

KENDRICK GAZETTE

VOLUME 56

KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, NOVEMBER 7, 1946

NO. 45

WHEAT MARKETS FIRM
WITH HIGHER PRICES

The wheat markets were firm with higher prices being quoted at all Pacific Northwest markets during the past week, according to reports to the Production and Marketing Administration of the United States Department of Agriculture. The strength in the markets may be attributed partially to the advance in the eastern futures near the end of the period, and the very tight shipping situation, especially in the Pacific Northwest. Large quantities of wheat are reported to have been sold to the C. C. C. for export through Pacific Northwest ports and the shortage of cars has delayed the shipments. Terminal stocks are low and receipts during the past three weeks have been very light. Sales of wheat by the growers in Oregon, Washington and Idaho have been unusually heavy during the first four months of the crop year. Estimates of the grain trade indicate that 60 per cent of the total crop for these states of about 142,000,000 bushels have been disposed of by the growers during this period, but shipments have not kept pace with sales. A report by the Bureau of Agricultural Economics shows that stocks of wheat for the three states in all positions, as of October 1, were 120,316,000 bushels.

Cash wheat prices in the Portland market were firm, with bids on all ordinary classes of wheat advancing 2 1/2c per bushel during the past week. Prices on high grade milling wheat were practically unchanged except on local dark hard winter, which advanced 6c per bushel on the high protein type. The demand appeared to be largely for the export grades of wheat, possibly for the account of the C. C. C. Selling pressure by the growers is reported to have slackened very noticeably as compared with recent weeks, possibly as a result of previous heavy selling, difficulty in making deliveries within the 45-day period, and for the reason of income tax adjustments. Sales of about 2,000,000 bushels of hard red winter and white wheat, according to trade estimates, from the Pacific Northwest, were made during recent weeks for shipment to Duluth and the Kansas City area. The movement of this wheat took a great many box cars from this area and shipment to the coast terminals are very light. Receipts at the Columbia river terminals during the week were 257 cars and at Puget Sound terminals 295 cars, compared with 238 and 307, respectively, for the previous week.

Bid prices on the Portland Grain Exchange at the close of the week showed: Soft white, soft white (no Rex), western white, western red and ordinary hard red winter, all at \$1.87 1/2 per bushel, basis No. 1, bulk, 15-day shipment, coast delivery.

The San Francisco wheat market averaged somewhat stronger than other recent weeks, largely reflecting small offerings rather than increased demand. While trading was narrow, prices were mostly around 2 1/2c to 5c per 100 higher compared with a week ago. Market supplies slackened further with central California growers holding remaining supplies even more firmly and generally asking around \$3.35 to \$3.40 on a country warehouse receipt basis for No. 1 hard white and No. 1 soft white wheat, sacked. Out-of-state offerings also were small and were mainly from the Pacific Northwest. Intermountain shippers generally were not making any additional offerings for shipment to the Pacific Coast following heavy sales to central western markets. Flour business was reported as good and advances in barley made for somewhat greater usage of wheat for feed.

Cash wheat values in the Kansas City market were slightly down from a week ago, although strength in wheat was maintained by the C. C. C. making large purchases. Country movement was about the same as the previous week, with the car shortage still acute. Arrivals for the week totaled 862 cars. Demand was largely from the mills, with incentive to buy being partially attributed to the desire to secure cars for re-loading. Trading basis was fully 1c to 1 1/2c per bushel lower than the week before.

In the Minneapolis grain market cash wheat was down about 4c per bushel for the week. Abolishment of the permit system enabled buyers for small country mills to enter the market. Mill buying was rather limited, being restricted generally to the better grades of wheat, with low grade or damaged wheat moving only at a wide discount. At the close of the week ordinary No. 1 dark northern spring was quoted at \$2.13 to \$2.14 per bushel.

Stocks of grain in all positions on October 1 (latest available) were smaller than last year, but are still above average. Stocks of wheat amounted to 957,000,000 bushels as against 1,030,000,000 a year ago and 1,083,000,000 two years ago. Disappearance of wheat, July through September, totaled 314,000,000 bushels, a drop of about 60,000,000 bushels from the same quarter a year ago and about 12,000,000 less than the same months in 1944. Of the disappearance about 78,000,000 bushels of wheat, including 28,000,000 bushels of flour equivalent, were exported; 32,000,000 bushels were used for seed. A year ago exports totaled 95,000,000 bushels, while 32,000,000 bushels were used for seed; 126,000,000 were milled for flour for domestic use, 16,000,000 used for industrial alcohol and 105,000,000 bushels were fed.

Stocks of oats October 1 amounted to 1,237,000,000 bushels compared with 1,391,000,000 bushels a year ago, and 1,002,000,000 bushels two

Deeds Now Secured

We understand that all the required deeds for the new American Ridge road have now been received from Boise and by Tuesday evening were on their way to this owner and that owner for their signatures.

The question now arises — just how soon can or will all be returned so that bids may be called for on this important road — time is "of the essence" since the road was wiped out in June!

The delay has certainly given ample time to unwind the yards of red tape with which all such projects are thoroughly wrapped!

Let's hope real action begins soon.

INTERESTING NEWS NOTES
FROM KENDRICK SCHOOLS

Sports

We start our basketball season officially on the 10th of December, playing the Troy A and B squads at Troy. The schedule, as tentatively drawn for the balance of the season, follows:

Clarkston at Kendrick, Dec. 13.
Orofino at Kendrick, Dec. 17.
Kendrick at Winchester, Dec. 20.
Moscow at Kendrick, Dec. 27.
Kendrick at Clarkston, Jan. 3.
Kendrick at Juliaetta, Jan. 7.
Genesee at Kendrick, Jan. 10.
Kendrick at Orofino, Jan. 15.
Kendrick at Moscow, Jan. 17.
Troy at Kendrick, Jan. 21.
Kendrick at Genesee, Jan. 24.
Winchester at Kendrick, Jan. 28.
Kendrick at Culpesac, Jan. 31.
Kendrick at Lapwai, Feb. 4.
Culpesac at Kendrick, Feb. 7.
Lapwai at Kendrick, Feb. 14.

We have a game with Juliaetta and two probable games with Lewiston which have not as yet been scheduled, and further changes may also be made.

The Sub-district Tournament will be held at Lapwai this year on the 26th, 27th and 28th of February.

Mississippians Enjoyed
The Mississippians, a National Assemblies program, was presented at the gymnasium Friday evening of last week, and was greatly enjoyed by students and school patrons alike.

The next program will be held on Nov. 22, at 9:00 o'clock, in the High school auditorium.

School Carnival Scheduled
The all-school carnival is scheduled for Friday evening, Nov. 15, at 8:00 o'clock.

About Annals
There are still several Annals to be picked up at the school office. Please get yours as soon as possible.

Fifth And Sixth Grades
The fifth and sixth grade pupils entertained their mothers Thursday afternoon with a Halloween program. Ice cream and cake was served by their teacher, Mrs. Jones. Friday afternoon Mrs. Ben Westendahl treated with refreshments, the occasion being their teacher's birthday anniversary. Mrs. Jones was presented a lovely gift by her pupils. The pupils receiving 100 per cent in the nine-week spelling test were: Janice Christensen, Unis Westendahl, Donna Kanikkeberg, Bernadine Glenn, Donna Lea Knox, Zelma Candler, Leroy Gladden and Sharon Sturman.

Cow Killed By Hunters
Sunday morning, Adrian Johns, noting the disappearance of a valuable Black Angus "nurse cow" instituted a search for the animal and found her — barely alive — suffering from a wound in the hip, evidently inflicted by a high-powered rifle. The cow was in a pasture on the "Janes place" between Kendrick and Juliaetta, and from the looks of the wound (gangrene having set in) the shooting occurred either Friday or Saturday.

