

ITEMS OF INTEREST FROM SOUTHWICK

Written For Gazette by Special Correspondent.

Dr. Truitt left Tuesday for Spokane to be gone several days. Mrs. Banning of Wright's mill left Tuesday morning for Lewiston.

Oscar Lawrence and George Douglas spent Sunday at the home of Homer Hayward.

A large number from in and around town attended the Peterson sale at Teakean, Tuesday.

A surprise party was given Mrs. Minnie Bunker Monday evening at her home, the occasion being her birthday.

Mrs. Homer Hayward went to Lewiston, Tuesday.

Mrs. Harry Smith and daughter of Leland spent the week end in town with her parents.

Miss Jane Ziemann went to Moscow last Friday to attend the Pre. Med. ball, returning home Sunday.

Vester Whiting and family and Homer Bets and wife spent Sunday at the home of Mr. and Mrs. Zoel Fairley.

Howard Southwick and family were the dinner guests of Fred Whiting and family, Sunday.

Homer Bets and wife visited at the home of Mr. and Mrs. R. Bets, Tuesday.

Mrs. Emma Hewitt spent Tuesday with Mrs. Harland Hewitt.

Chas McCoy and family and Wm. McCoy and family of Cameron were the Sunday guests of Wm. Bleck and wife.

Mrs. John Hewitt returned home Monday after spending last week at the home of her daughters in Bed Rock.

Miss Lila Wells was in Kendrick the first of the week.

Sandy guests at the Ben McCoy home were Nellie Henderson, Francis Farris Helen Jennings and Mr. and Mrs. Harry Smith.

A number of the pupils are absent from school on account of illness.

Mr. Reiche of Cameron was a caller at the Henry Brammer home Tuesday.

The first ball game of the season was played last Friday on the school grounds by the Freshmen and upper classmen, the losers to treat the winners to ice cream and cake. The score was 21 to 12 in favor of the upper classmen. They will have their treat Wednesday evening at the gym building.

A complete surprise party was given Prof. Parkins at the gym building last Wednesday by the high school, while he was busy practicing the agriculture boys for a minstrel show that is to be given later. The Prof. said that this was the first time that he ever was completely surprised. Cocoa, cake, sandwiches and pickles were served during the evening. A good time was reported.

Mrs. Leslie Triplett returned home Sunday from Lewiston, where she has been for the past two months with her son, Gail, who has been very ill. He is quite a lot better, but will remain there for some time longer with his grand parents.

Harold Whiting and wife were Kendrick visitors Tuesday.

Following are the names of those who received first and second places in the spelling tryouts in the Southwick community: 3rd grade: Doris Armitage, Carl Mustoe; 4th grade: Naomi Armitage, Pearl Winters; 5th grade: Rupert Hayward, Anna Theahant; 6th grade: Lucile Whiting, Werner Brammer; 7th grade: Esther Whiting, Frank Triplett; 8th grade: Myrtle Gertje, Thelma Mill.

Mr. and Mrs. Alfred Adams and two children of Teakean were overnight guests of Mr. and Mrs. Homer Bets, Wednesday.

Doe Bets and wife spent last Tuesday at the Wm. Berriman home.

Mrs. J. E. Frazier and children returned yesterday from Lewiston where they spent several days with friends.

LOCAL NEWS FROM THE LELAND COMMUNITY

Items of Interest From The Busy Potlatch Center.

The spelling contest to select winners to go to Lewiston was held Friday at the school house. Pupils from Cameron, Fairview, Welker and Leland participated. The winners were: Third grade, Thelma Candler, Leland, first; Clema Calvert, Leland, second; Fourth grade, Selma Wegner, Cameron, first; Wayne Wegner, Cameron, second; Fifth grade, Blanch Cole, Leland, first; Wayne Yenni, Leland, second; Sixth grade, Mildred Wegner, Cameron, first; Evelyn Hartinger, Welker, second; Seventh grade, Wilma Schultz, Cameron, first; Maxine Flesham, Leland, second; Eighth grade, Cora Blankenship, Fairview, first; Dwight Hoffman, Leland, second.

Mr. Harmon visited home folks at Rosalia over the week end.

Miss Tuttle visited Saturday and Sunday at Moscow.

Miss Lillian DeWinter, who is attending school at Lewiston was at home Sunday.

Claud Gephart was at Cottonwood last week.

About forty friends of Mr. and Mrs. Ford Parks gave them a surprise party Saturday evening. Welcoming them to their new home in Leland, and honoring Mrs. Parks on her birthday. A very pleasant evening was spent. The ladies served refreshments of sandwiches and cake.

Mr. and Mrs. Vincent were dinner guests of Ed Johnson and family, Sunday.

Mr. and Mrs. Russel Smith and family and Mr. and Mrs. Woodward and family took dinner with Mr. and Mrs. Calvert Sunday.

James Hilton and wife were callers with Jake Berriman Sunday.

Mrs. Harry Smith spent a part of the week at Southwick.

Mr. and Mrs. Parks entertained a number of relatives Sunday.

The Women's Missionary Society will meet for their all day business and devotional meeting Thursday, April 5, at the home of Mrs. Hugh Parks.

Rev. Antrim Kenoyer of Juliaetta stayed Monday evening at the home of Mr. Calvert. Mr. Kenoyer visited the high school Tuesday and gave a talk in assembly.

Cows Show Good Profit

PALOUSE—A statement of the actual profits derived from two cows over a period of 29 months was made this week by R. M. Morris, an ardent supporter of the local cheese factory. The two cows earned \$508 net profit for Mr. Morris during the period. All the milk was sold to the local cheese factory and was subject to their weighing and grading.

