dandy picture. Don't miss it.

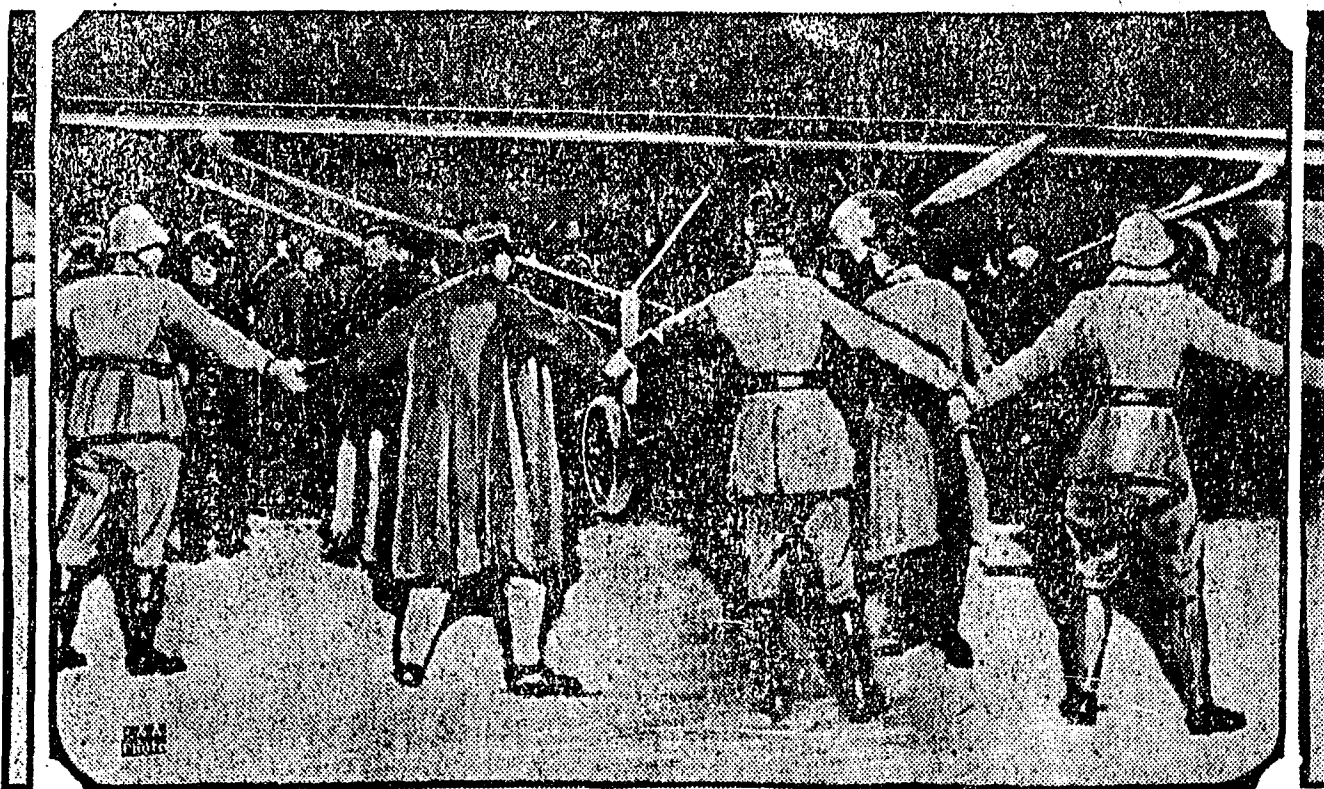

Two Shows: First Show at 7:45, Second Show at 9:15.

This is done so you can see the entire show before the dance starts at Barnum's Big Dance Pavilion. Big time here tonight! Everybody come.

Admission: Adults 35c Children 10c

Silver Dollar Once Made Five Quarters

Annapolis, Md.—Old records show that silver tokens for making change were first used in this country in Annapolis. With the consent of the government I. Chalmers, an Annapolis gold and silversmith, in 1783 turned out by hand sixpence, threepence and shilling coins to combat sharpers who, after depreciation of paper money, began to cut five "quarters" out of silver Spanish dollars.