This is the first incident of its kind reported in this area this year — and it is to be hoped that no more occur.

Little Damage Halloween

But little damage was done about town Halloween, probably the most destructive being the breaking of a window in the Travis Furniture & Electric Supply Co.

Windows about town were most thoroughly soaped and waxed, and some "enjoyed" the throwing of rotten tomatoes, a barrage of which struck inside the H. C. Schupfer home when the door was opened to a "trick or treat" knock.

A number of old cultivators, bean planters, etc., sitting on the Bean Growers lot were scattered about town, as were trash barrels, boxes, etc., but on the whole, it was a pretty quiet Halloween.

Buys Hotel

A deal was consummated this week whereby Mr. and Mrs. B. G. Linderman, formerly of Cedar ridge, and who recently disposed of their farm there, became the owners of the Perryman Hotel.

Mr. and Mrs. Linderman assumed active management Monday of this week.

The consideration was not made public. Mr. and Mrs. Linderman have many friends in this area, and we predict success for them in their new business venture.

There are no parking meters on Kendrick's streets. Trade at home!

Barley stocks totaled 231,000,000 bushels on October 1, a drop of about 18,000,000 bushels from last year and about 33,000,000 bushels less than in 1944. Wheat purchased by the Commodity Credit Corporation, October 24 to 31 inclusive, totaled 7,738,543 bushels, bringing the accumulated total since September 9, to 32,229,499 bushels.

KENDRICK GOES REPUBLICAN
—MARGIN SLIM, HOWEVER

Kendrick precinct showed a Republican trend in the election Tuesday, the average being about 10 votes. It will be noted that the three local candidates, George F. Brocke, King D. Ingle and Floyd Millard carried the precinct by a good majority, showing that local voters were intent on "picking their men" rather than voting straight tickets.

We do not have the exact figures on the number of votes cast, but from what can be gathered by the addition of figures, about 175 ballots went through the slot.

Below are the returns:

Republican Ticket
For United States Senator, Henry Dworshak 33
Representative in Congress, first district, Abe Goff 33
Governor, C. A. Robins 36
Lieutenant Governor, Donald S. Whitehead 78
Secretary of State, J. D. (Cy) Price 75
State Auditor, N. P. Neilson 35
Treasurer, Lela D. Painter 38
Attorney General, Robert Ailshie 82
Superintendent of Public Instruction, Alton B. Jones 82
Mine Inspector, George A. McDowell 80
Dowell 80
State Senator, William C. Moore 79
State Representatives (Two) —
Wayne Hampton 74
W. L. Mills 74
County Commissioner (First Dist.) Alvah Strong 74
Commissioners (Third Dist.) Geo. C. Hoidal 63
Clerk of District Court and Aud. Bessie Babcock 106
Assessor, W. Q. Taylor 101
Sheriff, Hap. Moody 107
Treasurer, Edna Therault 97
Probate Judge, L. G. Peterson 91
County Superintendent, Nell P. LaFollette 102
Prosecuting Atty. J. M. O'Donnell 102
Coroner, H. R. Short 106
Justices of the Peace (Two) —
Floyd Millard 113
James Arnot 91
Constable, Carl Anderson 91

Democratic Ticket

United States Senator, George Donart 75
Representative in Congress (First Dist.) Compton I. White 30
Governor, Arnold Williams 77
Lieut. Governor, R. L. Summerfield 77
Secretary of State, Ira H. Masters 82
State Auditor, Ernest G. Hansen 71
Treasurer, Ruth G. Moon 72
Attorney General, Frank Langley 76
Supt. of Public Instruction, G. C. Sullivan 74
Mine Inspector, Arthur Campbell 71
State Senator, J. H. Neil 71
State Representatives (Two) —
George F. Brocke 95
County Commissioner (First Dist.), Herman O. Lindsay 79
County Commissioner (Third Dist.), King D. Ingle 97
Clerk and Auditor, Assessor, Barton O. Wetzel 60
Sheriff, Alex Sprouse 55
County Treasurer, Probate Judge, Wynne Blake 67
County Supt., Prosecuting Attorney, Coroner, Justices of the Peace (Two) —
Ed. Solberg 49
Constable, Chas. Hicks 53

It will be noted by addition of the figures above that many voters failed to act on them — this being due, without a doubt, to the confused condition caused by the highly legal phraseology in which they were written. It seems too bad that such important matters cannot be put before the voters in "plain English," so that all may understand and cast their vote accordingly.

But then, it seems that lawyers just love to wrap up even the very simplest of matters in "miles of words."

Thanks For Gazette
Pensacola, Florida
Oct. 27, 1946

Dear Bill:
Just a few lines to give you my new address and to thank you for the Gazette.

The bases here are much larger than at Memphis, and of course it's quite a lot warmer, so far as temperature goes. Think I'm going to like it here.

The K. H. S. football team seems to be doing all right this year. I just hope they do as well the rest of the season.

That's about all for now — I'll thank you again for the Gazette, and close.

Sincerely
Jack Benscoter.

LATAH COUNTY REMAINS
IN REPUBLICAN COLUMN

Latah county remained in the Republican column, according to results from 16 precincts out of 24 received here early this morning (Wednesday). Single exception was the 44 vote trimming given Cy. D. Price, GOP candidate for secretary of state, by Ira H. Masters, incumbent democrat. Price received 1168 votes and Masters 1212.

Abe McGregor Goff, Moscow republican, who opposed Compton I. White for the first district congressional position, won his home county by a margin of 217 votes — 1370 to 1153.

Candidates and their votes follow: (Republicans listed first in each instance):

U. S. senator: Dworshak, 1314, Donart, 1122; congressman, Goff, 1370, White, 1153; governor, Robins, 1150, Williams, 967; lieutenant governor, Whitehead, 1328, Summerfield, 1085; secretary of state, Price, 1168, Masters, 1212; state auditor, Neilson, 1241, Hansen, 1168; state treasurer, Painter, 1250, Moon, 1130; attorney general, Ailshie, 1225, Langley, 1146; superintendent of public instruction, Jones, 1203, Sullivan, 1165; mine inspector, McDowell, 1186, Campbell, 1164; state senator, Moore, 1243, Neil, 1101; commissioner first district, Strong, 1309, Lindsay, 1125; commissioner second district, Hoidal, 1266, Ingle, 1192; auditor recorder, Babcock, 1690; assessor, Taylor, 1598, Wetzel, 963; sheriff, Moody, 1395, Sprouse, 1146; treasurer, Therault, 1575; probate judge, Peterson, 1401, Blake, 1068; superintendent of county schools, LaFollette, 1621; prosecuting attorney, O'Donnell, 1555; coroner, H. R. Short, 1713. — Lewiston Tribune.

Our Note: We are sorry we do not have the complete returns, and we also note some omissions in the above, no mention being made of the office of state representatives, two of whom were to be elected. This race was of special interest to this locality, inasmuch as one local candidate, G. F. Brocke, was involved.

Items De-Controlled Recently

Removal from price control of an extensive list of consumer durable goods including radios, lamps, small electrical appliances, kitchenware and glassware was announced recently by the OPA. This action was taken because the items have been found to be unimportant in business or living costs, or supply has been found to be in approximate balance with demand.