During the 29-month period the total cash received from the sale of milk from the two cows was \$853. By deducting \$345, the expense of keeping the cows, from this total, the remainder, \$508, is the profit received by Mr. Morris.

This statement is based on the actual amount of milk produced by these cows, less that used for home consumption. The two cows were not highly bred cattle, but are what would ordinarily be called common. They cost approximately \$70 each. They were not kept under the most favorable conditions, according to Mr. Morris, who stated that they were staked in a limited pasture.

Death of Mrs. Abner Corkill

Mrs. Abner Corkill passed away at her home near Troy last Sunday evening. She is survived by her husband and five children besides other relatives in this vicinity. Funeral services were held in Troy last Wednesday. Much sympathy is felt in this community for the bereaved family.

Letter From A. R. Hewitt

Sitting out here, in the sunny Philippines, with cool, white clothes on, and reading about the ice and snow that is blocking the roads "back home", sends cold shivers down my back. I just received a bundle of papers from one of my friends today, and several have written and told me about the ice and snow in Kendrick. It sure is great to sit out here, ten thousand miles from home, and read the good old "Gazette".

I felt like I'd just have to rub it in a little bit, so I'm enclosing a few lines about Manila. If you feel that it's worth publishing, go ahead; if not, you have a large waste basket.

It seems that no one around Kendrick is kicking up any dust lately. In fact, it sounds like someone had picked up the Pacific Ocean and set it down in your back yard. Some of you birds with long hair and chin whiskers had better build your selves arks, or you may get wet. Out here we're "floating" in beer and Sunnybrook, and you are floating in—you name it.

You probably have all heard of the cute little bamboo houses of the Philippines. They are little allright, but they don't look very cute. A self-respecting American hog wouldn't be caught sleeping in one of them. They look a great deal like a last year's hay-stack on stilts, and there are usually two or three half-clad kids, poking their heads out of each corner. The thatch with which they are roofed is a dirty brown, and everything else about them is dirty.

The stock, underneath the shack tells the wealth of the owner, as the hogs, chickens and caribou are kept there. They usually have about a half dozen mangy dogs wandering around somewhere close, but they don't count. The chickens roost on the poles which form the sides of the pig pen; the hogs somewhat resembling razorbacks only thinner, wallow around in the mud, and the caribou, if any, stands in one corner and eats hay. There is a convenient hole in the floor above, thru which the slop is dumped to the hogs, thus saving many steps.

There is usually a pool of water or stream, near these shacks, and sometimes a few scrawny trees around them. All the women have to do, on wash-day, is break a limb off a tree, squat down by a flat rock, near the edge of the water, and douse the clothes in the water, beat them out, and, presto, the laundry is finished. Anyone who has laundry troubles take a tip.

That's about all there is of interest, about the bamboo shacks. After looking them over I don't blame the Googoes, (Phillipinos) for joining the navy. I'd even join the Marines, if nothing better offered, if I had to live in one. If you ever come to Manila, look them over, and see if you don't agree with me.

A. R. Hewitt.

P.S. I saw Claude Stanton a few days ago and he said to tell the home folks "hello."

North Idaho Seed Potatoes

About 15,000 sacks of seed potatoes have been shipped from Moscow, Craigmont, Genesee and Nezperce to the Yakima valley and other portions of the west during the last few weeks, according to reports in Spokane. Approximately as many more still are awaiting shipment, making the total for the season about 70 cars.

These are reported all certified seed. Each sack contains 100 pounds and is sealed by the inspector. Seed potatoes grown in this region are Netted Gems, Bliss, Triumph, Irish Cobbler and Idaho Rural. The region is fast developing potato seed raising. Growers now are making a careful study of seed potatoes to culture and the average producer is said to be making money.

Death of J. F. Boyd

Joseph F. Boyd of Clarkston, passed away last Sunday morning at his home on South Eighth Street, following a stroke of paralysis, which he suffered the middle of last week. He was 68 years of age at the time of his death.

Mr. Boyd lived on a ranch at the mouth of Cedar creek about seven miles from Kendrick for several years before going to Clarkston. He is well known in this community where he was held in the highest esteem.

Surviving him are his wife, four sons and four daughters, Frank residing here; Laurel, Joseph, Wilbur, Harriet, Helen and Agnes, all of Seattle, and Mrs. Wilbur Pix of Clarkston. He also leaves four brothers and one sister.

Funeral services were held at 2:30 p. m. Monday, at the Vassar chapel, with a large number of friends and relatives present. The service was in charge of Rev. H. N. Dukes. Interment was made in the Vineland cemetery at Clarkston.

Business Changes in Juliaetta.

In a three cornered deal that was consummated Thursday of last week, the Fields meat market was acquired by William Combs and John Lewis; the Fields grocery stock was bought and merged with the Noble store; and the hardware stock of the Noble store was bought by the Houck garage and will be installed with his shelf hardware, and Mr. Houck will add materially to his stock, which should give Juliaetta one good hardware store instead of small quantities scattered around thru the different stores.

By disposing of their hardware the Noble store people will be given additional space, and will materially increase their stock of dry goods.

The new meat market proprietors will handle meats only, instead of meats and groceries.

The Juliaetta gardeners are making early garden, and everybody seems as busy as bees hereabouts.

Work has begun at laying gravel on the road from Juliaetta to the bridge spanning the Little Potlatch, and Genesee is to gravel the road from Genesee to the Little Potlatch bridge—thus assuring a gravel road from Juliaetta to Genesee, Moscow, Lewiston, Uniontown, Pullman and points beyond.

