

## Celebrate July 4th at Kendrick

### FAST BALL GAME PLAYED LAST SUNDAY

#### Juliaetta Wins From Kendrick in Eleven Innings.

One of the best games of the season was played last Sunday when Juliaetta and Kendrick battled for eleven innings on the Juliaetta diamond, the former team finally nosing out in the last of the eleventh with the deciding score, making the game 5 to 4. Both teams played good ball and the game was featured from start to finish by heavy hitting. Albright for Juliaetta and Sparber for Kendrick both pitched good ball.

Carl Carlson and Ernest Davis umpired the game to the general satisfaction of all concerned. The game was a non-league contest.

Following is a resume of the game in detail:

Kendrick	Ab	R	H	SO	E
Armitage, 3b.	5	2	0	2	0
Kulick, 1b.	5	0	2	0	2
Anderson, c.	5	0	1	1	1
T. Eichner, 2b.	5	0	1	1	3
Stanton, ss.	5	0	1	3	2
Flaig, cf.	5	1	0	1	1

Grangeville 5; Cottonwood 3.

### Held Sunday School Picnic

A well-attended Sunday school picnic was held at Bethel church last Sunday under the direction of the Latah Sunday School Council, with 12 Sunday schools represented. The crowd was estimated at 500 people. An interesting program was rendered.

### MAKING PLANS FOR A GRAND CELEBRATION

Expect Record Breaking Crowd Here July 4th.

All details concerning the big celebration here July 4th, are being taken up by the various committees in charge in ample time so that all necessary arrangements may be made before the big day. The finance committee was busy last week with a subscription list and the business men in town donated liberally toward a fund to defray expenses.

Considerable time is being spent by those in charge of securing entries for the parade, as this is expected to be a big feature. The committee in charge of this event is composed of G. P. Anderson, A. Wilmot, O. E. MacPherson and John Dammarrell. The committee met last Friday and has plans formulated to promote a long list of entries. It is hoped that the enterprising people from the various ridges and outlying communities will make an entry—anything from a clown, decorated car, float, to as far as their imagination will carry them. A long list of prizes will be given for the best entries. The baseball management is going to stage a fast ball game for that day and is now making arrangements to secure a good team. Final details will probably be completed the first of the week and the name of the visiting team announced.

With favorable weather conditions it is believed that a record crowd will be here to celebrate. Many former residents of this community have signified their intention of renewing acquaintances here that day.

Tables will be provided in the park for those who wish to bring their picnic dinner. Plenty of shade for everyone.

Following is a list of the various committees in charge of the celebration. Any information desired may be secured from them.

Parade: G. P. Anderson, A. Wilmot, O. E. MacPherson, John Dammarrell.  
Finance: A. Wilmot, G. P. Anderson and John Dammarrell.  
Grounds, concessions and pavilion: Tom Long, A. H. Dabbenberg and Dr. McKeever.  
Program: Mesdames. Anderson, Knepper and H. Thomas.  
Decorating and public safety: Joe Gardner, Rev. Taber and Ed Long.  
Sports: Rev. Lanphere, G. P. Barnum, R. H. Ramey, William Watts and George Leith.  
Publicity: Ralph Knepper, H. Schupfer and Clyde Daugherty.

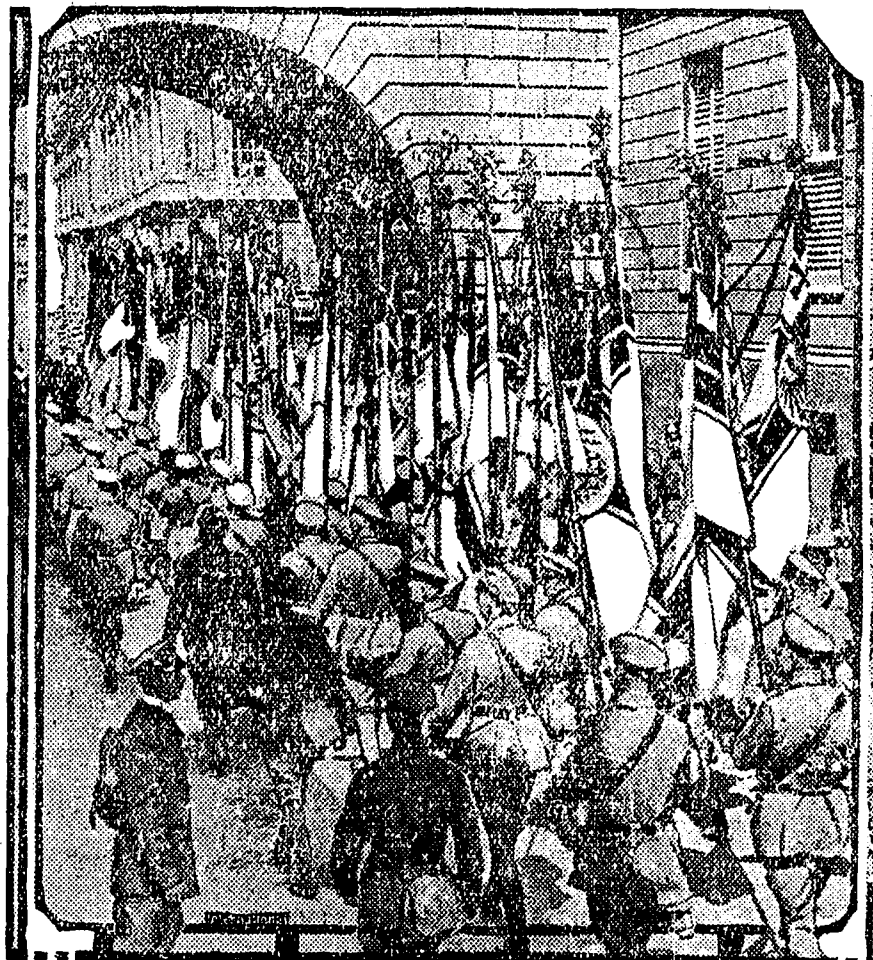

Miss Johanna Hooker entertained a number of friends at her country home last Sunday afternoon. A picnic dinner was served in the evening cafeteria style and it is needless to say that it was thoroughly enjoyed by everyone. Those present were Messrs. and Mesdames. Watts, Ramey, Keene, Knepper and their families.

Lapwai 13; Nezperce 5.

#### Central League Standing

Team	Won	Lost	P.C.
Nezperce	6	2	.750
Grangeville	4	2	.667
Lewiston	5	3	.625
Lapwai	4	3	.571
Orofino	2	4	.333
Cottonwood	0	7	.000

### "Steel Helmets" Parade in Berlin

More than 100,000 members of the Steel Helmets, Germany's unarmed army, paraded in Berlin and were reviewed by the former kaiser's three sons. The photograph shows the banners carried at the head of the procession.

#### Wilhelmine C. Lohman

Wilhelmine C. Lohman, nee Sauer, was born June 2, 1836 in Pomerania, Germany. Through baptism and confirmation she became a life-long member of the Lutheran church. In 1859 she was united in marriage with Frederick Lohman. To this union were born four children, one of whom died when only four years old. The three surviving children are: Mr. Herman Lohman, Lewiston, Idaho; Mrs. Fred Silflow, Sr. Cameron, Idaho, and Mr. Carl Lohman, Germany. Her husband preceded her in death nine years ago at the age of 95 years. She came to America in 1890, making her home with her daughter, Mrs. Silflow of Cameron, Idaho. She died on June 2, 1927 at the age of 91 years. She leaves to mourn her departure, three children, 14 grand children and 21 great grand children, besides a host of friends. Interment was made in the cemetery at Cameron, Rev. E. A. Rein officiating.

#### Hayes-Walker

Ethel Hayes of Pullman and G. F. Walker of Kendrick surprised their many friends last week by being quietly married at Coeur d'Alene, on Wednesday morning, June 8, at 10:30. The ceremony was performed by Rev. Hunter, Presbyterian minister of Coeur d'Alene. Announcement of their marriage was made here last Saturday. It was a complete surprise to everyone in Kendrick.