Not affected by this de-control action, which was effective October 30, are a number of consumer goods lists, including all major electrical appliances — such as household mechanical refrigerators, washing machines, electric ranges and vacuum cleaners — cooking and heating stoves, floor coverings, bedding products — such as springs and mattresses — and all major items of household furniture. The following consumer hard goods have been de-controlled largely on the supply basis: Radios and electric phonographs, small electrical appliances such as heaters, non-automatic toasters, irons, hot plates, electric heating pads and electric shavers; metal articles used in preparation, storage and serving of foods and beverages, which include all household kitchenware. Household glassware, including such items as glass tumblers and glass dishes, portable lamps and shades (other than industrial) and numerous other items.

Entertain With Dinner

Supt. and Mrs. Jasper Nutting entertained the teachers with a 6:30 dinner last Thursday evening in their home.

Following dinner games were enjoyed with Roy Long and Ross Armistage tying for honors for the men and Mrs. W. B. Deobald receiving honors for the women.

Those present were Mr. and Mrs. Ross Armistage, Mr. and Mrs. Cecil Gruell, Mr. and Mrs. Claude Jones, Mr. and Mrs. Roy Long, Mr. and Mrs. Werner Brammer and Mrs. W. B. Deobald.

Birthday Party

Marybeth Benscoter was honored with a surprise birthday party on her 15th birthday anniversary at the home of Nellie Fry last Thursday evening.

The time was spent in playing games, after which birthday cake and cider was served by the hostess. Those present were Marybeth and Wilma Benscoter, Helen Harris, Patty McCreary, Dorothy Thornton, Barbara Steadman, June Brown, Beverly Schupfer, Dorothy LaPlante, Louella Forest, Doris Clemenhagen and the hostess, Nellie Fry.

Leave For Oregon

Mr. and Mrs. Axel Swanson and family left Monday morning of this week for Wheeler, Oregon, where Axel will resume the taking of treatments for arthritis.

They were taken down by Wallace Emmett, who returned to Kendrick Wednesday.

The apartment vacated by the Swansons will be occupied by Mr. and Mrs. Roy Long and daughters.

Busy Month For Farmers

Idaho farmers will take some time off in November to participate in meetings of farm organizations. At Portland, in the middle of the month, the national sessions of the Grange will be held, and a large delegation of Idaho members, headed by E. T. Taylor, state master, will be in attendance.

Commercial Club Meeting

The regular monthly meeting of the Kendrick Commercial club will be held next Monday evening, November 11, with the 7:30 meeting in the city hall preceded by a 6:30 dinner at White's Confectionery.

A number of important matters are scheduled to come before the club — roads, both state and local, the swimming pool, etc., and it is hoped that all members and any others interested will be present.

Remember the date, place and hour, and be there to take part in the business of the evening.

PERSONALS AND NEWS
ON AMERICAN RIDGE

Miss Rita Cain spent the weekend with her girl friend, Miss Jennett Pearce, on Burnt ridge.

Mrs. Melba Woody entertained her pupils at a Halloween party at the school house last Thursday evening. Games were played, with all dressing in different costumes. A lunch was served at the evening's end, and all reported a grand time.

Mrs. Ada Cain and Mrs. John Wilson were in Moscow Monday afternoon.

Mr. and Mrs. Bruce Glenn and daughter Joan were Sunday evening visitors in the home of Mr. and Mrs. George Havens.

Mr. and Mrs. Wayne May were in Lewiston on Thursday.

Mr. and Mrs. Henry Brammer had as their guests Sunday Mr. and Mrs. Ira Havens of Moscow and Mr. and Mrs. George Havens and family. In the afternoon Mrs. Ira Havens and Mrs. George Havens called at the Wade Keene home.

Mr. and Mrs. Walter May spent Friday evening with Mr. and Mrs. Wayne May.

Mr. and Mrs. Henry Brammer and son Ernest were supper guests of Mr. and Mrs. George Havens Monday evening. The dinner was in honor of Henry Brammer's 65th birthday anniversary.

Don and Ray Benscoter, students at the U. of I., were home over the weekend.

Helen and Jim Matton called at the Wayne May home for a few minutes Thursday evening.

Mrs. Andy Cox is enjoying a new Westinghouse Electric range — one of the scarcest of items these days. Mr. and Mrs. Bruce Glenn and daughter were Sunday afternoon visitors at the Bigham home.

Mr. and Mrs. John B. Davis were Saturday and Sunday guests of Mr. and Mrs. Perry Mattoon. Mr. and Mrs. Davis have sold their home here to a party from Clarkston, and are moving to Nez Perce with their daughter and son-in-law, Mr. and Mrs. Orville Storer.

Mr. and Mrs. Bud Fey and Carroll Mattoon spent Sunday evening with their parents, Mr. and Mrs. Perry Mattoon.

Mrs. Bruce Glenn attended the Westladies Aid sale in Troy Tuesday afternoon.

Mrs. Walter Benscoter moved her daughters, Wilma and Marybeth to the Hiram Galloway home in Kendrick for the winter, where they will attend high school.

Mr. and Mrs. Walter Benscoter have received word that their son, HA 2/c Jack Benscoter, has been transferred to Pensacola, Florida.

Harley Eichner and Harry Benscoter were deer hunting Friday. They reported, "no luck."

Peggy Knutson spent Friday at the Perry Mattoon home.

Mr. and Mrs. Stanley McDougall and baby of Kellogg spent the weekend with Mr. and Mrs. Andy Cox.

Mr. and Mrs. Newt. Moray and sons were Sunday guests of Mr. and Mrs. Roy Kent.

Mr. and Mrs. Roy Yarnell and baby of Pullman and Mr. and Mrs. Bob Warwick of Oakesdale, Wn., were Sunday guests of Mr. and Mrs. Wayne Davis.

Mr. and Mrs. Frankie Benscoter were Lewiston shoppers Wednesday. Harley Eichner and Mrs. Dot Stanton were in Lewiston on Monday.

Frankie Benscoter and Mrs. Walter Benscoter were in Moscow on Saturday.

Noria Callison was a caller at the Bruce Glenn home Sunday morning.

Mr. and Mrs. E. P. Roberts spent Wednesday with Mr. and Mrs. Noria Callison.

Mr. and Mrs. Wayne Davis were visitors in Pullman last Thursday.

Mr. and Mrs. Ed. Kent and Mrs. Frankie Benscoter spent Wednesday night in Lewiston; Mrs. Benscoter with Grandmother Benscoter in Clarkston and the Kents with her sister, Mrs. Clyde Nichols.

Senior Ball Greatly Enjoyed

The Kendrick High school Senior Ball, held Tuesday evening, was greatly enjoyed by all present. The interior of the big gym. was beautiful, streamers of crepe paper, evergreen trees and brightly colored fall leaves, illuminated by soft lights making the scene very festive.

The music and floor were excellent, and although the crowd might have been larger, the dance was indeed a pleasing success.

A Grange initiation undoubtedly had something to do with the attendance.

Handicraft Projects

Price controls have been lifted from apparel and apparel accessory items made and sold by disabled veterans as handicraft projects, OPA announces. In many cases the veterans have learned woodcraft, metalcraft, pottery molding, weaving or leathercraft through occupational therapy programs of the armed services and the Veterans administration.

This suspension covers articles made in this way.

PERSONALS AND NEWS
ABOUT KENDRICK FRIENDS

Burton Souders and son Burton, Jr., Charley Greenwood, Monty Louder and Claude Craig left early Wednesday morning on a big game hunt.

Capt. and Mrs. Robert Olson arrived here Tuesday of last week from Montgomery, Alabama, for a visit at the home of her parents, Mr. and Mrs. A. G. Peters, and with other relatives. They were dinner guests Thursday evening in the home of her sister and brother-in-law, Mrs. Ray Hudson and family.

Mr. and Mrs. George Jones and children of Uniontown were Sunday and Sunday night guests in the home of Mr. and Mrs. Wade Keene.

