

GENESEE TOOK GAME LAST SUNDAY

Crack Pitcher Too Much For Kendrick Hitters.

Last Sunday's ball game at Genesee proved rather disastrous for Kendrick, the score at the end of the ninth showing 12 runs for Genesee and only five for Kendrick. Becker for Genesee held Kendrick powerless to score for 8 innings, but allowed 5 runs in the ninth when the Potlatchers staged a batting rally. Errors were largely responsible for the twelve runs secured by Genesee. Local fans are grinding their teeth and waiting impatiently for a return engagement, when the tables will be turned on the triumphant Genesee aggregation. Genesee will need all her war paint and medicine men to stem the tide when the return game is played here.

Following is a resume of the game:

Genesee	Ab	R	H	SO	E
Olson, 1b	5	0	0	3	1
Gherke, 2b	5	4	2	0	0
Types, c	5	3	1	0	0

Jail Showing a Profit

Star Mirror: Twenty-seven new federal prisoners were added to the guest list of the session of the federal court just closed, according to records at the jail. This brings the total number of prisoners to 38, two of whom are working on the county farm.

The large number of federal prisoners in this county jail means considerable revenue to the county, according to figures of Sheriff Charlie Summerfield. The government allows the county \$22.50 a day to feed this number, while the total cost for the 36 prisoners in the jail is approximately \$12 per day, leaving a profit of \$10.50 per day for the county. Ten more prisoners can be handled conveniently, and it is believed this will be ample room to care for the prisoners taken by the county during the time the jail is accommodating the federal group.

Only men prisoners are kept in this jail, said the sheriff. Early in the session Judge Cavanaugh sentenced some women to serve their terms in this county, but this action was protested by Sheriff Summerfield, on the ground that proper provision for women prisoners was not allowed when the jail was built. As it is constructed now, there could be no complete segregation of men and women, and it is felt that this is not the best. Following the sheriff's protest, the jail was inspected by Frank Breshears, United States marshal, and it was decided to send the women elsewhere, in exchange for men prisoners.

The following new guests have registered at the Latah county jail: Pink Davis, \$200, 75 days; Russell Norgan, \$100, 75 days; Jay Guyer, \$500, 11 months; Carl Thompson, \$500, 11 months; Ernest Webb, \$500 6 months; Dan A. Nolan, \$300, 9 months; Archibald Mallotte, three months; Elmer R. Cole, \$600, 7 months; Liger Hill, \$600, 7 months; Roy Evans, \$100, 2 months; Herman Wilkins, \$200, 3 months; J. C. Mathews 3½ months; Phillip Shooler, serving out a \$150 fine at \$2 per day; Robert Gaffney, \$100, 3 months; John Duffy, \$100 3 months; Frank LaPape, serving out a \$125 fine; Keith Harrington, \$75, 75 days; Jess Heller, \$200, 3 months; Clarence Ricketts, \$100, 3 months; Art Brown, \$150, 75 days; Harry Dayton, serving out a \$50 fine; Sam William Porter, serving out a \$250 fine; L. A. Davis, 11 months; Harry Ervin, 9 months; Morris Potter, \$750, 9 months; Dave Schoeffler, \$500, 9 months. All of these prisoners are charged with violations of the liquor law, excepting Archibald Malotte, charged with transporting fight films; A. L. Davis, charged with misappropriating bank's funds and Harry Ervin, violation of the motor theft law. Morris Potter, a liquor law violator, already has been installed as cook for the new crew.

Will Build Rearing Pond

Deputy State Game Warden, Ed Collins of Moscow, was a Kendrick visitor yesterday. Mr. Collins stated that he was planning to put in a rearing pond for trout at Bovill, providing the people of the county would help to defray the expense of feeding the fish. There is a pond practically in readiness at Bovill where the town water supply was formerly secured. It is understood that this pond is available and that the people of Bovill will cooperate.

Mr. Collins stated that it would be necessary to keep the small trout in the pond for a period of four months, when they would then be planted in the upper forks of the Potlatch. It is his plan to put 50,000 trout in the pond and it would cost about \$25 per month to feed them. Ground liver is used for feed.

Stores Close Memorial Day

Local stores are planning to close, at least during the progress of the ball game, Wednesday afternoon next week. Most of the business houses will be closed all day.

Where Explosion Killed Forty

Ruins of the dance hall, in West Plains, Mo., after the explosion that resulted in the deaths of forty persons and the injury of many others. The dance hall was in the second story of the structure, which was utterly demolished.

Hauling Beans to Market

For the past week or ten days local warehouses have been receiving beans in considerable quantities. Many farmers who had wet beans last fall stacked them in the field, covering them with grain straw and lumber. The beans have dried out and in most instances are of good quality. Prices have been very satisfactory and are bringing the growers a nice profit.

Last fall there was little demand for beans as buyers were reluctant to handle them on account of their wet condition. Growers who threshed them when they were wet were only offered around two cents a pound, which would not begin to pay expense of growing and harvesting.

Rain Badly Needed

The Potlatch country needs rain within the next week or ten days, both for the spring grain and to put the ground in shape for bean planting. While there was excessive moisture in the early part of the spring farming season, the continued dry weather has caused the ground to bake on top and it is now impossible to get it in shape for bean planting. A good rain would soften the clods and make it possible to cultivate the ground for a seed bed. There was an unusually large amount of spring plowing done this season, but on account of the hard surface the ground plowed up cloddy and can't be put in shape for bean planting. A good rain would almost insure a crop of both grain and beans and would cause a large acreage of beans to be planted as the ground has not been in shape for planting late spring grain.

Hund-Anders

A very pretty wedding was solemnized at the home of Mrs. Jennie Hund of Leland, Wednesday, May 23, at high noon, when Miss Elizabeth Hund became the bride of Mr. Conford Erving Anders, Rev. Geo. H. Gibbs, pastor of the Leland Methodist church officiating.

The bride was becomingly dressed in a silk gown of Venetian blue. The rooms were tastefully decorated with pink peonies and roses.

The ceremony was followed by an excellent wedding dinner. Only immediate relatives were present.

The bride is a successful school teacher and one of Leland's finest young ladies. The groom is a prosperous young farmer.

After a short wedding trip to southern Idaho the young couple will be at home on their farm near Gifford.

That Doesn't Count

"But, madam," said an automobile salesman to a lady, "if you take this car we'll put your initials on it free. It will make a charming monogram on the door." "Well, that would be very nice," replied the lady. "But, you see, my husband says it isn't the initial cost that counts, anyway, but the upkeep."

Lewiston Plays Here Sunday

A game that should cause keen interest among the baseball fans in this locality, will be played here Sunday afternoon between Lewiston, one of the strong teams of the Central League, and Kendrick, tied for second place in the Valley league. This game will afford an opportunity for the fans to measure the comparative strength of the Central and Valley league teams.

Last Sunday Lewiston was defeated by the Nezperce aggregation by a close score. It is understood the game will be protested by Lewiston on account of a bad decision on the part of the Nezperce umpire at home plate. If this protest is allowed, Lewiston will still be a strong contender for first place in the Central league.

If Kendrick can take Lewiston into camp Sunday, it will be a very good indication that the locals are still in the race for a place in the tournament.

The game will be called at 2:30 and a big crowd is expected to attend. This should be one of the best games of the season.

