VOLUME 56

KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, SEPTEMBER 26, 1946

NO. 39

PERSONALS AND NEWS ABOUT KENDRICK FRIENDS

A. O. Kanikkeberg made a trip to Seattle over the week-end. He visited at the home of his daughter and son-in-law, Mr. and Mrs. Judson I. Lee, and with other relatives. He brought his daughters, Donna and Ann home with him.

Mrs. Hiram Galloway took the train Friday for Pasco, where she visited her daughter and family, Mr. and Mrs. Paul Abrogast, over the week-end.

Mr. and Mrs. Loyd Israel left last week for Moscow, where Loyd will attend the U. of I. Mrs. Israel will assist J. M. Lyle with office work in the Veterans' Administration office.

Mrs. Oscar G. Medalen and son Allen and daughter Delores arrived last week from South Dakota, where they spent the summer.

Charles and Teddy Deobald and Don Fry, U. of I. students, and Scottie Coulter, who is teaching a mathematics class at the U. of I., were home over the week-end.

W. A. Watts left Wednesday afternoon by train for Seattle and Canada, where he will join his brother, Dr. C. E. Watts, and E. A. Deobald on their big game hunting trip.

Bob Watts and Ossie Kanikkeberg, who are attending the U. of I., were home over the week-end.

John Soumar, Myrtle, was a Kendrick business visitor last Saturday. Silvie Cook, whose winter address is now Lewiston, Ore., was a Kendrick business visitor Monday. He will spend a few days with his mother on the farm before returning to Lewiston.

Mrs. Walter Hartung of Juliaetta is quite ill in the Moscow hospital.

Mr. and Mrs. Wm. Wolff of Pullman were Sunday guests in the home of Mr. and Mrs. Walter McCall.

Mr. and Mrs. N. E. Kargraud and family left Monday for Portland, Ore., after having spent the past ten days at the home of Mr. and Mrs. Jack Travis.

Thos. McDowell, Colfax, came down Monday to spend several evenings visiting friends and looking after business. He was a guest in the home of Mr. and Mrs. Fred Stedman while here.

R. H. Easterbrook, who has been employed in southern Idaho for the past several months, arrived home Monday.

S/c Clement Israel arrived home Tuesday to spend a leave with his parents, Mr. and Mrs. Clem Israel, Southwick, and other relatives. Clement was aboard one of the ships in the Bikini at atomic bomb test, so was privileged to see much of that great exhibition. We have not had an opportunity to talk with him, so cannot say how long a leave he may have.

Callers in the Everett Fraser home Sunday were Mr. and Mrs. O. C. Smith of Culeaca and Mr. and Mrs. Oren Brewer of Juliaetta.

Mrs. Laura Beauchamp, Temple City, Calif., visited with her cousin, Mrs. C. H. Fry, and friends at Southwick, last week. Mrs. Beauchamp was a Southwick resident 40 years ago.

Beatrice Smith, Leland, is home from Lewiston, suffering with a "strep" throat. She was taken to St. Joseph's hospital in Lewiston on Saturday, and brought home Tuesday.

Mr. and Mrs. Jack Johnston of Spokane were Sunday visitors in the L. J. Herres home.

Mrs. G. W. McKeever and daughter Chloe were Spokane visitors on Saturday.

Walter Candler took a load of sheep to Spokane Monday for Paul Supply.

Mr. and Mrs. Gifford Candler and daughter Zelma were Tuesday evening dinner guests of Mr. and Mrs. Ben Westendahl and family. The occasion was in honor of Charles Westendahl's 10th birthday anniversary. That evening Mrs. Ben Westendahl received a telegram from Mr. and Mrs. Gerald Candler stating that they were the proud parents of a son, born at a Walla Walla hospital.

Mr. and Mrs. Charles Candler and Mr. and Mrs. Bud Candler and family were Sunday dinner guests of Mr. and Mrs. P. G. Candler.

Mrs. Leona Mermoid of Seattle arrived Saturday evening to spend a week visiting her aunt, Mrs. Estella Leith.

Barbara White and Jean Crocker were Lewiston visitors Wednesday. Villa Lou Harris and Virginia Doty of Lewiston were week-end guests in the Paul Lind home.

Mr. and Mrs. Paul Lind and son Bob and Mrs. Bina Raby were Sunday dinner guests in the Everett Blackburn home at Cavendish.

Sunday evening Mr. and Mrs. Frank G. Harris, Lewiston, were callers in the Paul Lind home.

Mrs. James McCall of San Diego, Calif., and Mrs. Albert Larson of Chula Vista, Calif., visited in the Edgar Long home Wednesday and Thursday.

Mr. and Mrs. B. F. Nesbit returned Tuesday evening from Minneapolis, Minn., where they had been visiting their son, Henry Nesbit and family, for the past month.

Mr. and Mrs. Geo. Brocke and Mrs. Chas. Andres were Spokane visitors

Approves Of Swim Pool

The following letter is entirely self-explanatory:
Dear Mr. McCarty:
Thank you sincerely for sending me the copy of the Kendrick Gazette which contains the story you were good enough to write concerning me and my feeling of compensation because of my sharing in the 4th of July celebration. I appreciate this very much.
And I am glad that the group felt that the Memorial Swim Pool should receive the contribution. You have a fine project there and it will prove a lasting source of pleasure to your people.
With kind regards,
Burton L. French.

ANDREW WILMOT, IDAHO PIONEER, PASSES AWAY

Andrew Wilmot, 83, a resident of northern Idaho from 1889 through 1927, died Thursday last week at a Phoenix, Ariz., hospital following a minor operation. He was well known in Wallace, where he operated a restaurant for many years, and in Kendrick, where he owned a pioneer public utility.

Mr. Wilmot had been in ill health for several years. He left northern Idaho (Kendrick) in 1927, to move to California, and a few years later moved to Arizona, where he had since made his home.

A colorful pioneer of the early days in the Coeur d'Alenes, he made his first entrance into that area in 1889, walking to Burke, Idaho, from Thompson Falls, Mont., with a friend. He operated mining boarding houses, hotels and other businesses in Wallace, but is best remembered as proprietor of the Gem Cafe for many years.

Active in Wallace civic affairs, he served on the school board for several years and was also a city councilman. In 1917, he sold his interests in Wallace and moved to Kendrick, where he took over the Potlatch Consolidated Electric Co., a public utility serving power and light to that community of about 500. Service was soon extended to Troy and Juliaetta, and in 1925 an extension was built to Deary and Bovill.

Mr. Wilmot disposed of his utility holdings to a group of Spokane business men in 1927, and they later sold to the Washington Water Power Co. He moved to California for his health, but soon moved eastward to Tempe, Ariz., where he made his home until about five years ago, when he moved to Mesa, Ariz.

During his later years in Arizona, he devoted most of his time to mining interests.

Mr. Wilmot was born in Texas, but at an early age he was orphaned and adopted by a store owner in southern Illinois. He grew to manhood in that area, but started west when he became 21. He worked in Colorado, California and Montana before coming to northern Idaho. At one time he was part owner of one of the largest theatres in Butte, Mont., but soon lost a fortune and headed for northern Idaho.

He is survived by his widow, Lucille, at Mesa, Ariz.; one daughter, Mrs. Arthur Dunkle, Troy, Mont., whose mother died while she was in infancy; and one son, Bill, publisher of the Pasco (Wash.) Herald, whose mother also died while he was an infant. Six grandchildren and one great-grandchild also survive.

Lyons-Benfell Nuptials

In a home beautifully decorated with huge bouquets of dahlias and asters, flanked by gleaming white candles, Miss Joyce Lyons, daughter of Mr. and Mrs. Frank Lyons of Southwick, and Leonard Benfell of Spokane were united in marriage at the home of the groom's parents by the Rev. Green, at 7:00 p. m., Saturday, September 21. Miss Mary Benven played the wedding march.

The bride was attired in a lace gown with finger-tip veil, and carried a bouquet of pink and white carnations. The bridesmaid, Mildred Oregon, of Colfax, wore a gown of powder-blue net, and carried a bouquet of mixed asters.

The groom and best man, Paul Carter, wore suits of blue, with white carnation boutonniere.

Only the members of the two families and a few intimate friends attended the wedding.

A reception was given immediately following the ceremony. The table was tastefully decorated in pink and white, centered with a big three-tiered wedding cake decorated with pink and white rose buds and topped with a miniature bride and groom.

After the bridal couple had cut the first piece of cake, the remainder was cut and served by the bride's mother.

After a short honeymoon Mr. and Mrs. Benfell are going to Seattle, where Mr. Benfell will enter the University of Washington.

Church Board Meeting

Official members of the Community church board met at the home of Rev. and Mrs. J. H. Coulter Tuesday evening.

The time was spent discussing the needs of the local church and plans were made for the coming year.

Mrs. Coulter served refreshments at the close of the evening.

Tuesday

Among those going from here to attend the funeral of Mrs. Ertle Thompson at Colfax, Tuesday, were the Mesdames Johanna Nelson, Bina Raby, Liddie Ameling, Lester Crocker and Harry Benscoter.

Mr. and Mrs. Ralph Reid and children have moved into the house with her parents, Mr. and Mrs. C. G. Arnett. Their household goods arrived from Tacoma Tuesday evening.

INTERESTING NEWS BITS FROM THE SOUTHWICK AREA

Mr. and Mrs. Elton McCoy had as dinner guests Sunday Mr. and Mrs. Clarence Whitinger and son, Wm. Henderson, Mr. and Mrs. Glen Daggett and children of Lewiston. Afternoon callers were Mr. and Mrs. Milton Benjamin and Mr. and Mrs. Irvin Fry and baby.

Guests in the Aaron Wells home Sunday were Mr. and Mrs. Tommy King and daughter Diane; Mr. and Mrs. Werner Ziemann of Lewiston, and Rollin Armitage and son.

Mrs. Mollie Daggett of Lewiston called in the Lettenmaier home Sunday.

Mr. and Mrs. Virgil Harris and family were dinner guests in the home of Mr. and Mrs. Don Cantrill Sunday evening.

John Meland returned home from Spokane Saturday where he has been visiting for the past ten days.

Mrs. Lou Watson and son Dick were supper guests in the Wilmer Hanks home Monday evening.

Mr. and Mrs. Gordon Harris were dinner guests in the Charlie Harris home Sunday.

Dinner guests in the Gordon Harris home Tuesday were Mrs. Leslie Beauchamp of Temple City, Calif.; Mrs. Minnie Wetmore of Yakima, Wn.; Mrs. Mattie Vaughn; Mrs. Buckles and Nellie Buckles, county superintendent of schools, all of Lewiston.

Mr. and Mrs. Charlie Mustoe of Sunnyside, Wash., were visitors on Tuesday in the home of Mr. and Mrs. Given Mustoe.

Mrs. Wm. Winters and son of Clarkston are spending this week in the L. J. Southwick home.

Jay Thornton was a recent business visitor in Kootenai.

Mrs. Hazel Bales of Grangeville was a recent visitor in the Longteig home.

Southwick School Notes

There are 18 pupils enrolled in the upper grade room. New pupils from other schools are: Joan Winters, James Finke and Gerald Erlwine.

There are 20 pupils enrolled in the lower grade room. The new pupils from other schools are Leslie, Wilma and Thelma Bradley from Astoria, Wash.; Fern Jennings from Dayton, Ohio and Patty Finke from the Golden Rule school.

We are using the new state adopted spelling books, but the new English texts have not yet arrived.

Ronald Lohman, Gary Gertje, Audrey Beck, Ronald Benjamin and Claudette Reed have been absent due to illness.

Miss Buckles visited school Tuesday afternoon.