The bride is a professional nurse and has made her home in Pullman for a number of years. The groom is too well known in this community to need any introduction.

The Gazette joins their many friends in wishing them future happiness. They are now at home in their apartments in Kendrick.

#### Thomas C. Lynch Married

Announcements were received in Kendrick yesterday of the marriage of Miss Minnie Jane Watkins to Mr. Thomas C. Lynch. The wedding took place at Seattle, Friday evening, June 3, at seven o'clock. The bride is the daughter of Mr. and Mrs. R. O. Watkins of Seattle. Mr. Lynch was principal of the Kendrick schools for the past year and was very popular with his students. Mr. and Mrs. Lynch will be at home after June 15 at 4418 4th Avenue N. E., Seattle.

### Created New Herd District

W. F. McClelland of the Southwick community stated this week that the Nez Perce county commissioners had created a new herd district to go into effect July 6. This new district, with the former herd district, makes about nine square miles in the northeast corner of the county, which comprises the Southwick community and vicinity.

### DISTRICT CONVENTION HELD AT MOSCOW

#### Oddfellows and Rebekah Lodges Have Good Session

The third annual convention of Odd Fellows and Rebekahs of Idaho District No. 18, met in Moscow Wednesday of this week. A large number attended from Kendrick and vicinity and reported a very successful and interesting meeting.

C. A. Hagen of Moscow, district chairman of the Oddfellows, and Mrs. Floyd Naylor, district chairman of the Rebekahs, presided over their respective meetings.

The convention opened at 10 o'clock with the following program:

Musie, Davis' Boys' Band.  
Invocation, the Rev. Mr. Hitchcock of Potlatch.

Address of welcome, Mayor Harry J. Smith, Moscow.

Piano Solo, Josephine Harland, Troy.

Welcome from Odd Fellows, John L. Naylor, Moscow.

Welcome from Rebekahs, Mrs. Reta Holman, Moscow.

Response to welcome, M. Wiley of Troy.

Reading by Miss Thelma Smith of Moscow.

Remarks by the grand officers. Song "The Home on the Hill," Musie, Davis' Boys' Band.

At noon lunch was served at the Christian church after which business sessions were held by both Oddfellows and Rebekahs. At 6 o'clock a joint banquet was served at the Christian church.

### Surfacing Troy Highway

Highway District No. 3, will soon resume the work of surfacing its part of the Moscow-Bovill State Highway from the Dalberg crossing on Bear Creek, to which place it was completed last fall, to the east line of the Troy highway district. In addition, the village of Deary, with the proceeds of a recently authorized bond issue and a 40 60 agreement with the State Department of Public Works, will complete the highway through that village. The districts rock crusher is now being repaired and put into shape for the seasons operations. It is reported that District No. 4 (Bovill) is formulating plans for surfacing the road from Bovill to its west line, but this statement has not been verified. —Troy News

### I. O. O. F. Held Big Meeting

Grand Master Carl Johnson, Grand Patriarch John Peters and President Effie Watkins paid an official visit to the subordinate and Rebekah lodges of this district, meeting with them in Kendrick last Saturday night. The subordinate lodge was in regular session and the Rebekahs in special session. After a very enthusiastic meeting, attended by about 150 members from Kendrick and visiting brethren, the two branches united and enjoyed a program of speeches, songs, quartet music and readings. Following this a light lunch was served.

Mrs. Mina Davidson of Clarkston arrived Thursday morning to attend the funeral of Mrs. Margaret Davidson.

### ITEMS OF INTEREST FROM SOUTHWICK

#### Written for Gazette by Special Correspondent

Mr. and Mrs. Wm. Berriman returned home Saturday from Clarkston. Mr. Berriman is able to be around but still has to carry his arm in a sling.

Mrs. Belle Cuddy returned home from Mohler, Tuesday, via Lewiston. She has been visiting her son at Mohler for the past several weeks.

Mr. and Mrs. Clarence Henderson of Potlatch spent Sunday with home folks.

Mrs. Souder and mother, Mrs. Wells of Crescent, were in town Tuesday.

Mr. and Mrs. Fred Whiting spent Sunday at the home of Raymond Blankenship of Bed Rock.

Mr. and Mrs. Murray Benjamin of Potlatch spent Sunday with her parents, Mr. and Mrs. Wm. McClelland.

Grant Bateman went to Spokane last Wednesday, returning home Friday evening. Henry Davis substituted as Park mail carrier while Grant was away.

Albert Jones of Elk River spent last Wednesday with his parents, Mr. and Mrs. Geo. Jones, returning home on the evening.

Mr. and Mrs. Jim Cook of Leland and Mr. and Mrs. Ben McCoy and daughters, and Willis Berriman spent Sunday at the home of Elton McCoy.

Mr. and Mrs. Pete Blake, who were recently married, have moved to Grandama Wells residence for the summer. They were charivariied by a large crowd Sunday evening.

Nels Longteig received word that his brother, Nute of Portland, was married last Sunday to Miss Wilson of that place. They left for Canada on a wedding tour and expect to return to Portland by way of Southwick.

The United Brethren Conference held at Asotin last week closed Sunday. Miss Isabel Binford of Vinapine, Oregon, will supply the Southwick district for the coming year.

A large number in and around Southwick attended the pioneer picnic held at Peek last week.

Miss Nadine McCoy went to Leland Tuesday evening to spend a few days with her sister, Mrs. Harry Smith.

Mrs. Attlee Mustoe is quite ill at her home west of town. Miss Nellie Henderson spent last Saturday with friends in town.

The farmers are very busy days planting beans and potatoes.

Mr. and Mrs. Armitage and two children spent Sunday at the home of John Phillips.

Ross Armitage is assisting Roy Southwick with his farm work this week.

Mrs. Ella Jones and daughter, Edna, left Monday for Pomeroy where they have employment.

A large number of friends attended the funeral of Mrs. Albert Guernsey held from the Methodist church Saturday. Services were held by Rev. Pearson of Peek and the remains were laid to rest in the Southwick cemetery.

Mrs. Fred Gehre of Sildex, Montana, arrived Tuesday for a visit with relatives. She expects to remain until after the fourth.

### Kendrick Plays Pomeroy Sunday

The local ball team will journey to Pomeroy next Sunday to play the leaders of the Valley League. They are going to leave their jinx at home and carry a few horseshoes instead. Some of the "dopesters" think this game is already on the scorebook for a win for Pomeroy, but there is plenty of room for them to be mistaken. Kendrick may have a surprise in store for them.

# SPECIALS for June

## Indian Blankets

Suitable for Auto Robes, Camping, etc., Each

**\$2.45**

## Hemstitched Pillow Cases

Size 42x36, each

Subscription Price **\$1.50**

Entered at the Post Office at Kendrick as second class mail matter.

### Hay Equipment and Practices

**Certain Methods Often Employed When Others Would Be Superior.**

(Prepared by the United States Department of Agriculture.)

Many different methods and practices of putting up hay are followed by growers in large hay-producing sections. Some growers follow certain practices because of the size of the haying operations, some because of climatic conditions, some because of the kind of hay or the quality desired. Through continuous use certain practices are often employed when others would be superior. Many hay growers are getting satisfactory results with the methods they now use, but there are others who could lower their costs by changing, according to L. A. Reynoldson, economist, and C. D. Kinsman, agricultural engineer of the United States Department of Agriculture.

**Have Equipment Ready.**  
Putting up hay is an operation that, even under the most favorable conditions, requires more constant attention and efficient handling than most other farm operations. Because of the comparatively short season, delays are costly. It is essential, therefore, that the equipment be in good shape before haying begins and that sufficient repair parts are always on hand.

The best equipment to use for haying varies according to the kind of hay, yield per acre, quality of hay desired, topography of the hay land, quantity produced each year and the distance hay is hauled from field to stacks.

#### Different Mower Types.

Some of the different types and sizes of mowers, sulky rakes, sweep rakes and stackers used by hay growers in certain sections are better adapted to conditions in other sections than those now in use there. Many of the items of special equipment and some of the labor-saving devices and methods used by different men could be employed with profit by others.