Fiddlers' Contest Next Friday

Arrangements have been completed for the Fiddlers' contest to be held at the New Kendrick Theatre next Friday night, April 6th. A prize of \$10.00 will be awarded the winner. The following old time fiddlers have already entered the contest:

E. O. McAllister	Juliaetta
Frank LaBolle	Kendrick
Aniel Peters	Leland
N. E. Ware	Kendrick
Ike Morgan	Juliaetta
Frank Flesham	Leland

Several others have stated that they will be on deck if they can arrange to be here. A full list of the contestants will be published in next week's paper.

Winter Wheat Reported Good

Reports from various sections of the Inland Empire indicate that the winter wheat yield will be the greatest in history.

O. E. Barbee, assistant professor of farm crops at Washington State college, reports that winter wheat is in perfect condition, although not as much as usual was planted last fall, due to heavy rains. He says that Washington can utilize spring wheat equally as well and predicts that high areas will be sown.

Fall-sown wheat never has been in better condition in Idaho, according to reports from various sections. Wheat is heavier and is in better condition than ever before.

NEWS FROM THE KENDRICK SCHOOLS

Daily Doings in the Grades and High School

The seniors have been practicing their play regularly. They have the first act learned and are starting on the second.

The debate in General History class: "Resolved that the Safety Pin is a useful article", was won by the affirmative.

The high school students will take their six week's examinations next week.

The Freshman assembly program will be given next Friday afternoon.

The members of the Ceaser class have finished their second book of Ceaser and have a good start on the third. They expect to finish another this year. As yet, there have been no classes held after school.

Mr. Jarvis gave the General History class a test this week on which he received some surprising answers.

Lillian Long, Marjory Davidson and Edna Stanton entertained a number of their friends at Lillian's home last Friday night. Those present besides the hostesses were: Helen Clem, Hester Knepper, Irene Davis, Bessie Blevins, Bessie Morey, Eleanor Herres, Elbert Long, Herbert Rodgers, Walton Morey, Charles and Carl Davis, George and Paul Schulze and Arthur Foster. Everyone had a very good time playing cards and dancing. Refreshments consisted of cocon, fruit salad and cheese straws.

Friday ended seven months of school. Those having perfect attendance during the last month were: Dorothy Candler, Elizabeth Carlson, Nettie Mae McDowell, Rowena Ramey, Karl Emery, Burneda Cummings, Nona McAllister, Ethel Cummings and Jack Plummer.

The seventh and eighth grade pupils are nearly all busy making bird houses for the exhibit on April the sixth. A prize of "The Western Bird Guide", will be given to the pupil making the best bird house.

The eighth grade is beginning this week in "The Country Life Reader", having finished their regular eighth grade reader last week.

The primary room has finished the sand table circus. It presents a very gay appearance, with the big tent, animals, clowns and bright pennants. The children have enjoyed the hand work and have learned a great many interesting things of wild life.

The second grade finished the review of the Free and Treadwell reader and will start the Young and Field reader next week.

Those receiving 100 in spelling for the past week are: Dwight Langdon, Phyllis Thomas and Irene Thornton in the second grade and Myrtle Humphrey, Doris Garoutte, Quentin Dammarell and Lorraine Taber in the first grade. For the week before Irene Thornton was the only one in the 2nd grade and Myrtle Humphrey, Georgia Garoutte, Dick Carlson and Helen Gardner of the first grade.

Farewell Party

Mesdames Ramey, E. Long and Barnes entertained at the Ramey home last Wednesday evening in honor of Mrs. R. F. Brown, who will leave next week for a visit with her husband at Scenic, Wn. From there she will go to Winnipeg, Canada, for a visit with friends and then take ship for France, which is her old home.

A large number of the friends dainty refreshments were served. Mrs. Brown was present and enjoyed a very pleasant evening. A handkerchief shower was a part of the evening's festivities.

Deaconess L. M. Knepper arrived yesterday afternoon from Chicago to visit a few days at the home of her father. From here she will go to Fort Hall, Idaho, where she will teach at the Indian school.

HAPPENINGS IN THE CAMERON SECTION

Good Spellers in The Cameron School.

While attempting to shift gears in ascending the Wandseher Gulch grade, Walter and Carl Hartung, Jr., overturned their truck, Saturday afternoon. Luckily neither was injured and the truck received no damage.

Mrs. Otto Schoeffler entertained a number of friends on Tuesday and Friday of last week.

Mrs. Fred Newman entertained the following, Tuesday afternoon at a birthday dinner, in honor of her daughter Helen's fifth birthday: Mesdames John Schwarz, Reiche, Fred Mielke, Ida Stoneburner and the Misses Marie Schwarz and Emma Hartung. Messrs. Fred Mielke, Herbert Mielke and "Grandpa" Newman. The afternoon was spent in quilting, (as usual).

Mr. and Mrs. Gus Kruger and daughter, Rosalie, were guests of Mrs. Ida Stoneburner and Miss Emma Hartung Sunday evening.

Miss Minnie Blum celebrated her birthday, Friday evening by entertaining a group of friends and relatives.

Walter Silflow was in Lewiston, Friday, where he had his tonsils removed. He was accompanied by A. O. Wegner. He returned Sunday feeling none the worse for his operation.

George Ehlers, Mr. and Mrs. A. Spekter and Mr. and Mrs. O. Henry were in Lewiston Friday and Saturday on business.