The fourth grade have been studying about "Continents" in geography. We are organizing the school into a "Glee Chorus" and a "Choral Chorus."

The upper grade room held a meeting the first day of school to elect officers. Arlie Armitage was chosen president; Ronald Perry, vice president; Nina Lohman, secretary; Virginia Cuddy and Dick Watson, sergeant-at-arms; Gerald Erlwine, reporter and James Finke, librarian. Officers are to serve for six weeks, and 10c club dues are to be paid by each member. The money will be used for refreshments at parties or picnics during the term.

Mrs. H. B. Thompson Passes

Word was received here Saturday that Mrs. H. B. Thompson died in her sleep Saturday night at Pullman.

It is understood her son, John Brewster Thompson was home on leave and with his mother at the time of her death.

Mrs. Thompson was acting as House Mother at Ferris Hall, Pullman, when death came.

Mr. and Mrs. H. B. Thompson and family lived in Kendrick around 12 years, he being associated with the Kendrick State Bank, going from here to Colfax, where Mr. Thompson was cashier in a bank. Mr. Thompson preceded his wife in death about four years.

Survivors are a daughter, Mary Elizabeth Thompson, Denver, and a son, John Brewster, Colfax, and two sisters.

Mrs. Thompson will be remembered by her many friends here as taking an active part in civic and church work.

Funeral services were held Tuesday in Calfax at 1:00 p. m., with interment in Greenwood cemetery, Spokane.

Error In Wedding Report

In making a typographical error correction in the account of the Meyer-Silflow nuptials last week, another error was made. The paragraph should have read:

"A reception was given following the ceremony at the home of the bride's parents. The bride's table, four covered, was centered with a four-tiered wedding cake topped with a miniature bride and groom. After the bridal couple had cut the first piece, the remainder was cut and served by Mrs. Margaret Parks, an aunt of the bride; Miss Gertrude Widmer, the bride's cousin and Mrs. Harold Silflow presided at the punch bowl and coffee urn. Other assistants were the Misses Marjorie Wendt, Esther Wendt, Gladys Silflow and Irene Heimgartner."

We're sorry we make mistakes, but we're just like everyone else at this time — rushed and short of help.

Baby Girl Arrives

Mr. and Mrs. Stanley Mills, Gardfield, Wash., are the proud parents of a baby daughter, born Sept. 19. She has been named Judith Elaine.

Mrs. Mills will be remembered here as Marie Havens.

INTERESTING NEWS NOTES FROM KENDRICK SCHOOLS

Sports

The football team met the Lapwai team on the local gridiron last Friday, winning by a score of 18-0 in favor of Kendrick. On the field Kendrick made 17 first downs and Lapwai, three. However, all of Kendrick's scores were made in the first half.

Officials were Jasper Nutting and Charles Andres, both of whom have had considerable experience.

The Kendrick squad was composed of: Clinton Smith, fullback; George Brocke, Jr., quarterback; Ed. Johnson, left halfback; Kenny Brown, right end; Edwin Hanks, right tackle; Delos Miller, right guard; Loyd Ware, center; Jerry White, left guard; Elroy Kuykendall, left tackle; Boyd Thornton, left end; Clarence Alexander, right halfback. Other squad members are Jackie Mustoe, Bob Ware, Richard Kuykendall, Harold Halseth, Don Millard, Herb Millard, Dave Coulter, Bruce May and Frank Dammarell.

Our next game is with Lewiston, here, Oct. 2, and we hope to be as lucky with this game as the last one.

The Annual Staff

The Annual Staff has been chosen and is as follows: Patty McCreary, editor; Delos Miller, asst. editor; John Brown, sports editor; Wilma Benscoter, features editor; Nellie Fry, society editor; Evelyn Schupfer, printing editor; Raymond Easterbrook, business manager; Junior Brocke, asst. business manager; Doris Clemenhagen, art manager.

Definite plans have not been made as yet on the Annuals. We are checking different companies and the prices they would charge, as well as delivery dates. We are going to have the Annuals on time this year, and if we cannot find a satisfactory company, we will mimeograph the pages and paste the pictures in.

Senior Ball

The Senior class held a meeting Tuesday morning, and decided to hold the Senior Ball sometime the latter part of October. A definite date will be set when an orchestra can be obtained.

School Be Dismitted

School will be dismissed on October 3 and 4, as the teachers will be attending the District I. E. A. convention at Lewiston.

National Assemblies Program

Galen Miller Harvey in a fun and music program at the piano will be the first in a series of National Assemblies programs. It will be at the school house, October 8.

Hot Lunch Program

The Hot Lunch program will begin on Tuesday, Oct. 1. Prices per meal will be 15c. Mrs. Hiram Galloway will have charge, assisted by Mrs. Elmer Anderson.

School Carnival

The date for the school carnival is set for November 15. Mr. Long will be the director.

Grade School News

The first graders have begun their new readers, "We Look And See." The Achievement tests have not been given in the fourth grade as yet, due to many absences.

Donna and Ann Kanikkeberg enrolled in the sixth and fifth grades respectively, Monday of this week.

Delores Medalen enrolled in the eighth grade Monday.

Cold, Clear Nights

Friday night of last week, following the heavy rain storms of the preceding days, the skies cleared and a heavy white frost descended — nipping cucumbers and tomatoes here in the valley, and effectively killing those on the hills. Saturday night and Sunday night were also clear and cold, following beautiful Indian summer days — and the frosts that came with them put the finishing touches on the cucumber plants and other of the more tender garden varieties — but apparently did no further damage to tomatoes.

It is hoped that a stretch of real Indian Summer is here with us — for there still remains out-of-doors a goodly acreage of beans and oats, a little clover and a few patches of late-sown spring grain.

Farmers could use about two weeks of fine weather to real advantage.

Idaho Bean Forecast Good

Idaho dry field beans were favored by an unusually good growing season except for a rather prolonged hot spell during August. The forecast of production as of September 1, was 1,964,000 bags, the same as a month ago. The indicated yield of 1,650 pounds per acre remains as the highest ever harvested in the state if it materializes. The crop started maturing about a week earlier than usual and considerable cutting had been done by September 1st.

Production, by kinds, as of September 1, was estimated to be 1,139,000 bags of Great Northern; 310,000 bags of small reds; 80,000 bags of pintos; 25,000 bags of pea and medium whites; and 410,000 bags of other edible and garden seed varieties.

Can Pears

One hundred and four quarts of pears were canned at the school house Friday for the Hot Lunch. Those assisting were Mrs. C. G. Arnett, Mrs. Hiram Galloway, Mrs. C. E. Harris, Mrs. E. R. Brown, Mrs. Ben Westendahl and Mrs. Henry Jones.

Mrs. Ben Westendahl served gingerbread and coffee to the workers.

New Garage Roof

Everett Fraser has just completed the laying of a new shingle roof on his garage at his home on the school house hill.

Surprised On Birthday

A group of friends and neighbors dropped in on Mr. and Mrs. Ed. Gertje Sunday, in honor of his birthday anniversary. Those present were Mr. and Mrs. Harold Parks and family, Mr. and Mrs. Roy Gertje and sons, Mr. and Mrs. Chet McIver, Henry Bleck, Mr. and Mrs. Archie May and grandchildren, Dale and Caroline, the latter of Craigmont, and Mr. and Mrs. L. A. Grinolds.

The self-invited guests served a pot-luck dinner, including a beautiful birthday cake baked by Mrs. Harold Parks.

A most enjoyable day was spent.

NEWS ITEMS ABOUT LELAND RESIDENTS AND FRIENDS

Painfully Cut

Last Thursday evening, following the dismissal of school, Kathleen Crawford, daughter of Mr. and Mrs. Walter Crawford, and a seventh grade student, lost control of her bicycle coming down the schoolhouse hill, and plunged through a barbed wire fence, which cut a deep gash in her left thigh and left arm. She was rushed to Dr. Christensen's office in the school bus by Mrs. Fred Glenn, where she was given immediate attention. Many stitches were required to close the wounds.

She will be required to remain in bed at least a week.

Rally Day And Dinner

A Rally Day program, "Resources For Christian Living," will be given next Sunday, Sept. 29th, at 10:30. Sunday School classes will meet at 10:00 o'clock. Everyone is invited to come for the services and basket dinner which will follow.

There will be a business meeting following the dinner, at which the pastor will report on the District Conference. The Youth Fellowship will meet at the home of Betty Parks at 7:00 o'clock Sunday evening. Betty will lead the meeting.

Other News

Mr. and Mrs. Robert Erickson and family were supper guests on Thursday in the home of Mr. and Mrs. A. G. Peters.

Ben Hoffman, who had the misfortune to fall from a combine about two weeks ago and break several ribs, is much improved at this time.

Mrs. Harry Smith was called to Lewiston Friday evening by the illness of her daughter, Beatrice, who is employed in that city.

Mr. and Mrs. Roy Craig entertained Sunday with a supper to celebrate their wedding anniversary. Guests were Mr. and Mrs. Jesse Hefel and family, Mr. and Mrs. Robert Draper and Ervin Draper.

Sunday dinner guests in the home of Mr. and Mrs. Lloyd Craig were Mr. and Mrs. Robert Erickson and family and Mr. and Mrs. Gordon Peters and daughters.

Mrs. Rachel Daugherty of Spokane is spending several days this week with her daughter, Mrs. A. G. Peters, and other relatives.

The Leland Methodist Youth Fellowship enjoyed a supper and recreation hour at the church last Sunday evening preceding the meeting. There were 16 present, including, some of the junior group. James Thornton led the meeting.

School Notes

Suffers Fall. Miss Hennis was unable to be in school last Thursday because of bruises suffered in a bad fall experienced Wednesday evening when on her way home from school.

4-H Club Leader Visits. Leonard Wolff, local leader of the Boys' 4-H club, visited school last Wednesday morning to view the film on 4-H Club work, which was being shown.

County Superintendent Visits. Miss Nellie Buckles, County Superintendent of Public Instruction, visited all day in our school Monday of this week.

New Projectionist. Charles Parks is replacing Howard Wolff as student projectionist for the balance of this year.

This Week's Showings. Two very interesting and instructive films were shown this week. The first, "How A Plant Grows" showed how the seeds germinated and grew into a full-grown plant. The second film, "Do Unto Animals," showed how many animals are killed or injured in transit to market by improper methods of handling.

Road Finally Given Approval

Wednesday afternoon of last week the Kendrick Highway District commissioners, Harley Eichner, E. T. Long and John Galloway, came into the Gazette office waving the newly received and approved forms that assure construction of the new American Ridge road — and attached to the long-awaited forms, bearing the signatures of this district's commissioners, were the checks that represented the Kendrick Highway Districts part of the funds — the men were losing no time in getting the signed papers back to Boise, in the hopes that advertising for bids would begin at once.

This action (on the part of Boise) assures construction of this road — a road needed ever since the cloud-bursts of last June — but on which, for some reason or another, work has been delayed, and delayed again — but now there is no doubt but what it will be built, and soon.

The lack of this road has inconvenienced American ridge residents seriously, forcing them to haul grain, cattle and other farm products many miles further in order to reach their market, and since the beginning of school, all the students on the lower end of the ridge have been forced to go by the way of Juliaetta — or else ride horseback.

True, the Kendrick and Juliaetta Highway districts did their best to fix up the old road — but it's still a long way from being a highway.

PERSONALS AND NEWS ON AMERICAN RIDGE

Mrs. Alvina Groh returned to the Geo. Havens home Sunday evening after spending the week-end with Mr. and Mrs. Henry Brammer and Mr. and Mrs. Herman Meyer. Mr. and Mrs. Brammer spent Sunday evening at the Havens home.