In Idaho a crew of 14 men will stack

80 to 90 tons of alfalfa daily, using slips and a Mormon derrick. This hay brings a premium of 10 to 20 per cent over that put up by other methods. In Colorado a seven-man crew stacks only 90 tons with a similar outfit. In Montana, a five-man crew stacks 30 to 40 tons with an overshot stacker and sweep rakes.

A crew of eight men in Colorado using a slide stacker and home-made sweep rakes will stack about 65 tons of wild hay per day. In Nebraska, a four-man crew using an overshot stacker with a backboard and front-board will put up 32 tons. Without the latter device, another man would be necessary.

A crew of six men using a slide stacker and sweep rakes stacks 60 tons of irrigated timothy and alsike hay per day.

Farmers who feed cattle should be interested in a method of handling hay in Nebraska whereby four to five tons can be taken from the stack, put on a wagon and pitched off in the feed lot in about one hour.

This and other information is contained in Farmers' Bulletin 1528-F, "Effective Haying Equipment and Practices," a copy of which may be obtained free, as long as the supply lasts, upon request to the United States Department of Agriculture, Washington, D. C.

### Pasture Without Grain Is Not Enough for Pigs

That it is not profitable nor advisable to attempt to grow pigs on pasture without grain is shown by some work done at the Kentucky station a few years ago. Some pigs weighing 63 pounds each were turned on rye pasture on March 19 and kept there for 42 days, no grain being fed. They did not maintain their weight, in fact they lost 5 pounds during the time. Some other pigs weighing 82 pounds each were turned on clover and bluegrass pasture on May 13. On July 4 these pigs averaged 90 pounds each, having gained only 8 pounds in 53 days.

### Growing Onion Crop

In growing a crop of onions, it is well to remember that as a general rule it is the early sown crop which produces the best yield. The seed should be sown after the danger of hard freezes is over. The ground should be well prepared, free from weeds, and all course trash and litter should be raked off in order to make cultivation easier. The seed is sown at the rate of three to five pounds per acre in rows anywhere from 12 to 14 inches apart.

## JULIAETTA COMMUNITY NEWS

### UNITED BRETHREN CONVENTION HERE THIS WEEK

The Pacific District General Convention of the Sunday School, Christian Endeavor and W. M. A. of the church of the United Brethren in Christ is now in session here and a good attendance is reported. Following is the program as outlined:

#### THURSDAY, JUNE 16, 7:30 P. M.

Registration of Delegates, Antrim Kenoyer, Albion, Wn.  
Song Service, Scripture Reading, Prayer,  
Rev. S. M. Mathes, Dayton, Wash.  
Address of Welcome, Bishop F. L. Hoskins, Myrtle, Ida.  
Response, Annual Address, President A. S. Henderson

#### FRIDAY, JUNE 17, 8:30 A. M.

Quiet Hour ..... I. N. Luce, Juliaetta, Idaho  
Address, ..... Rev. J. E. Harwood, Huntington, Ind  
General Secretary of Religious Education

2nd Vice-President, Ruth Higdon ..... Sifton, Wash.  
Secretary, Antrim Kenoyer, ..... Albion, Wash.  
Treasurer, Roberta Stanton, ..... Portland, Oregon  
Music Committee:  
Rev. George F. Calvert, ..... Clarkston, Wash.

#### Both Legs Amputated

E Kimberling, who has been an invalid for a number of years, being afflicted with rheumatism, had both legs amputated above the knees the first of the week. The operation was performed at his home in Juliaetta by Dr. Einhouse and Dr. Carrithers of Moscow. Mr. Kimberling is reported to be getting along as well as could be expected.

#### Crop Prospects Good

All crops in the vicinity of Juliaetta are flourishing and recent weather conditions have been ideal. The warm weather this week is greatly benefitting tomatoes and watermelons, and farmers have been exceedingly busy planting beans and getting the ground in shape.

#### Locals to Play Clarkston

The Juliaetta ball club will go to Clarkston Sunday afternoon and a fast game is expected. After defeating the Kendrick team last Sunday the locals feel that their luck has turned and will give Clarkston a run for her

#### money.

Mrs. Walter Cochran was a Moscow visitor the first of the week.

Mr. and Mrs. Gunther and family visited friends in Kendrick Wednesday evening.

Mrs. Leland Houck was a Kendrick visitor Wednesday afternoon of this week.

A farmer's boy brought a cowhide to the junk man and asked what the price was for hides. "Is it a green hide," asked the dealer. "Naw," replied the boy disgustedly, "they ain't no green cows. The one this came off was a brindle.—Ex.

At The New Kendrick Theatre,  
2 day, Tonight and Saturday.

## DEARY GARAGE

Authorized Ford Dealers

Lincoln *Ford* Fordson

CARS-TRUCKS-TRACTORS

## FARMERS

**interested in harvesting their crop  
for 50c an acre, should write  
us at-once.**

Factory Representative will be here soon.  
No obligations.

### Agricultural Notes

Legume bacteria work for nothing.

Every farm should have some means of extinguishing fires.

Doves are important weed destroyers, it is said. One dove was found to eat 9,200 weed seeds at a single meal.

Only ten minutes of actual human labor is required to produce a bushel of wheat.

Crops grown on the farm or locally usually form the most economical feeding ration.

When cutting soy beans for hay, cut when the beans are formed in one-third of the pods.

Rape is a garden crop, or should be. Many people do not know it, but out of rape can be made one of the best salads, or "greens," known.

After grain is cut and stacked or threshed the stubble field furnishes a cheap pasture for sheep. Rape sown in the stubblefield will also make excellent sheep pasture.

### Medicinal

An English jurist says a new hat is an excellent tonic for a woman. But it often is a bitter pill for her husband.

### Card of Thanks

We wish to thank our many friends and neighbors for their kindness and sympathy during the recent bereavement of our loved one and for the many floral offerings.

Mr. and Mrs. Fred Silflow, Sr. and family.

### Some Good in "Fussing"

Fussiness has not much to recommend it. Cream, I have observed, does not rise well on agitated milk. Still, were there no fussers it is possible that some of us would not accomplish much.—Portland Oregonian.

### Don't Forget

A Glass of That  
**GOOD BEER**  
when in town.

Soft Drinks, Tobacco,  
Cigars, Candies, and  
Ice Cream.

McDowell's Confectionery

### Why Not Enjoy The Best

in a  
**"JIFFY"**

The super-Comfort tent for Campers and Tourists. Only in the famous "JIFFY" will you find the "Jiffy" tent features: Special forest green fabric, absolutely water, sun and mildew proof. Poles, light, strong wood or steel. Adjustable top support. Strong, easy working steel joints. Special patented door fasteners. With or without center pole.

## McCormick-Deering Tractor Power---for All Work!

EVERY YEAR McCormick-Deering Tractors stand stronger with local farmers. The name McCormick-Deering has become the symbol of reliable power farming because it stands for carefully built, practical, many-sided, long-lived farm power—and the kind of service cooperation we are able to offer our customers.

Men who have used International Harvester tractors—for months or for years—are steadfast friends of McCormick-Deering farm power. They will recommend McCormick-Deering when you come to buy. Other men, who risked using cheaper, lighter tractors, found themselves underpowered. They fell short of reaching full production with the least possible labor and in the shortest possible time. After this experience they were ready for new and better power. There are many like these, too, who will recommend McCormick-Deering when you make your power investment.

# These cars stand up!

EVERY General Motors car is built to represent General Motors quality and value throughout its life. Whether its potential mileage is to be used up by one owner or several owners makes no difference.

That is the reason for the high resale value of the current series of the General Motors cars. It is also the reason why USED General Motors cars offer real opportunities.

General Motors dealers are dependable merchants and will give you, if you wish to buy out of income, the advantage of the low rates of the GMAC Plan of time payment.

The price ranges of the new General Motors cars are given below. Pick out the car which interests you most. Then clip and mail the coupon. We want to tell you all about that car and also why General Motors cars, used or new, offer real value to their purchasers.