Julietta Defeats Clarkston

Julietta pulled a surprise last Sunday by defeating Clarkston on the Julietta diamond by a score of 10 to 9. Up to the ninth inning the score was 10 to 4 in favor of the Cherrypickers but a ninth inning rally netted the Sandeaters 5 runs. Albright for Julietta pitched his best game this season and was the feature of the game.

Troy Will Celebrate

At a meeting held in the balcony of Williamson's store last Monday evening, with a representative attendance, it was unanimously decided to hold a two-day celebration this year. The dates set were July 3 and 4. It was shown at the meeting that upwards of \$400 had been pledged to defray expenses, and that there would be still further contributions. The amount in sight gives assurance that nothing will be left undone to make the celebration a success.—Troy News.

Sold 19 Electric Ranges

The Washington Water Power Co. sold eight electric ranges in Kendrick during the recent special sale. There were 19 sold in the district which is under the managership of Mr. Barnes this includes the towns of Bovill, Deary, Troy, Kendrick and Julietta.

Mr. Barnes said yesterday: "Twenty-five per cent of the residential customers of the Washington Water Power Co. in Kendrick now have electric ranges installed."

"This means that there is one electric range in very four homes now being served by the Washington Water Power Co. in this progressive town."

"If we keep progressing in this manner it will not be long until we will have good roads to travel on in place of the present rough trails."

Boy Drowned in Clearwater

Tribune: The Clearwater river claimed its first Lewiston victim in 1928 Wednesday afternoon shortly after 5 o'clock, when Harley Peterson, seven years, son of Mr. and Mrs. M. A. Peterson, 0203 Twenty-fourth street, lost his life when he tumbled off a log on which he and another boy had been playing. The log extended into the river from the foot of Twenty-fourth street.

The first news of the tragedy was carried to the parents by the little fellow's playmate and immediately the river's edge was searched with a hope that the body would be recovered in time to possibly save the boy's life. The stream was running rampant, however, and when the boy reported the accident stated that Harley's body was not seen again after it first went under.

The police were notified, and a hurried trip was made to a point on the Snake river a short distance above the bridge to enlist the aid of a motor boat and crew, but when the velocity of the stream was encountered it was seen that to negotiate the distance from the confluence of the two rivers to the foot of Twenty-fourth street would require such time that darkness would have prevailed before the search could be started.

Some "Cackleberry"

The contest for big "Cackleberries" is on and Wm. Bozett has a pullet that has set a pattern that will be hard for ordinary hens to follow. He brot to this office on Saturday of last week a white egg that measured 6½x8 inches and weighs 4 ounces.

Now the famous Potatch country that Editor Knepper is always holding up as an example, will have to look to its laurels for it is falling behind on the production of "mampals,"—Genesee News.

The dimensions of the egg mentioned by the Genesee News are rather below par. In fact, a man from Cedar Creek brought an egg to the Gazette office some time ago that measured over 8 inches in circumference but we refused to publish anything about such an ordinary egg as that. A champ egg has to measure at least nine inches in order to arouse any interest in the Potlatch country.

We have refrained from starting a 1928 egg contest as such an affair results in a deluge of big eggs to this office. Our office safe has a hump on top, having been thru the big Kendrick fire years ago, and our egg exhibits have a habit of rolling off on the floor. It gives any newspaper publisher the jim-jams to see broken egg shells in his office.

Decoration Day Game Here

Kendrick will play Troy here next Wednesday, Decoration Day. This is Troy's first appearance on the Kendrick diamond for a number of years. It is reported that the bricklayers have a good aggregation this year and are capable of putting up a scrappy game. This contest will start at 2:30 Wednesday afternoon. Don't miss it.

Bovill vs. Julietta

Bovill and Julietta will battle for supremacy next Sunday afternoon on the Julietta diamond. Bovill always has a good ball team and Sunday's game ought to furnish a good exhibition of the national sport. This is not a league game as Julietta has an open date for that day.

Fiddlers Play at Cavendish

A big crowd attended the old fiddlers' contest held at the Cavendish hall Thursday evening last week. There were nine contestants and all were required to play behind a curtain. The winners were chosen by a vote of the audience. Barton Davis received first prize and A. G. Peters second. J. E. Frazier of Kendrick took part in the contest.

ITEMS OF INTEREST FROM SOUTHWICK

Written For Gazette by Special Correspondent.

Miss Wilson left Sunday for her home in Nampa. She went by way of Moscow, where she will visit with friends for a few days.

Miss McCollum left Sunday for her home in Orofino.

Roy Southwick and wife, Howard Mustoe and family, Givard Whiting and children and Rev. Mathes were the dinner guests of Mr. and Mrs. Gordon Harris, Sunday.

Mr. and Mrs. Parkins left Sunday for their home in Culesac.

Mr. Fairley left last Saturday for Peck.

Attlee Mustoe and wife spent Sunday with her parents on Cream Ridge.

Charlie Roy and Mildred Craig of Leland spent Sunday at the home of Vester Whiting.

John McIver, Chester McIver and wife drove to Lewiston, Monday, to see Mrs. McIver, who is ill. John McIver will remain there with his wife for a few days.

Mrs. Math Kazda is quite ill at her home south of town.

Mr. and Mrs. Jennings and daughter, Margaret, Mr. and Mrs. Elton McCoy and Ben McCoy and family spent Sunday at the home of Harry Smith in Leland.

Harold Whiting returned Monday night from Moscow, where he served as a juror the past week.

Miss Erlin Stump and her grandmother returned home from Julietta, Sunday.

Mr. Jennings has moved his family to the timber where he has work for a while.

The family of Fred Whiting moved to Clarkston last Saturday.

Mrs. Eva Wright moved from her ranch home to her residence in town Tuesday.

Eva McCoy is spending this week with her sister in Leland.

Fred Hassinger and family of Gifford spent Sunday with her mother in town, Mrs. Wm. Berri-man.

Nadine McCoy, Helen Jennings and brother, John, and Russell Baker left Monday on a camping trip. They expect to be gone a week.

Francis Farris was the guest of Nellie Henderson, Sunday.

The U. B. conference will be held on Cream ridge this year beginning next Wednesday, May 30th.

Ray Southwick of Cream ridge had the misfortune of losing his house and contents by fire Sunday night, while they were away from home. Everything was a total loss. The origin of the fire is not known as they had had no fire since breakfast time that morning.

Accident Near Cameron

Charles McCoy and his little four year old daughter had a narrow escape Wednesday while driving a team with a load of wood down a hill near Cameron. The wagon tongue broke and threw both occupants of the seat under the horses. They were dragged for a short distance, but were not injured except for a few slight cuts and bruises.

Received Heavy Sentence

T. B. West of Lewiston, a former resident of Kendrick, was sentenced to serve eight months in the Kootenai jail at Coeur d'Alene and to pay a fine of \$200, at Moscow last Saturday. The sentence was imposed by Federal Judge C. C. Cavanah. West pleaded guilty to one sale of liquor, being sentenced to six months and fined \$200 for that offense, and on the two counts of possession he received a sentence of 30 days each.

Take Post Graduate Work

W. R. Smith left Tuesday afternoon for Illinois where he will take post graduate work at the University of Illinois. He expects to return the latter part of June.

MAKES SWIM RECORD

The photograph shows Mrs. Lottie Schoemmel in the water of the Denuville pool, Miami Beach, Fla., while she was establishing the world's swimming endurance record by swimming around for 32 hours, taking her food from other swimmers who swam beside her. She eclipsed the old record by one hour.