Mr. and Mrs. Harry Benscoter attended the funeral of Mrs. Thompson at Colfax Tuesday, that evening on their way home they called on Grandmother and Mrs. Greene, at Moscow.

E. P. Roberts, Norla Callison, Mrs. Harry Benscoter, Mrs. Walter Benscoter and Perry Mattoon were in Lewiston Wednesday to have their blood "typed," as possible aid for Frank Roberts, who is to undergo an operation there today (Thursday). Mr. and Mrs. Roberts took him to the hospital Tuesday.

Mrs. Pearl Chaney and sister-in-law of Troy, were Sunday afternoon callers of Mrs. Sam Bigham.

Mr. and Mrs. Norla Callison and family were visitors in Lenore Sunday at the Walter Weaver home.

Lloyd Farrington is bulldozing a pond at the Callison home.

Mr. and Mrs. Wesley Peterson and son of Moscow were Sunday dinner guests of Mr. and Mrs. Walter Benscoter and family.

Mrs. Geo. Havens and son Rayner and Mrs. Alvina Groh were Friday afternoon callers at the Walter Benscoter home.

Guy Smith and Mrs. Maude Patch of Buffalo, Wyo., were Friday night guests at the Harry Langdon home.

B. Assmann of Portland arrived Monday for a few days vst at the Langdon home. Mr. and Mrs. Langdon took him to Lewiston on Wednesday, from where he left for Portland. Mrs. Langdon remained in Lewiston to visit with her daughter Erma for a few days.

Larry Langdon went to Spokane on Tuesday to attend a C. I

INTERESTING HAPPENINGS NOTES FROM JULIAETTA

Mr. and Mrs. Carl Thies and Bill Hicks, who have been visiting for the past three weeks with Mrs. Thies' brother and Mr. Hicks' brother, Chas. Hicks and wife, left for their home in Union City, Indiana, the first of the week.

Mrs. E. A. Kirkpatrick and brother, Gordon Swears, left for Spokane on Tuesday to be with their mother, who is to undergo surgery.

Teachers from the Juliaetta school attending the I. E. A. meeting at Moscow Friday, Sept. 13, were: Mrs. Mary Adams, primary teacher, Mrs. Laura Darby, intermediate teacher; Mrs. Lewis Lindquist, Commercial and Biology teacher, and Mrs. Trombetta, supt., Math. and Science.

Miss Betty Burns, accompanied by her father, Arl Burns, and Mr. and Mrs. Earl Parks, were Sunday dinner guests of Mr. and Mrs. Bob Burns in Moscow.

Mr. and Mrs. Woodrow Nye and Buzz Nye are spending their vacation in Clarkston, Wash.

Mr. and Mrs. Sam Haddock and daughter Carol, Mr. and Mrs. Einar Alvin Nye and children of Clarkston spent the week-end at the Woodrow Nye home here.

Mrs. Virgil Dygert and Miss Alice Brown were Lewiston visitors Saturday.

Sunday dinner guests at the Jack Hammond home were Mr. and Mrs. Melvin Courtney and children and George Courtney, of Peck.

School Notes
Juliaetta students held their first Student Body meeting this fall, with a larger enrollment of students. The class officers were selected at this time as well as advisors. Officers are: Leonard Weber, president; Dickie Johns, vice president; Donald Johns, secretary; Minnie Peters, treasurer.

Senior Class officers are: Donald Johns, president; Claude Clark, vice president; Minnie Peters, secretary; Betty Burns, treasurer; John Trombetta, advisor.

Junior Class Officers: Dick Johns, president; Shirley Hadley, vice president; Neil Candler, secretary; Alice Brown, treasurer; John Trombetta, advisor.

Sophomore Class officers: Charlie Berreman, president; Richard Hammond, vice president; Marjory Johns,

secretary-treasurer; Mrs. Margaret Covington, advisor.

Freshman Class officers: Jo Anne Peters, president; Peggy Hadley, vice president; Frankie Peters, secretary; Jackie Hammond, treasurer; Mrs. Lewis Lindquist, advisor.

At the opening meeting of P.-T. O. held in the school house last week the following officers were elected for the school term: Mrs. Melvin McKellips, president; Mrs. Henry Black, vice president; Mrs. Mary Adams, secretary; John Trombetta, treasurer. Plans were made to start the Hot Lunch program Monday, Sept. 23, with Mrs. Allan Grayson, cook.

STONY POINT VICINITY

Fay Heath, Byard Parks and Kathleen Steigers are attending the U. of I. at Moscow this year.

Edgar, Ruth and Carol Sue Heath were Sunday dinner guests at the Newt. Heath home.

Word has been received here that Mrs. Bob Willoughby has been very ill at her home at 1895 Humboldt Street, Santa Rosa, Calif. She has asked her friends here to write to her.

Sgt. Billy Steigers is anxiously expected home from Guam in the near future, but as yet no definite word of his sailing date has been received.

Marion Stevens has started putting tan brick siding on his home.

Bobby Coffland was a Sunday dinner guest in the Marion Stevens home.

Mr. and Mrs. Eldon Heimagrtnr and sons have moved to their new home here.

There was a light frost in this area Saturday night.

Installing New Lights

Otto Schupfer and E. W. Jones were busy Monday and Tuesday installing new "cold light" fixtures in the Red Cross Pharmacy.

These fixtures and lights are of the very latest type. The new "cold light" employs a long tube similar to fluorescent, but does not have the "cycling" or flutter of that light. It is said, too, that the light tubes will last much longer.

Anyway, the new fixtures produce a wonderful "daylight" light, and add materially to the appearance of the store.

Planning Room

Don't decide on the size and shape of the room until you know what furniture you will use and how it will be arranged. Common sizes of living rooms are 12 to 18 feet wide and 16 to 30 feet long. The fireplace is the center of family living in the living room, so place it for comfort and beauty. This is generally on one of the long sides of the room. Don't build a mantel between doors leading to a porch or just opposite a side entrance. This hinders traffic. Place windows to give best views and the most light and air. Living room window sills should be low enough to allow a clear view of the outside when sitting. In a small house, there are definite advantages to combining the living and dining rooms to give a feeling of more space and greater size. When the two areas are thrown together, larger gatherings can be entertained.

Golden Fleece

Once the exclusive property of the Inca and his royal family, the golden fleece of the vicuña—the smallest and most delicate member of the camel family—is today being woven into attractive souvenirs and sold to tourists at Indian market places in Bolivia and Peru. These priceless souvenirs include hand-woven scarves, rugs, gloves, slippers and ponchos. Restrictions on the killing of the animal and the export of the fleece from its native habitat in the altitudinous regions of Peru, Chile and Bolivia have kept the fashionable cloth from the world markets and made the souvenirs all the more valuable. Only a very limited amount of the exquisite vicuña fleece is coming into the country at present, small shipments being the result of an experiment in Peru where instead of being slaughtered, the vicuña is being domesticated and shorn of its fleece.

Bright Spot In The News

Mingled with news of shortages and shutdowns, or rationing and wrangling, it's refreshing indeed to read of a company that has had neither labor trouble nor "pricing obstacles" — a manufacturer that is pushing ahead a major expansion program while industry is struggling through strike after strike and a disrupted national economy.

It's good to know, too, that this company has achieved its largest measure of new success with an idea that already has eased working fatigue and increased productivity for more than 100,000 farmers.

A team of three brothers in a town less than 50 miles from Detroit is responsible for this one bright spot in the news. They are the McIntyres of Monroe, Michigan, who, in a recent 15-minute conference signed a new contract with their 1,500 employees, granting them an

18½-cent-an-hour raise, and reported to them that the company now is the largest independent maker of hydraulic ride control equipment in the world.

While the company's products now are used on most new passenger cars, on trains and trucks, on motorcycles and motorboats, the company is proudest of its first new postwar idea, conceived by the three McIntyres, themselves farm owners, and the oldest a member of the agricultural committee of the Detroit Board of Commerce.

The three McIntyres have a simple formula for employee relations that has played a big part in the growth of the company. Workers are paid on a base hourly rate, plus piece work, which makes their average normal pay 20 per cent higher than the average. Then, after normal dividends are paid to stockholders, the remaining profits are divided into four equal parts. One part is paid to the stockholders in the form of extra dividends. The second part is paid to employees in the form of a bonus, in proportion to earnings and length of service. The third is used to purchase additional equipment and to add floor space, thus increasing production and providing more jobs. The fourth part is for additional working capital to handle the greater volume of business.

Here is a formula, proved in operation, that might well be eyed by management and labor as a whole

as one answer to their current problem, and supports our long-time contention that there are ways to settle labor disputes without a strike.

Going Fishing?

Going fishing? You won't lack company, for the Idaho fish and game department reported yesterday the unprecedented total of 38,609 resident licenses to date. The figures, compiled by Ray Bussard, license clerk, show a new all-time record — almost twice as many licenses being sold as were purchased during the same period for last year, when the total was 21,882.

Tremendous increases in non-resident fishermen are also noted. During the same period 2,211 non-resident season licenses were sold, compared with 876 last year, with the current volume nearly three times that of the past season. Non-residents fishing only 10 days in Idaho are also more numerous than ever before, a total of 372 buying that class of license, compared with 171 a year ago.

Miss Bussard said it appeared virtually certain that the 1945 record of 162,000 licenses of all sorts would be far exceeded in 1946, even though the present volume subsidies, which is not likely, as vacation season has just begun.

Kentucky, with six, has furnished more Speakers of the House of Representatives, than any other state.

PROTECTIVE COATINGS AT BARGAIN PRICES!

**PHENOLIC
LUSTERLESS ENAMEL**
4,102 gallons

Colors: outside black and
olive drab.
Suggested Uses: machinery,
buildings inside and out.

Price per gallon
80c
(Minimum sale, 40 gals.)

**RED LEAD
IN LINSEED OIL**
30,000 gallons

Price, per gallon
\$2.40
(Minimum sale, 20 gals.)

**OLEORESINOUS
EMULSIFIED PAINT**
35,608 gallons

Oil in water type, ready
for use after mixing with
equal parts of water, gaso-
line or kerosene — dries in
a few hours. May be
brushed or sprayed.

Colors: loam, olive drab,
field drab.
Suggested Uses: wood, brick,
masonry, concrete, plaster,
basement walls, interior
walls, storerooms, concrete
floors, exterior surfaces.

Price, per gallon
49c
(Minimum sale, 100 gals.)

**OIL TYPE
READY MIXED PAINT**
13,909 gallons

Ready for use; contains
linseed oil; washable.

Colors: black, loam, earth
brown.

Suggested Uses: wood, brick,
masonry, concrete, farm
buildings, warehouses,
fences, plant maintenance,
mining property, railroad
buildings.

Price per gallon
49c
(Minimum sale, 100 gals.)

SPECIAL PRICE on all OLIVE DRAB and LOAM COLOR PAINTS,
regardless of kind, enamel, oleoresinous or oil type.
Price per gallon, in 500-gal. lots..... **30c**

U. S. A. And The British Loan

In our opinion Great Britain does not particularly need to borrow \$3,750,000,000 from the United States, and we don't particularly need to lend it to that government. Both of us are able to "shiny on our own side."

Editorial writers have used, misused, copied and repeated the old chestnut: "Since trading finances did not operate in a political vacuum, we can take it for granted that the vote on the loan will also powerfully influence the course of world politics."

The United States has gotten the "bad end of the stick" in every effort that has been made "to operate in a political vacuum" with old time Europe, which produces most of its products and carries on its world trade more economically than the United States has ever done or can ever hope to do.

British, German, French, Danish and other European ships have all had "the best of it" in the shipping

business, for illustration, because their price and wage scale were cheaper than ours. They will continue to hold those advantages.

