

KENDRICK GAZETTE

NEWS ITEMS ABOUT LELAND RESIDENTS AND FRIENDS

Annual Bazaar Oct. 30th
The Ladies of the W. S. C. S. will hold their annual bazaar and chicken dinner on Wednesday, Oct. 30, in the Leland church basement, beginning at 5:30 p. m.

Other News
Mr. and Mrs. Elwin Flesham and son Ronald and Virgil Flesham, all of Clarkston, were Wednesday evening callers in the home of Mr. and Mrs. Lloyd Craig.

Mrs. Chester Vincent and daughter Carol Lynn spent several days in Clarkston last week, called there by the illness of Mrs. Vincent's mother, Mrs. Robert Robinson.

Sunday dinner guests of Mr. and Mrs. Oney Walker were Mr. and Mrs. Orval Walker and sons and Mr. and Mrs. Lawrence Larson of Lewiston and Mr. and Mrs. Donald Morgan and son Roger of Lenore. Evening callers were Mrs. Dora Hefel and Mr. and Mrs. Roy Craig and daughter Paige.

Mr. and Mrs. Herman Johnson left Saturday for Lewiston, from which point they will accompany Mr. and Mrs. Andy Dreps on a trip to Coulee Dam, Seattle, and other coast cities.

Mr. and Mrs. Ben Hoffman attended church in Juliaetta Sunday afternoon.

Mr. and Mrs. Harvey Thornton, Miss Arlene Johann and Willis Thornton, all of Moscow, were Sunday dinner guests of Mr. and Mrs. Jesse Thornton.

Mr. and Mrs. Archie Hutchison of Swift Current, Saskatchewan, Canada, arrived Wednesday to spend several days with Mr. and Mrs. Wilbur Corkill and family.

Mr. and Mrs. Harry Smith had as dinner guests Sunday J. M. Woodward and Mr. and Mrs. Clyde McGee, the latter of Clarkston.

Mr. and Mrs. Wilbur Corkill and family and Mr. and Mrs. Archie Hutchison were Monday afternoon visitors in the home of Mr. and Mrs. Rudy Anderson at Troy.

Mrs. Rachel Daugherty, who spent the past two weeks here visiting her daughter, Mrs. A. G. Peters and other relatives, was a Sunday school visitor twice. Other visitors at Sunday school were Mr. and Mrs. Robert Erickson and family and Ellen Estes of Kendrick.

Sharon and Shirley Wallace are spending some time with their aunt Mrs. Billy Weyen and family, while their parents, Mr. and Mrs. Arnold Wallace, are on a trip to Canada to visit relatives.

Mr. and Mrs. Lloyd Craig and Billy Weyen assisted Mr. and Mrs. Oral Craig with moving, Monday.

Leland School Notes

Herbert Harrison is again giving piano lessons to nine of the students here. Lessons are now given on Wednesday instead of Tuesday. Those enrolled are Wanda and Darlene Peters, Nina and Norma Dagefoerde, Jeanette Cridlebaugh, Anna Holsath, Kathleen Crawford, Mary Ann Glenn and Leone Parks.

Those who have missed school this week because of illness were Eddie Corkill and Teddy Meyer.

Report cards for the first six-week period were issued this week. Our attendance for the first period was 99.1 per cent. Those neither absent nor tardy for this period were: Kathleen Crawford, Clynes and James Thornton, Charles Parks, Stanley Smith, Howard and Walter Wolff, Sonja and Anna Holsath, Darlene and Wanda Peters, Keith Thornton, Marcella Craig, Alvie, Rose Mae and Athleta Estes, Teddy Meyer, Marlene and Norman Silflow, Norma and Nina Dagefoerde, Herman Hinrichs, Jeanette Cridlebaugh, Sandra and Ruth Tarbet, Gerald and Elaine Hefel, Arlene Glenn, Paul Dagefoerde, Jr., Kaye Weyen and Ernest Heimgartner.

Movies shown this week dealt with the lumbering industry and the control of the pocket gopher. In the first we learned how the trees were felled and transported to the mills where they were cut into many different types of lumber. In the latter picture we saw some of the daily habits of the little gopher and how they can best be controlled.

Those in the Intermediate room who received 100 in their six-week spelling tests were: Barbara Silflow, James Thornton, Leone Parks, Darlene Peters and Keith Thornton.

In the Primary art classes they are making Halloween decorations for their windows and blackboards. New shelves have been added to one side of the primary room to hold their library books and supplies of all kinds, and also to display

Report To Be Heard

Boise — The Idaho Education Survey commission will, on October 21, receive from Dr. John E. Brewton, director of the Idaho survey, the report of his committee on the Idaho education survey.

The commission is arranging for open meetings to which they hope all interested persons will come. Dr. Brewton will be present to give a resume of the survey and also to answer questions asked concerning it. It is urged that all school board members, commercial club directors and other interested parties attend at least one meeting, a series of which are to be held throughout the state, one of which is scheduled for Lewiston on October 24, at the Lewiston High school auditorium at 7:30 p. m.

INTERESTING NEWS NOTES FROM KENDRICK SCHOOLS

Sports News

The Kendrick Tigers triumphed over the Genesee Bulldogs 26-24 in their first conference game last Friday on the local field. Kendrick's touchdowns were made via the pass route, and taken over the goal line by Ed Johnson, Boyd Thornton, Raymond Easterbrook and Junior Brocke.

The second squad of Kendrick football players met the Orofino team in a practice game at Orofino last Tuesday. We did not learn the final score.

The Kendrick Tigers are scheduled to play the Lapwai Wildcats in their second conference game of the season next Friday afternoon, Oct. 18, at Lapwai.

Senior Ball

A definite date has not yet been set for the annual Senior Ball. However, they are trying to obtain an orchestra for October 23.

Hallowe'en Dance

There will be a Community Masquerade party and dance Monday evening, Oct. 28, at the Kendrick school gym. It is being sponsored by the Girls' P. E. class. The proceeds will be used for purchasing basketball suits.

High School News

Four high school boys went out to the Galloway Bros.' orchard Monday evening after school to pick apples for the school hot lunch program.

A salesman, representing a Denver firm, called at the school house Tuesday morning to take orders from the Junior class for class rings.

Grade School News

First and Second Grades — The following second graders have learned to spell all their classmates names: Helen Luman, Marjorie Ingle, Gene and Jack Easterbrook, Junior Westendahl, Clinton Trout and Leland Slind.

The following first graders have learned the A, B, Cs since school began: Donnie Travis, Jackie Ware, Sharon Powell, Dickie McGraw, Jean Jones, Patricia Weaver, Nicky Damon, Judy Koopp, Paula Hall, Eddie Galloway, Patty Candler and Raymond Onstott.

Third and Fourth Grades — Jack Maynard, Kathryn Abrams, Roger Christensen and Shelia Westendahl of the third grade had perfect spelling for the five-week test, therefore they are exempt from the six-week tests. The third and fourth graders are making Hallowe'en decorations.

Seventh and Eighth Grades — This room had a weiner roast last Thursday night on Luckens flat. They played games and everyone reported a very enjoyable time.

Circle Meetings Postponed

The Wallace Circle will meet next week (Friday, Oct. 25) with Mrs. George Brocke.

Mrs. Kenneth Brocke's Circle will meet next Friday (Oct. 25) at the home of Mrs. Paul Lind.

Rummage Sale Success

The rummage sale, held by the W. S. C. S. Sales Day was definitely a successful project. Mrs. Wm. Holt, chairman, reports \$51.80 taken in.

some of their handwork.

Visitors in the Primary and Intermediate rooms last Tuesday were Mrs. P. H. Dagefoerde and daughter Ann and little Patricia Corkill.

The M. Y. F. of the church enjoyed a kabob roast on Monday evening. The kabobs, consisting of steak and onions, may not have been perfectly coked, but the fifteen young people and five adults had a most pleasant time around the campfire and playing games afterwards.

Mrs. A. G. Peters accompanied her mother, Mrs. Rachel Daugherty, to Spokane on Monday afternoon. Mrs. Peters is a delegate to the W. S. C. S. conference meeting in that city.

NEWS FROM LOCAL MEN IN THE ARMED FORCES

Jerry Candler Writes
Madigan Gen. Hospital
October 11, 1946

Dear Mac and Bill:
I guess it's about time I wrote you and thanked you and all others concerned for the paper, and also give you my new address.

I'm over here at Madigan General hospital, for what I don't know. I spent three weeks at the hospital at Fort George Wright, but they didn't do anything to me or tell me why I was there. We flew over in a C-47, and it was quite the thing, it being my first time up. It got a little rough coming over the mountains, though.

If Maurice Long, Chuck Easterbrook and Buck Langdon are still here, I hope to get over to see them, as it's only about a ten-minute ride by bus over to Fort Lewis.

Well, there just isn't anything to write about around here, so will have to close for this time I guess. I'll sure be glad when I start receiving the paper again.

— As ever
Pvt. Jerry Candler.

Note: We don't have Maurice Long's address, but here is Chuck Easterbrook's: Pvt. Charles Easterbrook, Co. A, 51st E. T. Bn., Ener-Tne. Ctr., Fort Lewis. Pvt. Bernard A. Langdon, Co. A, 51st E. T. Bn., B. T. S., North Fort Lewis.

Home For Keeps

Sgt. James Whittinger, son of Mr. and Mrs. James Whittinger, arrived home Sunday from Fort Lewis, Wn., in company with Sgt. Roy Silflow, the two young men, lifelong friends, being members of the same outfit.

Sgt. Whittinger and Silflow entered the service together on January 16, 1945, received their preliminary training together, and were shipped to the Philippines just before the end of hostilities, landing in southern Luzon, while fighting was going on at the northern end of the island.

Here they were transferred to different units, but were stationed close together and got to see each other quite often.

After the clean-up in the Philippines was over, the two young men were assigned to occupation duty in Japan, landing there on October 14, 1945, James being assigned to Yokohama, and Roy another station some 20 miles away.

Sgt. Whittinger reports that Yokohama is really nothing but a shell of the city it once was, the great B-29 fire raids having burned out almost all the factories and business district, and even large portions of the residence section. However, the Japs were soon moving back in, putting a roof on any walls remaining standing — and making the best of the situation.