Marketing of Farm Products by Post

New Bulletin Includes Information on Regulations.

(Prepared by the United States Department of Agriculture.)

The benefits and limitations of parcel post marketing of farm products as disclosed in a study of the operation of this form of selling over a period of 14 years are set forth by the bureau of agricultural economics in a publication, "Marketing Farm Products by Parcel Post," just issued by the United States Department of Agriculture.

When the parcel post law went into effect in 1913, says the author, Lewis B. Flohr, there were many and varied ideas as to the part it might play in marketing farm produce. Some persons declared that it would solve the farm marketing problem. There has been a continued and slowly increasing volume of marketing by this method, he says, but the quantity of farm products passing through the postal service has not reached the proportions expected by the enthusiasts and is a relatively small part of the total marketings of farm products.

The department's new bulletin includes information on the parcel post regulations and requirements, the ways and means of making contact between producers and customers, the necessary business attitude and management of the business, and the factors limiting parcel post marketing. The possibilities of parcel post marketing are discussed in detail for a long list of commodities, including fruits and vegetables, poultry, eggs, meats, butter, cheese, cream and milk, mushrooms, nuts and nut meats, sirups, honey, plants, and other farm products.

Copies of the publication, which is designated as Farmers' Bulletin No. 1551, may be obtained from the Department of Agriculture, Washington, D. C.

Term "Acid Phosphate" Has Been Changed Back

Concurring with the decision of the Association of Official Agricultural Chemists to change the term "acid phosphate" back to the original term "superphosphate," Secretary of Agriculture Jardine recently announced that all reference to this fertilizer in department publications and correspondence will hereafter be made through use of the term "superphosphate," with the old name carried in parentheses until the change is established.

The change has already received the general approval of the fertilizer industry, editors, agronomists, experiment station directors, and others.

For many years the term "acid phosphate" has been applied to a fertilizing material which is neither acid in reaction nor does it impart an acid reaction to the soil on which it is used. Dr. Henry G. Night, chief of the bureau of chemistry and soils, says it is desirable, therefore, to get away from this misnomer which is responsible for the general impression among farmers that the continued use of this material will bring about an acid condition in their soils. This impression has resulted in considerable sales resistance which it is felt will be overcome by getting back to the original name, a name that is descriptive of the contents of the fertilizer, whereas the only excuse for the word "acid" is that sulphuric acid is used on phosphate rock to make the phosphorous available for plants, but the acid does not remain as such in the finished fertilizer.

"Straw" Potatoes Are Not Likely to Satisfy

When growing "straw" potatoes they are planted in rows the same as when they are to be cultivated, except that the rows may be closer together. The seed is covered very

shallow, and about the time the potato tops begin to show above ground the straw is added. The straw should be four to six inches deep and evenly spread over the ground.

On rather rich land and in wet years strawing potatoes is not likely to be very satisfactory; one reason being that the straw keeps the soil so wet the plants do not make good growth and the tubers are of poor quality.

Work Not Always Toil

The one thing harder than hard work is to be denied the privilege of toll. When the misfortune of illness takes us away from our work we begin to appreciate the blessings of work.

Locust Blossom Time

The prettiest time of the year in Kendrick is at this season when the locust trees are loaded with blossoms. There is an unusually heavy bloom this year and many of the trees are almost solid white. Millions of bees are reaping a harvest from these honey-laden blossoms.

Had Smallest Homestead

In the death Friday of William Gamble, highly respected citizen of Clearwater county, making his home at Greer, it is recalled that he had distinction of having made homestead entry on the smallest tract of land in the history of the United States land department, says the Tribune.

On March 30, 1900, Mr. Gamble made entry on lot 14, section 34, township 37 north, range one east, containing 42-100 of an acre and afterwards commuted it to cash entry, the cost of the tract being \$1.58. This was at the west end of the wagon bridge at Ahsahka, and was used as a ferry landing for years.

School Notes

The fifth and sixth grades celebrated the last day of school at a picnic, about two miles up the Potlatch river above Kendrick.

The following pupils of the sixth grade made perfect attendance records for the term: Roy Long, Oscar Onstott, Johnnie Kite, Annabell and Josephine Davis, and Jane Plummer.

The members of the eighth grade were delighted to receive the returns from the examinations, for every member received an average above eighty-five, thus each was awarded a diploma. Nona McAllister received the highest average which was 94½%. Edna Bolon was second with an average of 98.8-9%, and Jack Plummer third with an average of 91.2-3%. The other members of the class were: Bur-neda and Ethel Cummings, Bonnie Candler, William Holt and John Wilson.

The fifteen members of the seventh grade were promoted into the eighth, there being one conditional promotion.

The seventh and eighth grades spent their last day of school at the ice mines on American ridge. It was an ideal picnic ground with ice water, shade and real ice could be found buried beneath the rocks. It is believed that no one went home hungry but all "glad for the freedom of school let out."

Linden News

Mrs. Oscar Torgerson of Elk River visited her parents, Mr. and Mrs. W. Zimmerman, Tuesday and Wednesday of last week.

Grandma Keeler has returned home from Crescent where she spent several weeks with her grandmother, Mrs. Gus Farrington.

Miss Grace Dahl of Park was a guest of Mrs. Edgar Bohn several days last week.

Mr. and Mrs. Louis Alexander and Mrs. J. H. Hunt visited relatives in Clarkston, Sunday. They were accompanied home by Mrs.

Sylvia Jenks, who will visit her daughter.

Mr. and Mrs. C. H. Fray and family spent the day Sunday at the George Garner home.

Mr. and Mrs. Roy Bohn of Bovill spent Sunday at the Smith home.

Dan and Raymond Lyons returned from Kendrick, Friday evening where they attended high school the past year.

Arthur Foster of Kendrick is assisting Arley Allen with his farm work.

Mrs. Henry Baker and children visited at the C. E. Harris home several days last week.

A number of people from here attended the ball game at Southwick, Sunday.

Mr. Rowe, representing the Lewiston Marble and Granite works was transacting business here Saturday.

Quite a number of young folks gave Miss Fae Pippenger a pleasant surprise party, Saturday evening at the home of her aunt, Mrs. Edgar Bohn, in honor of her birthday. A jolly good time was had by all.

Mrs. Effie Eakin and daughter, Zaida, Mr. Young and Mr. Will Fisher of Moscow visited friends on the ridge Sunday.

Then He Remembered

He was rather absent minded, his wife tied a piece of cotton round his finger to remind him to get his hair cut. On his way home he noticed the cotton, entered a barber shop. "Yes, sir?" said the barber, a puzzled note in his voice. "Eh? Oh, yes, cut my hair, please." "Certainly," replied the barber, "if you wish it, but you wouldn't mind my mentioning the fact that I cut it at lunch time today, will you?"

Thought for Today

He is incapable of truly good action who knows not the pleasure in contemplating the good actions of others —Lester.

Incentive in Defeat

What is defeat? Nothing but education, nothing but the first step to something better. —Wendell Phillips

'Cold Turkey' About House Paint!

Guarantee

We guarantee Winchester Paint to be a strictly 60 per cent pure lead and 38 per cent zinc paint ground in pure linseed oil. We furthermore guarantee this paint on your walls for five years if put on by a competent painter under our supervision.