If we are going to "grub stake" England and all the rest of the world, literally as well as figuratively, then how can we expect to create that imaginary world trade out of a "political vacuum" that is so deep that we can't reach bottom?

Then, if our memory fails us not, there remains the debt of World War I. There also remains the matter of those naval bases we wanted in both the Pacific and Atlantic, bases for which this nation paid in lives as well as money—but which it seems we aren't going to be allowed to retain because they were on "British, French, Dutch" or other possessions.

Surely America must have some real statesmen somewhere. Why can't they be found?

Let the world know your needs, or what you have to sell. Advertise!

Learning The Hard Way

An entire community—hotel, store, garage, homes—was destroyed by fire recently in the state of Washington. In ten minutes thousands of dollars worth of property and a town were wiped off the map. Thirty families were stranded. Fortunately, no lives were lost.

In this case the fire may have been avoidable. It was thought that a chimney spark on a dry roof started the conflagration. However, the citizens of this town will not forget the lesson they have learned. When they build again, and that will be no easy job in these days of shortages and high costs, they will undoubtedly give serious thought to the elimination of fire hazards. It is a good bet that hereafter they will make certain that their fire fighting equipment is in good order. If they have any luck at all, the nation's No. 1 property destroyer will find slim pickings in their region for a long time to come.

It should always be remembered

that fire is one enemy (as well as a friend) that we always have with us, and care should always be taken with it, especially now that the hot, dry season is here.

Here are a few simple rules: Never build a bigger fire in your stove than is absolutely necessary. Start it slowly so that sparks will not flare up the chimney. Use the minimum amount of fuel, and close all drafts as soon as possible.

If burning trash outdoors, do it early in the morning when air is moist, and be sure your barrel has a fine screen to prevent any spark drift.

Never burn dry grass, slashings, stubble, etc., without first obtaining a permit from the local fire warden, and then make sure that you have plenty of help and adequate equipment to handle any eventuality.

Go to friends for advice; to women for pity; to strangers for charity; to relatives for nothing. — Old Spanish proverb.

Russia Gets Ice-Free

Finnish Arctic Port

By receiving the Petsamo region from Finland under the peace treaty, Soviet Russia obtains an ice-free port which was formerly the Finns' "back door" on the Arctic ocean. Although Petsamo was Finland's northernmost harbor, it was the only one that remained usable throughout the year, says the National Geographic society. The Gulf stream, hugging Arctic shores, warms the waters of the bleak fjord while Finnish harbors on the Baltic nearly 700 miles south freeze solidly at times in the winter.

The region inland from Petsamo formerly formed a narrow corridor from the Arctic to Finland proper. The Arctic highway, "Finland's Burma road," ran through this corridor to connect with the country's rail system. Also situated in the Petsamo corridor are rich copper and nickel mines, the latter owned largely by a Canadian combine. The USSR has agreed to buy the mines from the Canadians.

The treeless interior is sparsely populated by Lapps, who, unlike their nomadic tent-dwelling brothers in other parts of Scandinavia, live in log cabins. They survive chiefly by means of a reindeer economy, but also they farm and fish. Along the fjords, fishing is the principal occupation not only of the Lapps but of the Finns who live in this far north land.

U. S. to Set Up New

Caribbean Quarantine Post

As a result of congressional legislation the U. S. will establish an animal quarantine station on Swan island, 150 miles off the coast of Honduras in the Caribbean sea. It is designed to facilitate importation of disease-free livestock into the United States for breeding purposes and to protect this country's livestock industry from animal diseases of foreign origin.

The quarantine station on Swan island, a United States possession, will be operated by the department of agriculture's bureau of animal industry, but its facilities will be available to other countries.

Establishment of the station will be of particular importance to livestock breeders in the United States as it will provide a safe means by which they may import certain strains of livestock in demand in this country for breeding purposes, such as Zebu cattle and Caracul sheep. Operation of the station will not, in itself, remove any existing department of agriculture animal quarantine requirements. However, it will make it easier for imported livestock to conform to present quarantine regulations and will safeguard United States livestock herds from contracting diseases from imported animals.

Specialists List Food

Budget for Family

Canning, freezing, drying and fresh storage of foods must be planned together, according to family tastes for the different foods. While specialists recommend 100 quarts of canned goods for each person, and a number of bushels of fresh stored foods, one family may have no good storage space available for fresh foods, and may therefore increase the amount of canned goods. Likewise, a family that has a frozen food locker will probably freeze many foods that would be canned by another family.

About 4 quarts of canned greens, 20 or more quarts of tomatoes and tomato juice, and 30 quarts of other vegetables for the canned goods are recommended for each person. Along with this, 25 quarts of canned fruits and 6 quarts of jellies and preserves, along with 6 quarts of pickles are suggested.

For the family with a large garden, specialists recommend storage of 1½ bushels of potatoes for each person, together with several heads of cabbage, 1½ bushels of root vegetables, 1½ bushels of fresh fruits such as apples, 12 pounds of dried beans, peas and fruits, and 25 to 35 pounds of cured meats.

Can With Honey

E. J. Thiessen, research worker in foods and nutrition at the Wyoming experiment station, describes honey as excellent for use with canned pears and canned apples. Miss Thiessen based her report on wartime studies of sugar substitutes. She said that the flavor of the honey blended well with the fruits listed. Judges scored it as "fairly good" with plums but did not like it with peaches. Honey should be used in half and half combinations with sugar for good canning results, the food specialist said. The cost for honey is perhaps a little higher than for sugar, but the honey will save on the use of rationed sugar. Addition of a small quantity of powdered ascorbic acid adds to the nutritive value and prevents darkening of canned fruit with storage, she said.

White Snakeroot Poisonous

White snakeroot, a slender, erect, perennial herb which grows from one to five feet high, is poisonous to cattle. The leaves grow opposite each other and are three to five inches long, oval, pointed and have sharply toothed edges. Each leaf has three main veins which are prominent on the undersurface and many branches. The plant blooms in late summer, producing attractive clusters of eight to thirty small white flowers. The roots are coarsely fibrous and usually shallow. Snakeroot grows in the damp, rich soil of woods, swamp areas and shady ravines and in groves along streams. It also is sometimes found on cleared hillside and in orchards and orchard pastures. Animals with chronic cases of snakeroot poisoning show a marked sluggishness and fatigue and a trembling of the muscles, following exercise. In horses the disease runs a rapid course, the animal often dying within two or three days after the symptoms appear.

Attractive Salads

To make salads attractive, take more care in arrangement. Consider the rim of the salad plate the frame of the picture. Place the lettuce so that the outer edges are just within the rim—never hanging over the edge. Foods of harmonizing color should be used. Don't forget a few garnishes to complete the salad picture. To preserve the crisp, fresh appearance of garden vegetables have them thoroughly chilled. Prepare the foods for salads a day in advance, and keep them in the refrigerator overnight. For a texture contrast—use something crisp with something soft. For example, use celery in fish, egg and vegetable salads; use shredded cabbage or lettuce in shrimp, vegetable or fruit salads.

Laundering Shirt

Shirts are easy to launder, if you follow the proper procedure. Remember that, when cottons are concerned, the hotter the water the better. Rayon and rayon mixtures, however, should be laundered at a lukewarm temperature. Put the shirts through two batches of suds, and treat heavily soiled collars and cuffs with a soft soapy brush. Don't rub portions of the fabric together—that invites fraying. When washing cotton, remember to have the first rinse water as hot as the wash water. For drying, hang by the tails of the shirt to prevent the excess water running down and streaking the upper portion. Roll shirts in a towel and iron when not too damp. Begin with the collar. Press double thicknesses on the wrong side, then on the right. Iron the yoke and the cuffs. Iron the sleeves double, starting at the fold on the underarm seam. Press the back of the shirt, and the fronts last. Always iron the double thicknesses on the wrong side first, and be careful not to let the iron get too hot.