James says that he does not care for occupation duty — but that it might be worse, as the Japs are, on the whole, accepting G. I. rule with a good grace — and most of them appear quite satisfied that they are getting a fair deal. However, an occasional "cocky" Jap is encountered and when this happens is promptly put in his place.

James says the winters in the Yokohama area are not bad. There is not much snow, but the cold wind off the harbor is quite penetrating.

On the first of June of this year Sgt. Silflow was transferred back to James' unit, and the two young men found life more pleasant, as they were thus able to share letters, papers and pictures as well as duties.

They boarded ship for home at Yokohama on September 12, and 18 days later, after a stormy crossing on a small, salvaged ship, they landed at Seattle, Sept. 30, and were sent to Fort Lewis for inspection and discharge. After a week at the Fort they were able to make a brief trip home (Oct. 6) where they secured Roy's car and drove back to the fort, returning home on terminal leave last Sunday, October 13. Their army duties are now behind them, and they expect to receive their honorable discharges about the 15th of November.

Sgt. Whittinger states that after the first of this year the mail service began getting poorer and poorer, and other letters and papers failed to make their appearance at all — even though they knew the items had been mailed. However, between the two of them, they managed to keep up pretty well on what was going on at home.

Sgt. Whittinger and Silflow, the

(Continued on last page)

SUNNY SKIES PREVAILED AT ANNUAL SALES DAY

Yes, sunny skies prevailed at Kendrick's Annual Sales Day — and in so doing undoubtedly cut down on the crowd present, although a very satisfactory number attended.

Many farmers came to town during the evening, having taken advantage of the wonderful weather to work in the fields.

A very satisfactory number attended the auction during the morning, and it gradually increased, to a good crowd as the day wore on — selling being completed about 2:30 in the afternoon. Items put up at auction consisted of everything from baskets of grapes to mules — although no satisfactory bids were heard on one large black mule, and his owner withdrew him. Chief items were household goods of all kinds, fruit, farm produce, chickens, etc., and Auctioneer Glenn hit the nail right on the head when he predicted a long sale.

The agricultural displays attracted considerable interest, and the prize winners were as follows:

Largest Table Squash — Asa Cook, Juliaetta; 2nd, Mrs. James Whalen, Juliaetta.

Largest Cow Pumpkin — Leonard Eckman, Juliaetta.

Largest Potato — Jerry Chamberlain, Kendrick, first; Charlie Schultz, Juliaetta, second.

Largest Ear Field Corn — Roy Riley, Kendrick, first.

Best Pint Pinto Beans — Harold Parks, Leland, first; Forest Grayson, Cedar ridge, second.

Best Pint Red Beans — Wallace Clark, Juliaetta, first; Tom Long, Kendrick, second.

Best Pint Alsike Clover — Jerry Chamberlain, Kendrick, first.

Best Bouquet Fall Flowers — Hanna Schultz, Juliaetta, first; Mrs. Cecil Chamberlain, Kendrick, second.

Best Bouquet Roses — Mrs. A. W. Jones, Kendrick.

Best Bouquet Asters — Ferrol Parks, Juliaetta, first; Mrs. Edgar Dammarell, second.

Largest Dozen Eggs — Helen Mattoon, Kendrick, first; Mrs. James Whalen, Juliaetta, and Karl Arne Kloster, Cedar ridge, second (tie).

Apple Display — Mrs. Otto Schupfer, Juliaetta, first and second.

E. M. White asks that all prize winners who have not yet collected their money, please call at the confectionery for it.

The dance in the gym, that evening was very well attended, and the big crowd apparently had a thoroughly enjoyable evening. Only disappointment of the entire day was the prices brought by the nylon stockings, candy and other items put up at auction for the benefit of the Area Living War Memorial Swimming Pool. A beautiful hand-carved and woven cut-work blanket, made by Mrs. Hattie Jones, and donated to the auction, was withdrawn due to lack of bidding interest.

All-in-all, however, the day can be said to have been a real success. Perhaps a rainy day would have brought a larger crowd, but it would also have cut down on the enjoyment of those who came. It is to be regretted that a football game could not have been scheduled for that day — but apparently no other school cared to do battle with Kendrick on Saturday.

P. T. A. Meeting Saturday

The Second District P. T. A. group is scheduled to meet in Kendrick next Saturday, October 19, according to a letter received from Mrs. Ullie Hardman, president of the Second District, P. T. A.

The state president, Mrs. Jay C. Jepson, and a National P. T. A. representative will be on the program.

One part of the program is to be a panel, or symposium, made up of teachers, parents and other persons on "What the Educators and Teachers Want From the P. T. A.," or a closely allied subject.

Mrs. Jack Willows, Route 1, Box 414, Lewiston, P. T. A. council president, has charge of this panel.

All-in-all, a very interesting program has been arranged, and it is hoped that the parents of Kendrick school children, and any others interested, will be present and make this meeting a real success.

Return From Hunting Trip

The hunting party made up of Frank, Lester and David Crocker, Wade Keene, Dee Miller, Elmo Eldridge and Henry Kortemeier returned Sunday night from a big game hunt — bringing out six elk and a bear.

Bank Total Over \$2,000,000.00

In another column of this issue will be found the financial statement of The Farmers Bank — and it certainly is worth reading — for it shows total deposits of \$1,970,524.29 — and total assets of \$2,053,765.89! Truly a real total for a bank in a town of this size.

Perhaps these figures are not startling to one used to reading the astronomical figures in which our government deals today — but we feel that officers and directors and employees of the institution are to be congratulated on the steady growth of this local institution.

It was not so long ago that some of the big cities referred to their banks as "Million Dollar Institutions." Well, Kendrick has one today — and then some.

INTERESTING HAPPENINGS FROM JULIAETTA AREA

Mr. and Mrs. Theodore Brasch of Nez Perce were Sunday dinner guests in the Fred Hadley home.

Mr. and Mrs. Virgil Dygert of Clarkston were Sunday callers in the Clifford Brown home.

Miss Donna Nye of Clarkston was a week-end guest in the Woodrow Nye home here.

Mr. and Mrs. Adrian Johns spent Sunday in Coeur d'Alene, attending a family reunion.

Mr. and Mrs. E. A. Kirkpatrick have taken delivery of a new 1946 Roadmaster Buick car.

Mr. and Mrs. Woodrow Nye motored to Lewiston Sunday night.

Gust Hanson is able to be out, after being confined to his home, convalescing from a heart attack.

Mr. and Mrs. Lewis Lindquist spent Saturday and Sunday in Moscow, where Mr. Lindquist was called by the serious illness of his brother, who is a patient at the Gritman Memorial hospital.

Juliaetta's Hot Lunch program is now in full swing. The canning of tomatoes and pears is being done by several women in the community, with Mrs. Allen Grayson in charge.

Miss Carol Meyer and Miss Mary Moulton of Coeur d'Alene spent the week-end at the home of Mr. and Mrs. Hap Meyers.

Mr. and Mrs. Christ Molden motored to Lewiston, Sunday.

Tureda Sams and Claudene Clark were week-end guests of Betty Burns. Mr. and Mrs. Jack Browning were Sunday guests of Mr. and Mrs. Everett Farrington at Kendrick.

Sunday birthday anniversary dinner guests of Mr. and Mrs. Walter Cochran were Mr. and Mrs. Claude Clark and family, Mr. and Mrs. Fred Glenn and children, Mr. and Mrs. Paul Hall and children and Mrs. Bruce Sherman and son Jackie. All called to help Mrs. Cochran celebrate her birthday and wish her many happy returns of the day.

Mr. and Mrs. Matt Martin of Clarkston were Sunday guests of Mr. and Mrs. Hap Meyer.

Buzz Nye and Johnnie Walsh returned from an elk hunting trip in the Kooskia area, bringing out a cow elk.

Wallace Hutchison is erecting a wood-shed on his property here.

Mr. and Mrs. Allan Grayson spent the week-end in Lewiston.

Phyllis Johns has been staying with her grandmother, while her grandfather, Chas. Jessup, is on a trip to Twin Falls to visit relatives.

Accompanying Mr. Jessup is Ben Pressman of Southwick, who, with Mr. Jessup, will attend a church dedication in Boise on their way back.

Mr. and Mrs. Earl Parks are the parents of a 7 1/2-pound son, born last Friday at the St. Joseph's hospital in Lewiston. The little lad is a grandson of Arl Burns, and Mr. and Mrs. Hugh Parks. He has been named Martin Byard.

Mr. and Mrs. Ergar Lockey of Vancouver, Wash., spent the week-end with Mr. and Mrs. Ballantyne.

Mr. and Mrs. Bierman and sons of Los Angeles were recent callers at the John Brandt home. Mr. Brandt and Mr. Biermann were boyhood friends, and enjoyed a good time reminiscing over old times.

Mr. and Mrs. Phil Johns and daughters Marjorie and Helen and son Dick, have returned from a 10-day motor trip to Long Beach, Calif., via Boise, Salt Lake and Boulder Dam. While in Long Beach they motored down to Tijuana, Mexico. On their return trip they came through San Francisco, Carson City, Nev., and Payette, Idaho.

Frank Spray and W. R. Davis have returned from a hunt, with two deer. Mrs. Mary McAllister, who has been visiting at the home of her

(Continued On Page 7)

PERSONALS AND NEWS ABOUT KENDRICK FRIENDS

Mr. and Mrs. Charles Goan arrived here Friday from Grangeville for a week's visit with friends. Mr. and Mrs. Roy Ramey and Mrs. Estella Leith were Lewiston visitors Thursday.

Mrs. Edgar Long left for Boise Saturday, as a delegate to the Rebekah Grand Lodge convention.

Mrs. B. N. Emmett arrived here Saturday from Missouri for a visit with her daughters, Mrs. Edgar Dammarell and Mrs. Edgar Long. This is Mrs. Emmett's first visit here in more than five years.

Mrs. Jo Lightfoot of Seattle, a former teacher in the Kendrick schools, arrived here Thursday for a visit with friends. She is now in Juliaetta visiting Mrs. Mary Adams. Henry Emery of Clarkston visited here Sales Day with friends.

Mrs. Margaret Covington of Juliaetta was in town for a short time Sunday. She is chairman of the Latah County Women's Republican League.