FARM POULTRY

BREEDING STOCK GOVERNS POULTS

The flock of young turkeys will be governed by the breeding stock. To produce healthy stock the breeders must be strong and vigorous. Weak or diseased birds will only produce their kind, so it is necessary for the turkey grower to exercise great care in selecting his breeding stock, writes W. D. Neale in the Idaho Farmer.

The breeders should be well fed. A daily ration of equal parts of oats, wheat and corn will be essential if birds are allowed free range, otherwise they should be fed twice each day. A green food, such as cabbage and beets, will be enjoyed, and sweet milk or clabber or buttermilk will take the place of bugs and meat foods. Plenty of grit and oyster shell should be kept before the birds during breeding season. Good foods mean eggs strong in fertility.

One gobbler to a dozen hens is sufficient. If more hens are kept, it will be necessary to have another gobbler. Do not let the gobblers run together, for they will spend much time and vitality fighting. Let one gobbler from the pen each day.

If the hens are inclined to stray away and hide their nests where they are hard to find, it will be best to confine them to a small pen inclosed by a six-foot chicken wire until after they lay each morning. One may have a covered pen if they are bad to fly.

Salt barrels, laid down and filled with straw, make an ideal place for hens to lay. The hen that begins to lay about the fifteenth of March will have finished and be ready to sit by the tenth of April. It is best to break her up and let her lay another month before allowing her to hatch a brood. The first eggs can be placed under a broody chicken hen. A large hen can cover ten eggs nicely.

If the turkeys are allowed to range the eggs should be gathered each day. Skunks, crows and dogs will rob the nests if they can locate them. A crow will sit around and watch a turkey hen an hour or two. As soon as she leaves the nest it will swoop down and get the egg. The eggs should be kept at a temperature of 50 or 60 degrees. They should be kept in a box lined with cotton batting, so they will not be jarred when handled.

Turkeys Profitable in Many Parts of Country

Farmers in practically all parts of the country have found that modern methods of raising turkeys are profitable. It was formerly considered necessary to have a lot of land and turn the turkeys loose; the old turkey hen stole her nest and more often than not the poult died rather than lived.

The secret of raising turkeys is in raising them away from chickens on ground on which chickens have never run. They are kept confined to one yard or run, about 125 poults being placed under one regular sized brooder stove in a 10 by 12 foot house. Artificial methods of incubating and brooding have proved very satisfactory.

Strict sanitary measures must be followed, such as frequent cleaning of the house, clean water vessels and feed troughs and an occasional spraying of the house. It used to be the idea that grasshoppers and other bugs could be relied on for a good share of the turkey diet. Modern turkey raisers, however, do not rely upon these foods, but feed a regular, scratch and dry mash, just as is done with chickens. Wet grass will not bother as long as the vitality of the turkeys is kept up by proper feeding.

Prevent Accidents

Chicks deserve a chance to be healthy. If the brooder is kept so hot that they cannot get a breath of fresh air, or if the house is so small or overcrowded that they cannot get away from the brooder and thereby regulate the amount of heat they receive, the result will be no better than if the chicks were chilled. The good mother either of chickens or of children provides warm quarters for her offspring but allows them some liberties.

Turkey Dangers

One of the most important dangers the turkey grower has to avoid is bare ground about the coops and feeding places. This is particularly important where losses in former years have been heavy. If the young turkeys are kept on a good sod and never allowed to come in contact with bare earth, particularly about the barnyard, where a degree of infection probably is always present, there will be vastly fewer deaths from diarrhea, black-head, etc.

Feather Eating

Feather eating usually results from idleness while the hens are in winter quarters as well as a craving for material not in their ration. Adding 20 per cent beef scrap to the dry mash may satisfy their appetite. Try hanging a piece of raw beef in the poultry house for the birds to peck at. Feed their scratch grain in, litter to keep them busy. As soon as the weather permits turn the flock on range so they can become interested in other things.

Italian Red Clover and Alfalfa Seed Worthless

Results of tests conducted at several experiment stations show conclusively that red clover and alfalfa seed from Italy are unfit for use anywhere in the United States. Alfalfa seed from South America also has been declared unfit for use in certain parts of this country. It now begins to appear that a similar study of adaptation must be conducted with red clover and alfalfa seed from different sections of the United States and adaptability areas located and defined. It has been discovered now that red clover seed produced in the Willamette valley, of Oregon, produces less hardy plants than seed produced in Wisconsin, Michigan or Minnesota and may prove to be as undesirable as Italian seed.

Grasshoppers Have Well Balanced Mineral Bodies

You have, no doubt, observed, and often heard people remark about chickens and turkeys doing so well where they had range and had access to a lot of grasshoppers. Do you know that a grasshopper's body, when chemically analyzed, shows that its body is made up of a perfectly balanced mineral mixture? The grasshopper's body contains a large per cent of vital minerals, and that's the secret as to why chickens and turkeys do well on them, and are always seen chasing grasshoppers. The same is true of other bugs and worms, and is one of the main reasons why poultry do so well on free range.

Agricultural Notes

Make repeated plantings of beans and corn so as to have a continuous supply of these vegetables.

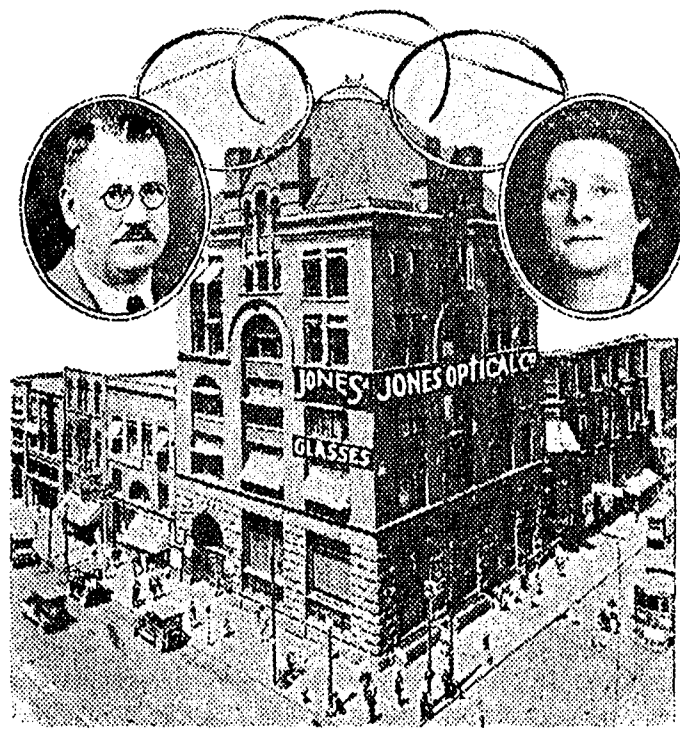

For carrots, no fresh manure should be applied. It makes 'em knotty and rough, and they often crack. Carrots like a sandy soil, not too rich.

Some of us don't have much success with lettuce after the hot weather comes. The secret of making it do well then is to provide some shade and give it plenty of water.

In a small home garden, plants can be saved from cutworms by putting a collar of stiff paper in the ground around them. This should go into the ground two inches and reach that high above it.

Watch the young cabbages and nip the cabbage worms. When white butterflies put in an appearance they mean cabbage worms. A spray with an arsenic compound will check them in a hurry.