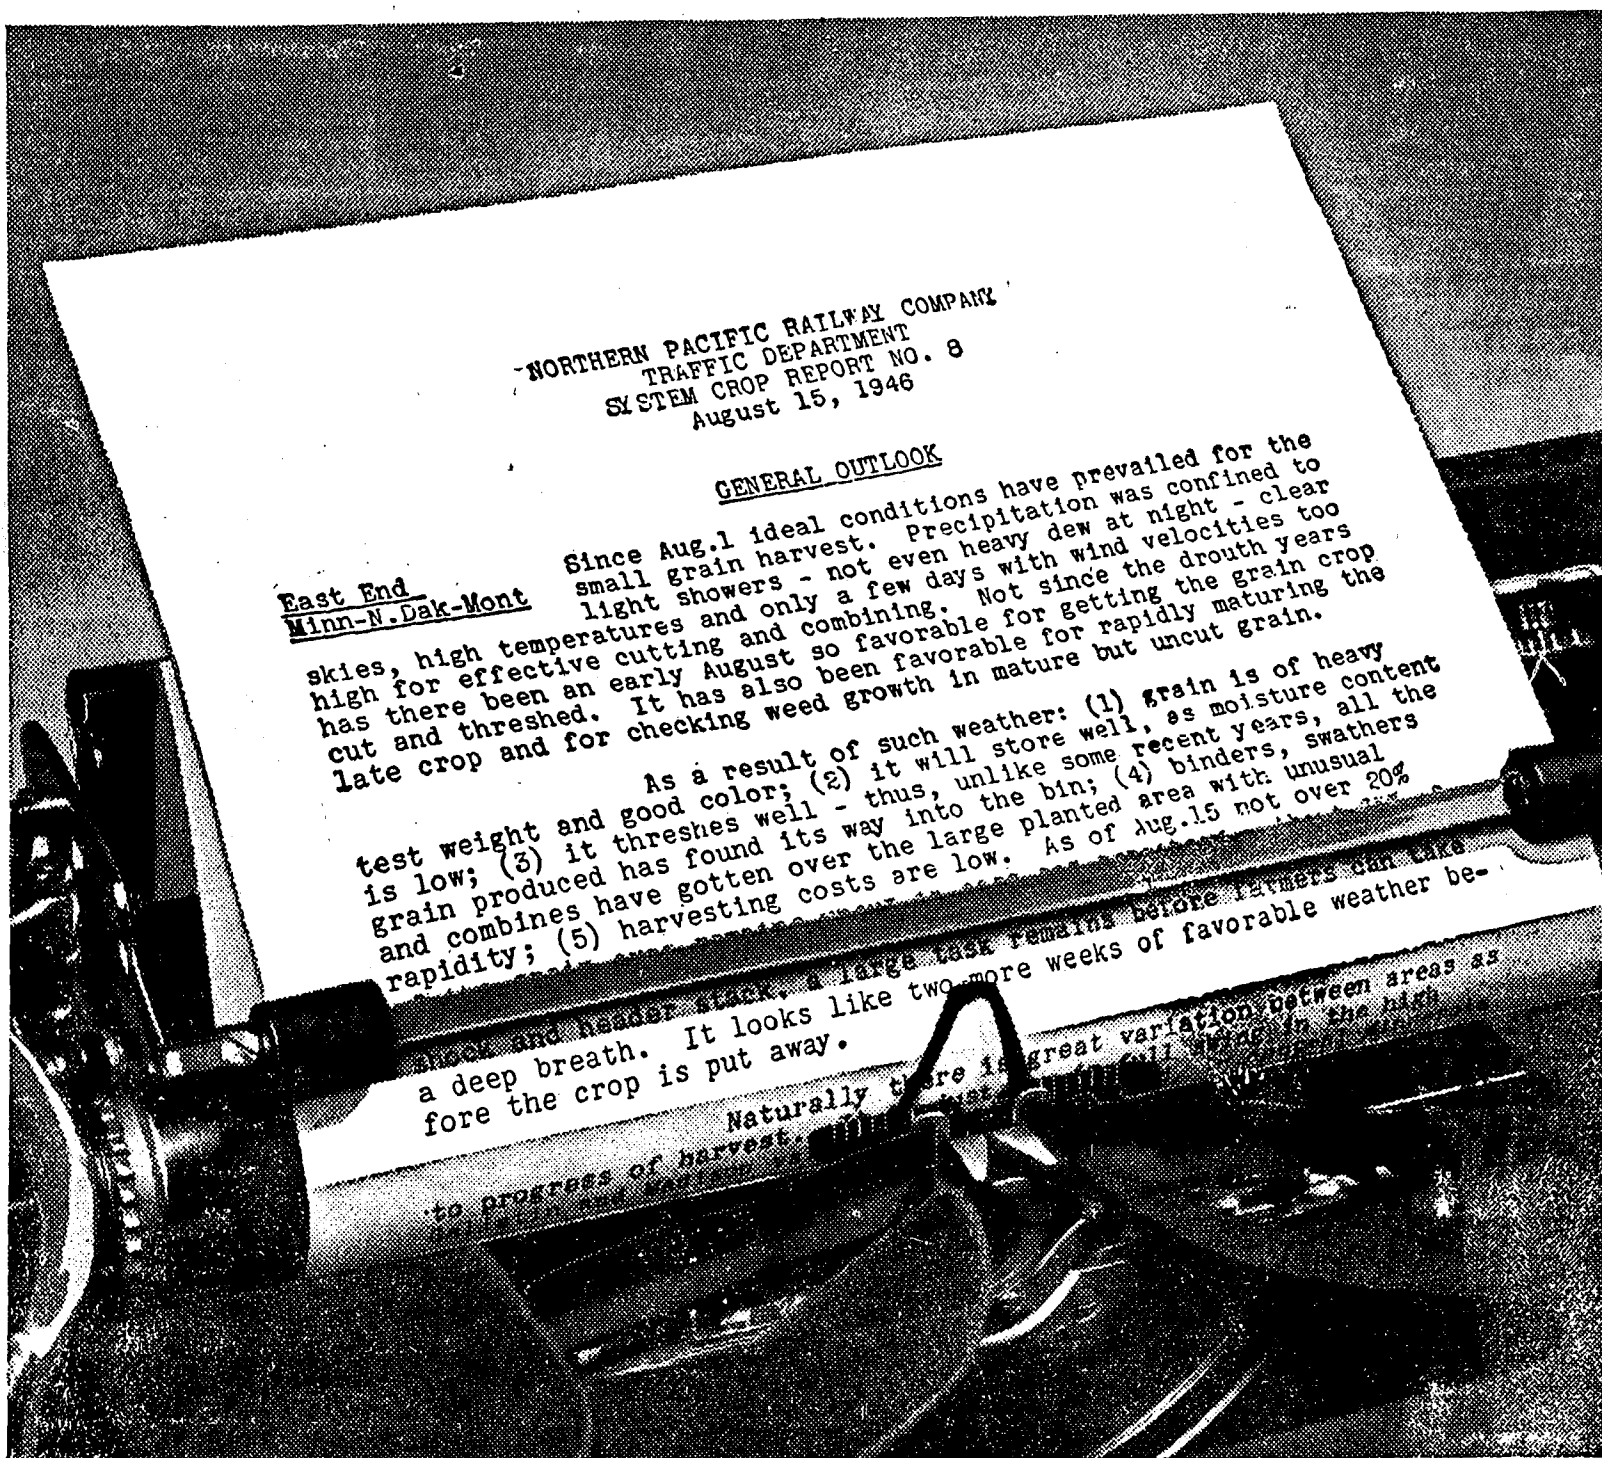

Indian Culture

The oldest and most numerous element of the southeastern Indians were the so-called Muskogean, whose chief tribes were the Creeks, Choctaws and Chickasaws. They were the peoples through whom De Soto passed on his momentous expedition from the coast of Florida to the Mississippi, which first opened up the interior of the North American continent. They were town dwellers with a fairly advanced primitive culture which, it is believed, was derived primarily from the American culture center—the long narrow strip extending from southern Mexico to Bolivia, where New world civilizations appear to have been born and from which they spread in various directions. Thus the Muskogean, in their religious and political institutions, seemed to reflect in many ways the more advanced peoples of Mexico.

Wash Salad Bowl

Wooden salad bowls need the same thorough soap and water cleansing that you give other kitchen utensils. Modern cooks no longer believe in letting oil or vinegar remain in the wood after use. It's an unsanitary habit and the disagreeable odors are just as likely to remain as the pleasant ones. To keep your wooden salad bowl in condition, wipe it immediately after use with a clean cloth. Then scrub it with a small brush that has been dipped in lukewarm soapy water. Rinse with cold water and dry thoroughly. Never soak a salad bowl or immerse it in water. If it is kept away from heat there is little danger of warping.

MAIN STREET

Battle of the crops...blow by blow

"As these carefully chosen words were tapped out at Northern Pacific headquarters last month, it looked as if the Northwest's part in the battle to feed the world were nearly won. And the whole thrilling story has unfolded fortnight by fortnight in the close-packed pages of NP's System Crop Reports.

It was a see-saw struggle. Report No. 2 (May 15) was bad: millions of acres of flax, barley, oats and sugar beets suddenly laid low by freezing temperatures... wheat hanging between life and death. Report No. 3 (June 1) showed some recovery. Not until No. 5 (July 1) did the miracle happen: from drenching rains came a "surprising recuperation of crops." Then in No. 8 (Aug. 15): "Not since the drouth years has there been an early August so favorable for getting the grain crop out and threshed."

These swift, accurate reports on all crops that grow along "Main Street" are compiled through hundreds of local observers up and down the line. They are used not only by NP but by millers, grain brokers, canneries, produce men and makers of farm machinery to help them catch up with changing crop conditions. Thus,

sensible private planning by a railroad becomes a really useful public service.

If you know of a better way to run a railroad, we'd like to hear from you. We'd like to hear from you anyway.

Better Oppose Socialism Now!

For the past decade the advocates of Federal socialism of this and that, and especially electric power, have had a clear field to malign private companies. Anyone who objected to the elaborate plan to substitute socialized power for private enterprise, as a matter of principle, was immediately branded a tool of the power trusts, an economic royalist, or some other unsavory term. The fact that socialized power is wholly contrary to our theory of government is carefully hidden from the people by its advocates.

When the private electric industry, long silenced by abuse from Washington, became vocal and decided to fight for its life, it was accused of "lobbying," an activity which power socialists considered their exclusive privilege. To silence the utilities, a bill to investigate their actions was proposed. But when it was enlarged to include the lobbying efforts of countless members of all government bureaus, including the gigantic Department of the Interior, long the main promoter of socialized power

in America, the matter was dropped. The utilities state they welcome Congressional inquiry into their organization and activities, and that under Article I of the Bill of Rights, they are entitled to petition congress for redress of grievances, and will avail themselves of that right.

It is time that "public servants" be made to account for the use of tax funds to build a public power monopoly which is exempt from the anti-trust laws; the general tax laws, and which when established changes our form of government. It is time for industry and individuals to oppose, as never before, the encroachment of European socialism that is proposed for the United States under various guises and skillfully hidden names.

There is no clay in a modern clay pigeon. These extremely brittle trap-shooting targets are made of molten pitch, mixed with pulverized limestone and poured into water-cooled moulds.

Trade at home. Buy it in Kendrick!

SET YOUR SIGHTS

It takes
planning
to achieve
a goal

Some young men know what they want and plan for it. Others are still looking for their niche: The new Regular Army can help both.

Perhaps you want to go to college but can't afford it. If you enlist in the Army, you'll get your chance. Honorably discharged after a three-year enlistment, you are eligible for 48 months of education at any college, trade, or business school for which you can qualify. The Government will pay your tuition, laboratory fees, etc., up to \$500 per ordinary school year, plus \$65 a month living allowance—\$90 a month if you have dependents.

If you haven't found your spot, an Army enlistment offers you training in any of 200 trades and skills. You leave the service eligible for further training at the best civilian schools.

You can assure yourself of the benefits of the GI Bill of Rights if you enter the Army on or before October 5, 1946. See your nearest Army Recruiting Station for details.

HIGHLIGHTS OF REGULAR ARMY ENLISTMENT

1. Enlistments for 1½, 2 or 3 years. (1-year enlistments permitted for men now in the Army with 6 or more months of service.)
2. Enlistment age from 18 to 34 years inclusive (17 with parents' consent) except for men now in Army, who may enlist at any age, and former service men depending on length of service.
3. A reenlistment bonus of \$50 for each year of active service since such bonus was last paid, or since last entry into service, provided reenlistment is within 3 months after last honorable discharge.
4. A furlough for men who reenlist within 20 days. Full details of other furlough privileges can be obtained from Recruiting Officers.
5. Mustering-out pay (based upon length of service) to all men who are discharged to enlist or reenlist.
6. Option to retire at half pay for the rest of your life after 20 years' service—increasing to three-quarters pay after 30 years' service. All previous active federal military service counts toward retirement.
7. Choice of branch of service and overseas theater (of those still open) on 3-year enlistments.

**Stronger Body Helps This New Tire OUTWEAR PREWAR TIRES**

No sensible driver would deliberately run his tires over a rock like the one in the picture. But sometimes it can't be helped...and that's when you will be glad if you have B.F. Goodrich passenger car tires. Built with more and stronger cords, the tire body is better engineered and 35% stronger than in wartime tires. But in building this stronger

body to hold the more durable, wider, flatter tread, B.F. Goodrich engineers built into it greater resistance to "road shock." Supplies of this new tire are still limited. However, we'll do our best to keep your car rolling until we can get new tires for you.

Army Experiments With**Cement for Seam Use**

Experiments in the use of cements as substitutes for thread in closing the seams of clothing, gloves, tentage and other equipment made of fabrics are being conducted by the quartermaster corps. During the war it was found that stitched seams constituted one of the least satisfactory factors in military clothing. Sewn seams of raincoats and water-proof garments often permitted the penetration of moisture, and a large proportion of failures in army clothing and equipment occurred at the seams. Studies showed that stitching failures appeared in 59 per cent of the garments examined.

The properties of specialized adhesives have improved to such an extent during the last few years that cements are now available which have a bond strength greater than that of fabrics. Some of the new adhesives are capable of withstanding wide extremes of temperature and high humidity. They are fairly flexible, have long life, and resist water.

The purpose of the research is to develop cemented seams that will function satisfactorily at high or low temperatures, under flexing and tension, and will remain stable when subjected to standard army laundry treatments and to aging under widely varying climatic conditions.

Jonquil Is an Offshoot**Of Narcissus Family**

Botanically, the narcissus, the jonquil and the daffodil are all narcissus.

All daffodils are narcissus and all narcissus are daffodils. Daffodil is the English word, and narcissus the Latin word, for the same flower.

The term jonquil, when properly applied, refers to one specific group of narcissus, which are miniature daffodils with dainty fragrant yellow blossoms, borne two or more on a stem, perfectly hardy, with onion-like instead of flat leaves. "Jonquil" should be used only for this one class of narcissus.

Classifications of the various types of narcissus are made according to the length of the trumpet as compared to the perianth. (The "trumpet," "crown" or "cup" is the name given to the center portion of the flower; the "perianth" is the surrounding row of petals or wings; and a "segment" of the perianth is one of these outer petals.)