Mrs. G. F. Brocke was a Moscow visitor Tuesday.

Mrs. E. A. Deobald was a Spokane visitor Tuesday.

Mrs. Bina Rabby left for Spokane Tuesday.

Mrs. E. E. Sands and children of Seattle, Wash., arrived here Wednesday evening of last week for a ten-day visit in the home of her sister, Mrs. W. L. McCreary and family.

Mr. and Mrs. R. L. Blewett and son Billy came over from the ranch at Gifford and spent the week-end at their home here.

John W. Davis was a Lewiston business visitor Thursday. He brought back his car with him, it having been in the repair shop there since June, following a wreck. The delay was caused by inability to secure repair parts.

Vernor Davis, Pendleton, Oregon, spent the week-end here with his parents, Mr. and Mrs. John B. Davis.

U. of I. students home over the week-end included Charles and Teddy Deobald, Ossie Kanikkeberg and Ray Bencosoter. Scottie Coulter, who is teaching math. at the U. of I., also spent the week-end at home.

Mr. and Mrs. H. D. Crotthwait and Miss Marion Hartwell of Moscow and Miss Donna Wallace and Johnnie Theissen, Lewiston, were Sunday dinner guests at the home of Mr. and Mrs. L. A. Wallace.

Walter McCall, Sr., arrived home from Canada last Saturday, where he had been visiting his brother, James, for the past two weeks.

Mr. and Mrs. Wm. Wolff and family of Pullman visited Sunday at the Walter McCall home. Mr. and Mrs. Walter Hartung and family of Juliaetta were also guests.

Mr. and Mrs. Paul Lind, accompanied by Bob and Eugene and Scottie Coulter, were Sunday visitors at the Leon Lind home in Gifford.

Misses Jean Crocker and Barbara White, who are employed by the telephone company in Lewiston, were home over the week-end.

Mr. and Mrs. Paul Sennitt and daughter of Spokane were week-end guests in the home of her uncle and family, Mr. and Mrs. Wm. Watts.

Mr. and Mrs. Herman Schupfer attended a W. W. P. Co. meeting and party in Moscow Friday evening.

Mr. and Mrs. Edgar Dammarell were Lewiston visitors Wednesday. Jim Wilson of Headquarters is here visiting his father, Scotty Wilson, and other relatives.

Roy Johnson has been quite ill with the flu, but is up and about again.

Eugene and Bob Lind and Bob Watts, who are attending the U. of I., were home over the week-end.

Mrs. B. F. Nesbit, who suffered a stroke some two weeks ago, is now reported as slightly improved.

Clarence Pertyman and Dr. D. A. Christensen were Lewiston business visitors Tuesday, each taking delivery of a new pick-up.

Convention To Be Held

The annual meeting of the Washington-Idaho Wheat League will be held at Lewiston on October 31 and November 1st, according to an ISLA dispatch from that city.

Luncheon To Be Held

At the Second District P. T. A. meeting, to be held in the local school house Saturday, there will be a luncheon at noon in the school-house. Reservations must be in by Friday noon. Call Mrs. Herman Travis, P. T. A. president.

G. S. C. S. Meet Saturday

The G. S. C. S. will meet Saturday afternoon with Chloe McKeever. All members are urged to be present.

Wallace-Thiessen Nuptials

Miss Donna Wallace, daughter of Mr. and Mrs. L. A. Wallace, Kendrick, and John Thiessen, son of Mr. and Mrs. William Thiessen, Genesee, exchanged vows at 10:00 o'clock Monday morning, October 14, at St. Stanislaus parsonage in Lewiston, the Rev. Fr. Concannon officiating at the ceremony, which was performed in the presence of relatives and intimate friends of the young couple. The ceremony took place in front of a fire place, adorned with candles and fall flowers.

Hazel Baumgartner, Lewiston, and Sgt. Lawrence Thiessen, brother of the groom, attended the bridal pair. The bride was lovely in a gray suit with black accessories. Her corsage was of gladioli and chrysanthemums.

Following the ceremony the happy couple left on a brief honeymoon trip, after which they will make their home in Genesee.

Employed At Creamery

Joe Langdon began work at the local creamery Monday morning of this week, replacing Chuck Andres, now employed at Blewett's.

PERSONALS AND NEWS ON AMERICAN RIDGE

Mr. and Mrs. Henry Jones and son Edward and Grandmother Jones of Kendrick; Mrs. Harry Benscoter and Mrs. Sam Bigham were Monday afternoon visitors of Mr. and Mrs. Harry Langdon.

Mr. and Mrs. Henry Black and children of Juliaetta and Mr. and Mrs. John Wilson and family of Troy were Sunday dinner guests of Mr. and Mrs. Robert Cain. The dinner was in honor of Mr. Cain's birthday anniversary, which fell on Monday.

Jeanette Piece of Burnt ridge spent the week-end with Rita Cain.

Mr. and Mrs. Bruce Glenn and daughter Joan were Sunday afternoon visitors of Mr. and Mrs. Noria Callison and family.

Mrs. Dora Woodcock of Portland, who had spent the past two weeks visiting at the home of her son, Walter May and family, left Monday afternoon for her home.

Mr. and Mrs. Lester Roberts of California were Sunday guests of Mr. and Mrs. E. P. Roberts, Mr. and Mrs. Harvey Thornton of Moscow were week-end guests.

Mr. and Mrs. Geo. Havens and family were Sunday dinner guests of Mr. and Mrs. Ira Havens in Moscow. The dinner honored Ira Havens 64th birthday anniversary. All drove out to Garfield in the afternoon to call at the Stanley Mills home.

Your reporter wishes to thank Mrs. Harry Benscoter for writing this column last week.

Mrs. Walter Benscoter and daughters Jorene and Wilma and Mrs. Harry Benscoter were in Lewiston Saturday. The occasion was Mrs. Harry Benscoter's birthday anniversary.

On Sunday Walter Benscoter and daughters Jorene and Nita and Mrs. Harry Benscoter were in Peck, Mrs. Benscoter visiting at the home of her parents, Mr. and Mrs. Dan Lyle, while Walter and daughters visited at the Kahlor home.

Mr. and Mrs. Frankie Benscoter were Sunday morning callers at the George Havens home.

Mr. and Mrs. Archie Morgan of Moscow were Sunday morning callers at the Ed. Kent home. All drove to Lewiston in the afternoon.

Mr. and Mrs. Wayne Davis attended the football game in Pullman Saturday.

Don Benscoter of the U. of I. spent the week-end with his parents, Mr. and Mrs. Frankie Benscoter. Their other son, Ray, came home on Monday from the U., suffering with a severe cold, returning Friday.

Mr. and Mrs. Glen Miller and daughter and Mrs. N. C. Normoyle of Nez Perce, were Sunday afternoon callers at the Bigham home.

Mr. and Mrs. Harry Benscoter have received word that their sons, Cpls. Bob and Dick Benscoter, will be home sometime in December with their discharges.

Mr. and Mrs. Andy Cox have a couple of men from Spokane insulating their home.

Rev. and Mrs. Perry of Moscow and Rev. Lewis of Portland were

Wednesday dinner guests of Mr. and Mrs. Harold Roberts.

Mr. and Mrs. Geo. Davidson and son Bill were Sunday afternoon visitors in the Walter Benscoter home. Bruce Murdoch and C. W. Jessup of Juliaetta were Wednesday morning callers at the Perry Mattoon home.

Mr. and Mrs. Geo. Davidson and son Bill were Sunday evening callers in the Perry Mattoon home.

Mr. and Mrs. Ray Knutson and daughter were Monday evening callers of Mr. and Mrs. Perry Mattoon. Word has been received that Mr. and Mrs. Leonard Hanson are the parents of a son, born Tuesday, Oct. 15. Mrs. Hansen will be remembered as Mildred Wegner.

Mr. and Mrs. Herman Meyer and Mrs. Marvin Silflow were Wednesday morning callers at the Henry Brammer home on their way to Lewiston. Their daughter, Loeta, spent the day at the Brammer home.

Mrs. Dora Woodcock spent Wednesday night with Mr. and Mrs. Warney May.

Mr. and Mrs. Walter May and family and Mrs. Dora Woodcock were Thursday evening dinner guests of Mr. and Mrs. Harry Benscoter.

Mr. and Mrs. Warney May were Thursday callers in Moscow, and on Friday were in Lewiston.

BIG BEAR RIDGE NEWS

Mr. and Mrs. George Jones and daughters of Uniontown and Mrs. Wade Keene were Sunday dinner guests at the E. H. Jones home.

Mrs. M. Tweedy returned to Spokane Monday, having visited her niece, Mrs. Oscar Slind and family. George Slind of Spangle, Wash., visited relatives here last week.

Mrs. Albert Nelson and daughter Dawn Marie and Karen, are moving to Kendrick to make their home.

Miss Esther Nystrom showed the making of stuffed toys at the Happy Home club meeting at the home of Mrs. Henry Kortemeier Friday afternoon. The November meeting will be on "Bound Button Holes and Sewing on Zippers." Mrs. Gerald Ingle will be the hostess.

Mrs. H. Sneve has returned home and is recovering from her recent illness.

Mr. and Mrs. Anton Moen and children and Mrs. M. Carlson of Coeur d'Alene, and Mr. and Mrs. Emmett Peterson of Cut Bank, Mont., spent the week-end with Mrs. Johanna Nelson.

Mr. and Mrs. Florian Rode and sons Merrill and Milford Field arrived here last week from Great Falls, Mont., and are at the home of Mrs. Rhode's sister, Mrs. Gabriel Forest.

Walter Jones is building an addition to his home here.

The Lutheran Church in Deary will observe their 50th Anniversary of the organization of their congregation, Sunday, Oct. 20th. Dr. Field, district president, will deliver the morning sermon at 10:30. There will be dinner at noon and a program at 2:30. Everyone is cordially invited to attend.

Mr. and Mrs. K. D. Ingle and Gerald Ingle have been away on a hunting trip.

Mrs. Claude Jones and son Roger and Mrs. Lou Myers were Lewiston shoppers Saturday.

This ridge was well represented in Kendrick Sales Day.

Mrs. Everett Fraser has been delivering mail during the past two weeks, while Mr. Fraser was on a hunting trip.