Because of lack of change the cutting of Spanish dollars into halves and fourths was condoned, and even necessary, until it was discovered that expert cutters were reaping a small fortune. When expertly cut fifths could be discerned from quarters only by keen eye sight or by weighing, Chalmers produced new standard coins and took the short pieces in exchange until the fraud was stopped.

TOWN CRIERS' DUEL ROCKS BRITISH TOWN

One of Contestants Has Range of Seven Miles.

London.—Stentor, the famous herald of the ancient Greeks, renowned for his loud voice, would surely have hung his head for shame had he visited the little village of Pewsey, Wiltshire, the other day, for twenty-four of the loudest "loud speakers" in Britain were arrayed against one another seeing who could shout the loudest.

Pewsey is so small it only appears on large scale maps, but it certainly was the noisiest place in all Britain when the human "loud speakers" started "broadcasting" for the town criers championship of England and Wales, with its silver challenge cup and a goodly handful of golden sovereigns.

As the "big noise" the town criers were immense, but they also provided an impressive spectacle, for most of the towns that boast a crier provide him with a handsome uniform, a bell and a wand of office. Some of the uniforms were picturesque in the extreme, and of great antiquity, and some looked like courtiers out of the middle ages, others like highwaymen, gallants of the bath which Beau Nash controlled, or glorified trolley car conductors and bandmen.

Mufti Wane.

Some carried more gold lace than any admiral in full uniform. One or two there were in "mufti," or with merely a peaked cap to denote their calling. Sad to relate, it was from these one or two soberly clad competitors that the eventual winner came—Ernest Austin of Highworth, Wiltshire, who wore ordinary street clothes.

But the gayly clad ones howled nobly, and there was not much in it between Austin and Walter Abbott of Lyme Regis, who wore a carefully copied imitation of the dress of the town crier of that ancient borough in the Thirteenth century. Gomer Thomas, from an unpronounceable Welsh town, and winner of the cup last year, was placed third. He had a gaudy uniform and was first favorite for this year's contest.

The oldest competitor was seventy-five and the stoutest voice was undoubtedly that of James Cox of Burnham, who has a seven-mile range. Cox, however, could not even get fifth prize as others beat him for enunciation and oratorical powers.

Tuning Up.

Pewsey enjoyed itself when the loud-voiced men gathered, for never was there so much noise in Wiltshire, as the competitors exchanged greetings and tried a few practice shouts against each other. All having been allowed to test their vocal chords, the criers lined up and marched to a combined carillon on their bells to the arena, a great field, in which the judges' tent was placed 200 yards from the platform. The judges could not see the criers, and judged merely on purity and loudness of tone.

The "test piece" was a bright little composition proclaiming the virtues of Pewsey, and ran as follows.

"Oyez, oyez, oyez! Found at Pewsey district carnival the biggest and brightest spectacle in the south and west of England, where a week of revelry and pageantry reigns supreme, and a procession of stupendous proportions passes through scenes of fairyland midst a blaze of brilliant illumination; a revival of the time-honored town crier, the means of announcing royal proclamations, the earliest advertising medium, and the original form of broadcasting. God save the king."

"This proved somewhat of a tongue-twister to many of the competitors, who are accustomed to proclaiming in simple language and in the local accents of their native districts. Loudness of voice was not the sole aim, for the competitors had to make their proclamation with great clearness and with due regard to the niceties of elocution. A pause in the wrong place ruled out several of the loudest mouthed criers.

Cross-Bred Trees to Solve Wood Shortage

New York.—Wood pulp is being consumed four times as fast as it is grown, says a report issued at the New York botanical garden, where experiments are being carried on in co-operation with Columbia university

and the Oxford Paper company in an effort to increase the supply.

Selective breeding and hybridization are making trees grow much more quickly, the report states, and the results of such breeding have been conspicuous in the various fruit trees in certain of the nut trees, as well as in ornamentals.

Similar improvement in trees grown for wood pulp should present no essential differences either in procedure or results, the report adds.

Seek Buried Gold

Buffalo, N. Y.—Many fortune hunters have been crossing the Niagara river to Perry station, a hamlet just beyond Welland, Ont., drawn by the rumor of gold buried years ago by a miser on a farm.