8 models—\$525 to \$780. The quality car of the low-priced field. 3-speed transmission. Dry-disc clutch. Smooth, powerful engine. Fisher Bodies. Duco finish. Fully equipped.  
CHEVROLET TRUCK CHASSIS: 1/2-ton, \$395; 1-ton, \$495.

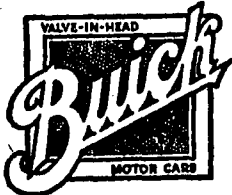

6 models—\$775 to \$975. Has largest 6-cylinder engine in its price class. Fisher Bodies. Duco finish. Beautiful, stylish lines. Value proved by unprecedented sales.  
PONTIAC 1/2-TON CHASSIS, \$585; with screen body, \$760; with panel body, \$770.

11 models—\$875 to \$1,190. Gratifies your finer taste. Satisfies every need. Fisher Bodies. Duco finish. 6-cylinder motor. Harmonic balancer, 4-wheel brakes and other new features.

7 models—\$1,095 to \$1,295. The "six" that is winning and holding goodwill everywhere. Fisher Bodies. Duco finish. Rubber silenced chassis and other tested improvements. 4-wheel brakes.

18 models—\$1,195 to \$1,995. Everybody knows Buick's worth. Now finer than ever. New models vibrationless beyond belief. 6-cylinder valve-in-head engine. Fisher bodies. Duco finish.

LaSalle

6 models—\$2,495 to \$2,685. The new and beautiful car designed and built as a companion car to Cadillac. Has V-type 8-cylinder engine. Bodies by Fisher. Duco finish. Now on display.

50 body styles and types—\$2,995 to \$9,000. The pioneer in the 8-cylinder field. Standard of the world. Duco finish. Bodies by Fisher and Fleetwood. 500 different color and upholstery combinations.

## DIXIE COW BREAKS ALL RECORDS

Red Lady Is Record Breaker.

Red Lady, a pure-bred Jersey cow, has just completed the highest dairy record ever made by any cow south of the Mason and Dixon line. This cow yielded 1,028.51 lbs of butterfat and 19,008 lbs of milk in an official 305-day test. This great record follows one in which Red Lady produced 800.24 lbs. of butterfat and 17,195 lbs. of milk in 305 days.

Mr. R. L. Shuford of Newton, N. C., is the breeder and owner of this remarkable cow. Mr. Shuford's daughter is shown holding the animal.

Both Red Lady and her sire, Oakwood D's Fox, have won the solid gold Medal of Merit, the highest award that is offered by the American Jersey Cattle club.

## Good Qualities of Iogold Oat

Plant Resulted From Single  
Specimen of Kherson Se-  
lected at Ames, Iowa.

(Prepared by the United States Department of Agriculture.)

A new selection of the Kherson oat is being distributed for the first time this season to Iowa farmers under the name of Iogold. It was developed in the co-operative experiments of the United States Department of Agriculture and the Iowa Agricultural experiment station. Iogold resulted from a single plant of Kherson selected by Prof. L. C. Burnett at Ames, Iowa, in 1906. After being tested in nursery experiments for a few years it was considered of sufficient promise for advancement to the plant experiments, where it has been grown continuously to date.

### Outstanding Characters.

The outstanding characters of Iogold are high yielding power, stiffness of straw, and resistance to stem rust of oats. The average acre yield of Iogold is 65.3 bushels as compared with 64.3 bushels for Iowa, in the nine years for which comparable data are available. In comparison with other important varieties developed in the co-operative experiments, it resists lodging as well or better than the Richland (Iowa No. 105), although 3 or 4 inches taller, and is the equal of Iowa in yielding power. In the severe stem rust epidemic of 1926, it showed less than 2 per cent of rust infection, whereas most other varieties showed from 80 to 100 per cent of infection. For growing on land where lodging and rust usually affect oats, it is believed that Iogold will prove superior in ability to stand up and produce a high average yield. Among 21 varieties of oats grown in a uniform oat rust nursery in 1926 at approximately 50 experiment stations in the United States and Canada, Iogold showed the highest degree of rust resistance of all varieties.

### Produced for Purpose.

Iogold was produced for a special purpose. Richland has been a very satisfactory variety for low, rich soils, where taller varieties frequently lodge, and where rust usually occurs. However, it has not been altogether satisfactory on the uplands, especially on the more worn and thinner soils where it has been entirely too short in the straw for convenient harvesting with a grain binder. The Iogold has been bred particularly to replace Richland under these conditions. It also produces an excellent quality of grain. The kernel is slightly plumper than that of the Richland. Iogold is the result of 20 years of breeding, and should prove one of the most valuable of the improved varieties developed by the Iowa agricultural experiment station in co-operation with the bureau of plant industry of the Department of Agriculture. There may be some slight objection to the yellow color of Iogold, but as oats are consumed largely on farms, the color is not especially objectionable.

## Proper Feed for Brood Sows Before Farrowing

Proper feed before and after farrowing will have a great deal of effect upon the size and vigor of the litters raised this spring. A good deal of care should be taken not to make the ration too fattening. It would be better if there was no corn in the ration. However, this would not be economical on most farms, so as much as one-third of the grain ration may be corn if necessary. The remainder may consist of ground oats and middlings or bran. A small amount of linseed oil meal will help. All grain should be ground if not too expensive, as it will be found cheapest in the long run.

Besides the grain the brood sow should have some kind of roughage.

## Paid Potato Grower to Grade Product

Has Much Better Chance of  
Securing Higher Price.

It paid the Kaw Valley potato growers to grade their wares and brand the sacks in which they were shipped in 1926, according to E. A. Stokdyk of the Kansas State agricultural college. "From July 6 to August 21 the bulk of Kaw valley potatoes moved to market," he said. "Sales records were obtained on 539 cars marketed during this period, or 13.5 per cent of the Kaw valley potato crop. A number of growers were marketing U. S. No. 1 potatoes. These outsold partly graded potatoes 81 per cent of the time. Partly graded potatoes outsold U. S. No. 1 only 13 per cent of the time. This indicates that the grower who has his potatoes graded and inspected under Federal supervision so that they grade U. S. No. 1 has from 80 to 90 chances out of every 100 of getting a higher price than he would obtain if his potatoes were not graded or were only partly graded."

"Selling potatoes in branded sacks also paid. Branded sacks outsold unbranded sacks for the same grade and same method of sale 57 per cent of the time. Unbranded sacks outsold branded sacks for the same grade and same method of sale only 34 per cent of the time. In the remaining 9 per cent of instances, returns were approximately the same for branded and unbranded potatoes."

"The experiences of the growers show clearly that grading potatoes and using branded sacks pay big returns. The results in 1926 indicate the progress Kaw valley growers have made in the last six years. Practically all of the improvement has come in that time which marks the period during which the Kaw Valley Potato Growers' association has been functioning."

## Most Profitable Plan to Sow Spinach in Rows

While old-fashioned gardeners always broadcast the spinach seed, it is much better to sow it in rows, thin it and give the individual plant a chance to develop. It will give much finer leaves much more quickly. Plant some of the "long-standing" types now offered by the best seed houses. The Dames, who provide much of our best garden seed, have developed spinach and the King of Denmark type was the forerunner of other fine European spinaches that have made it practically a new vegetable. Then, too, varieties have been developed that stand the heat better than the old-timers.

## Agricultural Facts

Try gas on ground hogs.

At present 60 per cent of a tree is wasted in its conversion into lumber.

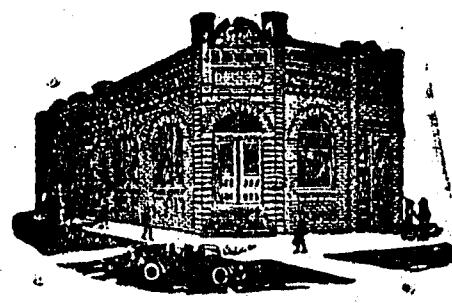

Plant lima beans on your poorest ground.