Differences in Height

The little cartilages between the vertebrae of the spinal column in the human body diminish in size during the day because of the weight or pressure that is upon them. In some individuals the difference in height between day and night may be as much as one-quarter to one-half an inch.

Much Timber in Sequoia

Enough timber is contained in one of California's trees to build 22 homes of average size. This was announced by the state department of resources in conferring distinction upon a giant Sequoia near Crannel, Humboldt county. The tree is 308 feet high and 20 feet in diameter.

The Great Debt

we owe heroes of this and generations gone by can never be paid in full.

May our spirit of patriotism never dim with the passing of years. Let us remember this year, more than ever before, that this is a duty we owe to our God, our Country and our Flag.

DAIRY FACTS

SUNLIGHT EFFECT ON DAIRY CALVES

T. W. Gullickson and C. H. Eckles make the following report in the Journal of Dairy Science:

Four heifer calves were placed on an experiment at from three to seven days of age. Two were confined in a completely dark well ventilated box stall and allowed in the open only at night. The other two were allowed to run out of doors during the day and confined only at night. The ration for all animals was identical. The grain portion consisting of corn meal, corn gluten feed, wheat bran, and linseed oil meal, 3:1:1:1, and timothy hay of fair to poor quality forming the roughage. The animals were weighed every ten days and the height at the top of the withers measured every thirty days during the two-year period.

The animals in both lots continued normal in all outward respects during the test. All heifers came in heat when less than a year of age. The two in the "sunlight" group were accidentally bred at the first heat period. One dropped a normal full-time calf, and the other a small, slightly deformed calf, with both eyes present but blind. This condition was not thought to be due to the ration. One heifer in the "no sunlight" group was bred at about sixteen months of age and dropped a normal calf. The other heifer of this group was found to have malformed reproductive organs which prevented conception but did not hinder oestrus.

From these data it is concluded that the absence of sunlight was without effect upon calves kept in darkness from the age of one week to two years. Normal reproduction also occurred.

Best to Compound Grain Mixture for Dairy Cows

In making a ration, cost is one of the important factors. The best practice is to compound a grain mixture so that it will balance with the home-grown roughage. With this in mind, the separate grains should be selected to supply the necessary nutrients at the lowest possible cost. For this, not only the price per hundred pounds but also the relative cost of each constituent, especially protein, must be considered. For example, to determine the cost of a pound of digestible protein in a given feed divide the price of 100 pounds by the per cent of digestible protein in the feed. If this calculation is made for several feeds, the relative cost of protein in each will be apparent. Then the feeds that furnish protein at the least cost can be selected. The same can be done to determine the cost of the carbohydrates and fat, which are the heat-making or energy-producing part of the feed.

Good Grade Bull Better Than "Scrub" Pure Bred

While pure-bred cattle still perform well enough at the stall to add something to grade herds by contributing the right kinds of bulls for breeding purposes, not all pure-bred cows are capable of producing bulls that will do this. A certificate of registration is not enough to prove that a bull will increase the value of the grade herd into which he goes. Many farmers have said that they would rather have a good grade bull at the head of their herd than a "scrub" pure-bred. This stand is a stand for better production, but at the same time, the one way to insure that a "scrub" pure bred is not being purchased is to insist on a bull with butterfat records back of him, just as the buyer would insist on butterfat records back of any grade bull which he would consider "good."

Dairy Notes

Concrete makes a good dairy stable floor.

A good milking goat gives about two quarts a day. An equally good cow will give at least ten quarts. A goat will usually milk six to seven months.

A parasite in the dairy business is the man who keeps an underfed herd of cows, feeds his family butter substitutes and complains about the low price of butter.

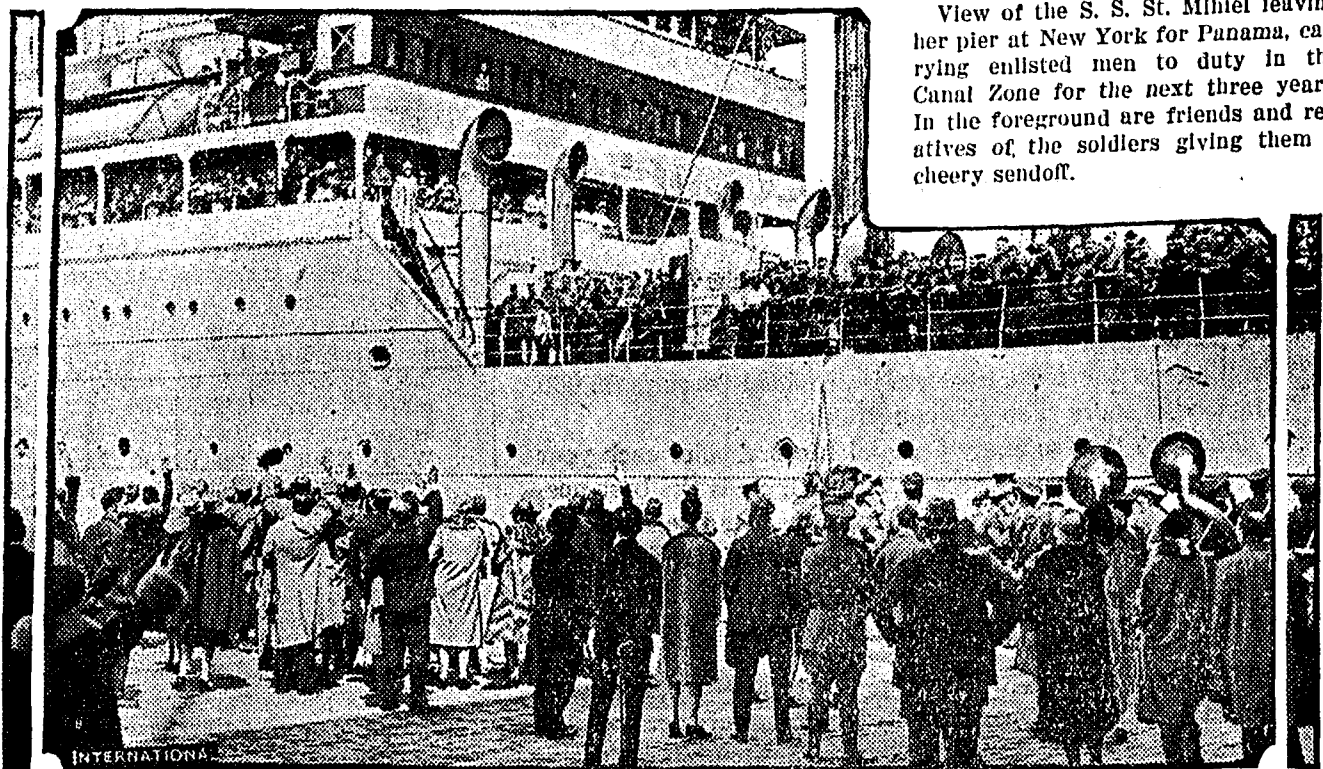

A fair milk production for a mature Holstein cow is 40 to 45 pounds a day. The cost of feed at present prices will be around 40 cents per day. If feed is all purchased at retail the cost may be higher.

Don't feed a cow too much protein. It causes udder troubles and difficulties in breeding.

Don't expect full pails from half-filled cows. Sunshine and exercise make healthy cows, but feed is necessary to make a healthy cow pay.