Mr. and Mrs. John Schwartz, Mrs. Ida Stoneburner and Miss Emma Hartung spent Sunday afternoon at the home of Fred Mielke.

Herbert Schwarz returned Monday evening from Spokane where he has been attending the Northwestern Business College the past three months. He will return in the fall to resume his studies after helping his father with the farm work this summer.

Mr. Louis Oldag was taken to a Lewiston hospital for medical treatment.

Mr. and Mrs. Fred Silflow, Jr. and sons, Emil, Harold and Marvin were in Lewiston, Saturday.

Mr. and Mrs. Fred Silflow, Sr. were in Lewiston, Wednesday. They were accompanied by Mrs. Teats, their guest.

Mrs. O. Henry was a visitor in the school Wednesday afternoon.

On Friday, Mr. Cridlebaugh took his pupils to Leland to the sectional spelling contest. They hiked over, enjoying a picnic dinner in the grove of Amiel Peters. A good time was enjoyed by all the youngsters. The Cameron school had the largest percent of contestants of any school represented. Three first and one second place was won by Cameron pupils. These will represent this district in the County contest to be held in Lewiston, Saturday, March 31.

Those who won either first or second place are: Wilma Schultz, seventh grade, first place; Mildred Wegner, sixth grade, first place; Selma Wegner, fourth grade, first place; Wayne Wegner, fourth grade, second place.

Special mention is given Selma Wegner who has had only three months work in the fourth grade, having been promoted the beginning of the second semester.

The pupils are busy training for the Track Meet to be held in Culldesac, May 5th. They hope to have a number of contestants for the various events.

The report cards for the 7th month will be given out Friday.

Baseball Practice Sunday

Manager Bolon stated yesterday that he would like to see a big turnout of ball players next Sunday afternoon for practice. Last Sunday there were enough men on the grounds to make two complete teams and a good workout was held.

The Farm Equipment Co. shipped in its second carload of farm tractors last week, practically all of them being already sold.

OPPORTUNITY

"TIME, TIDE and OPPORTUNITY wait for no man."

Time is Opportune

for the acquisition of shares of the **IDAHO CERAMIC MATERIALS COMPANY** at par value of \$1.00 per share Common stock—Non assessable.

How many times have you and I missed some real Golden Opportunities by not quickly grasping them?

It takes adequate working capital to conduct a business successfully. We are in the market for adequate capital.

We are laying the foundation of an important basic industry, capable of tremendous expansion and embodying unlimited profit possibilities.

Read the history of Industrial America. The great industries of today, almost invariably, were built thru the promotional spirit; they were capitalized in shares before they were bonded. Many who bought such stocks have been rewarded beyond their wildest expectations.

Developing Ceramic Materials

The natural wealth of the state of Idaho includes vast deposits of valuable non-metallic minerals. China Clay, Silica and Feldspar, which are found in abundance near Troy, Idaho, are minerals belonging to the non-metallic branch of mineralogy. These minerals are often called ceramic materials because they are the raw materials employed by the ceramic industries in the production of glass, porcelain wares, refractories and kindred products. The uses of some of these minerals, however, are not restricted to the ceramic industries. China clay for instance, is extensively used as filler in paper, rubber, paint and other products. The future uses of china clay loom equally as important as those already mentioned.

While china clay is found in nature as non-metal, this unique mineral contains the metal aluminum in the oxide state in combination with silica. The metal aluminum is capable of being extracted from such clays and it is quite likely that, within a few years these clays will be successfully utilized for such purpose in large tonnage. The problem of economical recovery of aluminum metal from china clay has been given very serious attention in recent years by both American and European experts—a large western mining corporation has for some time past conducted experiments on clays found in the Northwest to the same end. The first step in such processes is the production of pure alumina—the final step involves the recovery of aluminum metal from the alumina by an electric process.

Naturally those white clays which are the purest and contain the largest percentages of alumina, or aluminum oxide, will be the first to be exploited for the metal aluminum. Certain local clays, found in immense tonnage, contain, in the refined state, from 40 to 50 percent alumina and are moreover practically iron free and devoid of other

undesirable impurities. Mr. Robert Keffer, deceased, former Anaconda Copper Co. chemist pronounced an analysis of a fair sample of this clay as the best ever made for such material by that company.

The Northwest has vast resources of electrical power and vast resources of essential raw materials so that it is not at all fanciful to predict that great electro metallurgical and electro chemical industries are in store for Idaho and Washington which may well include the production of aluminum metal from refined local china clay.

The policy of the State of Idaho is to invite and encourage the development of its natural resources. The non-metallic mineral deposits of this state as for instance our clay deposits, are natural resources as much so as are the vast metallic ore bodies, containing gold, silver, lead, copper and zinc, located in our renowned mining districts. Both are mineral deposits—the development of both and the recovery of the minerals therein contained, is analogous. Both are essentially mining operations, involving the mining, milling, refining and marketing of minerals as minerals.

The value of the non-metallic mineral resources of the State of Idaho are, as yet, little understood and appreciated by the general public. Industries based on such minerals—using such minerals as raw materials—call for extensive plants and large pay rolls. The Northwest is a fertile field for such industries and it is believed that it is on the eve of such industrial development. The commercial production of raw materials is a forerunner and should therefore be encouraged.—Troy News.

Immortal Architect

Ictinus, the chief architect of the age of Pericles, designed the Parthenon at Athens, the great hall for the mysteries (Telesterion) at Eleusis, and the temple of Apollo Epicurius at Phigalia. He is said to have written an architectural treatise on the Parthenon.