Mr. and Mrs. Ray Hudson and son David were Sunday dinner guests in the home of Mr. and Mrs. A. G. Peters at Leland.

Mr. and Mrs. Loren Crocker of Spokane were Sunday visitors at the Frank Crocker home.

Mr. and Mrs. Lloyd Ware and sons Bob and Pete left Monday on a big game hunt.

E. M. Millsap and Bob Clemenhagen left Thursday of last week on a big game hunt in the Bungalow area.

Mr. and Mrs. Frank Fanning of Portland, Oregon, spent a couple of days this past week visiting in the home of Mr. and Mrs. C. E. Harris.

Mickey Harris, who is attending business college in Lewiston, was home over the weekend.

David Hudson is spending this week at the home of his grandparents, Mr. and Mrs. A. G. Peters at Leland.

Mrs. Laura Emmett is visiting this week with her daughters, Mrs. Edgar Long and Mrs. Edgar Dammarell.

Mr. and Mrs. Leon Lind and children were over from Gifford for the weekend.

Students home from the U. of I. over the week-end included Bob and Eugene Lind, Tom Brown, Teddy and Charles Deobald, Paula McKeever, Bob Watts, Don Fry and Ossie Kanikkeberg.

Mr. and Mrs. Lloyd Israel, accompanied by Mrs. Hiram Galloway, drove to Pasco last week-end to visit with Mr. and Mrs. Paul Abrogast.

Edgar Dammarell and son Frank and Douglas Christensen returned last Thursday from a big game hunt, bringing back three elk and two deer.

Kenneth Powell was in Troy Sunday on business.

R. H. Easterbrook and sons Jack and Gene drove to Spokane Sunday to bring back Mrs. Easterbrook, who has been in a hospital there undergoing surgery.

Mr. and Mrs. Jasper Nutting and children were Spokane visitors over the weekend.

Sunday guests in the Roy Johnson home were Mr. and Mrs. Herman Hagenah and son of Cottonwood and Mr. and Mrs. Jack Walters, Clarkston, Wash.

Orville Storer, Nezperce, was a Kendrick visitor Tuesday coming over for his wife, who had been visiting in the home of her parents, Mr. and Mrs. John B. Davis, since Sunday. Mr. and Mrs. Davis accompanied the Storer home to spend some time.

Misses Barbara White and Jean Crocker, Lewiston, spent Tuesday at their respective homes here.

University students home over the weekend included Ossie Kanikkeberg, Charles and Teddy Deobald and Miss Paula McKeever.

Mr. and Mrs. Joe Watts and daughter Janey of Moscow were here over the weekend visiting home folks.

Rilla Davidson came home last Wednesday from Lewiston, where she had been caring for the Kermit Waide children.

Mrs. Russell Smith and Mrs. W. A. Watts were Lewiston visitors on Tuesday.

Lt. and Mrs. Rex Blewett left on Wednesday for Emmett, Idaho, where they will visit her parents before returning to Fort Lewis.

Mrs. Everett Fraser left Sunday for Atlanta, Georgia, where she will visit her daughter, Mrs. Ed. Greene and family.

Mrs. Estella Leith returned Sunday from Coeur d'Alene, where she has been visiting her daughters and their families for the past three weeks.

Mrs. Fred Gladden is substituting this week for Mrs. Hiram Galloway on the Hot Lunch program at the school house.

Edwin Coulter, who is teaching at Ferdinand, spent Saturday night at his home here, returning Sunday.

Stork Shower

Mrs. Everett Newman was complimented with a "Stork Shower" Wednesday afternoon in the home of Mrs. Raymond Hudson, with the Mesdames Lloyd Ware, Don Cantrill and C. E. Harris as co-hostesses.

Many lovely and useful gifts were received by the honoree.

Refreshments were served at the close of the afternoon.

Birthday Dinner

Mrs. Roy Johnson honored her son Allen on the occasion of his 24th birthday anniversary, with a dinner. Guests were Bob and Eugene Lind, Dick McMonigle, Moquiam, Wn., Dick Stafford, Pullman, Wash., and Allen and Sidney Johnson.

Improvements At Home

Russell Smith and Walter Hartung have been busy the past few days installing white asbestos shakes on the sides of the Smith home.

When completed the appearance will be materially improved, as

BIG BEAR RIDGE NEWS

Mr. and Mrs. K. D. Ingle became grandparents, when a daughter was born to Mr. and Mrs. Wm. Ingle in Spokane, October 24th.

A family reunion was enjoyed at the Chas. Bower home Sunday, honoring Mr. and Mrs. George Larson of California.

Mrs. Bertha Lillie and daughter, Miss Helen, spent Friday evening at the Ed. Halseth home.

Mr. and Mrs. George Jones and daughters of Uniontown, Wash., were Sunday evening visitors at the E. H. Jones home.

Mr. and Mrs. Henry Kortemeier visited Mrs. Kortemeier's sister and family in Lewiston last week.

Mrs. Rose Long of Pullman spent the week-end with her daughter, Mrs. Ronald Jones.

Mrs. Ralph McGraw of Moscow visited at the Floyd McGraw home Sunday.

Miss Nystrom will meet with the Happy Home club at the home of Mrs. Gerald Ingle Friday afternoon, Nov. 15th. She will give a lesson in making bound button holes and sewing in zippers.

Mr. and Mrs. Pete Halseth of Deary spent Friday at the Ed. Halseth home.

Mr. and Mrs. Halvor Lien visited relatives in Moscow Monday.

Mr. and Mrs. Warren Leland and children of Pasco spent the week-end at the home of his sister, Mrs. Oscar

Slind and family. Henry and Andrew Lien visited at the Ed. Lien home in Opportunity, Wash., last week.

The Ladies Guild annual supper and fancy work sale will be held at the Community hall, Friday evening, Nov. 22.

Mr. and Mrs. W. E. Hecht have moved to their new home in Juliaetta.

Eddie Galloway was out of school this week with a severe siege of tonsillitis.

Mrs. James Nelson, Miss Alta Moore and Leon Ingle served as judges; Miss Bertina Forest and Mrs. Henry Kortemeier as clerk, and Ed. Halseth as constable at the election here.

LELAND NEWS

The Leland Homemakers Club will meet in the church basement Wednesday, Nov. 13. This will be "Toy Workshop Day," under the supervision of Miss Lucile Eyrich, home demonstration leader. Ladies are asked to bring scissors and material suitable for making toys. A covered dish dinner will be served at noon.

The pastor of the church and the officers and members of the Women's Society of Christian Service and the entire Leland community sincerely appreciate the fine patronage and loyal support given at their bazaar and dinner last week.

The official board of the Leland Methodist church met on Wednesday evening at the home of the chairman, Wilbur Corkill.

PINE CREEK GOSSIP

Arlene Riley spent Thursday night with Donna Arnett.

Cleo Sharu visited Friday in the Amelia Riley home.

Mr. and Mrs. Roy Fey and family visited Sunday in the Chas. Fey home.

Donna Arnett spent Friday night with Arlene Riley.

Mr. and Mrs. Ross Hazeltine visited from Thursday night until Sunday in the home of her parents, Mr. and Mrs. William Riley.

Betty Glenn spent Wednesday night with Dona Arnett, and Bernadine Glenn Thursday night with Dorothy Mae Wilson.

North Idaho Chamber Meet

The winter session of the North Idaho Chamber of Commerce will be held at Moscow on November 21-22, according to announcement of George Beardmore, Lewiston, president.

The meeting will afford a splendid opportunity for industrial and agricultural people from all sections of the state to get together and discuss Idaho problems. Particular attention will be paid to the development plans of chambers of commerce for the coming year.