Mr. and Mrs. George Larson are here from California visiting Mrs. Larson's mother, Mrs. Kate Gallo-way, and sister, Mrs. Chas. Bower.

Clarence Morey has gone to Canada on a big game hunt.

Return With Game

Several local hunters, who departed for the wilds with out-of-town parties, but have returned with game, include Jack Kuykendall and Clarence Perryman.

The hunting party made up of Bill White and son Roy, Emulus Brown from Kendrick, and three

friends from Lewiston returned last Wednesday from the Kelly creek section bringing back six elk and four deer.

The hunting party made up of Mr. and Mrs. Arthur Foster, Mr. and Mrs. Henry Jones and Mrs. Hattie Jones returned Sunday evening with an elk. Inclement weather forced an early return.

Grant and Don Bateman, James Morrison and Manning and Oscar Onstott returned Sunday evening from a big game hunting trip with an elk and a deer.

A hunting party made up of Walter Brocke, George Brocke and son Gene, and George Wilken left Sunday morning for the big game country of Canada. They expect to be

FACTS about the COST OF ELECTRICITY

There have been a lot of wild statements about the cost of electricity. The FACTS are important to YOU. They make interesting reading.

For example, compare the average residential cost of 1.47c per kilowatt-hour paid by Washington Water Power customers with that paid by customers of PUD (Public Utility District) Systems, as stated in the latest available report of the Bonneville Power Administration.

WASHINGTON WATER POWER	Average Res. Cost Per KWH
Cowlitz PUD.....	1.47c
Grays Harbor PUD.....	1.73c
Skamania PUD.....	1.92c
Pacific PUD.....	2.19c
Wahkiakum PUD.....	2.37c
Clatskanie PUD.....	2.58c
Kittitas PUD.....	2.77c
Klickitat PUD.....	3.24c
Lewis PUD.....	3.71c
	3.72c

Something Has Been Added

Something new has been added to the pheasants of Idaho. Every game bird released this year by the two state farms has been tagged with a numbered band, the fish and game department announced this week. Hunters preparing for the pheasant season that begins October 26, were urged by Maurice Lundy, bird biologist, to watch for the bands when they make successful shots.

He said the light metal band around one leg of each bird should be sent to the game department with a note about the place in which

it was killed. The idea is to get more information about how the farm-raised birds have grown and scattered. If we get good cooperation from hunters we can tell how the number of state-propagated birds compares with the wild stock. Of course the check will not be accurate or conclusive this fall because it is the first year that the birds have been banded. There are many unbanded hatchery birds in the field now from previous releases. After a few years of banding we can get a pretty close idea about the number of pheasants that reach the

hunter.

In northern and western counties the pheasant season is October 26 to November 11. Most eastern counties can be hunted October 26 to November 3. Bag limit is uniformly three roosters a day, or in possession. No hens may be shot.

Army On New Basis

Enlightened and humanistic leadership is proving an important factor in attracting high caliber men to the new United States army as a career, it was pointed out by Lt. Alfred M. Steele, in charge of the local recruiting station.

"The modern recruit, ranging from the fourth grader to the college graduate, has a keen perception of the dignity of man," Lt. Steele said. "He is in no mood to stand lack of consideration by his officers concerning him as an individual, his personal welfare, his recreation, and his training and assignment to duties commensurate with his abilities."

"By the same token his broader understanding indicates, by and large, alert responsiveness to leadership that is humanistic, enlightening and discerning. And it is upon that kind of leadership that the new army is being built."

Of 110,000 emergency war-time commissioned officers who applied for re-commissioning in the new army, only a selected ten percent have been re-commissioned. These are experienced officers. They are thoroughly qualified in their technical profession and have the poise and background to gain loyalty and respect.

There is no place in the new army for officers who, to cover an inferiority complex, use abusive language to subordinates or take improper advantage of their rank.

Austrian Winter Peas

Last week a farm dispatch erroneously stated that Austrian winter peas were grown "principally in the Twin Falls and Ashton areas."

John L. Olmstead of the Idaho County Free Press, Grangeville, corrects, and the following item is based on stories in recent issues of the Free Press:

"The growing of Austrian winter peas has developed from a minor activity to more than a million dollar crop for the farmers of Idaho county. The acreage in the state has increased sharply from 10,000 acres in 1945, to 24,000 acres in 1946. All but five per cent of this is in north Idaho this year, with about two-thirds of it, or 17,000 acres, in Idaho county. The major production of winter cover crop seeds is now in the Pacific Northwest. These seeds are shipped to southeastern states for fall planting to keep land covered during the winter months."

Homesteading In Idaho

If you're a World War II veteran with good character — and good luck — you might get a ranch or farm in Idaho by submitting an application to the Bureau of Reclamation. All the land is irrigated, with 2,500 acres in the Gooding division, Minadoka project, Burley; and 150 acres in the Owyhee project, Boise.

Reclamation commissioner Mitchell W. Strauss, Washington, D. C., has advised that a local examining board, indorsed by local veterans' organizations, will rate applicants as to character, industry, capital and farm experience, and will select the high scorers to participate in the drawing for the farms.

Get acquainted with your neighbors, meet them in Kendrick when you come in to trade.

**Production Line Is Adapted to Farms****Mechanical Age Proves Benefit to Agriculture**

The production line generally is considered to exist only in city factories but many farmers today have borrowed a leaf from industry's book by putting their grain handling operations on approximately the same automatic basis.

A by-product of the electro-agriculture age, a system of this nature is applicable to both small and large farms. Here's how it works: Grain-laden wagons are driven into the barn or adjacent to a building in which the produce is to be stored. Stationary or portable elevators,

This blower-equipped hammer mill can be fed from overhead bins and later re-elevate the ground feed into adjoining bins, located over the mixer.

powered by electric motors as small as one-third horsepower (although one or, preferably, two horsepower motors are recommended by most agricultural specialists) raise the grain into bins located above the grinder and mixer. Electric hoists often are used to tilt up the front end of the wagon, allowing the grain to pour out of the end gate into the elevator hopper.

Unground grain flows by gravity through chutes to a blower-equipped grinder, which blows the ground grain back into another overhead bin, from which it again gravitates by chute to the mixer. Mixed feed is either fed out immediately, sacked, re-elevated into storage bins or blown directly into the feed lot. Tests show that one man can unload 40 loads of corn per day, or a load of grain in from two to three minutes, with an electrically operated elevator.

Know Your Breed
Brown Swiss

First importation of Brown Swiss into the United States was in 1889. The breed is well adapted to intensive dairying conditions. Brown Swiss, due to their ruggedness and ability to consume large quantities of coarse roughages as well as their carcass value, are an ideal general farm breed.

The milk is white and the fat globules of medium size. The average test is 4 per cent butterfat.

Brown Swiss are second only to the Holstein in size among the dairy breeds. Mature cows will weigh about 1,850 pounds. They are heavier muscled, blockier and more fleshy and angular than other dairy breeds.

Inoculate Soybeans**To Get Ride of Weeds**

The best way to help soybeans stay ahead of weeds is to inoculate the seed. The presence of large numbers of effective bacteria right from the start enables the young plants to draw nitrogen from the air for faster growth.

They quickly fill the row and shade the ground, preventing weed growth, conserving moisture, and lessening the need for cultivation. The effectiveness of soybean inoculation was demonstrated at an eastern experiment station. The inoculated test plots matured into a highly profitable crop due to better stands, aided by abundant supply of immediately available nitrogen.

How to Overcome Soft Corn Winter Problem

While putting whole corn plant in a silo offers the most satisfactory method of preserving maximum feed value. If silo capacity is insufficient, the ears may be snapped and made into ear corn silage which will keep well and produce about the same amount of beef. If the soft corn is not put in a silo, it will be advisable to use one of the improved artificial methods of drying the corn.

Iowa Is U. S.'s No. 1**Food Producing State**

Iowa, admitted to statehood in 1846, produces more food for the tables of the nation than does any other state, and across its rolling plains lies one-fourth of the grade A soil in the entire country. Iowa is first in corn, oats, hogs, poultry, eggs, value of livestock, and in finished cattle for market.

The state is roughly rectangular, a pattern repeated over and over in its 222,000 farms and countless fields — nearly all of which are square or oblong. The flat checkerboard impression of today's traveler in Iowa is quite different from the concept of the first white visitor, Pere Marquette, as he drifted down the Mississippi under the bluffs near present-day McGregor, in 1673, wrote in his journal. "To the right is a chain of very high mountains."

With rare exceptions roads run directly east and west or north and south, and there is one to every mile. Only four states have more hard-surfaced highways than Iowa. The state is fourth in railroad mileage; no point is more than a dozen miles from a rail line. This transportation network gets precious crops to market in record time.

Black Spruce Swamps**Restocked by Planting**

That cut over black spruce swamps can be successfully restocked by planting is indicated by a test made on the Superior national forest, Minnesota, in the spring of 1938. Two-one black spruce trees were bar-planted at a spacing of four by four feet directly in a heavy growth of live sphagnum moss overlying peat. The moss was so wet that regular slits could not be made, so much of the shaping of the hole and subsequent firming of the moss around the roots was done by hand. Unlike plantations on upland which often have to be weeded or released two or three years after planting, no subsequent care was required by these trees. An examination in October, 1945, at the end of eight growing seasons, showed a survival averaging 68 per cent, or about 1,850 trees per acre. Moreover, these survivors averaged 44 inches in height (ranging from 16 to 87 inches). The shorter trees were found in the wetter areas. The examination brought out the fact that sphagnum moss is an excellent rooting medium due to its extreme porosity, large water-holding capacity, and good aeration.

Watch Clothes for Mildew

Mildew is not a simple stain, many people believe. It is a fungus growth that eventually "eats" into the fabric, causing serious and permanent damage. It thrives in a damp, warm, dark, unventilated place. Therefore, if clothes are even slightly damp when put away or if dampness reaches them in storage, a closed bag and hot summer weather make conditions ideal for the growth of the mildew. Before storing clothes, they should be given a thorough brushing, airing and cleaning to make sure they are dry to help prevent fungus growth in garments. The clothes should then be stored in a dry place or in a moisture-proof container so dampness cannot reach them. Unless such safety measures have been taken, stored clothes should be examined in mid-summer to see if any mildew has started. If so, they should be taken out of the storage bag at once, brushed, sunned and dried outdoors before putting away again.