NOTICE OF SHERIFFS SALE ON FORECLOSURE OF MORTGAGE

In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah.

STATE OF IDAHO, Plaintiff,
vs.

Samuel Gruell, Jr., and Ella Gruell, husband and wife, and Anna W. Eaves Carsosw and O. C. Carsosw and C. D. Adams, doing business under the name and style of Adams Grocery, Defendants.

UNDER AND BY VIRTUE OF AN Order of Sale issued out of and under the Seal of the above entitled Court on a judgment and decree of foreclosure and sale rendered in said Court on the 25th day of February, 1928, and entered and filed in said Court on the 9th day of March, 1928, and docketed with the Clerk of said Court, in favor of the above named plaintiff and against the above named defendants, said order and writ being duly attested on the 9th day of March, 1928, and to the Sheriff of Latah County, Idaho, directed and to me CHARLIE SUMMERFIELD, as such Sheriff, delivered on the 14th day of March, 1928, for execution whereby I am commanded and required to proceed to notice for sale and to sell the property mentioned and described in said judgment and decree in the manner provided by law and to apply the proceeds of such sale to the satisfaction of said judgment and decree with interest and all costs and attorney fees.

The property described to be sold by said judgment and decree and said order is situated in the County of Latah, State of Idaho, and is described as follows, to-wit:

Lot Three (3), Four (4), Five (5), and Six (6) of certain tracts known as the Juliaetta Orchard Tracts near Juliaetta, Idaho, according to the records in the Auditor's office of Latah County, Idaho.

NOTICE IS HEREBY GIVEN, That on the 16th day of April, 1928, at the hour of 2 o'clock P. M. of that day, at the front door of the County Court House in Moscow, Latah County, Idaho, I will sell all, or so much of the above described property as may be sufficient to satisfy the Judgment as set out in said Order and Writ with interest and all expenses and costs, at public auction, to the highest bidder therefor in lawful money.

Dated this 16th day of March, 1928.

CHARLIE SUMMERFIELD, Sheriff.

By Geo. K. Moody, Deputy. 12-4

LOOK AHEAD!

Buy a McCormick
Deering Tractor
NOW
for Many Years of
Successful
Power Farming!

Bird's-eye view of the 3-plow tractor

POWER FARMING with the McCormick-Deering Tractor is more pleasant. The chore requirements of a tractor are less than those of horses and more agreeable. A tractor needs attention, but only a fractional part of that required by horses for the same work.

A tractor operator controls more power, enabling him to do more work in a given length of time than can be done with horses. Field days can be made longer when emergencies arise—the tractor does not tire and chore time is eliminated.

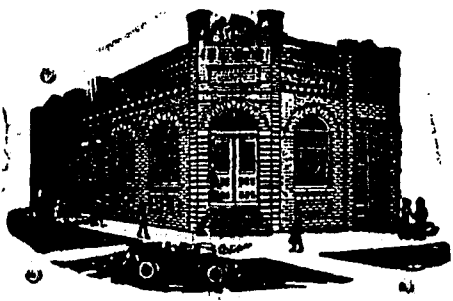

Triple-Power Tractor

The McCormick-Deering Tractor combines all farm power units in one, whether it is drawbar, belt, or power take-off work; thus one power unit does all the work. Come in Now and investigate McCormick-Deering power farming. You can reduce your overhead and increase profits by becoming a McCormick-Deering Tractor farmer now.

DAIRY FACTS

COWS NEED WARM DRINK IN WINTER

Successful winter dairying calls for an adequate supply of water at a temperature that will not paralyze the entire digestive tract of the cow when she drinks.

"Water is equally as important as feed," says Dr. C. H. Eckles, chief of the dairy division of the University of Minnesota. "A cow milking 30 pounds daily drinks close to 100 pounds of water every 24 hours. Sometimes watering the cows means turning them out of the barn once a day to drink what they can stand of ice-cold water. Can we imagine a cow which weighs around 1,100 pounds drinking 100 pounds, or nearly one-tenth of her weight, of ice water at once? Of course she will not do it and consequently will not give her owner 30 pounds of milk even though she has the ability to produce this much and has feed enough as well.

"The milk flow may be cut down quicker by a lack of water, or by the use of ice water, than by poor feed. Individual drinking cups in my judgment pay more dividends to the user than almost anything else in the line of modern barn equipment. Even if the water is not warmed in the cups the cow will take such small amounts at a time, so long as it is above freezing, that no harm results from drinking it cold.

"If cows must be watered from a tank outdoors and under conditions which mean ice water, it will pay to install a water heater of some kind. It is much cheaper to warm the water with fuel than by giving the cow extra grain to warm it within her body."

Cows With Records Are Decreasing in Number

Pure bred dairy cows of good type and with high official records are actually getting hard to find.

The shortage, according to Roy T. Harris, supervisor of Wisconsin dairy tests, is caused by the fact that since 1920 there has been a marked decrease in official testing. Up to that time there was an abundance of tested animals, but as the demand for pure breeds slackened with the change in economic conditions many breeders discontinued advanced registry testing.

"The oversupply of animals with records is no longer evident," declared Harris, "in fact, there is an actual shortage of animals combining desirable form with even good advanced registry backing. This situation indicates that the most opportune time to start or renew testing is right this year."

Winter months are particularly favorable for starting cows on test, especially to make semi-official records. Cows freshening in the fall produce as much as 15 to 20 per cent more milk and butterfat than those calving in the summer. Another advantage of starting the test in the fall or winter is that on many farms plenty of help is generally available to care for the cows when production is highest. In short time testing, ranging from seven to thirty days, the best records are usually made in the winter.