Parents Of Daughter

Mr. and Mrs. Lyle Trout, Kendrick, are the proud parents of a baby daughter, born to them Tuesday.

The little lady has been named "Ginger." Mother and babe are doing nicely.

New Streamlined Coaches

New streamlined coaches of the latest design, Northern Pacific railway's first installment of post-war passenger equipment, are being put in service immediately on the transcontinental North Coast Limited, E. E. Nelson, passenger traffic manager said this week.

The new coaches, 36 of which were ordered two years ago, are part of a large Northern Pacific purchase of passenger equipment which includes a fleet of completely new streamlined North Coast Limiteds, expected to go into service early next summer between Chicago and the Pacific coast on a new, fast schedule of approximately 45 hours.

The new cars now being put into service are equipped with the latest type of seat, built to support the whole body and easily adjustable to various positions. There is a window for each pair of seats. The inside pane is safety glass and the outside is plate solite glass, resistant to heat and glare. An individually controlled light over each seat is beamed to enable a passenger to read without disturbing a fellow-traveler in the adjoining seat.

Each car has well-equipped dressings rooms and a spacious lounge. Healthful air-conditioning, sound deadening and other unseen engineering features contribute to the comfort and pleasure of passengers.

Returns From Korea

Sgt. Tommy Long, son of Mr. and Mrs. E. T. Long, Kendrick, arrived home October 20th from Seoul, Korea, where he had been stationed for the past year.

Sgt. Long was overseas 16 months, most of which time was spent in Korea.

Tommy, with the Personnel section, served 23 months in the army, and of this time, as previously stated, 16 were overseas.

He extends to all his thanks for the paper it reached him "just now and then" but was more than welcome when it did get there.

Among The Sick

Mrs. Paul Lind has been confined to her home with a severe cold, as has Mrs. J. H. Coulter.

E. A. Deobald has been away from the garage intermittently since Sunday, due to illness.

Loses Finger

Oscar Laurence's eldest son had the misfortune to get the ring finger of his left hand in a buzz saw Tuesday. The digit was so badly mangled that Dr. Christensen was forced to remove it.

Wonderful Fall Weather

This territory has been enjoying as fine fall weather as anyone could wish the past week. The nights have been clear and cold, with the thermometer hitting around the 25 above mark most nights. However, the days have been bright sunshine, and lawns look like velvet carpets.

Farmers have had to quit plowing around 9:30 to 10:00 in the morning, for as soon as the ground thaws on top it becomes very slick. Fall-sown wheat is up in many cases to a good stand, and on the whole, fall work is well advanced.

About Sugar

Spare stamps nine and ten, good for five pounds each of home canning sugar, will continue valid during the month of November, the OPA has announced. Both stamps were to expire October 31, 1946. Following the recently announced decision on a joint U. S. D. A.-OPA program to move western beet sugar into eastern deficit areas, this action is the second 30-day extension granted by OPA to permit housewives to receive their fair share of sugar.

Give to the Living War Memorial Swim Pool. Remember, it's yours, not Kendrick's!

WANTED AIRPLANE ENGINE MECHANICS

Here's real opportunity for former members of the air force. If your MOS is 748, 750 or 754, a grand new opportunity awaits you at your nearest army recruiting station. A reenlistment now assures you of a lifetime of security, a retirement pension of plenty and a chance for you to practice your trade equipped with the finest of tools every good mechanic loves. Improve your craftsmanship, education and living conditions. Investigate at your nearest army recruiting station today!

Mrs. Brodie

BALANCES
the budget

"You have to be a trained seal to balance a budget these days!" complains Mrs. Brodie.

"Everything costs so much! Take clothing—when you can get it," says Mrs. Brodie, "and look at the price tags! And food—that's simply skyrocketed! Housefurnishings—if you can find a house to furnish—are way up!

"But electricity!" says Mrs. Brodie. "No, indeed!" says Mrs. Brodie.

"Electricity has been coming down steadily for years!"

"Electricity," says Mrs. Brodie, "is just about the easiest thing in my budget to balance!"

If you have a budget to balance—and who hasn't?—you'll appreciate that the low cost of electricity is no accident. It took plenty of practical planning and experience on the part of the folks in this company who—like Mrs. Brodie—have budgets to balance, too.

(Don't take Mrs. Brodie's word for the rise in living costs. The U. S. Department of Labor will furnish you the figures, if you're interested.)

'Package' Naval Units With Synthetic Resin Product

The East Coast's 10th fleet and the West Coast's 19th fleet, which include over 2,000 units of the navy, are being "packaged" against time and the elements by the use of a new synthetic resin product, which can be readily stripped off when the ships again are put into commission. Guns and other equipment also are sheathed.

Application of the coating is by spray gun. The process starts with a framework of pressure-sensitive tape built up around the object to be sealed. Then a "webbing solution," a synthetic resin product to which a webbing agent has been added to produce filaments emitted from a standard spray gun, is applied. These filaments are extruded in a cobweb-like form, and bridge over, but do not adhere to the surfaces with which they come into contact.

The web is built up to a point where sufficient strength is obtained to apply a moisture barrier coating, which is a synthetic resin solution with the webbing agent omitted. The third operation is the application of a pigmented resin topcoat for protection against the sun's rays and general weathering conditions. Finally a hot air blower is used to take out fumes given off by the solvent from the package's interior.

Demands for Beef Grow in Western Livestock States

The western livestock states are just about self-sufficient in the production of beef to supply the needs of their population, according to two members of the bureau of agricultural economics in Berkeley, Calif.

In 1910, the economists point out, the three westernmost states—Washington, Oregon, and California—produced enough beef cattle to supply the requirements of the Pacific coast population. The other western states produced a surplus of beef cattle that was shipped east.

By 1940, the Pacific coast population had increased so that it needed the surplus beef production of Nevada, Idaho, Utah, Arizona and part of New Mexico, in addition to that of the three Pacific coast states. While some cattle were shipped east from these five states, that number was offset by westward shipment from states farther east.

By 1970, it appears possible to the economists that a very small net amount of beef, if any, will be available for shipment eastward from the entire 11 western states.

Standing Posture

In a standing position, the body should be vertical and essentially straight when seen from the side as well as from the back. The vertical line should pass through the ear, shoulder, center of the hip and ankle when seen from the side. The feet and knees should be directed forward, and the arches should not sag. The chest should be erect but not fully expanded or tense, the abdomen flat and relaxed, neither sagging nor retracted. The common admonition "throw back your shoulders" is a poor and ineffective approach to good posture. "Suck in your stomach and throw out your chest" usually results in a tense, rigid, tiring posture which may be as bad as the posture it is intended to correct. The shoulders should rest comfortably on the chest rather than be held rigidly back with the arms turned outward. The position should be maintained with the spine rather than the shoulders. The body should achieve its full height in this position, with the head and chin level, not tilted back. There should be a feeling of tallness, with the top of the head pulling away from the soles of the feet.

Increase Wetting Power

Detergents, which look like powdered soap, are also described chemically as sulfonated alcohols and related compounds. Like soap, they increase the "wetting power" of water so that it reaches the innermost parts of the material. Many of them cause water to wet material even more effectively than soap. Their solutions work to a good suds, and even when not whipped to suds, they remove grease readily, but the suds hold up less well than soap-suds, and gradually disappear as the solution cleans. In hard water the detergents have an advantage over soap. Because they do not combine with the minerals that cause hardness in water, as soap does, they clean as well in hard as in soft water. Because their solutions are not alkaline, they can be used with some fabrics and dyes that would be injured by soap.