Beliefs About Twins

Are Refuted by Test

Madison, Wis.—Twins are folks just like the rest of us, are not mentally handicapped, and do not acquire similar characteristics with age.

Prof. Curtis Merriman, University of Wisconsin psychologist, arrived at the above conclusions after a recent study, in which he psychologically examined 200 pairs of twins, all pupils in elementary schools.

In answer to a common supposition, Merriman found that older pairs of twins do not resemble each other intellectually any more than younger pairs of twins do not resemble each other intellectually.

Another popular belief shattered in the tests was that twins have to divide the intellectual power which would have been allotted had a single child been born to the same parents. Results of the psychologist's examination showed that the average intelligence quotient of all twins was 90—almost a normal 100.

Modern smokers praise the integrity of Camels

THIS is the age of frankness and plain-speaking, and it rates Camel first among cigarettes.

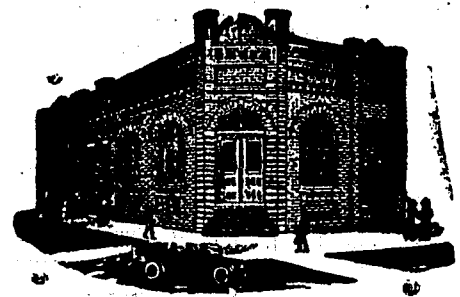

For Camel is that kind of a smoke. Camel is all quality and no false front or show. Camels are made of the choicest Turkish and Domestic tobaccos grown—no substitutes. And the finest blending ever given a cigarette.

It is Camel character that has won the smokers of today—such honesty of taste and fragrance as never was known in a cigarette before. You'll find all dreams of smoking pleasure realized in this modern, quality cigarette.

"Have a Camel!"

Control Corn Borer
by Cultural Method

Pest Does Damaging Work
While in Larval Stage.

(Prepared by the United States Depart-
ment of Agriculture.)

The European corn borer does its
damaging work while in the larval
stage. It passes the greater part of
its larval and also pupal existence
within the stalk or other parts of the
host plant, usually corn, but in some
parts of the country in a variety of
other plants, and weeds. For this
reason there is but little chance of
controlling this pest by insecticides,
and it is evident to entomologists of
the United States Department of Ag-
riculture who have worked on the
problem that the major control efforts
should be directed toward cultural
practices which will lead to the uti-
lization or the destruction of infested
plants. Measures recommended are:
Feeding to live stock, burning, or
plowing under; selection of varieties
of corn least susceptible to severe in-
jury, and regulating the time of plant-
ing to escape serious infestation and
yet produce satisfactory yields.

Control measures used must take in-
to consideration the fact that in the
New England infested area two gen-
erations occur annually and the in-
sects attack many plants in addition to
corn, while in the western areas, in-
cluding New York and the region
around the Great Lakes, the corn
borer is single brooded and confined
principally to corn. In New England,
therefore, it is necessary to utilize or
destroy all plants or crop residues
which are listed as hosts of the corn
borer, especially large stemmed
grasses and many roadside weeds. In
the sections where corn is chiefly at-
tacked, low cutting, shredding, deep
plowing, and burning of stubble and
stalks are recommended measures.

Sanitation Is Big Help
to Reduce Fowl Cholera

Fowl cholera is one of the greatest
menaces to poultry flocks, declared
Dr. J. W. Lumb, extension veterina-
rian of the Kansas State Agricultural
college in a recent radio address. It
affects chickens, turkeys and ducks
with equally fatal results. It is most
prevalent in late summer, fall and
early spring and is due largely to
changes of housing conditions and
methods of feeding and handling
which tend to lower the resistance of
the fowls.

Fowl cholera closely resembles
fowl typhoid. In fact the resemblance
is so close that to most persons the
diseases appear to be identical. Even
trained workers are often compelled
to make microscopic examinations be-
fore definitely diagnosing the disease.
Ordinary symptoms are ruffling of the
feathers, loss of appetite, drooping of
the wings and tail, a staggering gait,
and diarrhea.

The organism which causes fowl
cholera is microscopic in size, is rod
shaped, and known as pasteurella
avium. It multiplies very rapidly in
the blood, causing blood poison.