More bulls (cows, too) than you would think die from eating nails, etc., in feed. In Pennsylvania, feed manufacturers are not allowed to use wire to fasten tags to feed bags, just because of this danger.

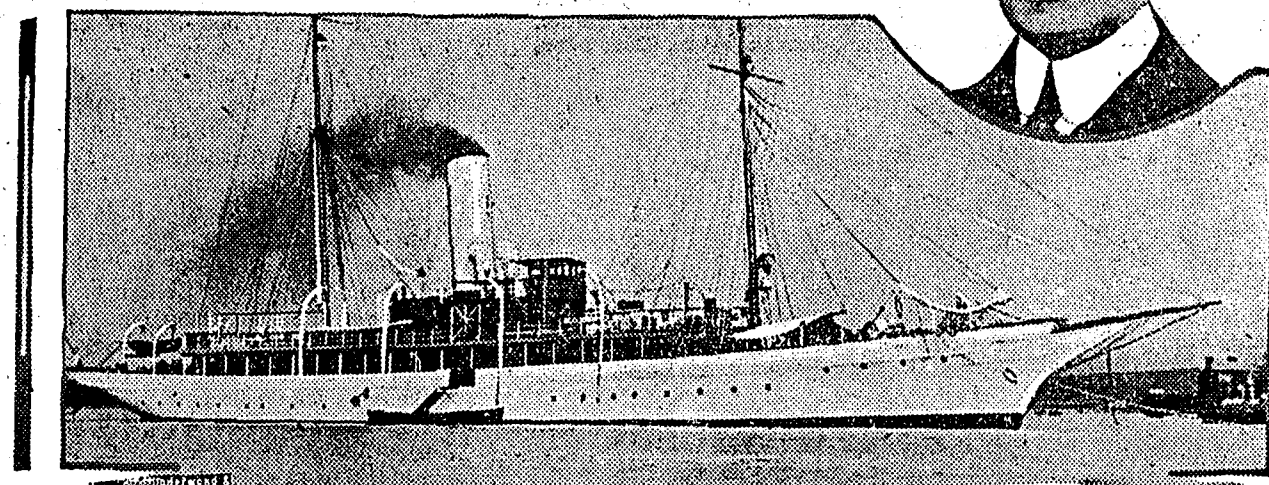

Soldiers Leave for Three Years in Panama

He will communicate with all beam stations from Australia to England and carries a special device for measuring the force of signals from any part of the world.

Many Colorado Lakes

The estimate by forest officials and others is that there are more than 2,000 lakes of all sizes in Colorado. Aviation developed there were more than 200 lakes in the recesses of the mountains that were not known and were spotted by flyers. On Grand Mesa alone there are more than 100 of all sizes lying at an altitude of 8,000 feet and all stocked with trout.

Earliest Railroad Tunnel

The first railroad tunnel was the Woodhead tunnel, in England, which was begun in the spring of 1839. The first train passed through December 2, 1845. This was over what was known as the Manchester, Sheffield & Lincolnshire railway, now the Great Central division of the London & Northeastern railway.

Modern Bell Towers

Modern examples of ancient bell towers are the campanile of the capital at Rome; Victoria tower, by Barry, at the houses of parliament, Westminster; the Great tower of the Basilique du Sacre Coeur, Montmartre, Paris, and the memorial tower in the Brown university campus at Providence, R. I.

Miserable Agriculturist

One of the oldest references to agriculture is on a papyrus describing the work of an Egyptian gardener, "who brings loads of produce, and his arms and neck ache beneath them. At noon he waters the onions and in the evening the vines. His is more miserable than any other calling."

A Visit To Your Bank

ENSURES A CAREFREE VACATION

Vacation Time is Play Time, and No Time for Worry. For instance, worry about your travel money and its safety.

Stepping into this bank before you leave, will ensure a CAREFREE VACATION, for we will change your cash into Travelers Cheques. These checks are spendable everywhere and just as welcome as currency.

Should you have the misfortune of losing them or having them stolen, your vacation will not be spoiled, because your money will be refunded.

This Bank sells this protection of your travel funds at a very small cost. We gladly extend every possible courtesy.

"Candle" Coal?

Cannel coal burns with a bright, candle-like flame, and it is probable that the name is a corruption of candle coal. This coal is found in Kentucky, Ohio and Indiana, and some believe that it is a product of an accumulation of animal as well as plant remains. The same kind of coal is found in Scotland, where it is called parrot coal.

Order To Show Cause Why Certain Real Estate Should Not Be Sold.

In The Probate Court of Latah County, State of Idaho.

In the matter of the estate of Columbus N. Clark, Deceased.
A. W. Behrens, the Administrator of the Estate of Columbus N. Clark, deceased, having this day filed his petition for an order authorizing said petitioner as such administrator to sell a portion of the real estate owned by the said decedent at the time of his death, and said petitioner having alleged in his petition that it is for the advantage, benefit, and best interests of the estate and those interested therein to sell a portion of the real estate owned by the said decedent, and which is described in said petition as follows, to-wit:

The Northwest Quarter (NW¼) of the Northeast Quarter (NE¼) of Section Twenty-two (22) in Township Thirty-eight (38), North Range Four (4) West of the Boise Meridian in Latah County, State of Idaho, and it appearing to the satisfaction of the court from said petition that it will be for the advantage, benefit, and best interests of the estate and those interested therein to sell the real estate above described.

Now therefore, it is hereby ordered by the court that all persons interested in the said estate are hereby required to appear before the above entitled court in the court room of said court in the Court House in Moscow, Latah County, State of Idaho, on Monday the 4th day of June, 1928, at 10 o'clock A. M., and then and there show cause why an order should not be granted by this court to said administrator for the sale of the above described real estate, and it is further ordered that service of this order shall be made upon all persons interested in said estate by the publication of same in the Kendrick Gazette, a newspaper printed and published each week at Kendrick, Idaho, for three successive weeks and in three weekly issues of said newspaper, beginning on the 11th day of May, 1928.

Witness my hand and the seal of the said court on this 5th day of May, 1928.
(Seal) ADRIAN NELSON,
19-3 Probate Judge.

ORDER TO SHOW CAUSE

In the Probate Court in and for the County of Latah, State of Idaho.

Order to Show Cause Why Order of Sale of Real Estate should not be made.

In the Matter of the Estate of Albert R. Knight, Deceased.
John B. Knight, the executor of the estate of Albert R. Knight, deceased, having filed his petition herein praying for an order of sale of the real estate of said decedent, for the purpose therein set forth.

It is Therefore Ordered by the Judge of said Court, that all persons interested in the estate of the said decedent, be and appear before the said Probate Court, on Monday, the 4th day of June 1928, at 10 o'clock in the forenoon of said day, at the Court Room of said Probate Court, in the Court House in Latah County, to show cause why an order should not be granted to the said executor to sell so much of the real estate of the said decedent as shall be necessary.

It is Further Ordered, That a copy of this order be published at least two successive weeks before the said 4th day of June 1928 in the Kendrick Gazette, a newspaper printed and published in the said Latah County, State of Idaho.

ADRIAN NELSON,
Probate Judge.
Dated this 10 day of May A. D. 1928. 20-2

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah.

FLORA D. VANFLEET, Plaintiff,
vs.
EUGENE F. VANFLEET, Defendant.