Seasoning Lumber

Farmers may hasten seasoning of green lumber and minimize in some degree the effect of shrinkage by certain practices, according to extension foresters. When conditions will permit, the framing lumber should be bought as far ahead of actual construction as possible and piled so that it is well ventilated. Halting the process of the building for a time after it is framed, sheathed, roofed and ready for lathing will also result in comparatively rapid seasoning. The object is to have as much as possible of the shrinkage take place before plastering so that plaster cracking can be minimized.

Infantryman's Job Called One of Toughest in World

The combat infantryman has one of the toughest jobs a human being is ever called on to perform, two prominent psychiatrists state in the Journal of the American Medical Association. "Because the infantry is exposed to the greatest danger it also suffers the greatest loss of manpower from psychiatric disorders," according to Dr. John W. Appel, M.D., and Gilbert W. Beebe.

The authors point out that in the North African theater mental disorder casualty rates for rifle battalions were forty times those of all other branches. In general 15 to 20 per cent of the total non-fatal combat casualties were neuropsychiatric. Of more significance, however, is the fact that in the North African theater practically all men in rifle battalions who were not otherwise disabled ultimately became psychiatric casualties.

Dutch Establish Trading Foothold in West Borneo

As far back as the early 1600s, the Dutch East India company had attempted to develop a monopoly of the diamond trade in western Borneo. The project was abandoned, but later the Dutch returned, and in 1778 signed a treaty of assistance with the local Sultan of Pontianak, an Arab chieftain who had founded a colony near the present town.

By a later treaty the Sultan accepted Netherlands protection and agreed to share his government and revenues. In time, the successor to the Pontianak sultanate exchanged tax privileges for a fixed salary, while the district was placed under Netherlands government and police jurisdiction.

Pontianak became the leading trade center of western Borneo, drawing on a productive hinterland in which coconut and rubber plantations predominate. Rubber, copra and lumber are the main exports. But gold and diamonds have remained on outgoing cargo lists, along with such exotic commodities as birds' nests, ebony, and betel nuts.

Western Thrace Colorful

Known as Western Thrace, the northeastern part of Greece is sparsely settled. The small towns along the sea are occupied mostly by mariners and fishermen, while inland farmers devote their attention mainly to the growing of "Turkish" tobacco. In this area it has not been uncommon to see old Turks wearing turbans and waist scarves no longer worn in Turkey itself. Workers in baggy pantaloons with fezzes on their heads harvest Indian corn. These people are Moslems who were left in Western Thrace during the 1923 exchange of Greek and Turkish Nationals. Before World War II the Rhodope mountain slopes in this region were well wooded. During German occupation, however, three million of Greece's 16 million acres of timber were hacked away to make winter quarters for Germans on the Russian front.

New Carpeting

New types of wool carpeting are found in plain colors with interesting textures which do not show foot-prints or dust or lint. The all-loop surface woven at different heights for the pattern is distinctive. The new shaggy-appearing texture is made by long strands of surface-yarn tufts which retain their shaggy look because of the springiness of wool fibers. The vacuum cleaner does not catch the long strands, but draws dust and soil out thoroughly. Another new carpeting combines twisted yarn with straight yarn to produce a two-tone effect. The twist stays in with the new methods of weaving. Many new Wilton rugs give the impression of sculpturing, with a carved effect woven in for durability. Tone on tone design will give a plain color and decorative surface designed to hide soil.

Commandments for Hunters

Here are the commandments, which every hunter should memorize: treat every gun as if it is loaded; be sure barrel and action are clear before you fire; carry only an empty gun, action open or taken down, into camp; carry gun so you can control muzzle direction if you stumble; be sure of your target before you pull trigger; never point gun at anything you don't want to shoot; don't leave a loaded gun unattended; never climb a fence or a tree with a loaded gun; don't shoot at a flat, hard surface, or the surface of the water, and don't mix alcohol with your gunpowder.

Huge Skyscraper Stands on Stilts in Ocean Bedrock

Building a skyscraper on what was once part of the Atlantic ocean presents problems. When the Turner Construction company started the \$15,000,000 addition to the home office building of the John Hancock Mutual Life Insurance company they discovered that Back Bay no longer means "an inlet of the sea," but it does mean that bedrock is 155 feet below the layer of "fill" and clay.

It was necessary that the foundation of the 470 foot building rest on this rock and, though the waters of the ocean are no longer below it, the building, like many a seaside structure, will stand on stilts reaching down into the earth a distance equal to one-third of the height of the building. This subterranean feat is accomplished with steel piles 120 feet long which are forced through the overlying clay and earth by a steam-driven pile driver with a 10,000 pound hammer. In terms of noise, boiler factories are out of the running.

So that the average neighborhood resident and passerby may understand the "why" behind the ear-splitting "whoosh-bong" that accompanies pile driving, the John Hancock company built a grandstand for the curious and named it the "Critics' Corner." They provide each visitor with a card stating that he is a "construction connoisseur."

University Tests Boost Yields on Illinois Soils

The most productive soils in Illinois have been made to yield 11 per cent more corn and other crops by using methods found to be effective by the University of Illinois college of agriculture. Soils of low productivity have been made to yield over 700 per cent more by using similar methods.

The first seven years of experimentation proved fruitless in finding a method of increasing crop yields on one of the productive, dark-colored, corn belt soils, reports F. C. Bauer, professor of soil fertility at the university. Thereafter, however, a method known as the residues system began to be operative.

Sweet clover was planted in small grain and plowed under the following year for corn. Results were good. Today it is shown that by using such a system on fertile soils the yield can be increased slightly more than 11 per cent. The addition of limestone, phosphate and potash to this productive soil thus far has had little influence. On mature, low-producing soils in the flat, gray, prairie region of southern Illinois the residues plan, along with the application of limestone, phosphate and potash, has increased yields to five times those produced on untreated land.

Slipcovers for Furniture

Slipcovers for furniture are well named, for they can cover a multitude of unsightly furniture problems. Sometimes a stain stubbornly clings to the permanent upholstery and the only remedy is to cover it with something else. Before slipcovering, be sure to remove as much of the stain as possible, particularly if it is greasy, for it may soak through the new fabric. If the furniture has moth spots, it's a good idea to get rid of the moths entirely, even if the slipcovers are not to be made of wool, to prevent further destruction of the upholstery. Slipcovers can often improve the appearance of furniture which has spindly legs or which, because of color or texture, does not harmonize with the rest of the room, and of course they are an easy solution for hiding worn spots. Some furniture is now sold "in the muslin" so that the buyer can cover it to suit herself.

Tobacco Soil

The best flue-cured tobacco soils are sandy loams, or fine sandy loams, 15 to 20 inches to the clay, with yellow or creamy sandy subsoil lying between the topsoil and the clay, the specialists explain. The soil must be well drained; it must have subsoil that is relatively open; and it must be relatively low in organic matter. The practice of following tobacco after tobacco year after year is doomed. It will result not only in crop failure but eventually in the loss of that land to tobacco production. A two-year rotation with tobacco followed by cotton or corn is good practice, but a three-year rotation with a grain crop included is safer and will give better results.

Fireproofing Cotton Fabric

It's easy to fireproof any cotton fabric that won't be hurt by dipping in a solution of borax and boric acid water. Make a solution of seven ounces of borax, three ounces of boric acid, and two quarts of hot water. Keep stirring until the water looks clear. Next, dip the article you want to fireproof into the solution just as though you were rinsing it in water. Wring it out, hang it up to dry, and press in the usual way with a warm iron. You need to re-dip articles every time they're laundered and the curtains, towels, or clothes you've fireproofed must be dry when you dip them otherwise the solution would be diluted and less effective.