Sanitary measures greatly reduce
the number of cases of cholera, ac-
cording to Doctor Lumb. Regular ra-
tions, good ventilation, even tempera-
ture, pure water, large houses and
large runs are also conditions which
help ward off the disease.

Unable to Fly Backward

The biological survey says that birds
cannot fly backward because the feath-
ers of birds point backward, so that if
a bird attempted to fly backward the
air would force the feathers forward
and the resistance of the air would be
such that the bird could not make
progress.

TO HOLDERS OF
SECOND LIBERTY LOAN BONDSEXCHANGE OFFERING OF NEW
TREASURY BONDS

Notice is given of a new offering of
UNITED STATES TREASURY BONDS,
dated June 15, 1927, and bearing inter-
est from that date at the rate of 3½ per
cent. The bonds will mature in twenty
years, but may be called for redemption
after sixteen years.

Second Liberty Loan bonds will be ac-
cepted in exchange at par. Accrued in-
terest on the Second Liberty bonds of-
fered for exchange will be paid as of
June 15, 1927.

Second Liberty Loan bonds have been
called for payment on November 15, 1927,
and will cease to bear interest on that
date. Holders of such bonds who desire
to take advantage of the exchange offer
should consult their bank or trust com-
pany at once. The exchange privilege
will be available for a limited period only,
and may expire about June 15th.

Further information may be obtained
from banks or trust companies, or from
any Federal Reserve Bank.

A. W. MELLON,
Secretary of the Treasury.

Washington, May 31, 1927.

ment of the institution, carrying
dairying, grain, potatoes, beans,
livestock, etc. Mining. Another
large department, not yet fully
developed but attracting a lot of
business; growing steadily. Pub-
lic utilities, railroads that make
the others possible, the telephone
that renders them all cohesive
and expansion possible, the pow-
er that runs all the wheels.
Scenery. Incomparable. All of
these things and others we have
in this great store.

Of course we advertise. On
this point the managers differ.
Some of them insist that we seek
trade only from the outside, ne-
glecting to inform those at home
of the advantages of buying
here. The home folks will line
up, anyway, declare those who
advocate that policy. The stock-
holders have to patronize us. Let's
make the big drive for the out-
siders, they urge.

So the advertising is spread
over a limited area of the nation.
The stockholders buy—some. But
they are not so busy at it that
they do not have time to become
discontented. They seem to be
listless. The goods on the shelves
may inspire no abiding confid-
ence. Spirit may have flown.

Putting it another way, why
do not the managers try selling
Idaho to Idaho people, perhaps
not exclusively but as part of
any advertising campaign.

Newspapers have long used it,
but commercial bodies have not
yet envisioned the importance of
acting along that line, with the
result that Idaho people know
comparatively little about their
own state and, therefore, are
not in position to tell the story
to their friends on the outside—
the best sort of advertising, if
put out with spirit and faith be-
hind it, and the most economical.

When our own people are en-
thusiased and advised they will put
on an advertising campaign for
Idaho by mail that will bring re-
sults not obtainable through the
cold and calculating representa-
tions of strangers.

An Idaho daily, calling atten-
tion to what it declares is an ill-
advised method, asks a number
of questions bearing upon the in-
formation possessed by the aver-
age Idaho citizen as to his com-
munity and his state. It carries
the interrogator down the street
of any city and he undertakes
to ascertain how much those he
meets know about the scenic
spots of Idaho, the agricultural
yields, the dairy production, the
mineral output, the timbering
activities, the building opera-
tions, the bank deposits and
clearings. He finds that the citi-
zens he meets are woefully de-
ficient on these subjects.

Knowledge carries with it a
strong desire for dissemination,
backed with assurance and force.
The man who knows always
wants someone else to partici-
pate in the information. He has
friends back east, and if he is
aroused he will write them tell-
ing about the resources, the
climate and the recreational spots
of Idaho. He gives them accu-
rate figures. Coming from a
friend they carry weight. More-
over he knows with considerable
exactitude what those friends
are interested in, a condition
that does not obtain with a prom-
iscuous appeal.

There can be no opposition in
reason to general advertising,
but when something is not done
to inspire our own people and en-
list their services we have neg-
lected one of our choicest oppor-
tunities.