Vitamin Research

Recent research at several state experiment stations indicates that loss of vitamin C — one of the most important offerings in fresh fruit — may be avoided if the housewife does not prepare fruit too long in advance and keeps it in the refrigerator while it waits. The New Mexico station found that cut sections of cantaloupe held in the refrigerator 2 to 4 hours lost no vitamin C, but that after 18 to 21 hours the loss amounted to 13 per cent. Co-operative studies at the Georgia, Louisiana and Virginia truck stations showed that sliced tomatoes may be held in the refrigerator for a few hours without loss of vitamin C.

Black Hole of Calcutta

The black hole of Calcutta refers to the infamous imprisonment of 146 English people in a military jail in Calcutta in 1756. Suraj-ud-Dowlah, 19 years of age, became the Nawab of Bengal and soon after broke with the British authorities. His sack of the town of Calcutta and capture of Fort William is the chief event of the town's history. Most English officials fled, but those remaining were forced to surrender after a brief resistance. The prisoners were forced into a single cell, about 18 feet long and 14 feet, 10 inches wide. The only ventilation came through two small barred windows that opened onto a veranda. It was mid-June when the heat was most oppressive and by morning only 23 of the 146 were alive. One of the survivors, John Holwell, commandant of the fort, gave an account of the agonies endured that night in the "Black Hole." The site now is marked with a black marble slab.

Advantages of Community Forests Recognized in U. S.

Enrichment of community life through cultivation of forests by cities is provoking an increasing number of communities to bring timberland under expert forestry management according to the American public works association. More than 2,000 municipal forests already established in the U. S. are protecting city watersheds, providing recreation and wildlife conservation areas and producing timberland products for cities on a sustained yield basis.

Though most municipal forests are too young to provide substantial revenue from market of timberland products, they are expected to become an important source of local revenue in this country as they have been for centuries in Europe. Some European cities and towns are completely tax-free because of profits from their municipal forests.

In this country, municipal forests are most numerous along the eastern seaboard, near the Great Lakes and in the far west. Manchester, N. H.; North Adams, Mass.; Newark, N. J.; Reading, Pa.; and Newport News, Va., are examples of cities administering municipal forests on long-range management plans. There are nearly 600 municipal forests in New York state and more than 150 in California.

Defrost Refrigerator to Maintain Efficiency

Defrost your refrigerator before the frost is a quarter of an inch thick, home management specialists advise. Thick frost slows down the freezing and cooling of foods and sends the temperature up. The frost acts like a blanket wrapped around the unit in the refrigerator. It keeps the cold inside the unit instead of letting it out to cool the foods.

Frost collects faster in the summer, and for this reason vegetables should be kept in covered containers. Then the moisture will stay in the vegetables where it belongs, and not out in the air where it will collect on the unit. Even in an ice refrigerator, it is best to keep lettuce, celery and other vegetables covered.

Don't fill the refrigerator too full, as that only shuts off the circulation of air, and the food doesn't keep as cool. Follow the rule of never putting anything into the refrigerator that you will throw away later. Finally, don't make your refrigerator work any harder than it has to. Open the door as little as possible and for as short a time as possible. Freeze ice cubes gradually without turning the dial to the coldest setting.

Brush Hair

Although there are many types of hair and scalp conditions, certain hair grooming habits are helpful to anyone. Most important of all, and perhaps the most neglected, is a daily brushing. Five minutes at night is all that is needed. Use a stiff brush to make long vigorous strokes. Don't be afraid of disturbing a wave or rearranging a part. Brushing is important for several reasons. First, it helps to remove dirt and dust accumulated in the hair during the day. Second, it stimulates the nerves and glands. If the oil glands are underactive, the stimulation to greater activity helps to keep the hair from being too dry. If the glands are overactive and discharging too much oil, brushing helps to distribute the oil more evenly over the hair and prevents oil from becoming clogged at the roots.

Sour Milk

The characteristic flavor of sour milk—slightly acid—is good in itself and adds zest to numerous dishes. Most important of all, sour milk has the same food value as whole milk, and in an easily digestible form. Like Little Miss Muffet, many people prefer sour milk served simply, as curds-and-whey or clabber. Then, too, sour milk may be substituted for sweet, cup for cup, in butter cakes and in all quick bread but pop-overs. For every cup of really sour milk, use one-half teaspoon of soda. For milk just beginning to sour, use one-quarter teaspoon of soda for every cup. Soda furnishes leavening power equal to four times its measure of baking powder. If more leavening than this is required in the recipe, make up the remainder with baking powder.

Jack Pine Poles

To help meet the heavy demand for poles, jack pine has recently been accepted for this use. However, the question has arisen as to how much jack pine is suitable for poles. Although the 1945 forest survey estimates show that there are some 977,000 acres of jack pine type in Minnesota, only 57 per cent of it has stands which contain pole-size timber. Under the present allowable cut for jack pine, 270,000 poles could be produced annually if it has stands which contain pole-specifications were used for poles. With the heavy competition from pulpwood and lumber which in 1944 consumed 282,000 cords and 103,000,000 board feet, respectively, it is estimated that the annual jack pine pole production in Minnesota will not exceed 100,000 pieces.

Maintain Health of Cattle During Fall

Seven Recommendations Given by Authorities

Severe losses of cattle may be suffered if proper methods of control are not maintained. American Foundation for Animal Health lists the following points as important:

1. Select good heifer calves for herd replacements now.
2. Inspect herd frequently for screw-worms. Losses may be prevented by prompt treatment of wounds.
3. Maintain ample clean water supply, an average of about 12 gallons daily.
4. Watch for outbreaks of black-leg or anthrax, vaccinating when diseases are prevalent.
5. Check pastures and fence rows for poisonous plants. Now is the danger period.
6. Be sure stock has adequate feed for milk production and to build themselves up for the winter ahead.
7. Handle stock carefully, both in driving and hauling to market.

Know Your Breed Brahmins

Brahmins, the name given to the native humped cattle breed of India, were first imported into America because of their resistance to cattle fever tick, ability to forage for feed on poor land and capacity to stand extreme hot weather.

As Brahmins were used for milk and as work animals and not for beef, the original stock imported into southern states did not prove very suitable for beef. Rapid strides in breeding improvement has made Brahmins of demand on the market.

The modern Brahman is a bulky, blocky animal, built along beef lines, although he retains his hump, dewlap, lapping ears and his ability to thrive in warm weather.

Use Seed Corn Tester

Seed Corn Tester Made of Cloth, with Pockets for the Kernels.

Ear seed corn tester, shown in illustration, may be made any size. By taking two yards of muslin cloth, doubling it and stitching across every 1½ inches, cutting just below the lines of stitches, then stitching it the other way, pockets in which to place the corn to be tested can be made. This will provide 576 pockets.

To fill, start at the lower left-hand corner, putting two or three kernels from an ear in each pocket, keeping record. When filled, double and roll the tester and soak in water a few minutes daily. Roll in a dry cloth and keep in a warm room. In four or five days the kernels will be well sprouted if fertile.

Farm Ponds Aid to Proper Flood Control

Where possible, a farm pond should have a relatively small drainage area, points out Clemson station authorities. If the entire water supply can be had from one or two large springs, the location is excellent.

If a small stream must be used, it is very necessary to construct a large emergency spillway to care for excess water during flood periods. All of the spillway should be screened to prevent loss of fish during high water.

Sterilamp Use in the Poultry Shed Advised

Invisible bullets of light, sprayed by the sterilamp ultra-violet tube, has given the poultry raiser a new weapon to combat air-borne cross infections which are responsible for causing a high rate of mortality among chicks. In tests made it was found that chick mortality could be cut in half and that hatching losses were greatly reduced when the ultraviolet tube was installed.

IDAHO RECLAMATION SERVICE BATTLES AGAINST CVA

Omaha, Neb. — A strongly worded resolution of opposition against a Columbia Valley Authority was passed by a unanimous vote of the more than 100 Idaho delegates in attendance at the National Reclamation Association annual meeting here this week (Oct. 10-11-12).

The Idaho delegation, which was one of the largest among the 17 western states comprising the association, included officers and directors of farmers' water-users organizations who own in excess of 2,000,000 acres of irrigated land in the state of Idaho.

The Idaho irrigationists, who are "up in arms" over the threat to their successful reclamation program and to their water rights by the proposed Authority legislation, said that they are "unilaterally opposed to the creation of a Columbia Valley Authority or any Authority which will take from the farmers of Idaho the water rights now owned by them and reduce these farmers to the status of renters of water."

"We are opposed to this class of legislation," the resolution continued, "first of all for the reason that it will interfere with and destroy the program already in effect for the complete development of the natural resources of the Northwest by a coordinated program of the Bureau of Reclamation, the Corps of Army Engineers, the Department of Agriculture and other federal agencies, for which the Congress has appropriated more than \$30,000,000 to be expended in Idaho alone, and comparable appropriations to the other states in the Columbia river basin. This development is vital to the people of Idaho and is being carried out under our present American system of government, for which there

can be no substitute."

The Idaho delegates declared they are opposed to CVA legislation for the following reasons:

"It is proposed that CVA take control not only of the water, but of all natural resources of the Columbia river basin.

"Three men, appointed by the President, would have this unlimited power. Nobody knows who those three men would be. The people would have no voice in their selection, and they would not be responsible to the people.

"All the natural flow of the rivers of Idaho during irrigation season has long since been applied to beneficial use. Reservoirs to impound 6,500,000 acre feet have already been constructed. These water rights are subject to condemnation under the provisions of CVA. When condemned the directors of CVA will rent this water to the farmers of their choice.

"CVA would take away from state courts jurisdiction over all litigation in which the Authority is involved, including water, litigation, and give exclusive jurisdiction to the federal courts.

"CVA would supersede and nullify existing law under which we have acquired our water rights and by which these rights are protected.

"CVA would destroy state rights and in lieu thereof create a federal corporation, consisting of three men having autocratic powers.

"We are absolutely opposed to any such legislative scheme because it will destroy the American form of government."

It's Still Fishing Season

Fishing has been playing second fiddle lately in the excitement over Idaho's big game hunting, but it is still very much on deck and giving a lot of enjoyment to sportsmen who do not mind a little frost with their

flies.