Providing Ice Storage for Use in the Summer

As an aid to farmers in providing ice storage, the division of agricultural engineering, department of agriculture, University of Minnesota, has prepared blue prints of a plan for a farm ice house holding 16 tons. The blue print shows just how the ice house should be built, and is distributed through the division of publications, University Farm, St. Paul, at the nominal charge of 10 cents to cover costs. With creameries paying premium prices for sweet cream, more and more farmers are becoming interested in providing ice for use in the summer in order that the cream may be kept cool until it can be marketed.

Efficient Ration for Bull Calf Is Outlined

A good bull calf ration is ten pounds of clover or alfalfa hay, together with a grain mixture of six parts of corn, four parts of oats and one part of linseed meal. The grain mixture should be fed according to the appetite of the calf, the object being to bring about a gain of about two pounds daily or a little better. To start with, five or six pounds of grain daily will be enough for the calf, but it soon can be increased to ten or twelve pounds. In some cases it pays to substitute bran for part of the oats and to increase the linseed meal in the ration to two pounds daily.

Feed for Cows

Use home-grown feeds as far as possible. Alfalfa or other legume hay is best. For most economical production, provide silage. Feed one pound of hay and three pounds of silage for each 100 pounds weight of animal. If silage is not available, feed two pounds of hay for each 100 pounds weight. Use a good grain mixture containing a small amount of cottonseed meal or linseed meal. Feed one pound of grain mixture for each three pounds of milk produced.

Moist Mash Excellent for the Tardy Pullets

As soon as pullets are bodily matured they should start laying. Fully matured pullets that are not laying may often be brought into production at this time by using a moist mash. The usual laying mash may be moistened with sour skim milk, buttermilk, semi-sold buttermilk and water, dried buttermilk and water, or water fed regularly at noon or some other convenient time. It must be fed at the same time each day and should be crumbly moist, not sloppy. Let the pullets consume all they can in twenty minutes and then take the mash away and thoroughly clean the trough. As soon as production reaches a satisfactory point, the moist mash may be discontinued.

Poultry Squibs

Do not crowd the growing birds. Give them ample room for development.

Crooked keels and other physical deformities often occur in crowded flocks.

The males should be kept separated from the pullets until the breeding season begins.

Do not provide perches with sharp edges. Bumblefoot and other ailments can often be traced to this cause.

Do not elevate the roosts too high. Bruising of the birds' feet in alighting from the perches causes serious trouble.

Fowl cholera is a very hard disease to control, due to the nature of the disease, outbreaks often occurring when least expected.

If the brooder houses are thoroughly scrubbed with boiling lye water they will be free from germs when stored away for the winter.

With corn at \$1 per bushel and wheat at \$1.25, poultry raisers can afford to feed more than the usual amount of wheat in place of corn.

Rolled oats or oatmeal are extensively used in chick feeding, and they are excellent for this purpose. When used as a complete ration they are apt to cause gas.

Common causes for cream churning too slow are too much cream in the churn and too low a temperature.

Grooming cows will directly or indirectly prove profitable. It improves the quality of the milk and affords satisfaction to the owner.

No mature bull ever should be trusted. It is a mistake to handle them, except when absolutely necessary, then always use a strong staff and never let the bull gain the upper hand.

Root Resembles Goat

The root of a tree which is almost an exact reproduction of a goat's head is on exhibition at Portsmouth, N. H. Every detail is perfect, including the "goatee" on the chin, horns, ears, mouth and eyes clearly defined, and in exactly the right position.

The New 5-A Plow Pays in Profits

Profits are what you are after—the kind of profits that come from good crops. You know that to raise good crops you have to do good plowing. John Deere plows have been leaders for almost a century because they give the best results. You'll have real plowing satisfaction and get better crops with a

John Deere No. 5-A Three-Bottom Tractor Plow

Get into your fields with a 5-A behind your tractor. You will be sure to like the clean-cut furrows of even depth and width you get—the clean scouring it does—the good pulverizing and the good trash-covering that are the result of work done with a high-grade plow.

You will like the way the heavy-duty power lift operates

—its ease, simplicity, positiveness and strength.

You will appreciate the light draft of the No. 5 and its exceptional strength—beams are guaranteed not to bend or break.

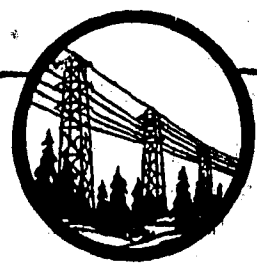

Remember, the 5-A is all John Deere Quality. You can get it in two-bottom and three-bottom sizes.

Come in and see this improved tractor plow.

A New "Hand" On the Farm

"Electricity has already made important contributions both to labor saving on the farm and to more modern, satisfying rural life. I am confident it is going to make further contributions of equal or greater importance."

WILLIAM M. JARDINE
Secretary of Agriculture

ONE HUNDRED AND FORTY practical applications of electricity to life and work on the farm have already been developed. Through the activities of the Committees on the Relation of Electricity to Agriculture in Washington, Idaho and many other states, farm electrification is becoming more and more extensive every year.

Dependable, low-cost power, as supplied in this territory from our system, promises as much to the farmer and his family as to those in the city and industrial centers.

The Washington Water Power Co.

Serving 45,000 customers in sixteen counties of Washington and Idaho

Cold Light Sought

Ninety-six per cent of the electrical current used for light goes into heat. When a way is found to eliminate this waste, nearly 25 times as much light as at present will be distributed for the same money.