Mangels should be sown about the same time as early corn.

The largest share of the eggs received in New York city come from the corn belt, where farm flocks predominate instead of commercial flocks.

One of the most profitable forms of permanent improvement on a farm is to drain the low, wet places in otherwise tillable fields.

In order to avoid injury to the breeding ewes at this time of the year, it is an established practice among shepherds to remove the rain from the flock.

## When You Open An Account With Us.

You have at your disposal the complete modern facilities of a bank which is prepared to meet not only your usual but also your unusual banking needs.

Feel free to ask questions about our service and to consult us at any time about your financial problems.

A growing account at this bank stamps you as the kind of a man in whose hands the future of this community is safe and promising.

Let us plan and work with you for a greater future and closer co-operation.

## Registered Animals Not Always High Producers

Too many farmers seem to be of the impression that if the animal is registered it will bring about the necessary improvement in their herd. But such is not always the case. Many a pure-bred animal is a scrub for the reason that there has been very little improvement in the family for several generations. The average farmer, when he buys a bull, looks only at the pedigree and thinks that if the animal has the papers it is just what he wants. The pedigree should be studied to note the records of the dam and the grand-dams as far back as the fifth and sixth generations. The records of the females are the first things that should interest, then consider the bull. If the pedigree is satisfactory, then study the bull to determine whether or not he will do for the herd.

### Rich in Minerals

Milk is very rich in mineral matter and the milk producing organs of the cow are so constituted that they can produce milk of only a certain definite composition. That is to say the milk of a given cow, when she is in normal condition, always contains certain definite percentages of protein, sugar, fat, mineral matter and water. Through breeding and selection we have produced cows that yield several times as much as nature's cows.

### History Repeats

A man named William Shakespeare was fined in a midland court for game trespass. It was for a like offense the greatest William Shakespeare was forced to fly from his midland home.

### Self-Feeders Not Good

for Calf, Says Expert

Dairy calves do not have sense enough to balance their ration for suitable growth. After three years, the South Dakota agricultural college finds that calves given access to a self-feeder get too fat or eat such expensive feeds as to make their gains too costly.

The self-feeders were filled with corn, ground oats and whole oats, linseed oil meal, bran, alfalfa and the minerals salt and bonemeal. During the experiment the calves developed rickets. This is a result of insufficient minerals or poor assimilation. As plenty of minerals was supplied, it

was assumed that the calves could not assimilate what they ate. The calves were kept in a barn rather better supplied with sunlight than the average. However, the sunlight came through the ordinary glass. Calves should be exposed to the direct rays of the sun at least one hour daily, says Thomas Olson, who conducted the experiment.

### Early Education Board

The legislature of Massachusetts created a state board of education on April 20, 1837. Horace Mann was the originator of the bill. Mann was elected secretary of the new board at a salary of \$1,000 a year.

## The DAIRY

### POOR ECONOMY TO GRIND DAIRY FEED

Grinding soy bean and coarse alfalfa hay, in an attempt to make them better feeds for dairy cattle, is of doubtful economy, judging from the results of investigations carried out last year by the dairy department of the college of agriculture, University of Illinois.

Comparison was made with whole hay and with hay chaffed by means of a silo filler. About 14 per cent of the whole soy bean was refused, the refuse being coarse stems, while only 2.5 per cent of the chaffed hay and 2 per cent of the ground hay were refused. The gain in digestible matter through chaffing and grinding was estimated to be about 50 pounds a ton, or about 5 per cent for each process. This small gain was due to the fact that the stems were so much lower in nutritive value than the other portions of the hay. The labor and power required were about five times as great for grinding as for chaffing.

There was less advantage in grinding and chaffing the alfalfa hay than in the case of the soy bean hay. Only 5 per cent of the whole hay was left un eaten, and chaffing and grinding resulted in the refusal of only 1 per cent of the hay prepared in these ways. Here again, grinding proved a much more expensive process than chaffing.

The results of the feeding trial showed that, in both the soy bean hay and alfalfa hay trials, the amount of milk produced a ton of hay fed was practically the same regardless of whether the hay was fed whole, chaffed or ground. The Pennsylvania Experiment station has reported that digestion trials carried out with alfalfa hay showed practically no effect of grinding upon the digestibility of the hay. It is concluded, therefore, that grinding of hay is of doubtful economy unless labor and power are relatively cheap and hay and other feeds relatively high priced. The chaffing of soy bean hay having coarse stems proved to be a fairly economical procedure.

### Rape Is Best Substitute

#### Pasture for Hog Family

Rape is one of the best substitute pasture crops for hogs. It should be sown as early in the spring as the seedbed can be well prepared. If sown in rows, from two to four pounds of seed per acre is sufficient; if drilled in solid, from four to six pounds should be used. The Dwarf Essex variety is to be preferred. If possible, divide the field into two parts and pasture alternately.

In securing a seedling of alfalfa only hardy northern grown seed should be used. The Grimm, Cossack, and Ontario Variegated strains are exceedingly well adapted to Michigan conditions. The seedbed should be well firmed and the soil should not be acid. The land should be well drained.

### Ample Supply of Green

#### Peas Is Always Delight

An ample supply of green peas, sugary with their own natural sweetness and not requiring any additions from the family sugar bowl, are the pride and ambition of every gardener's heart. Peas from a single planting are in bearing for only a short time. The dwarf varieties most commonly grown in the home garden yield for about ten days while the bush peas, those which require brush or wire supports and grow from three to four feet tall, remain in good bearing from two to three weeks. It is real economy to plant the tall peas for quantity. A succession of plantings must be made to have a crop over any long continued period.

### Useful Manure Floor

The use of the manure floor or storage shed, with an occasional use of the manure spreader is a step that goes hand in hand with good dairy farming. Planning the rotation so that manure may be supplied to the fields at regular intervals as it is needed insures a uniform, steady crop production that is a necessary part of well-organized farm operation. Neglecting the fields that are back from the barn is a poor practice, rapidly disappearing.

### Dairy Squibs

Fall freshened cows give more and cheaper milk and butter fat.

Two misfits in any dairy herd are the masculine cow and the effeminate bull. Both are far too common.

Dairy stables must be properly ventilated in winter or cows will not produce so well nor keep healthy.

At The New Kendrick Theatre, 2 day, Tonight and Saturday.

BUY CLETRAC and  
Farm More Profitably!

## "Cletrac Wins Again"

This ad has just been sent to us from Kansas. It appeared in the Stanford, Kansas, Courier, on June 6th. We are not using this ad to knock a competitor, but we are entitled to refer to facts. As I have said, "All agents will and can lie, but the tractors can't." The ad reads:

"Monday evening we had a demonstration near Garfield, competing with a Holt Tractor, each machine pulling a combine with 75 bushels of wheat in the grain tank. The Cletrac pulled to the top of a steep hill in high, changed into second and made it over the hill. The Holt failed to get farther than half way up the hill in any gear, then it pulled back down and tried it over again and failed again.

"After all this digging the Cletrac went to the bottom and went over the top again.

"The farm owner, Frank Furdick of Garfield said 'That is good enough for me, take the combine and the Cletrac to the house.'

"Between 250 and 300 farmers were present to witness the demonstration.

"Power and traction is what we sell—the two primary requirements of any tractor. Cletrac has them and we are willing to show the farmers and demonstrate against any tractor built."

The Model 20 is a three-bottom tractor; the Model 30 is the four-bottom tractor. It is true the Thirty Cletrac had trouble with the axles breaking out. The Company now puts in an axle which will never go out and all those having the light axles are now replaced free of charge to the owner having the light axle.

Cletrac, the "Champion of the World" is sold in Latah, Nezperce and Clearwater Counties by

Moscow, Idaho, Attorneys for Plain-  
tiff. 21-5

## JUST IDAHO

By Guy Flenner

## Idaho And Aviation

At least the larger places in  
Idaho should give serious atten-  
tion to air portage. Those hav-  
ing landing fields should enlarge  
and improve them with the least  
loss of time. Those not so pro-  
vided should take immediate  
steps to build.