THE STATE OF IDAHO sends greetings to the above named defendants.

You are hereby notified that a complaint has been filed against you in the district court of the second judicial district of the State of Idaho in and for the County of Latah by the above named plaintiff, and you are hereby directed to appear and plead to the said complaint within 20 days of the service of this summons; and you are further notified that unless you so appear and plead to said complaint within the time herein specified, the plaintiff will take judgment against you are prayed in said complaint. The nature of the above entitled action in general terms is to procure a divorce on the part of the plaintiff on the grounds of Desertion as will be more fully

shown in said verified complaint.

Witness my hand and the seal of said district court, this 15th day of May, 1928.

HARRY A. THATCHER,
Clerk.

By Adrian Nelson, Deputy Clerk.
(Seal of Court Affixed)

A. H. Oversmith, Attorney for plaintiff, Residence and P. O. address, Moscow, Idaho 20-5

NOTICE

Notice is hereby given that Harold McManus, will at the next regular meeting of the Board of Pardons of the State of Idaho, make application for a pardon from that certain judgment of conviction of Burglary, made and entered in Latah County, Idaho on or about May 31, 1921.

(Signed) Harold McManus. 20-4

NOTICE

The annual meeting of the stockholders of the American Ridge Co-operative Telephone Co. will be held at the Harland school house on American Ridge, on Tuesday, June 5 at 2 p. m. for the purpose of electing directors and transacting other business as may come before the meeting.

W. Q. Taylor, Sec.
B. F. Steelsmith, pres. 21-2

POULTRY

FIRST WEEK IS CHICK'S CHANCE

The first seven days are the hardest a baby chick has to live. It is during this week that careful feeding and close attention to brooding and temperatures are especially important.

Many poultrymen feed their chicks too young. A few make the mistake of waiting too long to give them their first feed. The proper time is between 48 and 60 hours after hatching, says J. G. Halpin, poultry specialist at the Wisconsin College of Agriculture. A chick ration, developed by poultry specialists at the college farm and used by thousands of poultrymen in Wisconsin and the Middle West, consists of 80 pounds ground yellow corn, 20 pounds wheat middlings, 5 pounds each of raw bone meal and chick-size oyster shell, and one pound of salt with skim milk to drink and plenty of sunlight.

This ration may be used as the first feed and continued until the chicks are several weeks old, says the specialist, who emphasizes that all ingredients must be of the highest quality. Using musty or moldy feed invites disaster to the brood and the same is true of the litter on the brooder floor.

Close brooding and high temperatures also take their toll. The chicks will thrive better if given an opportunity to run about in the sun and kept at a slightly lower temperature during the day. He cautions against letting the temperature fall too low, which may cause crowding and smothering of the weaker chicks.

This attention should be carried through the following weeks, too. The chicks, after coming safely through the first week, must be kept growing every day if they are to return their owners the biggest profit.

Grains Are Essential in Any Feeding Plan

Farm-grown grains, corn, wheat and oats are good feeds and are essential in almost any feeding plan, but unless a good mash is also fed, they will do little more than maintain the life of the bird. Most state experiment stations have worked out formulas for mashes that may be home

mixed, also numerous concerns are manufacturing prepared mashes. Either the home-mixed or commercial mash will give good results when fed as directed. They do not direct, however, that a little be fed today and some more next week, but tell you to keep it before the birds at all times. No one should expect one sack of mash to go very far in feeding 50 or 100 birds, any more than they would expect one feather to make a feather bed.

Give Chicks Chance

Taking the first hatched chicks away after they have become dry and fluffy may prevent the hen from leaving the nest with them before all the hatchable eggs are hatched. This is the chief advantage; they are not likely to be killed by the mother hen. Accidents in the nest do occur, of course, but, in consideration of possibilities, they are few. If chicks are taken away, they should be kept in a warm place in a covered basket and, when returned, given to the hen at night.

Poultry Hints

Comfort and contentment are necessary if hens are expected to lay well.

From the hens' standpoint, the house that is dry, wind-proof, light, bright, and clean is most satisfactory.

Milk and water are not interchangeable, and milk is a real food for protein building when hens require it most.

The newly hatched turkey is a weak little creature and must have the best of care. It is said that only about 60 per cent of the turkeys hatched ever grow to maturity.

Profit made on a flock of poultry depends not on the cost of the house in which they are kept but upon the kind of house.

The turkey hen can hover about 14 eggs. If more are given, she is liable to let them chill, as her body cannot keep them warm enough to incubate.

Water forms a large part of the ingredients of the egg, and if the hen has not everything that goes into the manufacture of an egg, her body will, of course, refuse to produce one.

When one gives baby chicks all the milk they will drink it is not advisable to put any meat scraps in the ration. If no milk is given to them, then a combination of meat scraps and dried milk would be all right.

Doctoring roup is not very satisfactory. Probably the best treatment is a dose of epsom salts, one-half pound to 100 grown birds, in the drinking water. Afterwards put enough potassium permanganate in the drinking water to give it a wine color.

QUEEN OF THE MAY

Miss Margaret Nuckols of Albany, N. Y., a freshman at Bryn Mawr, who was chosen May Queen for the old English May day festival which is held once every four years at the noted girls' school.

Revised Honey Grades Are in Circular 24-C

Rules adopted for grading honey, for the guidance of beekeepers in preparing their product for market and for convenience in buying and selling honey, are brought together in the latest revised form in Circular No. 24-C, "United States Grades, Color Standards, and Packing Requirements for Honey, Recommended by the United States Department of Agriculture," just published. Distributed with this circular is a separate wall chart, which gives in tabular form for ready reference the requirements for the principal grades of honey, and also a leaflet giving information concerning the stamp authorized for use with all United States grades of honey, and the design for use on honey labels.

This circular is a revision of and supersedes Department Circular No. 410-C, published last May, and also includes the information in Department Circular No. 364-C, "The Color Grading of Honey," published in 1925. It is a manual in 32 pages of necessary information relative to honey grades and colors, packing requirements for home and export trade, and a complete explanation and definition of the grades which the United States Department of Agriculture recommends for the standardization of honey merchandizing. It will be useful to producers of and dealers in honey. It may be procured by application to the Department of Agriculture, Washington, D. C., asking for Circular No. 24-C.

Seed Treatment Helps

Clover on Acid Soils

Bacteria will help bring back clover like it used to grow in the pioneer days.

Wherever clover is to be seeded on acid soil the seed should be inoculated, suggests I. L. Baldwin, bacteriologist at the University of Wisconsin college of agriculture, to farmers in sections of the state where there is a large percentage of acid soil.

"On acid soils the bacteria which help clover to make use of the free nitrogen of the air do not live long in the absence of the legume plant," he stated. "When new seed is sown on this type of land there is insufficient bacteria in the soil for the clover to use the nitrogen and consequently make its best growth."

"While it was formerly felt that inoculation of clover seed was necessary only when the crop was sown on new soil, recent experiments indicate that inoculation of all seed over a period of years is a profitable investment both in increased crop yields and in the prevention of crop failures."

Short Farm Notes

Change pastures as often as possible.

Alfalfa seeded on sour soil seldom develops a good stand.

A small amount of oilmeal along with the feed is beneficial, especially for brood mares.

It is good business to hatch chicks early. Pullets must be hatched early if they are to lay high-priced fall and winter eggs.