Dog Comfort

To keep dog dishes clean, never leave odds and ends on his plate to go bad. Scrape off the remains of his last meal promptly, and rinse off his dishes. Then dunk them in very hot water and plenty of soap suds. Rinse well, and leave them to drain dry. Change your dog's drinking water several times a day. And launder his bedding often to prevent that "doggy" smell. Dogs should be bathed every month during the hot weather both for their own comfort and yours. A thorough shampoo will work wonders on their coats, but drying well is important as dogs are susceptible to rheumatism, even in summer. Between baths, keep your dog well groomed with regular brushing, washing out the brush and comb after each use with soap and water. If you suspect your dog has fleas (and when he's rolling around in the dust all day it would be surprising if he hadn't) put a collar of dry suds around his neck before you start bathing him. Then if any one of the bugs tries to escape onto his face, they'll be caught by the suds.

Ringworm Treatment

The ringworm of the scalp epidemic, prevalent in many cities in the United States and Canada, affects approximately four boys to every girl, according to Lee Carrick, M. D., of Detroit, who made a study of 171 cases at the City of Detroit Receiving hospital. Dr. Carrick, who is from the department of dermatology and syphilology, Wayne university college of medicine, states that x-ray removal of the diseased hair by the roots is the treatment of choice but "there are neither the facilities nor enough qualified personnel available for successful execution of such a tremendous task." Three ointments, one developed from a copper compound and the other two from some fatty acids and their salts, are described by the author as valuable for local treatment in the fight against ringworm of the scalp. However, Dr. Carrick cautions that none of these ointments should be considered a substitute for x-ray removal of the hair.

Southeastern Indians

The Indians of the southeastern United States when the white men came represented a conglomerate of primitive human cultures. Their ways of life ranged from that of nomad hunters and fierce warriors to that of peaceful farmers. Their governments varied from absolute monarchies to democracies. Their religions extended from primitive animism to fairly well organized theocracies with temples and graven images. Although nearly 50 tribal names are recognized, or reported by explorers, all belonged to three or four basic racial groups, each of which varied widely in language and culture.

Dairy Pasture Grass Mixture

A fine dairy pasture mix, recommended by the University of Idaho, follows: Eight pounds of tall fescue; 6 pounds of orchard grass; 4 pounds of smooth brome, and 2 pounds of either ladino, alsike or white clover. This makes 20 pounds of the mixed seed per acre.

If you can't get tall fescue use the same amount of meadow fescue. On sandy soil use tall meadow oat grass instead of orchard grass. Be sure to include the smooth brome. Ladino is the best of legumes where it grows well. It is not as winter-hardy as some of the others and it doesn't do too well at elevations above 4,500 feet.

4-H Work Thrives**At Oldest Orphanage**

At the oldest orphanage in the United States in continuous operation is located one of Georgia's most unusual and successful 4-H clubs. A 505-acre farm nine miles south of Savannah is operated by the boys in the Bethesda Orphanage, which was established seven years after Savannah was founded, and all the boys taking part in the farm activities are 4-H club members.

Last March the Bethesda 4-H members planted two acres of slash pine seedlings which they dedicated to former members who served in the armed forces, according to Mr. Nitzschke. This tract will also be used to demonstrate good forestry practices to 4-H club members.

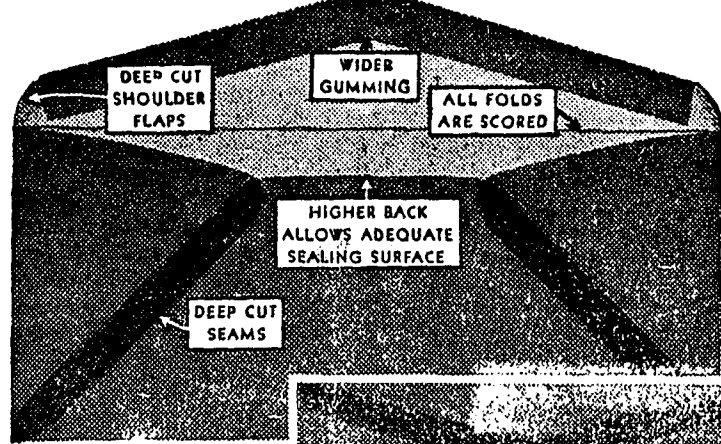

The Bethesda dairy herd of 70 dairy cows is an outgrowth of 4-H club activities. County Agent Nitzschke said this week. In 1937, Ernest Bull, a Savannah dairyman, gave the club members two registered Jersey calves and two grade calves.

Working under the supervision of County Agent A. J. Nitzschke, seven of the boys in the home have been declared state champions in 4-H projects since 1938.

FACTS about the COST OF ELECTRICITY

There have been a lot of wild statements about the cost of electricity. The FACTS are important to YOU. They make interesting reading.

For example, compare the average residential cost of 1.47c per kilowatt-hour paid by Washington Water Power customers with that paid by customers of PUD (Public Utility District) Systems, as stated in the latest available report of the Bonneville Power Administration.

When it comes to electric service, business management counts... and counts for you. It is Worth Keeping. For DEPENDABLE electric service at the LOWEST POSSIBLE COST... look to the

WASHINGTON WATER POWER	Average Res. Cost Per KWH
Cowlitz PUD	1.47c
Grays Harbor PUD	1.73c
Skamania PUD	1.92c
Pacific PUD	2.19c
Wahkiakum PUD	2.37c
Clatskanie PUD	2.58c
Kittitas PUD	2.77c
Klickitat PUD	3.24c
Lewis PUD	3.71c
	3.72c

WASHINGTON WATER POWER CO.

Keely Motor was Noted Hoax of Last Century

The Keely motor was a fraudulent device which John W. Keely, so-called inventor, claimed was operated by a force theretofore unknown to science. Keely succeeded in hoodwinking the public for almost a quarter of a century. His claims were first brought to notice in 1873 and were believed to have some foundation when several scientists could find no flaw in them, although Keely would never permit them to examine the apparatus itself. The following year, Keely's persuasive demonstrations before capitalists in Philadelphia, New York and Boston paved the way for the Keely Motor corporation. Some time later a number of scientists reported his device a fraud. As a result, financial aid was withdrawn and Keely soon found himself without resources. In the '80s, Mrs. Bloomfield Moore, widow of a millionaire Philadelphia manufacturer, began to back him, in the sincere belief that she was advancing the cause of science. Thus rejuvenated, Keely came out with a new "discovery." Finally, in November, 1895, Addison B. Burk, president of Spring Garden institute, and E. Alexander Scott of the engineers club, thoroughly investigated Keely's work at Mrs. Moore's request, and definitely found it to be fraudulent.

Army Develops New

Sleeping Bag, Tent

A new lightweight sleeping bag for use in cold, wet climates and a new squad shelter tent housing 12 men are among the latest subjects of experiments by the army quartermaster corps. The sleeping bag weighs seven and one-half pounds and consists of layers of resin-coated nylon separated by fibre-glass insulation. Sleeping bags issued during the war were not found suitable in wet climates. The outer layer of the newly developed bag prevents moisture from entering, while the inner layer, next to the occupant, overcomes the chilling effects of body vapor.

The new shelter tent is revolutionary in design, employing no center poles, ropes or stakes. It is 16 feet wide, 32 feet in length, 8 feet high at the ridge and 6 feet high at the eaves. The frame is made of steel sections which fold and nest together. The roof is of corrugated sheet aluminum which can be nested for packing. The upper portion of the side and end walls is of sheet aluminum, hinged outward for ventilation and protection against rain. The remainder of the sidewalls are of canvas. Broken down and packed, the shelter weighs 1,180 pounds and occupies 22 cubic feet. It can be erected by average troops in six man hours.

Egg Storage

The ideal place for egg storage before shipping is a cellar. The egg cellar should be kept at a temperature of under 65 degrees. Experiments show that eggs held for four days at 70 degrees graded 74 per cent specials, while eggs held at 58 degrees for the same period graded 95 per cent specials. Humidity is necessary in an egg cellar, and can be supplied by wetting the floor several times a day. Well-equipped egg cellars sometimes have a pipe around the edge of the ceiling with holes in it so the water will drip down the walls. Egg cases, flats and fillers should be stored in the egg cellar for two or three days before the eggs are packed in them. A dry egg case will absorb approximately one pound of moisture from the eggs packed in it.

Spectacle Designs

Spectacle design has undergone many changes through the centuries. The first spectacle frames were of wood, horn and leather. They were pivoted together, like a hinge, necessitating holding by the hand when in use. Later the bridge was devised, with the familiar prongs to be slipped over the ears. As fashions changed through the years, so did spectacles. Sometimes rims were thick, other times thin. Tortoise shell went through several cycles of popularity. Lenses have been round, square, oval, crescent and even octagon-shaped. In recent years, elliptical lenses, turned outward, have been in favor. This year jeweled spectacles, set with rhinestones and colored gems, have become a mode.

Wyoming Wools

Finer grade wools in Wyoming tend to come from the northwest and central counties and half and three-eighths blood wools come more largely from the southern and eastern counties, according to a research report based on 17 years of sampling work. Fine wool has sometimes dropped to as low as 15 per cent of the total clip sampled in the central sector of the state but has usually held above 50 per cent. In the northwest it has always been above 40 per cent of the total clip. Half and three-eighths, and also quarter blood wools have usually ranged from 60 to 70 per cent of the total clip sampled in southern and eastern areas, the report indicated. These counties, however, have also produced a good proportion of fine wools.

Add Niacin to Merits

Of Chicken Breast

Fried breast of chicken, one of America's favorite food treats, has more to offer than fine flavor and substantial protein and calories. Recent research by poultry specialists of the department of agriculture shows that the breast of chicken is an excellent source of niacin, the important anti-pellagra B vitamin. Tests show that the concentration of this vitamin is especially high in the flesh of broilers and fryers.

These findings and those of other laboratories indicate that chicken breast contains more niacin than any other muscle meat thus far tested and compares favorably with pork liver and beef liver which have been recognized as among the richest sources of this vitamin.

People with a preference for light or dark meat may be interested to know that the dark meat is superior in the vitamins, riboflavin and thiamine, but that the white breast takes first place in niacin.

U. S. Big Timber Producer

But Resources Dwindling

U. S. forests between 1857 and 1942 produced enough lumber to build 200 million six-room houses, but more lumber is used to make boxes, crates and baskets than is used for any other one purpose. Home construction is second, flooring third, and furniture making is fourth.

Forests in this nation produce almost half the world's annual cut of timber, but this rate of production cannot be continued indefinitely without better management of U. S. forests and woodlands, it is said. Timber products already are being imported from Canada and Russia.

There is no satisfactory substitute for wood as material for railroad ties or for whisky barrels. Wooden railroad ties are low priced and the material is resilient but it still is hard enough to resist heavy pressure. Oak barrel staves are durable, do not impart undesirable flavors or odors to a barrel's contents, and are said to improve the quality of aged whisky.

New Bombs Foreseen

The inevitable trend of aircraft with speeds above the velocity of sound means radically new designs of bombs for supersonic planes, according to the scientists at the ordnance department. Already army air force jet planes are traveling at approximately 600 miles per hour and it has been indicated that shortly they will equal the speed of sound which is approximately 764 miles per hour. Just what shape and size will be required to make the bombs of the supersonic era effective depends upon the results of the studies now in progress. The bombs themselves must be able to fall considerably faster than the present types, have less wind resistance and be more sensitive, the scientists believe. It may be that some of the fantastic designs seen in the comic strips of the "Buck Rogers" type may become the accepted shape for bombs of the future.