Peach Tree Borer PDB Control Urged

Pest Biggest Peach Problem in America

By W. J. DRYDEN

Fall is the time to forestall the 1946 peach borer. Material increase in the average productive life of peach trees can be brought about by the effective control of peach tree borers.

Masses of gum mixed with sawdust-like refuse at or near the base of the trees reveal the presence of infestations. The injury may extend about a foot above or below the ground line.

Best control is obtained by applying powdered crystalline paradichlorobenzene (PDB) to the ground in a ring around the tree as shown in the illustration. The ring should be mounded with three to five spadefuls of earth.

The amount of PDB to be used will depend upon the age of the tree. For trees 1 year old, use ½ ounce; 2 years old, ¾ ounce; 3 to 5 years old, 1 ¼ ounce, and for older trees, from 1 to 2 ounces.

Know Your Breed Jerseys

Originating in the Island of Jersey, the Jersey breed of dairy cattle first was imported into the United States about 1850.

Jerseys are said to be more evenly distributed in the United States than any other breed. They possess to a great degree those qualities ideal for dairy types. Alert, clean-cut, angular and refined in conformation they still have large barrels.

Their milk test is right and cost of butterfat production is low. Average butterfat content is 5.35 per cent, highest of all breeds.

Fall Versus Spring Fertilized Pastures

It is becoming increasingly evident from tests at New Jersey station and other states that except on very sandy soils fertilizers containing nitrogen for grassland and pasture sods, may be applied in late summer or early fall.

Fertilizers containing phosphoric acid and potash only, such as the mixtures usually recommended for alfalfa and Ladino clover fields, can be even more efficiently applied in the fall than in the spring.

Mineral Hopper for Hens

Laying hens and growing chicks need a constant supply of calcium in form of oyster shell or limestone. This hopper may be hung on the wall of the chicken house.

Conquering Flax Wilt

By Resistant Strains

During the early 20th century the flax industry was faced with a serious problem. Flax-sickness" was making the industry unprofitable. It was found that "flax-sickness" was the result of a flax disease called wilt. This wilt fungus was introduced into the new soil when cropped to flax, where it lived and multiplied ready to attack later flax crops. The remedy was the introduction of new wilt-resistant varieties of flax.

Double-Cross Corn Not Fit for Reproduction

All plants in a field of corn planted with hybrid seed of a given strain are related—first cousins. The seed coming from such a field is definitely inbred and should not be saved for seed, points out the USDA. Reduction in vigor and grain yield is always the result of inbreeding in corn. The alternative is to plant each year the freshly crossed seed of tested strains of hybrid corn.

Clothing De-Controlled

Approximately 10 per cent, by dollar volume, of total clothing has been released from price control when the OPA announced de-control of several dozen apparel items that are not basic in the ordinary wardrobe.

Most widely used among today's decontrolled apparel are men's and women's hats, neckties, bathing suits and trunks, some fabric gloves, handbags and men's and boys' scarfs and mufflers.

Cougar Derby Dates Announced

James O. Beck, director of the state fish and game department announced this week that the dates of the second annual cougar derby will be Nov. 1, 1946, to March 31, 1946.

All cougar killed and officially reported within these dates will be counted toward the cash prizes offered by sportsmen. Judge Will Cummings of Chatahooga, Tenn., who gave the first prize last year, is repeating his award of \$100.00. A. H. Woody and Clarence Adams of Boise have offered \$75.00.

Cougar skulls will be required as before. The game department pays \$50.00 bounty on each fresh skull turned in, with satisfactory evidence that the cat was killed in Idaho. The bounty is paid the entire year. The contest is conducted only during the specific period, and is separate from the bounty payment.

All persons taking credit for killing cougar should do their own hunting, the department said. Hunters will be on their honor to play the game square. A committee of judges not connected with the game department will be appointed.

Last season the cougar contest was won by Bob Donley of Garden Valley, who killed 19 lions. Pat Reed of Boise was second with 18. Seventy-five cougar were destroyed during the campaign.

Steamboat 'Round The Bend

Many Idaho people do not know that the St. Joe river is the highest navigable stream in the United States, and possibly in the entire world. "The Family Tree," company publication of Potlatch Forests, Inc., reminds us. Tugboats ply the river regularly, and 50 years ago steamboats carried passengers up and down the stream.

The St. Joe is used primarily now to furnish an economical mode of transportation for logs from the high forests to the sawmills around Lake Coeur d'Alene. Logs are dumped into the river at various points after being made up into oval-shaped brails, with cross-ties at spaced intervals to hold shape and position. Several brails can thus be moved down the river, one behind the other in a sort of link-sausage effect, in the tow of a single tug.

Get acquainted with the Kendrick merchants — they're here to serve you!

WANTED IMMEDIATELY BY THE UNITED STATES ARMY

Clerks, typists and stenographers. Former GIs who have any of the following MOS classifications — 055-405 or 213 — will be interested in this special announcement. Clerks, typists and stenographers are vitally important to any business. That's why the army has put these classifications high on their required list. Good pay, pleasant work can be yours if you are qualified to accept one of these reenlistment opportunities. Better discuss your problems with your nearest army recruiting officer.

World Has Two Labor Days; One in U. S. Most Orderly

In reality there are two labor holidays known as Labor Day, according to the Encyclopaedia Britannica.

Labor Day in the United States and Canada means a holiday for all people on the first Monday in September. It means the closing of businesses and celebrations with picnics, parades and athletic events. In every other industrial country of the world, Labor Day is celebrated on May 1, sometimes with bloody riots. In the United States, too, May 1 is widely celebrated by working groups, although the day is not designated as a national holiday.

Agitation for celebration of a labor day in the United States was begun by the Knights of Labor in the early 1880s. In 1884 the organization adopted a resolution that the first Monday of September should be considered a holiday for labor. Workmen of all organizations aided in the movement. Several states soon passed laws making it a legal holiday.

On June 28, 1894, congress passed a bill making Labor Day a legal holiday throughout the nation. But legislative action was needed by the separate states to put the bill into operation. By 1928 all the states and territories of the United States had passed such a law except Wyoming and the Philippines.

Old Tars Took Cranberries

As Protection Against Scurvy

Laboratory tests have shown that cranberries contain both vitamins C and A with nearly 80 international units of vitamin C per ounce credited to the little red berries. Their value was recognized as far back as early sailing days.

About the time English sailors were consuming limes on their seafaring voyages to prevent dreaded scurvy, Cape Cod skippers were pulling out from shore with a remedy of their own. As vessels were loaded for each voyage, barrels of cranberries were sent to the cook's galley. The berries were covered with fresh cold water and when stored in a cool place would keep for months.

Several times a week, every man, from the captain down, ate cranberry sauce, because he had learned from experience that cranberries helped to prevent scurvy. In those days, many a crew was wiped out by this dread disease but the New England sailors counted on cranberries for protection. Today we know that it was the vitamin C in the berries that offered this protection.

New Fibers

Applying both chemical and physical methods, scientists at the western regional research laboratory at Albany, Calif., have learned new ways of manipulating large molecules of protein substances into much larger and longer molecules of the long-chain type. Side chains on these long molecules are then induced to make chemical bonds with other side chains. These operations resemble in many ways those that the silk worm follows in creating the silk fiber. These interconnected long molecules may then be forced through a spinning device comparable to the silk worm's and they emerge as a fiber of the same general type of construction as the silk fiber. The silk worm stretches the natural fiber as it hardens, and scientific fiber makers have found that stretching also improves the strength and quality of synthetic fibers. New fibers which may vary widely in properties and may have many useful properties are within the range of possibility. Rayon, nylon, vinylon and glass fibers each has its own characteristic properties.