Aviation has gone over the  
top with the feats of Lindberg  
and Chamberlain. The more or  
less dormant imagination of the  
public and of officialdom has  
been aroused. Manufacturing  
plans on a larger scale than had  
even been dreamed of are being  
perfected. Commercial aviation  
will jump into a commanding  
place before we know what has  
happened, just as the radio did.  
Recreational flying will become  
among the attractions of sporting  
life, not only professional but  
amateur and personal.

Idaho cities should be equip-  
ed to take fullest advantage of  
these developments. An air  
port costs something, but is  
worth immensely more. Every  
port will be nationally catalog-  
ued and mapped. Idaho is a  
handy place to light. It will not  
be long until we will be  
after aviation business as we  
now are after the auto tourist.  
Those prepared will be in the  
best position to get it. Undoubt-  
edly the time is not far distant  
when air mail jumps will be lo-  
calized. That is another argu-  
ment in favor of air ports.

## The Bridge of Bigness

This state has bridged any  
number of chasms, educationally,  
politically, industrially. An-  
other is being bridged, the  
Snake river gorge. Between the  
Twin Falls north and south side  
tracts a mammoth steel struc-  
ture is being thrown across the  
river—a bridge that will have a  
record-breaking suspension from  
rim to rim. It will unite two  
important Idaho districts physi-  
cally.

This enterprise should carry  
a lesson to all parts of our state,  
the lesson that teaches the high  
value of unity.

The bridge stands mutely as  
a uniting force in all our activi-  
ties. The river chasm that has  
separated the two Twin Falls  
sections from ready contact is  
comparable to the gorge of senti-  
ment that has divided communi-  
ties all over the state. Occa-  
sionally they have gotten to-  
gether over more or less danger-  
ous grades. With state pride  
and state spirit constituting the  
bridge, there should be contin-  
uous unity of aims ambitions  
and actions. We do not have to  
issue any bonds to secure that  
connection, only the bonds of  
commonality of interest. Their  
coupons represent the best form  
of investment.

When we find it easy to get  
together it is not difficult to  
understand each other. When  
we are more readily conveyed  
to a realizing sense of the prob-  
lems of those who have invested  
large sums in our state, in rail-  
roads, mines, systems of com-  
munication, power plants, and  
so on, we are prompt to extend  
the hand of co-operation, not  
only for them, but to a greater  
degree, for ourselves.

The Bridge of bigness is be-  
ing built. Let us all resolve  
to hasten its construction.

## What Name?

A prize has been offered, in a  
nation-wide competition, for a  
name for the North and South  
highway. We shall not enter the  
competition formally, but we  
humbly suggest:

"THE IDAHO HIGHWAY."  
Why not something that at-  
taches this important artery to  
our state?

Many pretty names will un-  
doubtedly be proposed, but noth-  
ing more expressive of the con-  
struction and results of this high-  
way can be chosen than "Idaho."

We have seen how it works in  
our neighboring states. Those  
folks were far-sighted when they  
secured the designation, "The  
Oregon Trail," not only through  
Oregon but through other states.

The nation knows about the  
Oregon Trail—more about it  
than about any state it traverses  
excepting Oregon. It stands as  
a big advertisement for the Web-  
foot state.

We have also the Lincoln, the  
Yellowstone, the Roosevelt, the  
Evergreen and other highways.

This is OUR highway. It will  
become nationally known in time  
because of the natural beauties  
through which it has been built  
and the splendid engineering that  
carries it so majestically over

mountain passes.

Is there any good reason why  
it should not be called "Idaho"?

## NEGLECT CAUSES.

## MOST FAILURES

When farm poultry flocks are given  
the right attention, the grower meets  
with success in his efforts; but, lack  
of attention to the flock nearly al-  
ways results in failure to produce  
profits.

"Ninety per cent of the calls that  
we get for help with poultry are  
caused from lack of attention to sim-  
ple details in handling the flock,"  
says Allen G. Oliver, poultry exten-  
sion specialist at North Carolina State  
college. "Rarely do we get a call from  
those thousands of farmers who give  
their birds the right attention. If I  
were to sum up the most prevailing  
causes of failure, I would list the fol-  
lowing ten:

"The poultry house allowed to be  
dark, damp and drafty.

"Drinking fountains or troughs al-  
lowed to be dirty and filthy or the  
birds drink from stagnant pools of  
water.

"Lack of fresh air and sunshine, na-  
ture's disinfectants, in the house.

"Failure to clean and disinfect the  
house at regular intervals.

"Keeping the flock penned up in  
unsanitary houses and yards.

"Allowing dead poultry to remain  
exposed.

"Allowing sick poultry to run with  
remainder of the flock.

"Building the poultry house in a  
low, damp location.

"Failure to provide sufficient, clean  
water and shade in summer.

"Permitting lice, mites and other  
vermin to infest birds and houses."

These ten things, states Mr. Oliver,  
cause most of the failures and each  
of them could be easily overcome.  
They are plain, common-sense precau-  
tions which may be observed without  
great outlay of money and the most  
that is needed for their observance is  
some work and a proper regard for  
the dumb creatures.

Mr. Oliver makes the added precau-  
tion that birds should not be crowded  
in the house during the day nor on  
the roosts at night. Each hen needs  
about three square feet of floor space  
and from seven to ten inches of roost-  
ing space. Plenty of clean water and  
well-kept quarters are always needed  
for success with poultry.

## Correct Time to Start

## Young Turkeys in Spring

April and May are probably the best  
times to start the young turkeys, as  
the natural conditions are then very  
favorable to young bird life.

You can place the eggs under an old  
hen of the American or Asiatic breeds  
but White Leghorns will not be sat-  
isfactory. A Plymouth Rock or Brah-  
ma hen usually makes a fine mother.  
The first feed for poult is can be bread  
soaked in milk and squeezed dry, or  
finely chopped hard-boiled egg mixed  
with the crumbs from corn bread. Af-  
ter a few days they will be able to use  
fine chick feed. Young poult thrive  
the best when they have a range well  
supplied with insect life and green  
feed. Turkeys are seed eaters and in-  
sect eaters. They do not thrive on  
sloppy mash.

A Plymouth Rock hen will cover  
nine or ten turkey eggs. Be sure the  
hen is satisfied with her nest before  
giving her the turkey eggs. Then the  
management of the hen during the pe-  
riod of incubation is about the same  
as in hatching chickens except that it  
takes about 28 days.

## Feeding Young Ducks

## Often Much Neglected

Ducks should start laying as soon  
as the spring weather arrives. If they  
do not start laying when expected,  
see to it that they get feed which sup-  
plies the protein and mineral needs.  
A good laying mash such as is used  
for laying hens, in connection with  
scratch grains, will be very satisfac-  
tory. Very often the ducks are not  
given the attention which the chickens  
receive as they rustle for most of their  
feed in the summer time and are ex-  
pected to do this same way the re-  
mainder of the year whether the hunt-  
ing is good or not.

## Money From Chickens

More profit can be made from a  
few chickens that are properly housed  
and fed, than from a large number  
that are crowded into a house that is  
not suited for more than half that  
number. Overcrowding makes it prac-  
tically impossible to properly ventilate  
a building or to keep the building in  
good sanitary condition. Either con-  
dition encourages colds, roup and  
other contagious diseases. Sanitation  
is the backbone of successful poultry  
raising.

## Green Feed Necessary

Green feed or a satisfactory substi-  
tute is necessary for egg production.  
Sprouted oats is excellent—probably  
the best. The time and bother has  
limited their use. Many are using  
mangels, carrots, cabbage or lettuce  
with economy and success. The use of  
leaty alfalfa or clover in racks or bus-

kets is rapidly increasing. It is the  
best substitute commonly available.  
Alfalfa meal in the mash is being  
widely used and it made of the best  
quality hay is satisfactory.

Salt Very Important  
for All Live StockIt Is Not Wise to Allow Ani-  
mals All They Want.