Another angle to the subject re-
lates to the impression given by

Idahoans to any who may be in-
duced to immigrate through gen-
eral advertising. If they are not
advised and animated they do
not constitute informative and
optimistic representatives when
talking with the newcomers. In-
deed, lack of knowledge, with its
running mate, lack of enthus-
iasm, is liable to give the visitor
an erroneous impression of the
new country, its people and its
institutions.

Sell our own people. Get them
aroused to the potential great-

ness of Idaho. They will do more
than any other agencies to sell
the state to outsiders. It is not
because we have anything spur-
ious to put over or that we are
arguing a school in bunk or va-
por. We really have the goods,
as legitimate and clean and sale-
able as that of any state. We
can sell them and add to Idaho's
population and to the amount of
capital invested in them if Ida-
hoans as a whole shall be im-
bued with a desire for informa-
tion and with a spirit to spread
the good news.

INSURANCE

Consult us regarding your insurance problems. We
represent reliable companies writing the following poli-
cies at reasonable rates:

FIRE—Protecting your buildings and personal prop-
erty against all damage by fire.

FIELD GRAIN—Protecting your crops against fire while
growing in the field, in the stack, in the granary,
in transit, or in the warehouse.

The Bohn boys returned to their work at Park, Monday, having been layed off several days on account of rain.

Mrs. Merte Stone and daughters arrived from Lewiston, Monday to visit at the Louis and Addison Alexander homes.

Miss Olive Keeler spent several days last week with her friend Miss Aiken in Kendrick.

I. E. Foster and son, Arthur, were fixing fence on the ranch last week.

Miss Helen E. Keeler of Linden and York Martin of Orofino, were quietly married in Lewiston, June 2. They have made no definite plans for the future.

Just Nonsense

A woman has named her twin daughters Gasoline and Kerosene. The old man's name is probably Pete Roleum. Here's hoping they grow up paraffine girls. We want them refined and not crude. Had they been boys, one would probably be named Benzine. —Wichita Eagle.

WOMEN WORKERS ARE SEEKING NEW JOBS

Survey Shows They Are Looking for Variety.

Washington.—A growing tendency for women in industry to drift from job to job is found by ninety-seven economics students at Bryn Mawr, who reported on their own working experiences. The students who gave their own working histories were members of the Bryn Mawr summer school for women workers in industry. The results of the investigation have just been published in a report of the United States women's bureau.

Half of the students were less than twenty-six years old and over half of them had gone to work before they were sixteen years old. Over half had stuck to a job less than two years on an average. Dissatisfaction and the chance of better pay and better hours were the chief reasons cited for changing jobs voluntarily.

Many Changed Jobs. "For example," says Prof. Amy Hewes, who directed the investigation, "one worker, who started in domestic service, changed to a job in a lamp factory. Leaving that, she worked successively in a noodle factory, a glass manufacturing concern, the lamp factory again and a battery factory. Next she tried domestic service with two different employers, returned to the lamp factory, and left it a third time to make linings in a cannet factory."

The attempt to get away from the nerve-racking routine of one specialized, standardized task is a big factor back of such a working history, Professor Hewes shows.

Work Learned More Quickly. The workers' relation to his job has been profoundly changed with the new organization of industry, Professor Hewes explains. In the old days of long apprenticeship and craftsmanship, a worker looked forward to a lifetime at a single trade. Now, however, a large number of workers fail to identify themselves with one trade.

Change from job to job, and even from industry to industry is easy, for the work is specialized and in general can be learned quickly.

"A better understanding of the whole social and economic effect of the new rate of change and the shorter average employment is needed at the present time," she concludes. "Women, together with men, change jobs for reasons which have not been measured and with results which are not known. If it is found that frequent changes of employment are inevitable under modern industrial organization, then different methods of employment, management and different industrial relations and tactics from those now in vogue in many places will have to be worked out."

New Simple Alphabet Favored by French Blind

Paris.—A new system of touch-reading for the blind, more simple than Braille, is given prominence by the efforts of its friends to have it generally adopted. The blind are said to master it in a few minutes. Louis Mayron devised the system because he found many war-blind could not easily learn the Braille system. His alphabet is made by various positions of three characters, a right angle, a U and a square.