"But It Doesn't Hurt"

Six-year-old Anna had never seen anyone's nose bleed. One day, while she was playing her nose started to bleed. She ran to her mother, saying, "Oh, mother, my nose is broken, but it doesn't hurt."

Agricultural Notes

Poultry need direct sunlight and good ventilation to keep in best health.

"Years teach us more than books," but books will teach us more in fewer years. It's a wise farmer who reads.

In the constant cultivation and cropping of our soils the organic matter is burned out, and used up. Manure goes far toward replacing this loss.

Concrete fence posts of unusual shapes can be built by the use of special metal molds. These are produced by several manufacturers.

Potatoes keep best in storage at a temperature of from 34 to 38 degrees Fahrenheit. They are one of the easiest vegetables to store. Good ventilation is an advantage.

Store credit costs more than bank credit because storekeepers are equipped to handle merchandise and not credit; bankers are equipped to handle credit and not merchandise.

A good, workable mortar for masonry construction on the farm can be made by mixing one part portland cement to six parts sand, to which is added one part hydrated lime.

HAS FULL SCHEDULE

The Harvard hockey team has a full schedule this season, with very few, if any, soft spots. In its first game of the season it beat Massachusetts Tech by a score of 9-0, but had to bow to McGill by 3-1 in its second game. Then it beat Toronto, 4-1. Among the teams played by Harvard this season are Dartmouth and Brown. The photograph shows Morrill, who plays goal.

Armistice Car

The car in which the armistice was signed on November 11, 1918, is now housed in a building erected for this purpose at the great crossroads in the forest of Compiègne where the peace rendezvous was kept. It contains the same table, chairs, blotters and pens with which the German emissaries and Marshal Foch signed the armistice.

"smoking for pleasure."

Camels

"I'd walk a mile for a Camel"

Selection of Sire to

Head the Dairy Herd

The selection of a sire to go with a good herd calls for the exercise of a good deal of judgment and the better the herd the more there is depending upon a right choice. All that we know of heredity tells us that he should be pure bred. It also says that he should come from as many generations as possible of animals having the quality wanted. If we want production then we must know where the production is. In other words, we need records.

To make cow testing or dairy herd improvement association records of more use in the selection of sires, a modification was devised and put into operation under the name of Herd Improvement Record. This plan has now been in operation over two years and has met with a very favorable reception. It applies to pure-bred and mixed herds of pure breeds and grades, giving more permanence to the records than in ordinary association work. It encourages culling, which amounts to voluntary "selective registration," and supplies the quickest way yet devised for finding out the value of a bull.

Rinsing Milk Utensils

With Boiling Hot Water

Rinsing of all milk utensils with hot water—water as near the boiling point as possible—after they have been thoroughly washed, is of prime importance. Neglect of this causes more trouble in the handling of milk than any other single factor. Barn conditions have very little effect upon the bacteria content of milk. Of course the barn should be reasonably clean; so should also the body of the cow and the hands of the milker, but these precautions are of slight value if the utensils in which the milk is handled are not properly cared for. Pouring rinse water from one can or pail into another should be avoided, because this cools the water too much to make the rinsing effective.

Potatoes Need Moisture

Seven hundred tons of water are required during the growing period of an acre of potatoes.

CLETRAC, the World's Champion Tractor

"No Mud too Deep, No Hills too Steep"

Baldwin Combines, Oliver Plows, Superior Drills Oliver Discs

MR. FARMER, LISTEN! Before you buy a tractor consider these many important points which the Cletrac has above all makes.

1. Greater pounds pull at draw bar.
2. Unusual reserve power.
3. More traction than any other machine of its size.
4. Short turning with load with both tracks pulling on turns.
5. Full power delivery on turns without jerking and clutching.
6. One shot oiling system. Oil your tractor while you go.
7. Easy steering. Drive all day and merely call it joyriding.
8. Accessibility of parts—all gears easy to get at.
9. Low gas and oil consumption.

10. Above all, your life is not in danger because of the machine tipping over on hills. Your life is worth more to you than all the tractors on earth. The Cletrac will not fall over on you. There is no farm land too steep for this machine. And remember, the Cletrac is the only machine that will cultivate beans. Why? Because it has the Cletrac patented steering device and steers thru the planetary gears, which enables the driver to hold the tractor within an inch of the bean row. That is closer than a man can hold a walking cultivator to the beans.

Remember these points which are important. Furthermore, remember this—all tractor dealers can lie, but the tractor itself can't. Therefore, we are willing to demonstrate against any make of tractor, any place, on any hill, prove every word said about what the Cletrac can and will do.

The new machines come with much larger track pins and rollers, wider track rails, heavier splien shafts, heavier and better all the way thru.

We expect to stock all parts in Kendrick, this fall have a service man right in the territory to take care of emergencies. At present, when in need of repairs, call W. F. Behrens, Juliaetta, Houck's Garage, Juliaetta, or R. H. Mills, 918 W 1st Avenue, Spokane, Wash.

JULIAETTA, IDAHO

Simple Heroism

We can all be heroes in our virtues in our homes, in our lives.—James Ellis.

Old-Time Exhortation

A bidding prayer was a form of exhortation, always followed by the Lord's prayer, enjoined by the fifty-fifth canon of the Anglican church in 1603, to be used before all sermons and homilies. It was a prayer for the church, the sovereign, various classes of people, and a thanksgiving for the faithful departed. In changed forms, it still survives in modern church services.