In an article calling attention to the  
fact that all kinds of live stock need  
salt, Prof. E. S. Good, head of the  
animal husbandry department of the  
Kentucky College of Agriculture and  
experiment station, says that working  
horses require about two ounces each  
daily. They throw off considerable  
salt in perspiration. An idle horse re-  
quires only about an ounce daily.

Cows giving milk and steers require  
an ounce daily. A sheep does well on  
half an ounce daily, while a pig re-  
quires only about an eighth of an  
ounce. Hogs are often provided salt  
in mineral mixtures. The Kentucky  
experiment station recommends a mix-  
ture of one part of salt, two parts of  
ground limestone and three parts of  
steam bone meal, all by weight.

Six level teaspoonsful of barrel salt  
weigh about an ounce, which means  
that a working horse requires a dozen  
teaspoonsful of salt daily.

Many farmers find that keeping salt  
in boxes before stock is the best and  
simplest way of caring for this re-  
quirement of animals.

It is not wise to allow animals all  
the salt they want, after it has been  
withheld from them for any length of  
time. Hogs especially sometimes eat  
fatal quantities. Stock accustomed to  
salt obtain proper amounts to meet  
health requirements, when it is avail-  
able in boxes at all times.

## Fitting Horse Collars

## Is Most Important Job

The collar on a work horse should  
lie easily on the shoulders and not re-  
quire any force to push it into place.  
If force is necessary, it is too narrow,  
and injury to the neck is sure to re-  
sult from its use. It should also rest  
evenly upon the shoulders from top to  
bottom and not permit any see-saw  
motion. The top of the collar at the  
neck in front of the withers should  
rest on the neck.

The next thing to determine is that  
the collar is not so narrow as to  
pinch the animal's neck. Between the  
inside of the collar and the neck there  
should be a space that will admit the  
fingers and this space should extend  
from top to bottom. Some horses are  
very heavy at the top of the neck and  
the desired width may be found,  
but at the lower part of the neck,  
where the development may not be  
so heavy, the play is far too great.  
Horses that are compelled to work  
hard for any length of time in such  
collars invariably get sore shoulders.  
The secret in collar fitting consists  
in preventing any sideways movements  
of the collar, as they produce friction,  
which soon results in a sore neck.

## Excellent Definition

Milke says: "A pessimist is a man  
who buries the hatchet of enmity,  
but carefully oils it to keep it from  
getting rusty, and also keeps a spade  
to dig it up."—Cincinnati Cynic.

At The New Kendrick Theatre,  
2 day, Tonight and Saturday.

## INSURANCE

Consult us regarding your insurance problems. We  
represent reliable companies writing the following poli-  
cies at reasonable rates:

**FIRE**—Protecting your buildings and personal prop-  
erty against all damage by fire.

**FIELD GRAIN**—Protecting your crops against fire while  
growing in the field, in the stack, in the granary,  
in transit, or in the warehouse.

**HAIL**—Protecting your growing crops against damage  
by hail.

**AUTOMOBILE**—Protecting your private automobile or  
truck against fire, theft, and collision; protecting  
you against property damage and public liability.

We shall be pleased to give you any information in  
connection with insurance that you might desire. If  
you are busy at this time and can not call, write or  
telephone us and your requirements will be given  
prompt attention.

## LOCAL NEWS

Kendrick Lodge No. 26, A. F. & A. M. conferred two third degrees at its regular meeting last week after which a substantial feed was served. The lodge recessed for the summer months and will not hold regular meetings until September.

Dr. and Mrs. McKeever and little daughter were Spokane visitors the first of the week.

Miss Rilla Davidson returned home last Saturday after visiting at the home of her sister, Mrs. John Waide of Deary.

Charles Bodenhouse was transacting business in Moscow last Saturday.

Bryan Cargill, who is farming near Princeton, was in Kendrick on business last Saturday.

Walter Kayse of the Portland Furniture Co., spent the past week visiting at the home of Miss Edna Janes.

Roy Sparber left the first of the week for Orofino where he has employment.

Mr. and Mrs. Donald Miller and son drove to Wallace, Sunday, where they visited at the home of Mr. and Mrs. Lester Crocker. From there they planned to go to Harrington, Wash., to visit Mr. Miller's mother. Don is taking his annual vacation from his duties as mail carrier on Route No. 1.

Mr. and Mrs. John Waide of Deary drove over Sunday to spend the day with relatives.

Ernest Randall of Peck was a Kendrick visitor the first of the week. Mr. Randall is in the garage business there.

Jane McConnell arrived Monday from Tekoa, Wash., to visit friends for a week.

Mrs. Clarice Triplett arrived on the night train Monday from Seattle to visit her sister, Mrs. C. C. Blackburn.

Miss Eklund is enjoying a visit with her mother who arrived last week from Montana.

The local Campfire girls held a business meeting in the park Monday night to make plans for their part in the parade July Fourth.

A number of people here witnessed the total eclipse of the moon, which started at 9:30 Tuesday night and continued until 3:15 a. m. Wednesday. The total eclipse lasted nearly half an hour.

Mrs. Herman Busse and daughter will leave today for their home in Kuna, Idaho. Miss L. M. Knepper will accompany them as far as Spokane and will go from there to Coeur d'Alene to attend an Episcopal vacation camp for a few weeks.

Mr. and Mrs. Lawrence of Helmer were Kendrick visitors yesterday.

N. Williamson of Moscow was transacting business in Kendrick Thursday.

W. A. Petryman drove to Lewiston Tuesday afternoon on business.

Thomas J. Stone of Bovill and Mrs. Emma Rodgers of Portland were united in marriage Tuesday afternoon at Moscow. Mrs. Stone will be remembered here as Mrs. Joe Hugman, former resident of Big Bear ridge.

Mr. and Mrs. Paul Schulze drove to Lewiston on business the first of the week.

Miss Johanna Hooker will leave Sunday for South Dakota where she will visit relatives. Her mother will remain in Coeur d'Alene until her return.

Clair Donaldson of Williamson's Department Store of Troy, was a Kendrick visitor yesterday morning.

Andrew Lien of Bear ridge went to Moscow yesterday morning on business.

Mr. and Mrs. Fred Morris of Sweetwater spent the first of the week visiting at the home of Mr. and Mrs. Percy Ware.

Mrs. Allenbach accompanied by her two children arrived the first of the week from St. Paul to visit her parents, Mr. and Mrs. Julius Petrick.

Clyde Daugherty and Wm. Deobald drove to Moscow yesterday on business.

The band boys are making splendid progress with two rehearsals a week under the direc-

tion of Walter Thomas. They will be ready to furnish good music for the celebration July 4th. Rehearsals are being held Tuesday and Thursday of each week.

Mrs. Katherine Kelly will leave Monday for Statesville, N. C., where she will make her home with her mother, whose health is failing.

Clifford Davidson arrived Wednesday afternoon from Diamond Springs, Cal., to attend the funeral of his mother. Cliff will return to California the last of the week. He will move his family here in the near future and will make his home on American ridge.

## Chris Dunn Out on Bond

Chris Dunn, who was sentenced to serve from two to five years in the state penitentiary on the charge of being a persistent violator of the state prohibition laws, was released from the Latah county jail this week on a habeas corpus writ issued by the supreme court, now sitting in Lewiston.

The supreme court fixed bonds of \$2000 for Dunn, after he had been refused bond in the district court here following notice of his appeal of the decision. Under terms of his sentence he was to have been committed to the state institution within 30 days. His writ, however, is pending only during his appeal to the state court, before which he appeared at Lewiston with his attorneys this week. The high court has not announced its decision in the case.—Star-Mirror.

## The Candid One

Her mistress wanted to present her with a pair of shoes and casually asked what size she wore. "Well, Mis' Annie, mah size is five but I most generally buy nines," 'cause fives suttinly does hurt mah feet." —Ex.

## Linden News

Miss Allie Foster of Kendrick spent Friday with Eva Smith.

Mr. and Mrs. Edgar Bohn and daughter, Alfreda, and Arthur Bohn spent Sunday with Mr. and Mrs. Roy Bohn.