Fairy Stones in Virginia

There is a legend that the fairies of the Blue Ridge section of Virginia wept bitterly upon hearing the sad tidings of the Crucifixion of Christ and their tears, falling upon the earth, were crystallized into little pebbles, on each of which was formed a beautiful cross. Those who hold the little crosses in superstitious awe are firm in their belief that they protect against witchcraft, sickness and disaster. The fairy stones are staurolites, or natural crosses of stone, found chiefly in Patrick county, Virginia. St. Andrew's and Roman crosses are the most numerous and Maltese crosses the most highly valued. In their natural form they are dark reddish-brown to brownish-black in color, although in North Carolina and Brazil, S. A., some of these crosses are found in transparent form with green or reddish-brown colors.

Dusting Watermelons

Dusting watermelons with hydrated lime has helped growers against sunburn. In one area quart fruit jars with holes in the tops were used to dust the lime on all melons two to three times on account of rain which washed off the lime. The lime prevented the hot sun from burning the melons. The lime rubs off easily. The pickers rub off most of the material with their hands at picking time, while the packers rub off the remainder with a cloth when packing the melons in cars. The lime also kept the crows from damaging melons. Crows are suspicious birds and no doubt thought the lime was a poison bait.

Higher Cultures

The higher cultures of the world may be traced to two central regions. One in the Old world extended from Egypt to northwestern China, taking in the skirts of the plateau of Iran and northwestern India. That in the New world was a strip from Mexico to Bolivia. All the evidence indicates that man came into existence in the Old world, while the New world is a relatively late colony. Culture in the Old world had a longer time in which to mature and time to reach a higher level.

Jersey Cattle

Jersey cattle raised on the Isle of Jersey have the reputation of being free from all contagious diseases. Cattle tuberculosis, mastitis and sterility, the diseases which are found on dairy farms elsewhere, do not infest the cattle on the 10-mile-long island in the English channel, according to Jersey breeders there. There are some 9,000 cattle on the island, divided into average heads of 12. No artificial breeding is carried on. The island breeders grow some of their feed, such as grass, roots (from a second crop) and hay. Concentrates are bought to make up deficiencies. Tethering at pasture, as "semi-isolation," helps to prevent disease.

'Magic Pilot'

The first excursion steamer anywhere to have the benefit of a "magic pilot," whose efficiency is as great in darkness and fog and storm as in daylight and clear weather, now is operating out of Boston harbor. Congested harbor traffic conditions, the irregular course of the channel and the presence of island masses, have made navigation in the Boston harbor a complicated and hazardous procedure in "thick" weather, but the electronic navigator is designed to help the ship's captain plot a safe course, even though his normal visibility is strongly limited by natural conditions.

Bulls Treacherous

A bull considered perfectly safe usually injures someone, farmers are warned. It should always be taken for granted that bulls are dangerous. As a calf the animal must be treated kindly, but never petted or teased, and must be trained to being led and tied. When the bull is a year old it's wise to put a ring in its nose as a convenience in handling and as protection in case the bull becomes vicious. Dehorning is also a good practice, and the bull must not be allowed to run loose in the pasture with the herd.

First U. S. Patent Was Issued 110 Years Ago

Exactly 110 years ago, the United States issued its first numbered patent and it was for a locomotive, the Association of American Railroads reveals.

The patent was "designed to give a multiplied tractive power to the locomotive and to prevent the evil of the sliding of the wheels." It was issued to John Ruggles, a United States senator from Maine, who was largely responsible for the passage of the act of 1836 which set up the present-day American system of granting patents and administering the system properly. Senator Ruggles' invention was a gear-like arrangement for locomotive wheels and railroad rail which would mesh for grades.

The invention which was accorded the honor of Patent No. 1 was outmoded as soon as it was patented. About that same time a locomotive startled the world by pulling a train of cars up a grade without the aid of outside cogs or gears. That rapid progress has continued, until now the average locomotive contains almost 1,000 patented features, the Association of American Railroads said.

Freezing Vegetables

Garden freshness of vegetables and rapid preparation for freezer storage or for canning are the key points in turning out a high quality product. Delays between the time the vegetables are gathered and prepared for freezing or canning may cause enough deterioration to make them unfit for storage. To put up high quality vegetables, select vegetables fresh from the garden, preparing them as rapidly as possible after gathering and then canning or freezing promptly to retain quality, flavor and color. Having all equipment and supplies needed for canning or freezing ready for use will help greatly in rapid handling of garden products.

Kitchen Dangerous Place; Scene of Many Accidents

The kitchen, where many homemakers spend a large part of their time, is often a dangerous place to be!

Such things as water on the floor, a rickety kitchen ladder or a pot handle extending over the edge of the stove are booby traps waiting for some unsuspecting or unthinking victim to fall into their snares. The National Safety council estimates that the kitchen is the scene of one out of nearly every five home accidents serious enough to require hospital care.

A large part of these kitchen calamities are caused by burns from steam and hot liquids. A careful homemaker will lift the cover from a pan of boiling liquid so that it forms a shield against the steam, and she will also see that those handles are turned away to prevent grasping by childish fingers or to avoid the danger of an accidental bump. Thick, dry pot-holders are essential tools for every kitchen. Highly polished linoleum floors and spilled grease, water or fruit peelings are frequently the cause of injurious falls. And so are the stools, boxes and chairs used in place of a safe stepladder.

Heartstrings Pulled By Tots

With little fanfare and publicity the American Legion annually spends millions of dollars in its nationwide child welfare program. Most of this money goes for food, clothing and medical care. More than 30,000 volunteer workers carry on the program, searching out children in need, sponsoring enlightened legislation to protect their right, combating delinquency, doing all possible to give every child a square deal in starting life.

There is an intensely interesting human interest story in the birth of this huge program in the Legion, since 1925, has spent some \$56,000,000 in aiding underprivileged children.

It all started back in the days of the first A. E. F. in 1917-18-19 when orphan tots of France, Belgium and England made friends with

American soldiers and sailors. They tugged with mighty heart-strings as they sat on soldier and sailor laps, learning to pronounce American words and sing American songs, eat American candy, for which they paid with baby hugs and baby kisses. The doughboys of World War I passed the hat around on paydays to provide better food and clothing for the little children. Then companies, batteries and regiments started adopting orphans. The first Stars & Stripes sponsored an orphan fund which grew to millions of francs.

Out of the love of American soldiers and sailors for these innocent victims of war, grew the American Legion's child welfare program. It has proven to be one of the strongest ties uniting the veterans of World War I with the veterans of World War II — for history repeats itself. American soldiers and sailor hearts of World War II opened again to the orphans of war. American units again adopted orphans. The Stars & Stripes again raised an orphan fund.

Today the veterans of World War II, now in the majority in the Legion's membership of more than 3,000,000, are finding in its child welfare program a common bond of interest. They too have learned that heartstrings pulled by tots have a mighty tug; that when the great Nazarene said: "Suffer the little children to come unto me," he meant that their love conquers all. — The Legionaire.

Record Number Of Arrests

The state fish and game department reported today a record number of arrests during the months of July and August. The total was 173, far exceeding the previous high figure of 138 recorded during July and August of last year.

For eight months of 1946, the total has reached 447, according to the figures. This number compares with 303 at the end of August, 1945. With four months to go it appeared certain, the department said, that the arrest blotter for the entire year of 1946, would contain far more names than the 628 listed last year.

In some southern states, particularly Alabama, Mississippi and Arkansas, large scale vaccination of dogs has brought a marked reduction in cases of rabies.

AUCTION SALE

The undersigned will sell at Public Auction, on the Dorendorf place, 6 miles Northeast of Southwick and 1¼ miles Northeast of Crescent school, on Cedar Creek, on

Saturday, September 28, 1946

COMMENCING AT 12:30 P. M.

The following property:

MACHINERY

- 1 36-inch Swinging Buzz Saw
- 1 Stump puller
- 1 16-inch Plow
- 1 12-inch Brush Plow
- 1 Set Harness
- 1 3¼-inch Steel Wheeled Wagon
- 1 Mountain Hack
- 1 2-horse Cultivator
- 1 30-gallon Stock Kettle
- 1 Sled
- 1 32-volt Generator and Edison Battery
- 1 6-volt Wind Charger
- 1 6-volt Electric Fencer
- 1 Cider Press
- Blacksmith Tools — Vice, anvil, drill press, forge, tap and die, drills and tongs
- Cables, Chains, Logging Tongs
- Traps — Coyote and Bear
- 1 Garden Seeder
- 1 Grass Seeder
- Shovels and Axes
- 1 12-gauge Shotgun
- Many other small items

HOUSEHOLD GOODS

- 1 Faultless Malleable Range
- 1 Rex Charter Oak Range
- 1 Wood Heatrola
- 1 Bed Daveno
- 1 Davenport and Chair and Platform Rocker
- 5 Beds and Springs
- 3 Dressers — 1 Chest of Drawers
- 3 Tables and Stand Tables
- 15 Chairs
- 2 Arm Chairs
- 2 Rocking Chairs
- 1 Organ
- 1 Phonograph and Records
- 2 Sewing Machines
- 1 9x12 Brussels Rug
- 1 Lard Press — 1 Corner Wash Bowl
- 2 Sausage Grinders
- Dishes and Cooking Utensils — Fruit Jars
- Many other items too numerous to mention

TERMS: Time will be given on sums over \$20.00 on approved bankable notes

Notice For Publication

NOTICE OF PROOF APPLICATION OF WATER TO BENEFICIAL USE

Notice is hereby given that at 10:00 A. M. on the 12th day of October, 1946, at Moscow, County of Latah, State of Idaho, before J. M. O'Donnell, Notary Public, proof will be submitted of the application to beneficial use of 0.04 cubic foot per second of the waters of Potlatch Creek in accordance with the terms and conditions of Permit No. 19,881 heretofore issued by the Department of Reclamation of the State of Idaho. The name and postoffice address of the person or corporation holding said permit are Grace and Ed. Grant, Kendrick, Idaho.

The use to which said water has been applied is Fish Pond and irrigation.

The amount applied to beneficial use is 0.04 second feet.

The place where said water is used NE 1/4 NW 1/4 Sec. 35, Township 38 N. Range 3 W.

The name of the canal or ditch or other works by which said water is conducted to such place of use is Grant's Fish Pond.

The right to take water from such work is based upon Permit No. 19,881.

The source of supply from which such water is diverted is Potlatch Creek, a tributary of Clearwater River.

The date of priority which said user is prepared to establish is July 10, 1946.

MARK R. KULP
State Reclamation Engineer
First pub. Sept. 12, 1946.
Last pub. Oct. 3, 1946.

HERE'S

REAL

OPPORTUNITY

FOR 23

LOCAL MEN

IF YOU ACT BEFORE OCT. 5TH!

If you're a man with vision and are thinking of your own future don't let Octobr 5th pass without fully investigating the benefits offered by enlistment in the new U. S. Army!

You must enlist on or before October 5th to be guaranteed full educational benefits under the G. I. Bill of Rights. If you wait to enlist after October 5th benefits under the G. I. Bill of Rights will accrue only as long as the period of emergency exists. When war is officially terminated these benefits cease.

Never before has education been so important to success. Never before has specialized training been so essential to gainful employment. Both of these vital phases of your training for life work are yours at Government expense under the G. I. Bill of Rights. More than a full five-year college course or the equivalent course in a trade or business school will be entirely paid for by your Government if you enlist before October 5th.

Don't neglect taking advantage of this golden opportunity! Act now! See your nearest Army Recruiting Station at once.

LEWISTON, IDAHO

spent the week-end at her home here.

Mr. and Mrs. Ronald Jones and Keith were Pullman visitors Sunday.

Mrs. Floyd McGraw entertained the 4-H Club girls at her home Saturday afternoon. The girls are exhibiting their sewing at the county fair in Moscow.

Mr. and Mrs. Bill Ingle have moved to Spokane, where Bill is employed by a seed company.

Joe Forest made a business trip to Spokane this week.