Trout are in season in most of Idaho's waters until November 15, the game department announces. The date is five days past the closing of deer and elk hunting in most counties, and therefore give the hunter a chance to take a final fling or two at a rainbow while he is getting his game out of the forest.

Up Sandpoint way there are awed whispers that kamloops fishing will be hot about October 15. Men who know the champion fish best report the rainbow that try to be whales will be hitting hard again the latter part of October and should continue their "hot schedule" until about November 15. A few nice ones are being caught now, as has been the

case all summer and fall. Largest recorded in 1946 is a 30-pounder caught by M. R. Foster of Spokane, the last week in September.

Although cold weather has taken the edge off fly fishing in many streams, exponents of the delicate lure are keeping up their effort. Bait is found more effective, however, by the average fisherman.

Whitefish will be coming into the picture as winter advances. These game fish may be taken the year around in several streams and lakes.

PUBLIC SALE

Having rented my farm, I will sell at Public Auction at my place, 9 miles north of Kendrick, and 9 miles south of Deary, and ¼ mile north of Community Hall, on Deary-Kendrick highway, on

Friday, Oct. 18, 1946

Commencing at 11:00 A. M. sharp, the following property:

LIVESTOCK

- 1 Bay gelding, 8 years old, weight 1450
- 1 Bay gelding, 8 years old, weight 1400
- 1 Brown mare, 7 years old, weight 1400
- 1 Black Jersey cow, 9 yrs., fresh Dec. 1
- 1 Black Jersey cow, 3 yrs., fresh Apr. 6
- 1 Guernsey cow 3 yrs., fresh April 11
- 1 Guernsey and Jersey 2-yr-old heifer, fresh Dec. 5
- 1 Spotted cow and calf, fresh May 26
- 1 Yearling White Face heifer
- 1 Heifer calf, 6 months old
- 36 New Hampshire pullets

MACHINERY

- 1 10-20 McCormick-Deering tractor
- 1 22-in. Case separator, with Bean and Pea attachment
- 1 14-in. 2-bottom Moline tractor plow
- 1 12-in. foot lift gang plow
- 2 16-in. walking plows
- 1 7-ft. tractor disc 1 8-ft. single disc
- 1 8-ft. Western land roller
- 1 8-ft. McCormick binder
- 1 P & O Bean planter
- 1 Parker bean cutter
- 1 1-row Hammock riding cultivator
- 1 9-ft. single disc Van Brunt drill
- 1 2-horse walking cultivator

- 1 3-in. wagon and bundle rack
- 1 3-in. wagon and grain rack
- 1 2-wheel trailer 1 8-ft. Acme harrow
- 1 Pea and Clover rower
- 1 Carley 6-inch roller chop mill
- 1 3-sec. pipe bar harrow
- 1 3-section U-Bar harrow
- 1 2-section springtooth harrow
- 1 5-foot McCormick mower
- 1 10-ft. McCormick rake
- 1 Buggy 1 Bob sled
- 1 Mitchell Drag Saw with 3 blades
- 1 Anvil 1 Post drill 1 Grind stone
- 1 Forge and other Blacksmithing tools
- 1 Wood splitting gun 1 Emery stand
- 1 Set logging tongs, peevies, shovels, forks, chains, etc.
- 1 Western fanning mill
- 1 Home made electric fence charger
- 1 Cyclone hand grass seeder
- 3 Sets work harness — 1 Set light harness Double & Singletrees, neckyokes, collars
- 20 Acres bean straw
- 14 Tons threshed hay — in stack
- Other items too numerous to mention

HOUSEHOLD GOODS

- 1 Phonograph 1 Round dining table
- 1 Gas lamp 1 Heating stove

ROY GLENN, Auct.

F. O. BROCKE, Clerk

TO DISCUSS SWINE

PROBLEMS OCTOBER 17

Idaho swine breeders will discuss their feed and marketing problems around a common table at the Latah county fair grounds when they meet at Moscow for the fifth annual Idaho swine type conference, October 17. Announcement of the conference comes from W. P. Lehrer, Jr., assistant animal husbandman at the University of Idaho. The conference is sponsored by the University's Department of Animal Husbandry.

A short resume of the conference program includes Dr. Glenn C. Holm, university veterinarian, who will discuss swine sanitation and diseases common to Idaho swine. Herb Mer-

man, Spokane, packing house representative, will discuss the swine situation from the packer's standpoint, and the morning program will be rounded out with a round-table discussion of swine feeding problems by swine nutrition authorities, swine producers, and extension swine specialists. The afternoon will be given over to the free-for-all swine judging contest.

This year's swine type committee is made up of Wade Wells, University of Idaho extension swine specialist; Everett Warwick, Washington State College animal husbandman; and Henry Weimers, Boise, swine grower.

Hogs judged at the conference will be placed for disposal at the

northern Idaho purebred swine sale October 18. Some 50 head are expected to be consigned for the auction.

Fine Swine To Be Auctioned

More than 40 of the state's finest purebred swine will go on sale at Latah county's fair grounds, Moscow, October 18, when the auctioneer lifts his hammer to start the 1946 northern Idaho purebred swine sale under direction of the Northern Idaho Swine Breeders' association.

Elbert McProud, Latah county extension agent and secretary of the association, said consignments for 40 animals had already come to his office, and more are expected as

breeders over the state make last-minute decisions to sell at the annual auction. Consignments include Durocs, Poland Chinas, Chester Whites, Herefords and Hampshires. All stock is out of last spring's litters, and full registration papers will go to the buyers immediately after the sale.

McProud's list shows some of the state's best known swine breeders are bringing hogs to the auction. Henry Wiemers, Boise; R. H. Hauger, Fenn; Kenneth Butterfield and the Schott Brothers of Princeton, and August Mantz of Harvard are a few of the well known breeders planning for the sale. The University of Idaho will consign six animals from its prize Duroc and Poland China herds.

A Business Of Your Own?

Thousands of veterans now being discharged are anxious to get into a business of their own. Many of them, however, are not aware of the problems they must solve both before and after starting an enterprise.

A pamphlet put out by the U. S. Department of Commerce designed to acquaint them with some of these problems raises questions such as these: "Have you had previous experience in this type of business?" "Do you like to deal with people?" "Are you willing to work long hours?" "Have you considered working for someone else to get more experience?"

The pamphlet also points out the need for adequate financial backing, proper location of the business, especially if it is a store, the danger of entering a field already overcrowded, and the advisability of consulting local businessmen in non-competitive lines as to the need for the kind of enterprise contemplated. There is need for many new businesses in America today, particularly in the west, but veterans will be wise to study thoroughly the fields they want to enter before launching out on their own.

They should also consider, too, that if hiring men, they will in all probability be "doing business" with a union, which will undoubtedly play a large part in setting their prices. Careful forethought will aid success and prevent disillusionment.

If you spend your dollars out of town, how long do you think the community can endure? Trade at home.

The Philippine Islands

Manuel Roxas was elected as the first president of the Philippine Republic, and was inaugurated on July 4, in Manila. He was recently in Washington making preliminary arrangements, with the help of the then Philippine Governor Paul McNutt, for the independence of the islands, as this involved new arrangements with the United States government.

Mr. Roxas, in a recent interview, presented the history of the Philippines, beginning with the Spanish-American War of 1898, and following the tragedies of the recent World War, and the record of progress made by the islands in all the past years. President Roxas had a good deal to say about the onward and upward progress of the Philippines and he made it very plain that most of the credit for the improvement of his countrymen began when the American government sent shiploads of school teachers from America at the earliest possible moment after the United States took over the islands.

A new and cultivated race of people now inhabit the Philippines because the United States brought up an educated nation of people, where education had been ignored under Spanish rule.

We read about a fellow who is planning to go around the world on a bicycle. By the time he gets back maybe his new automobile will be ready. Clanton (Ala.) Union-Banner.

Competition is the life of trade — advertise. Tell the public what you have!

MAIN STREET

We hope it's a frozen asset

This Northern Pacific snowplow may never earn back the \$98,000 we paid for it. But no matter how bad the blizzards this winter, you'll get through on the North Coast Limited.

All up and down the Northern Pacific you can find equipment units of this kind—many of them "frozen assets". No flood, storm, washout, rock slide or other foreseeable emergency will catch us unprepared. We gladly take our own profit-money to provide this unprofitable equipment because, in the end, good and dependable service means more business, more profits for us.

This kind of "selfish public service" is a good thing for all our neighbors along "Main Street". Right now (without waiting for any social blueprint) we are using every trick in the book to make this a better railroad. Last year we laid 800,000 new ties... tamped 1,400,000 yards of crushed stone into deeper, finer roadbed... went ahead with the building of a new \$9,000,000

passenger train which is going to carry you in the lap of luxury.

If you know a better way to run a railroad, we'd like to hear from you. We'd like to hear from you anyway.

A STANDARD OF CALIFORNIA PRODUCT

Soil Replacement Is Now Essential

Soil Food Drainage Must Be Replaced

No enemy bombs hit American soil during World War II, but the nation's farm land nevertheless was "mined" in order to produce the gigantic crop yield which helped make victory possible, according to a statement made public by the Middle West Soil Improvement committee.

"War-time crop goals which were necessary to produce foodstuffs, meat, dairy products, oil and fiber crops at a rate never before attained in history," says the statement, "drained the soil's resources

Adding life-giving substance to pasture in New London county, Connecticut.

of nitrogen, phosphorus and potash faster than they could be replaced. "As a result the need for carrying out soil-rebuilding and erosion-control practices will be great for many years to come.

"American farmers increased their production at least one-third above prewar records. In order to meet world food demands and prevent famine overseas, they are being asked to continue their crop output at high levels.

"Steps to repair the damage done to the soil's fertility level during the war and to make the land continue to yield crops enough to solve the world food crisis, are therefore imperatively necessary.

"The means for accomplishing this lie in providing the soil with all available plant food containing nitrogen, phosphorus and potash and in following intelligent farm management practices such as the raising of nitrogen-fixing legumes, regular crop rotation, pasture improvement and where necessary, contour plowing."

Milk Can Range Waterer

Ten gallon milk can makes an excellent water container for range and other use.