Mr. and Mrs. C. H. Fry and family called at the C. E. Harris home Sunday evening.

Mr. and Mrs. W. Weyen entertained at Sunday dinner Mr. and Mrs. John Weyen of Leland.

Mrs. C. E. Harris spent Tuesday afternoon with Mrs. Roy Bohn.

Callers at the McPhee home Sunday afternoon were Mr. and Mrs. Claud Pippenger and family of Cavendish, Mr. and Mrs. Edgar Bohn and Mr. and Mrs. Geo. Garner and family.

Mr. Presnall of Southwick preached here Sunday morning. He and Mrs. Presnall and family were dinner guests of Mr. and Mrs. Louis Alexander.

## Crescent Clippings

Mr. and Mrs. Wm. Kauder and Alice Cramer visited with the Leroy Southwick family of Lenore, Sunday.

Mr. and Mrs. Wm. Dorendorf and baby, and Mr. and Mrs. Mike Forest and children visited Sunday at the A. Dorendorf home.

Mrs. Anna Kimbley and children and Mr. and Mrs. James Farrington and son visited at the Gus Farrington home, Sunday.

Mrs. Emilie Christensen and son, George, Mr. Marion Wright, and John Darby were business visitors in Lewiston, Tuesday.

Mrs. Wm. Dorendorf and baby spent Monday with Mrs. Albert Dorendorf.

Henry Davis carried the mail for Grant Bateman a couple of days last week.

The servants were abed, and the doctor answered the doorbell himself. A colored man stood on the steps holding a large package. "Is Miss Matilda at home, sah?" asked the man. "Yes, but she has retired," returned the doctor. "Can I leab dis fo' her, sah?" "Certainly," replied the doctor. He took the bundle from which flowers and buds were protruding, and after bidding the man good night, carefully carried it to the kitchen, where he deposited it, paper and all, in a pan of water. The doctor thought nothing more of the affair until he heard Matilda's angry voice in conversation with the maid.

"Ef I had the pusson heah," cried the cook, "dat put mah new spring hat in this year dish-

pan, I'd scald 'em for sho!" —Ex.

## Chick Activity Sought by Successful Farmers

In brooding chicks successful poultrymen take considerable pains to keep them active, points out L. M. Pluck assistant extension poultry specialist for New Jersey. It is known that inactivity is the first cause of toe-pick ing, feather-picking, and other vices.

Both the feeding system and the management of the chicks receive close attention. Plenty of room in the brooder house, sufficient mash hoppers space, and plenty of drinking fountains are to be found on the farms where the best flocks are produced.

To prevent overfeeding and the resultant sluggishness and inactivity a careful watch is kept on how well the chicks clean up what is given them "For," says Mr. Pluck, "a hungry chick is active and the only time at which its appetite should be satisfied is in the evening. Inactivity breeds mischief and a mischievous chick is a source of trouble."

## Dislikes Solos

I have always thought there is something ridiculous about solo singing. There is a good deal of screaming and yawning. And I do not care to see any mouth open to its greatest extent. E. W. Howe's Monthly.

## OLD "DOC" BRADY, THE RUBE, COMING JULY 1 and 2

Old "Doc" Brady, (the Rube in person), with his big "Country Store" and Vaudeville Attraction. 100 fine prizes given away free. Riots of fun. Free candy for the kiddies. This will be held at the New Kendrick Theatre, Friday and Saturday nights, July 1st and 2nd, and will be in conjunction with the picture show. New picture each night. Watch for further announcement in next week's Gazette. Remember the date and plan to be here. You may be one of the lucky ones to win a prize. 24-1

Mr. and Mrs. W. Weyen entertained at Sunday dinner Mr. and Mrs. John Weyen of Leland.

Mrs. C. E. Harris spent Tuesday afternoon with Mrs. Roy Bohn.

Callers at the McPhee home Sunday afternoon were Mr. and Mrs. Claud Pippenger and family of Cavendish, Mr. and Mrs. Edgar Bohn and Mr. and Mrs. Geo. Garner and family.

Mr. Presnall of Southwick preached here Sunday morning. He and Mrs. Presnall and family were dinner guests of Mr. and Mrs. Louis Alexander.

## Crescent Clippings

Mr. and Mrs. Wm. Kauder and Alice Cramer visited with the Leroy Southwick family of Lenore, Sunday.

Mr. and Mrs. Wm. Dorendorf and baby, and Mr. and Mrs. Mike Forest and children visited Sunday at the A. Dorendorf home.

Mrs. Anna Kimbley and children and Mr. and Mrs. James Farrington and son visited at the Gus Farrington home, Sunday.

Mrs. Emilie Christensen and son, George, Mr. Marion Wright, and John Darby were business visitors in Lewiston, Tuesday.

Mrs. Wm. Dorendorf and baby spent Monday with Mrs. Albert Dorendorf.

Henry Davis carried the mail for Grant Bateman a couple of days last week.

The servants were abed, and the doctor answered the doorbell himself. A colored man stood on the steps holding a large package. "Is Miss Matilda at home, sah?" asked the man. "Yes, but she has retired," returned the doctor. "Can I leab dis fo' her, sah?" "Certainly," replied the doctor. He took the bundle from which flowers and buds were protruding, and after bidding the man good night, carefully carried it to the kitchen, where he deposited it, paper and all, in a pan of water. The doctor thot nothing more of the affair until he heard Matilda's angry voice in conversation with the maid. "Ef I had the pusson beah," cried the cook, "dat put mah new spring hat in this year dish-

pan, I'd seald 'em for sho!"—Ex.

## Chick Activity Sought by Successful Farmers

In brooding chicks successful poultrymen take considerable pains to keep them active, points out L. M. Pluck assistant extension poultry specialist for New Jersey. It is known that inactivity is the first cause of toe-pick ing, feather-picking, and other vices.

Both the feeding system and the management of the chicks receive close attention. Plenty of room in the brooder house, sufficient mash hopper space, and plenty of drinking fountain are to be found on the farms where the best flocks are produced.

To prevent overfeeding and the resultant sluggishness and inactivity a careful watch is kept on how well the chicks clean up what is given them. "For," says Mr. Pluck, "a hungry chick is active and the only time at which its appetite should be satisfied is in the evening. Inactivity breeds mischief and a mischievous chick is a source of trouble."

## Dislikes Solos

I have always thought there is something ridiculous about solo singing. There is a good deal of screaming and yawning. And I do not care to see any mouth open to its greatest extent. E. W. Howe's Monthly.

## OLD "DOC" BRADY, THE RUBE, COMING JULY 1 and 2

Old "Doc" Brady, (the Rube in person), with his big "Country Store" and Vaudeville Attraction. 100 fine prizes given away free. Riots of fun. Free candy for the kiddies. This will be held at the New Kendrick Theatre, Friday and Saturday nights, July 1st and 2nd, and will be in conjunction with the picture show. New picture each night. Watch for further announcement in next week's Gazette. Remember the date and plan to be here. You may be one of the lucky ones to win a prize. 24-1

Bible School ..... 10:00 a. m.  
Church Service ..... 11:00 a. m.  
Theodore Roosevelt said: "Even men who are not professedly religious must, if they are frank, admit that no community permanently prospers, either morally or materially, unless the church is a real, and vital element in the community life."

Now is the time the churches of this community need your active support, if they are to be a real vital factor in the community life. Come and join us. Come and worship with us. Dale Lanphere, Pastor.

## Common but Costly

Aluminum, which forms a part of all clay soils, is the commonest metal, points out an answered question in Liberty. Its high cost compared with iron is due to the difficulty of extracting the pure metal from the ore.

## Slander

Slander is a complication, a compulsion and sum of all wickedness.—Isaac Barrow.

## Ancient Text Book

The oldest text book on the eye in existence dates back to the early Eleventh century and was written in Bagdad.

## Things Material

A prominent clergyman says that the girls of today "think too much of the material," but we are informed that many of them leave that matter to their dressmakers.—Boston Transcript.