Mrs. Joe Clemenhagen has returned home from a visit with her daughter in Yakima.

Mrs. Grant Clemenhagen entertained the Ladies Guild at her home last week.

The Happy Home club will meet at the home of Mrs. Henry Korte-meier, October 11th.

A large number from here attended funeral rites for Knute Lathrop, pioneer resident of the Deary area, Sunday afternoon at the Deary Lutheran church. He is survived by two daughters, Mrs. Hartvick Lee and Mrs. Ed. Peterson, near Deary.

Mr. and Mrs. Roland Moody and son of Anchorage, Alaska, are here visiting Mrs. Moody's parents, Mr. and Mrs. C. Holm in Deary and with her sister, Mrs. Joe Whybark, in Pendleton, Oregon.

Mrs. Leonard Fairfield is employed in Long's store in Kendrick.

Mr. and Mrs. Halvor Lien were Sunday dinner guests at the Rev. Peter Hesby home in Deary.

Mr. and Mrs. Ralph McGraw and Rhoda of Moscow, were recent visitors at the Floyd McGraw home.

Miss Marjorie Penland, R. N., of Spokane, is spending part of her vacation with her grandparents, Mr. and Mrs. A. Kleth, and other relatives here.

Mr. and Mrs. Stanley Sneeve of Genesee spent the week-end at the home of Mrs. Carrie Sneeve and sons.

Mr. and Mrs. C. C. Shapley of Sedro Woolley, Wash., returned to their home after spending from Sunday until Friday at the home of Mr. and Mrs. A. C. Wilson and family.

The Big Bear Ridge Ladies Guild will meet on Wednesday, Oct. 2, at the home of Mrs. Joe Clemenhagen.

At this meeting canned fruit for the Lewiston Orphan Children's Home will be packed for shipment. Anyone that cares to donate fruit to this cause is invited to attend the meeting and their help will be greatly appreciated. If you have fruit, and cannot attend on that date, please leave your gift either at Mrs. Clemenhagen's of Mrs. King D. Ingle's on or before Oct. 2.

A. C. Wilson and son delivered cattle to the Spokane market the first of the week. They rounded up their cattle in the Moose Creek area in preparation for shipment.

Leonard Olson was in Lewiston on Saturday and attended the cattle auction.

Wayne Wilson was a recent Lewiston business visitor.

Wm. Ingle spent the week-end at his home here.

CAMERON NEWS

Mr. and Mrs. Gus Blum and family of Pullman; Mr. and Mrs. Wilbert Brunstiek, Mr. and Mrs. Albert Glenn and Kenneth Slead were Sunday guests of Mr. and Mrs. A. H. Blum.

Gladys Wegner, teacher at Wash-tucna, Wash., and Vern Wegner, U. of I. student, spent the week-end with home folks.

Mr. and Mrs. Walter Koepf were vacationing in the cities on the coast the past week.

Mr. and Mrs. Jack Lansing of Moscow were visitors in the home of Mr. and Mrs. Glenn Newman Friday and Saturday.

Mr. and Mrs. Geo. Wilken and family spent Sunday with Mr. and Mrs. W. R. Johnson, at Peck.

Mr. and Mrs. Ed. Mielke and family were visiting Mr. and Mrs. Glen Wegner Saturday evening.

Mr. and Mrs. Ray Whitinger and sons and Mrs. Fred Newman visited with Mr. and Mrs. Earl Whitinger Sunday.

Mr. and Mrs. Ray Rainville of Portland visited with Mr. and Mrs. Herman Silflow and Mr. and Mrs. A. E. Spekter the first of the week.

Mr. and Mrs. Alec Larson and Mr. and Mrs. Fred Silflow were Sunday dinner guests of Mr. and Mrs. Herman Silflow.

Mrs. A. H. Blum, Mrs. Theo Meske, Mrs. Glen Wegner, Mrs. Ed. Mielke, Mrs. Geo. Wilken and Mrs. Albert Glenn spent Wednesday afternoon with Mrs. Wilbert Brunstiek.

Mr. and Mrs. Jim Farrington were Sunday evening visitors in the home of Mr. and Mrs. Fred Newman.

Mr. and Mrs. Aug. F. Wegner were visitors in Lewiston and Moscow Sunday.

Kenneth Wilken was a Spokane visitor the first of the week.

Mrs. Tena Riggers of Nez Perce visited with Mrs. Stoneburner and Miss Emma Hartung, Wednesday.

Mr. and Mrs. Herman Silflow spent Sunday evening with Mr. and Mrs. John Blankenship.

October 5th Army Deadline

Approach of the October 5th deadline marking the last day upon which recruits in the United States army may take advantage of the full provisions of the G. I. Bill of Rights was brought to the attention of all prospective enlistees in this area today by Col. Murray, in charge of the local recruiting station.

After this deadline he emphasized, the G. I. Bill of Rights provisions will apply only for the duration of the emergency and will automatically cease upon official termination of the war which may come at any time.

Specifically this means that those who enlist after October 5 will be granted these rights only in proportion to the time they have served before the official termination.

For example, if a man enlisted on October 6 and hostilities were to be officially terminated November 6, he would receive only one month's education at government expense at the end of his enlistment.

The man who enlists on, or before, October 5, however, is guaranteed one month's government paid education in the college, trade or business school of his choice for every month served, up to 48 months — equivalent to over five ordinary school years.

Not only will the government pay

for this college course, Col. Murray concluded, but, in all probability, the present over-crowded conditions in college will be eased by that time, assuring the student of greater individual attention under vastly more pleasant conditions than exist now.

Double Feature Coming
This week's offering at the local theatre will be another of those popular double features. First of these is "Rainbow Over Texas," which has as its stars Roy Rogers, Gabby Hayes and Dale Evans, assisted by "Trigger" the horse.

Second offering is entitled "Gay Blades," and it has Allan Lane, Jean

Flour Increases
Consumer prices on flour bought at retail will be increased from approximately 1c to 2c per 5-lb. package as a result of a recent action granting an interim flour ceiling price increase of 20c per 100 pounds, says an OPA dispatch.

The increase is passed on to consumers since under the new Price Control Act none of the increase can be absorbed by wholesale or retail distributors.

Potlatch Chief Sez

PUBLISHED BY THE KENDRICK CO-OPERATIVE CREAMERY

HI, THERE, FOLKS:

About Milk Bottles:

Little Jack Horner,
Sat in the corner
Collecting creamery milk bottles,
'Cause he couldn't find anything
else to do!

Are you a "Jack Horner?"
Please go look in the corner, and
see if you don't have a stack of
milk bottles collected. Truthfully
speaking, don't those bottles get
in your way? Everytime you walk
out the back door don't you kick
over a couple, sometimes even
more? If the answer is "Yes,"
why not get in the habit of bring-
ing them in regularly, or sending
them in with our milk man?
Make it a practice to never get
a bottle of milk without return-
ing a bottle. For folks, how can
we bottle milk, if we don't get
the bottles to put it in?

About More Milk:

Mary had a little lamb,
Its fleece was white as snow,

And everywhere that Mary went
The lamb was sure to ask:
'I'm hungry, where's some
milk?'

The creamery isn't hungry, but
we would surely like to know
where some milk may be. We
could easily find use for an ad-
ditional 40 gallons a day, as we
have been having a hard time
keeping up with the demand. The
future for the dairy farmer who
sells whole milk is definitely a
bright one. For those in doubt of
this statement, please come in
and talk it over with us, as we
would certainly appreciate finding
a new patron interested in selling
us whole milk.

About Certificates:

If you are one of the persons
who received a card from us in
the past week regarding stock
certificates, please remember to
call for your certificate at your
first opportunity.

Sell us your cream!

LINDEN

Mr. and Mrs. B. G. Linderman
and Clem Lyons were dinner guests
of Mr. and Mrs. John Cuddy and
Mr. and Mrs. James Holt Thursday
evening, the occasion being Mrs.
Cuddy's and Clem Lyons birthday
anniversaries.

Mrs. Arthur Foster and children,
Mrs. Marion Souder and Mrs. Frank
Souder visited with Mrs. Jones
Wednesday afternoon.

Miss Joyce Lyons returned to Spo-
kane Thursday, accompanied by her
mother, Mrs. F. C. Lyons.

Mr. and Mrs. Loyd Israel went to

Moscow Sunday, where Loyd will
attend the U. of I.

Joe Michaelis left Sunday evening
for Cottage Grove, Oregon, where he
will attend school. Mrs. Michaelis
and daughter will remain with her
parents, Mr. and Mrs. Louis Alexan-
der, until he locates a residence for
them.

Mr. and Mrs. Clem Israel went to
Lewiston Tuesday to meet their son,
S. I. Clement Israel, Jr., who will
spend a leave at home.

Alex Weaver underwent minor
surgery on one foot Tuesday at Dr.
Christensen's office. He is able to
hobble around a bit.

Mr. and Mrs. T. J. Armitage and
Mrs. Rollin Armitage and Rona, of
Southwick, visited Mr. and Mrs.
John Cuddy Sunday, and were din-
ner guests at the Linderman home.

Sixty friends of Mr. and Mrs. B.
G. Linderman arrived at their home
Sunday at noon with well-filled
lunch boxes to spend the day, and
wish Mr. and Mrs. Linderman good
luck, as they are leaving soon for
California, having sold their farm
to Mr. McCallister of Kennewick,
Wn., who expects to take possession
about October 1st.

T. P. Fisher and Clem Israel at-
tended a sale on the North Fork
Wednesday.

Mrs. John Cuddy returned from
the Davidson Nursing home at Ken-
drick last Thursday. She is im-
proving steadily.

T. P. Fisher left Friday for Med-
ford, Oregon, after visiting old neigh-
bors on the ridge for three weeks.

Mrs. Arthur Foster, Mrs. B. G.
Linderman, Eva Smith and Leila
Crayson spent Monday afternoon at
school helping Miss Brown celebrate
her birthday anniversary. Three big
birthday cakes were served during
the recess period.

Mr. and Mrs. Frank Lyons and
sons George and Clem spent the
week-end in Spokane visiting their
son, Dan, and attending the wed-
ding of their daughter and sister, Miss
Joyce Lyons and Leonard Benfell.

Mrs. Lyons was very much sur-
prised last Tuesday to see a coyote
in their yard, which had been run
by a dog, and when he saw the
open gate, ran in — but soon dis-
covered he was in the wrong place
and made his get-away. Mrs. Lyons
wasn't quite fast enough to secure
a gun and get him. Coyotes are
quite numerous in this section, but
this is the first time one has been
chased into a home yard.

TEAKEAN GOSSIP

Harry Jones of Woodburn, Oregon,
returned to his home Tuesday of
this week, after spending ten days
at the C. Y. Groseclose ranch.
Grover Groseclose has been laid
up for several days with a severe
attack of lumbago.

Mrs. Wm. Groseclose was a week-
end visitor at the C. Y. Groseclose
home. She returned to Juliaetta with

George Wilson, who had brought up
Edward Groseclose and his sons,
Virgil and Johnny, for a few hours
visit Sunday evening.

We hear that the old "Ludy place"
has been purchased by a veteran.

Avery Miller and Merton Preusser
are building a basement under Mr.
Miller's home at Juliaetta.

We had our second and third kill-
ing frosts during the past week —

The first one being August 6th. The
last two finished the remainder of

the tender vegetables.

Car Hits Guy Wire

A car, owner and driver unknown,
hit the guy wire on the Potlatch
Telephone Co. pole on the corner at
the J. G. Travis home Sunday morn-
ing about 2:00 o'clock, putting a
number of phone lines out of com-
mission, according to Otto Schupfer,
manager of the local company.
By Sunday noon most of the dam-
age had been repaired.