Rusted cans no longer suitable for milk are satisfactory. Fill the cans with water and invert them into pans large enough to permit plenty of drinking space. This North Dakota station idea will prove a labor saver.

Two-Row Fertilizer

This two-row, horse drawn fertilizer distributor has been converted from a one-row planter by the Texas Agricultural Experiment station. The machine may be used for putting down commercial fertilizer in listed furrows in advance of rebedding land or for side dressing row crops.

2,4-D Use on Irish

Potatoes Discouraged

The use of 2,4-D as a weed killer in potato patches has not always proved satisfactory. Herbicidal agents selected in character might find widespread use if they removed undesirable weeds without causing concurrent injury to a growing crop, according to studies conducted at Camp Detrick, Md.

It was found that the use of substituted phenoxycetic acids, such as 2-methyl-4-chlorophenoxyacetic acid and 2, 4-dichlorophenoxyacetic acid, may be of value for the selective control of weeds in potato fields.

Dairy Cows Need More

Room in Their Mangers

One of the greatest needs in barns on the average farm is larger mangers, according to Carl Huffman of Michigan State college. He states that some mangers just aren't big enough to hold all the roughage that a cow should eat, while others which are large enough do not get enough hay put into them to produce milk cheaply. Good roughage will cut down the amount of grain cows need.

Causes and Prevention of Home Accidents Listed

Falls on stairs, from porches and ladders, and on slippery floors and sidewalks are among the chief causes of home accidents, the National Safety council points out, adding other reasons:

Burns by gasoline and kerosene, matches, smoking in bed, and steam and hot liquids; suffocation by bedclothes, and baby sleeping with adults; firearms from playing with guns and examining or cleaning guns; poison gas from stoves badly vented or otherwise in disrepair, and gas failing to ignite, and poisons from failure to identify the bottle before taking medicine, and harmful substances left within a child's reach.

Home accidents can be prevented by: repairing stair treads and bannisters, installing handrails, insuring adequate light, and removing ice and snow, or spreading sand or salt; never using gasoline or kerosene to start fires or dry-clean, keeping matches out of children's reach and never smoking in bed; never using heavy blankets or fastening them on a child's bed or using pillows in a child's bed and always treating a gun as if it were loaded. Unload and lock up all guns in the house.

Find Small Percentage Possess Large Savings

To get the answer as to who held savings deposits and U. S. bonds, economists of the department of agriculture interviewed about 3,000 family groups representing a scientific cross-section sample of the people in the entire United States. That sample included farm people, town people, and city people of different income levels.

After careful survey and weighing the results, the economists conclude that only a small minority of the people have much money in banks or bonds. Over half the families have from less than \$500 down to nothing. If this poorest half spent all they have saved up, their spending would represent only 3 per cent of the holdings in the country.

On the other hand, the highest 10 per cent of the people, those who had an income last year of \$4,450 or more, hold six-tenths of the bonds and money in the bank. The top 30 per cent hold nearly nine-tenths of all these funds that are available for spending.

Safe Dress

If you are a woman who does outdoor work in slacks or overalls, wear flat heels. High heels may cause you to fall by catching in the cuff of your slacks or overalls. Flat heels will not only avert this danger but you will be less tired at the close of the day than when you wear high heels. Another way to guard against the danger of being tripped by a too-long or too-wide trouser leg is to fasten a short strap to the inside seam and attach to a button sewed on the other seam. A long pair of gloves slipped on when taking food from the oven will save you many a burn. When cooking wear short sleeves that will not catch on the handles of pans of hot food. Many women and small children have been burned by such mishaps. Long sashes or tie belts on dresses are a common cause of accidents. If you must wear a belt that ties, use a short one that ties at the back.

Food Storage

Store onions, potatoes and foods canned in glass in a cool, dry and dark corner. For meat, the best rule is to keep it clean, cold and covered. A temperature of 45 degrees or lower is the best. Wash poultry thoroughly inside and out, pat it dry and store in a very cold place. If your eggs have some soiled spots on them wipe off with a dry, rough cloth, but don't wash them before storing because the water destroys the protective film on the shell that keeps the air out. Vegetables also need careful handling to preserve their goodness. Wash, drain and store your salad greens in a covered pan and keep cold. Cauliflower, Brussels sprouts and broccoli lose freshness faster than cabbage so leave them uncut and keep cold but not too dry. Keep your root vegetables—beets, turnips, rutabagas and carrots—in a cool ventilated place and it's all right to cut the tops to two inches in order to save space.

Range Efficiency

It is generally known that coal ranges, if completely covered, use only about 18 per cent of the heat supplied. Kerosene and gasoline stoves are about 25 per cent efficient, and gas stoves 35 per cent; electric stoves, on the average, use 50 per cent of the energy supplied. An emersion heater unit can be expected to use up to 90 per cent. Another thing that determines efficiency and length of time it takes food to cook is the utensil in which it is placed. Quickest cooking can be done when a pan slightly larger than the element is used; it is always best to use the smallest utensil possible for the job to be done and the unit to be used. A pan with straight sides is more efficient than one with sloping or curved sides. Straight-sided ones have less surface and therefore lose less heat through radiation.

Leading Lights Served With Judge Advocate

The judge advocate general's department, which marked its 171st anniversary last July, is one of the oldest branches of the army. Founded in 1775 by an act of the second continental congress, the department was organized as a part of General Washington's army by Lt. Col. William Tudor, the first judge advocate general.

One of its first members was Capt. John Marshall, who later became secretary of state and chief justice of the Supreme court. Among the many other distinguished figures in law and government who have served with the department are Henry L. Stimson, later secretary of state and secretary of war; Maj. Patrick J. Hurley, later a major general, secretary of war, and ambassador to China; Maj. Felix Frankfurter, presently associate justice of the Supreme court; Col. John H. Wigmore, later dean of Northwestern university law school and a world authority on the law of evidence; and Gen. Hugh S. Johnson, NRA administrator and journalist.

The department attained its largest size during World War II, when it numbered approximately 3,000 officer-attorneys and was described by the judge advocate general as "the largest law firm in the world." Best known to the public for its part in connection with military justice, it also acts as the chief legal advisor to the army and the war department upon a wide variety of subjects.

Mexican Bases Aid

AAF Hurricane Lookout

Earlier hurricane warnings and better protection for people living in the southern and southeastern United States will be the results of special agreements just completed with the Mexican government which will permit army air forces aircraft to operate from three Mexican airfields.

Hurricane-hunting planes of the AAF formerly have been unable effectively to keep tabs on hurricanes moving into or originating in the Gulf of Mexico and Pacific waters adjacent to Mexico. Before the landing rights were granted, weather planes were based at Morrison field, West Palm Beach, Fla.

Now, with bases at Las Vajadas in Vera Cruz, Merida in Yucatan, and Ixtapetec in Oaxaca, the AAF can extend its hurricane-hunting activities far to the west—to follow each storm that develops, flying through and around it, and to keep the weather bureau constantly informed of the rate of movement and intensity of these vicious tropical disturbances.

Portable Farm Elevator

The portable elevator is the "strong back" that does the laborious lifting for the modern farmer, according to R. D. McMichael of General Electric's farm industry division. The portable farm elevator will handle bales, boxes, baskets, ear corn, oats, wheat and other small grains; bags of potatoes, or even gravel and sand. Valuable as the portable elevator is in the harvest rush of handling the hundreds of millions of tons of farm crops, its usefulness by no means ends when crops are safely housed, the farm expert pointed out. Such stored products usually go ultimately to market or are used to feed farm livestock. The farm truck or trailer can be loaded as easily and quickly as the crop was stored originally. Ground feeds as well as sacked commercial concentrates purchased to supplement farm-grown feeds present no problem for the portable farm elevator.

Cotton Classification

The Smith-Doxey act is the name of a congressional act which provides free classification and market news services to organized groups of cotton growers. This act directs the secretary of agriculture to provide for free classification of cotton to cotton growers who are organized to improve the quality of their cotton. If a grower wants his bales of cotton to be classified, he must be a member of a group of farmers who have adopted a single variety of cotton for the community or county—with each member planting a part, if not all, of his crop to the variety selected. The farmer himself does not apply for cotton classification. Each organization must file a group application for the services with the department of agriculture's cotton classing office right now.

Railroads Use Herbicides

The railroads have always been major customers for herbicides. Since non-selective killing and soil sterilization are desirable for their type of weed clearance, huge quantities of crude salt, oil, sodium chlorate, and arsenic oxide are used. In 1944 alone, 4,500 tons of arsenic oxide and 1,783 tons of sodium chlorate were allocated for use on railroad rights-of-way. Since both oil and sodium chlorate are fire hazards, and sodium chlorate and arsenic oxide are fatal to animals, they are not ideal for roadside or railroad weed control. It has been reported that cows will actually jump fences to eat plants poisoned with sodium chlorate, which gives off an odor like new-mown hay.

Tip For Proper Hat Care

It takes a two-fisted man to put on his hat properly! And that means grasping the brim back and front with thumbs and fingers to keep the crown and brim in shape longer, say clothing specialists.

Pushing up the crown when a hat is wet is not advisable, either; the creases will not fall back into their former shape. To properly dry headgear, turn the brim up, which will prevent "bellying" and buckling of the brim after the hat has dried.

A hat can best be kept free from felt stains by wiping off excess hair oil before donning a hat. Placing one hat on top of another is not advisable either, since the oil from the sweatband of one will penetrate the crown of the other. Dust, too, should be removed daily by brushing, because rain will work into the fabric, eventually give it a spotty appearance, and make cleaning more difficult. To retain ribbon luster, the band and bow should be wiped with a soft cloth.

Idaho Schools Need Money . . . yet

"Blue Law Initiatives Would Take Millions Away!"

Since 1939 the state of Idaho, its 44 counties and 1112 common and public schools have benefited immensely from the state-controlled sale of liquor. The income to the state general fund and to Idaho's schools amounted to:

\$10,788,721.89

of This Sum Latah County Received \$200,854.94

Prohibition by counties (local option) will not drive away liquor. It will NOT stop drinking. It will drive consumption AND SALES under cover. The money which has been going to benefit all of Idaho's citizens and schools would be going to enrich bootleggers and racketeers. The experiences of National Prohibition proved that!

REMEMBER THE DAYS OF AL CAPONE!