Linden News

Mr. and Mrs. George Garner and family spent Saturday evening and Sunday in Juliaetta with George's parents, Mr. and Mrs. Jim Garner.

Mrs. Longfellow was a caller at the Smith home Sunday afternoon.

Martha and Margaret Whisler spent Sunday with the Sterling girls.

Mrs. F. C. Lyons and daughter, Joyce, who have been spending the winter in Kendrick returned home Tuesday.

Mr. and Mrs. Louis Alexander and family spent the week end with relatives in Clarkston, returning home Sunday evening with a new Dodge car.

Mrs. R. C. Winegardner and children spent the week end with relatives in Lewiston.

Mr. and Mrs. Chas. Quick left Saturday for Dillon, Montana.

Alvie Hudson went to Lewiston, Monday, on a business trip. Dave Genry of Kendrick was on the ridge Friday buying cattle.

Cleve McPhee was a Sunday dinner guest of Mr. and Mrs. Edgar Bohm.

Cylinders Rebored

We have installed a reboring machine and are now in position to rebore your cylinder block by the most up-to-date method. We have also installed a cylinder hone and can put a perfect finish on the cylinder walls. With new rings and pistons you will have practically a new motor. We guarantee our work. Bring in your motor before the spring rush starts.

Mrs. Fred Gladden entertained the Ladies Guild at her home Wednesday afternoon.

Evan Lien spent the week end with his sister in Clarkston.

The Union Sunday school will give an Easter program at the Steele school house Easter Sunday. Following this a basket dinner will be served.

Miss Pearl Whitecomb was quite ill last week but is now recovering nicely.

Letter From The Hulls

Long Beach, Cal.

This is probably my last letter, for we will soon be on our way home. We leave our apartments March 29 for the home of Mr. and Mrs. Blackburn, who have kindly consented to board us for a week, where it will be quiet and we both can rest for our journey home. We have been having change and rest. The bell boys get the chance and the landlord the rest.

During our stay here so far, one or both of us have been ill all the time. This is a beautiful climate but if they had some cold weather I think it would prevent some of the sickness here.

The doctor ordered me to stay in the house and my good wife, to see that I obeyed, has hidden my shoes and hat, so you see I am denied seeing the many sights always on tap here.

Some of our friends visit us daily. This morning H. J. Wesels came over with Dan Hunter, another Kendrick old timer. This afternoon Mrs. Hull and

Mrs. Hunter are out shopping, at least they said that was what they were going to do.

We have not taken many of the land excursions, although we are asked one or more times daily to go. Many people take these rides just to see the country, never thinking of buying any land, but the real estate men always try to get a crowd each day. These rides take one from ten to sixty miles away.

We shall be glad when we see Kendrick again and that happy time is drawing near when we will return, if we have no further illness.

With kindest regards to all,
H. P. Hull.

Growing Beans

Lewiston Tribune: The disastrous results last season, in this vicinity, in the bean growing industry, due to the early, continuous and excessive fall rains, are not likely to discourage the growers from again seedng beans in considerable acreage this season, as the crop is a comparatively new but promising one for this portion of northern Idaho, and has usually been a profitable one.

One of the big advantages of the bean crop is that it requires comparatively, little moisture and can be alternated with grain crops in the dry-farming districts, and takes the place of the

off-year of summer fallow, thus insuring a crop each year, instead of losing the alternate years. With little added expense, and with practically the same equipment, beans can be grown in place of summer fallow, with the production of a crop of about 800 pounds of beans per acre, often exceeding the value of a wheat crop.

Beans, being a leguminous crop adds fertility to the soil, by secretion of nitrogen in the nodules of the plant, and thus another crop can follow without much soil detriment. The districts of this region that are best adapted to bean production include those lying along the foothills of the Craig mountains and adjacent to the canyons of the Clearwater and Potatch rivers in Nez Perce, Lewis and Latah counties. In some parts of this county, beans are being successfully grown at an altitude of as much as 3,000 feet, as the canyons afford good air drainage, it being essential to have freedom from frost from May 20 to about Sept. 15.

In 1915, northern Idaho bean growers received an average price of about four cents per pound. From 1922 to 1925, the average price was 4.9 cents per pound. With a yield of 800 pounds per acre, the returns, at 4 cents per pound, would be \$32 per acre for beans. It is estimated that a bean crop costs about \$11 per

YOUR EASTER HAT

acre more than summer fallow, but that beans and wheat, alternating, are about \$21 an acre more profitable than wheat and summer fallow.

Bean straw is said to be but little inferior, in feeding value, to wheat, oat and barley hay. The yield of bean straw is one-half to three-fourths of a ton per acre. Even the culls from the cracked beans are good for hog feed; thus the by-products from the bean crop have an important value. One hope for the bean crop is that a growing demand for beans has followed the World war, and the bean acreage has about doubled since 1921.

In this district the production of beans is confined, in the main, to two classes: Little Navy, or small white, and the Lady Washington, or large white variety. These beans are shipped east and to the Pacific coast cities.

HEADQUARTERS FOR

Mill Feed, Hay and Grain

This is headquarters for anything in the feed line. We buy and sell hay and grain and always have a stock of mill feed for your needs. We are glad to serve you.

POULTRY FEED

The poultryman will find that he can do well here as we keep a full line of chicken feed and at prices you can afford to pay. If you need Egg Mash, O. K. Scratch Feed, Bran and other poultry feed, get our prices before you buy.

Highest Market Prices

Paid for your hay and grain. A good place to sell as we are glad to look after your interests.