Another False Alarm

Six fire engines, forty firemen and a large number of policemen, reporters and photographers answered an alarm in London, only to find that a man had accidentally staged his hair and a companion had turned in an alarm.

Kendrick Methodist Church

Preaching at American Ridge at 11:00 a. m.

A baptismal and sacramental service will be conducted at the morning service.

The evening service will be conducted in the park if the weather permits.

You are cordially invited to these services.

L. E. Taber, Pastor.

PRESBYTERIAN CHURCH

Bible School 10:00 a. m.

Dale Lanphere, Pastor.

Emanuel Lutheran Church

Rev. E. A. Rein, Pastor, Cameron, Idaho

Sunday School 9:30 a. m.

Church Service 10:30 a. m.

Church Council first Monday in the month.

Ladies Aid first Wednesday in the month.

Come and worship with us.

Snake's Rattles

Some folks insist that you can tell the age of a rattlesnake by the number of its rattles. Nature authorities say this isn't true, because rattles may be added to the tail at uncertain times in the year, and as rattles are brittle and get broken, it is impossible to tell the age, accurately, by counting them.—Exchange.

Work Is the Grand Cure

Work is the grand cure for all the maladies and miseries that ever beset mankind—honest work which you intend getting done.—Carlyle.

Conqueror Without Mercy

The slain of the World war would not make a third of the toll of human life exacted by Genghis Khan during his reign over Asia, remarks the Dearborn Independent.

Known to Fire Worshipers

Baku, the Mecca of the Zoroastrians or Fire Worshipers, was for centuries visited by thousands who came on pilgrimage to the "Eternal Fires," which were nothing but burning natural gas or petroleum; in the Temple at Surakhani, Marco Polo, the Venetian traveler describes the "Burning Springs," and Roman history provides the earliest records of the use of oil for lighting, being burned in the lamps in the Temple of Jupiter.

KENDRICK STORE CO.

DEALER'S NAME AND ADDRESS

Fadeproof MIDDISHADE Blue Serge Suits

Anywhere at any time

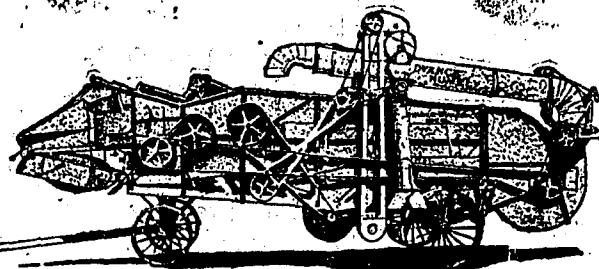

A Middishade Blue Serge Suit is "in good taste"

YOU wouldn't wear golf knickers to a church wedding. You wouldn't wear a very light-colored business suit to any affair of a formal nature. You wouldn't wear a tuxedo to a picnic.

But you could wear a Middishade Blue Serge Suit—the universally useful suit—to any of these events and to business every day!

Come in and see our Middishade Blue Serge Suits. Models to suit all tastes—and all guaranteed fadeproof.

Advance-Rumely Ideal in STEEL

Rust-proof and Weather-proof

To the thorough cleaning and separating for which the Rumely Ideal is everywhere known, the Advance-Rumely steel separator adds these important advantages:

- (1). Fire-proof steel construction.
- (2). Proof against warping even when kept out in inclement weather.
- (3). Extreme durability.

The Advance-Rumely Steel Separators are practically 100% steel. Decks and sides are of heavy galvanized steel. And then, for additional protection, the metal is varnished. Think what that means in protection from the elements.

They are light running and easily handled. They can be operated by any good tractor of the proper size. Every adjustment, oil hole and grease cup is on the outside. Concaves are raised and lowered by simple levers. The blast from the cleaning fan is regulated by two doors on each side of the fan drum. The sieves can be easily raised and lowered.

Do not overlook the fact that these sturdy steel separators are built to give long service. The frames are built of steel angle irons, hot riveted to the frame. Axles and wheels are also of steel. They are machines that will not get out of line. And, with reasonable care, will serve you a lifetime.