THINK BEFORE YOU VOTE!

Prohibition Without An Election!

That's what the "Blue Law" Initiatives provide for. These initiatives are dangerous and tricky. If passed, a county could be made "dry" merely upon filing a petition signed by a small minority (55% of the vote cast for Secretary of State. You'd not have a chance to vote on the matter.

Is That the American Way?

Sheep Lost In Fire

Thirty-five head of valuable Panama breed sheep, a strain which the University of Idaho had been developing for the past 16 years, were burned to death in a spectacular fire at one of the U. of I. barns last Sunday evening. The flames also destroyed some 40 tons of baled hay and several tons of chopped feed.

A goodly number of head of other breeds of sheep in the barn were driven to safety.

The cause of the blaze remains a complete mystery at this time.

At one time the cow barn, which was within 100 feet of the burning building caught fire, but these flames were promptly put out.

No value has yet been placed on the loss — but it is a severe one.

GOLDEN RULE

Mrs. Ida Silflow of Cameron visited with Mrs. Glen Betts Thursday.

Mr. and Mrs. Archie Betts and sons of Lewiston called at the Glen Betts home Thursday evening.

George Finke, some of his army buddies and Kenneth Wilken left on a big game hunt Sunday.

Mabel Cowger spent the week-end at home with Mr. and Mrs. W. A. Cowger. Dean Luce was a caller at the Cowger home Saturday.

KENDRICK COMMUNITY CHURCH

Address on India next Sunday morning at 11:00 by Miss Ruby Hobson, Medical Missionary (recently returned to America, having been in India the past five years).

Such an opportunity rarely comes to Kendrick. All are invited.

Miss Hobson may speak at the Leland Church at 10:00 a. m. or 7:30 p. m.

TEAKEAN GOSSIP

Mrs. Al. Heimark visited a week with her mother, Mrs. Dick Van Cleave, in Lewiston.

Mr. and Mrs. Leo Olson from Montana were over-night guests of Mr. and Mrs. W. L. Brown, Wednesday.

Mr. and Mrs. Chester Westling and Mrs. Wm. Groseclose of Juliaetta visited Thursday with Mr. and Mrs. Carroll Groseclose and family and Wm. Groseclose. They brought ice cream and cake for a birthday anniversary dinner honoring Carroll and his father, Wm. Groseclose. Mrs. R. E. Brock and Grover Groseclose were also guests.

Mr. and Mrs. Clifford Brown and Mr. and Mrs. Al. Heimark were dinner guests of Mrs. Van Cleave in Lewiston, Friday.

Mr. and Mrs. Orval Choate and Walthon Wells made a trip to Boise last week.

We are happy to hear that our old friends and neighbors, the Jack Lansing and Carey families are moving back to their ranches. They are seeding fall grain, and find moving a good deal of work.

Beverly Brown was an over-night guest of Viola Brown, Friday.

Clarence Dougherty of American ridge got two loads of shake timber from Wm. Groseclose and hauled it to Juliaetta, to be worked up this winter.

Mr. and Mrs. Gifford Brown and family and Bill Marsh, Orofino, were dinner guests of Mr. and Mrs. Ralph Stucker, Kendrick, Sunday.

Mr. and Mrs. Al. Heimark are spending this week in Spokane, visiting his parents and other relatives and friends.

Mr. and Mrs. W. L. Brown spent Sunday in Orofino.

Viola Brown was an over-night guest at the Gordon Choate home, Sunday.

Ray Lougee and Grover Groseclose attended Sales Day in Kendrick, and took a load of produce to the Wm. Groseclose home in Juliaetta.

Miss Alda Choate, teacher of the Teakean school, is giving a program Friday evening, Oct. 25. A pie social will follow. From all reports there will be plenty of ghosts and witches to scare even the bravest.

Wonderful Fall Weather

The past week has seen about the most wonderful fall weather that anyone could wish, with clear, warm days and cool, frosty nights the rule. In fact, it got cold enough in Kendrick last Friday night to freeze 2-inch icicles on a dripping water hose at the Kendrick Garage.

Local warehousemen say that so far as they know, all crops in this area are now under roofs — and that no one has suffered a real loss due to inclement weather — although some lost rowed beans and peas when hit by the high wind of some weeks ago.

Farmers say that they would like some rain now, since the ground is plenty hard, and consequently slows down fall plowing as well as taking the edges off plow shears.

Notice
Anyone having W. S. C. S. table linen please turn it in to the church by Friday.

Deserves Your Support
Ever stop to figure out just how much the home town really means to you — not only as a convenient place of business, but as the center of your educational and cultural life? Then — support it! No mail order house ever helped you build an inch or road, a school or church!

Potlatch Chief Sez

PUBLISHED BY THE KENDRICK CO-OPERATIVE CREAMERY

HI, THERE, FOLKS:

These cold, nippy mornings, do you know what you need to pep you up? Hot chocolate made with Potlatch Chief milk. It's just the thing with which to start the day right. One cup of hot chocolate gives you more body, building products and more energy than a whole gallon of coffee.

And — For a mid-morning snack or a midnight supper, hot chocolate is just the thing to satisfy everyone. Always have an ample supply of Potlatch Chief milk on hand, so you can make hot chocolate in a jiffy when a familiar voice yells: "I'm hungry!"

And — Another good "snack time" dish is milk toast. It really hits the spot these frosty mornings — especially when made with Potlatch Chief milk and Potlatch Chief butter. Try some tomorrow morning, or at "snack time."

Little Woman: "Darling, I've just read that a man up north exchanged his wife for a horse. You wouldn't exchange me for a horse would you?"

Husband (dutifully): "Never, but I would hate to be tempted with a good car."

Two of our local fishermen were indulging in the piscatorial sport and the following conversation is said to have taken place:

First fisherman: "It's getting late and we haven't caught a single fish."

Second fisherman: "Well, I'm in favor of going home as soon as I let two more big ones get away."

Hariduity means if your grandfather didn't have any children, then your father probably wouldn't have had any, and neither would you, probably.

Give some people an inch and they want to become a ruler.

MEAT IS SCARCE

But we're cutting some mighty fine beef these days. Try a steak or roast.

And . . .

When you think of Groceries or Meats . . . think of us.

MORE ABOUT ARMED FORCES

latter being a Gazette caller Wednesday, wish to extend to all their thanks for the paper.

Sgt. Silflow states that he has nothing to add to Jim's report — it covered the ground thoroughly.

Mr. and Mrs. Walter McCall have received word from their son, Walter, Jr., that he has now been promoted to the rank of Fireman 1/c.

LINDEN

Mrs. Chas. Keeler and daughter, Mrs. Ted Vaughan and little son returned Saturday from a visit with relatives in Shadron, Kansas.

Mrs. Nell P. LaFollette, county superintendent of schools, and Mrs. Ottness, health nurse, both of Moscow, visited the Linden and Cedar ridge schools Friday.

Anna Smith spent the week-end with the Galloways on Big Bear ridge.

Clarence Weaver was in Spokane Monday and Tuesday on business.

Jake Riebold, home on leave, spent several days with his sister, Mrs. Felix Holt, and with Mr. and Mrs. Addison Alexander.

Joe Michaelis came up Wednesday evening to move his family and household furniture to Forest Grove, Oregon. Rickie Alexander, who has been visiting his grandparents, Mr. and Mrs. Louis Alexander, accompanied them to Pasco.

Miss Wilma Cuddy spent the week-end with her parents, Mr. and Mrs. Ray Cuddy, returning Sunday evening to her studies at N. I. T. C., Lewiston.

Mr. and Mrs. Loyd Israel of Moscow, and Mrs. Hiram Galloway of Kendrick spent Sunday in the Clem Israel home.

This ridge was very well repre-

sented at Sales Day in Kendrick Mr. and Mrs. Arley Allen spent Saturday with relatives at Riggins. F. C. Lyons and sons have returned from their hunting trip, reporting good luck.

Ramie Hunt, Felix Holt and Clarence Wilson returned Saturday with three elk. The remainder of the party stayed a few days longer to hunt.

Mrs. Addison Alexander entertained at a quilting party Thursday with a fried chicken dinner, each person bringing a covered dish. Those present were Mrs. Ervin Swenson, Mrs. Marion Souders, Mrs. John Darby, Mrs. Arnie Kloster, Mrs. Rose Farrington, Mrs. Alva Craig, Mrs. Bob Chibberg, Mrs. Tompkins and daughter, Mrs. Clem Israel, Mrs. Louis Alexander, Mrs. D. W. Whybark, Mrs. F. C. Lyons, Mrs. Arley Allen, Mrs. Stewart Wilson, Mrs. Arthur Foster, Eva Smith, Mr. and Mrs. Joe Michaelis, Mrs. C. H. Fry and son Bob and wife and children called in the afternoon.

Mr. and Mrs. Melvin Garner and children of Kendrick spent Sunday with Mr. and Mrs. Arley Allen.

Elmer Cuddy went to Moscow Monday to get a "cat" for Clarence Weaver, which he expects to use in logging this winter.

Mrs. Rollin Armitage and children returned to their home in Southwick Sunday evening, after spending the week with her parents, Mr. and Mrs. Ray Cuddy.

Addison Alexander is building new cement sidewalks about his home.

Raymond Whybark finished pouring the cement for the basement of his new home Thursday afternoon.

CAMERON NEWS

Corus-Rush Nuptials

Miss Dorothy Corus, daughter of Mrs. Mabel Corus, Clarkston, and Benny Rush, son of Mrs. George McKinnon, Cameron, were united in marriage at the Clarkston Methodist church Thursday of last week. They will make their home on a farm near Genesee.

THESE ARE

THE FACTS

AS WE FACE THEM TODAY!

ANTI-FREEZE . . .

Get it anywhere you can find it. There will be very little of the "permanent type" available anywhere. However, we have lots of radiator alcohol.

TIRES . . .

Buy what you can find, where you can find it, if you wish to keep on rolling. However, we get a few now and then — and that Goodyear is worth waiting for.

HYDRAULIC BUMPER JACKS . . .

Please be patient. Production limited, due to the war, which is not officially ended.

STORAGE BATTERIES . . .

Conditions are steadily worsening. However, we do get a few now and then. Please don't buy one unless you absolutely need it. They won't keep, you know.