When the calf is put on pail feeding it should be given small amounts of fresh milk. Three times daily is better than twice.

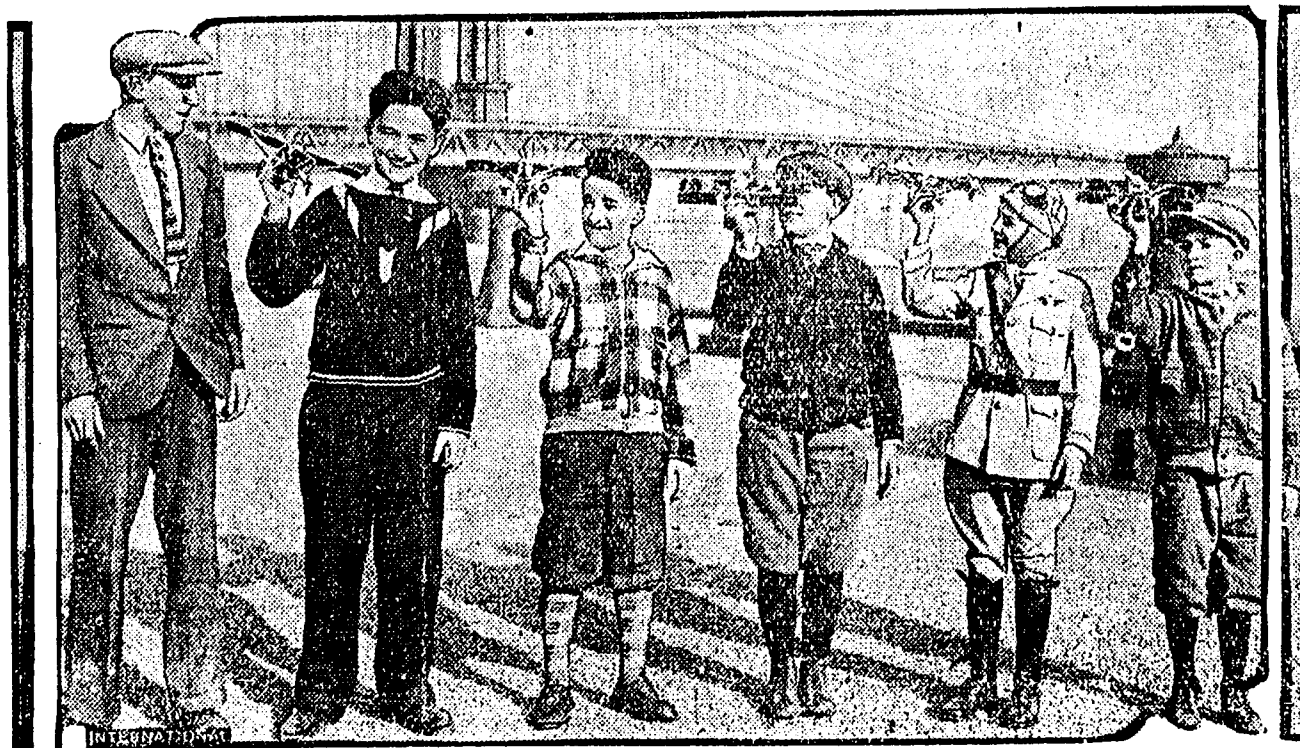

Sowing the onion seeds where they are to remain to grow into plants is the way to make this crop profitable for the seedlings are expensive to buy.

Horses are creatures of habit more than any other kind of live stock. Sudden changes of feed or throwing them into work too quickly after an idle spell, is hard on horses and likely to cause sickness.

To Stop Fire in Chimney

When the chimney catches fire, it can be stopped by closing doors and windows, says Nature Magazine. If an open fireplace, hold a wet blanket in front to stop the draft.

Air Cadets, America's Future Flyers, Organize

Here is a group of members of the Air Cadets of America, with their model planes. They have an airport near Haledy field, New Jersey, provided by Philip Castellano, a wealthy aviation enthusiast. Left to right they are: Maj. Sgt. Nicholas Bartolotta, First Sgt. Diego de Caro, Angelo de Caro, Diego Mancuso, Jr., Sgt. Salvatore Angello and James Bagge.

LOCAL NEWS

Mrs. Herman Wilken Improving

Word comes from Peck that Mrs. Herman Wilken, Sr., is slowly recovering from the operation which she had last fall. She is now able to sit up in her wheel chair several hours a day, but is still unable to walk. She is being cared for at the home of her daughter, Mrs. W. R. Johnson.

Announces Candidacy

W. Q. Taylor, American ridge, has announced his candidacy

for the office of assessor of Latah county at the August primary election. He is the first candidate in the county to "break the ice." It is understood that E. J. Gemmill, who has held the office for nearly eight terms, will not be a candidate.

Mr. Taylor is well known in the county having resided in various parts of it during the past 35 years. His name will appear in the republican primaries.

Got The Number

The scholarly appearing little man hurried into the precinct station. "I wish to report," he gasped, "that my car has been stolen!" "See who did it?" growled the desk sergeant. "Yes... " "What'd he look like?" "I fear I could not describe him accurately," said the little man. "But," he brightened, produced a notebook from an inner pocket, "I succeeded in taking the number of the car."

Banjo Pickers Contest, June 1

The Banjo Pickers Contest will be held at the New Kendrick Theatre, next Friday night, June 1st. It is expected that several contestants will take part. The picture program for June 1 and 2, will be two good pictures, the first picture being "An Affair of the Follies," extra good drama from First National, and the second picture being "40,000 Miles With Lindbergh," which just finished playing Spokane about 2 weeks ago. Besides this will be shown the International News Reel. All of these pictures will be shown both nights. So come and see an extra good show.

Friendship's Value

Every man rejoices twice when he has a partner of his joy; a friend shares my sorrow and makes it but a misery, but he swells my joy and makes it double.—Jeremy Taylor

STAMPS OUT REVOLT

General Carmona, Portuguese President, premier and military dictator, photographed after the termination of the recent revolution, which he successfully suppressed.

Manure Spreader Useful Implement on Any Farm

The farmer who tries to run a farm economically without the use of a manure spreader is making a mistake. This is one implement that every farmer ought to possess, even though his farm may be only a small one.

Manure that is allowed to pile up under the eaves of the barn, with the most valuable fertilizing elements leaching away, is worth only a fraction of that that is hauled out promptly and distributed evenly over the land. If any leaching is done, let it be done in the field.

With spreading of manure by the use of forks it is impossible to get uniform distribution. The manure spreader tears up the manure and spreads it in an even, uniform strip down the field. The maximum value of the manure is thus derived.

The labor-saving feature of the manure spreader is another tremendous advantage. With it the actual labor of handling the manure is reduced by at least 50 per cent and besides, time is saved.

Old Samplers

Needlework horn book is the oldest name for a sampler. The alphabet was embroidered on the material.

Covered Wagon

A "prairie schooner" was the name given to the large covered wagon, in which the early settlers of America traveled across the continent.

Polished by Friction

A gem is not polished without rubbing nor a man perfected without trials.—Exchange.

Pioneer Magazine

The Illustrated London News is the oldest illustrated weekly. It was founded in 1842 by Herbert Ingram.

Penalty of Sensitiveness

The heart that is soonest awake to the flowers is always the first to be smothered by the thorns.—Moore.