Scissors and Shears

Scissors and shears are designed for different uses. Scissors generally are smaller and are made for snipping and trimming. Shears are designed for cutting fabrics and are ordinarily longer than scissors and have one blade heavier than the other. Like knives, good scissors and shears are easily damaged. The fine cutting edge is dulled on cardboard or paper, flowers, wet cloth or heavy string. Inexpensive utility shears should be kept on hand for such uses. Scissors should never be used on heavy fabric since it is likely not only to dull them but also to spring them. Once sprung, scissors are permanently damaged. Protect scissors or shears by hanging them up or keeping them in a box. In damp weather they may be protected against rust by wrapping in waxed paper.

Middle America

The total population of Middle America, the eleven republics that lie between our southern borders and Colombia, is now 46,531,277, or about one-third that of the United States, reports the Middle America Information bureau. Of these countries, Mexico has the largest population, 19,848,322, with Colombia's 8,701,816 running second. Panama, with her 573,351 people, has the smallest. Haiti, with 3,000,000 people living in her 10,700 square miles of land, is the most densely populated. The remaining republics are Guatemala, Honduras, El Salvador, Nicaragua, Costa Rica, Cuba and the Dominican Republic.

Find Cow Spends Most Of the Night Grazing

The common belief that a cow spends most of her time lying down has been refuted by findings of dairy research workers at the Louisiana State university agricultural experiment station. In warm weather, they say, she spends most of the night grazing — if she gets the chance — in an effort to make up for time spent in the shade to escape the heat during the daytime.

Constant observation of six dairy cows during one week in the summer showed that on two relatively warm days night razing averaged over six hours, or more than three times the approximately two hours grazed during the daytime between morning milkings and evening milkings. Grazing habits of the cows were studied to determine their effect on milk production.

Daytime grazing more than doubled on two relatively cool days but even on the cooler days the cows grazed more at night than during the daytime, it was reported. For the entire period three grazing periods were the most common at night, and the time spent grazing averaged 5.5 hours, while 3.5 hours were spent lying down and 0.7 hours standing without grazing.

Rheumatic Fever Greatest

Cause of Heart Ailments

The greatest cause of chronic heart disease is rheumatic fever, which is responsible for most heart ailments in persons over 40. Yet this fever need not cause as much damage to heart tissue as it has, due to new technique of convalescent care. In this way the heart may be strengthened and the blood flow increased over a period of time.

People who sleep with a second pillow at night frequently have heart trouble. Awakened from sleep, gasping for air, the victim finds relief sitting upright, then he begins sleeping with his head propped up by pillows. A doctor's examination may reveal that the heart is pumping blood inefficiently and that clogged circulation in the lungs results in breathlessness.

Other indications of heart weaknesses are chest pains, particularly those which develop after stress of argument. Breathlessness after walking is another possible danger sign, as well as exhaustion after simple games. "Gas pains," especially those which spread and radiate down the arms, should be looked into.

Palladium Jewelry

With platinum mesh, as fine as that used by chemists, French artisans achieved a high fashion note this season with delicate gossamer-like diamond jewelry. In this country where jewelry no longer belongs exclusively to the "carriage trade" and more inexpensive items can be found in jewelry stores, the same Paris fashion effect has now been obtained by curving fine wire strands of palladium-filled into large floral patterns with the petals rhinestone-tipped. As in gold-filled, the rare brilliant white precious metal palladium, which stays white, is welded on a base metal for palladium-filled. Non-tarnishing qualities and brightness of color are thus retained in costume jewelry of modest cost.

Latin and Greek Origin

Various estimates of the sources of English words have been made. One computation credits us with using in every 100 words of ordinary speech, 60 from Saxon sources, 30 from the Latin (including those through the French), 5 from Greek and 5 from other sources. Others claim that the vocabulary of every day life is up to 75 per cent Anglo-Saxon in origin but that a great part of the vocabulary of literature and commerce contains a majority of words of Latin and Greek origin. Some sources lower the estimate to about 50 per cent of Anglo-Saxon origin, the other half being predominantly of Latin and Greek derivation.

Versatile Oils

During the war, military equipment had to be operated in all kinds of climatic conditions from the heat of the Sahara to the cold temperatures of Alaska and the low temperatures of airplanes at high altitudes. It was necessary that hydraulic oils used in various parts of airplanes and gun mounts in connection with shock absorption and various other mechanical devices should flow reasonably well at very low temperatures and also should have a sufficiently high viscosity at the higher temperatures. Oils of this type can be prepared by blending certain types of long chain molecules with petroleum lubricant fractions.

DDT Victims

DDT is recommended for flies, mosquitoes, lice, cockroaches, spiders, bedbugs, fleas and some kinds of ants. Livestock and poultry insects killed by DDT include flies (house flies, horn flies and stable flies), fleas, brown dog ticks, chicken mites and lice. Plant pests which may be controlled include beetle leaf roller, cabbage worms, leafhoppers, some grasshoppers, European corn borer, codling moth larvae, Oriental fruit moth, Japanese beetle, Colorado potato beetle and others.

Heavy Eating Bees Must Be Well Fed

Annual Requirements Six Times Bees' Weight

By W. J. DRYDEN

Some colonies of bees gather a type of honey in the fall that they cannot digest during the winter. All bees need about six times their own body weight a year in feed, which means that a 10-pound colony requires 60 pounds of honey and four or five combs of pollen stored in the hive to carry them through the winter.

When bees are lacing in honey they can be fed sugar syrup in-

Sugar syrup being given to hives of bees at USDA testing laboratory.

mediately after the fall honey flow ceases, to provide them with food for the winter.

When bees are confined their rations must be watched. If they run out of pollen, it may be furnished by feeding soybean flour. The flour should be fed on top of the frames where they can get it during bad weather when they need it most.

When new bees are housed, a can of sugar syrup may be placed in each hive, as shown in the illustration. This same method may be followed when bees run short on honey for any reason.

Flea Beetle Control Must Be Started Now

Flea beetles often feed and breed on various types of weeds, closely related to garden crops. They spend the winter in the adult stage hidden away under leaves, grass or other protection in the garden along fences or in adjoining waste areas, later moving to garden.

Control means that weeds never be allowed to grow or trash to accumulate that will serve as a winter housing project. The use of calcium arsenate or arsenate of lead, lime dust, rotenone or pyrethrum dusts have proven effective as sprays or dust.

When it becomes necessary to ship breeding stock or show poultry, this light-weight shipping crate will be found satisfactory. It may be marked for return, in which case, if kept clean and disinfected, it may be used over and over again.

Use of Dry Ice Proves

Death to Pesty Rats

Not only will dry ice rid storage houses of rats, mice and other pests but will aid in reducing scald, experiments at Rhode Island station show. In the tests 25 pounds of dry ice for each 100 cubic feet of storage space was used in tightly closed buildings. The ice, fanned by electric fans, will produce a 20 per cent carbon dioxide concentration, sufficient to kill all rats and mice present.

2,4-D Known to Kill

Many Weeds Outright

Among the weeds that 2,4-D will kill are buckhorn, burdock, chicory, cocklebur, dandelion, dog fennel, elderberry, fanweed, ground ivy, lambquarters, legumes, locust, morning glory, nettles, pepper grass, pigweed, plantain, ragweed, sow thistle, sumac, sunflower, wild top, wild buckwheat, wild carrot, wild radish, yellow rocket, yellow trefoil and Austrian cress. Others are added daily.

How "Winterproofing"
makes your car
safer to drive...

Probably your car has been driven all summer with worn out oils; the spark plugs haven't been cleaned; the battery's thirsty and the tires are bound to have lost some rubber on that vacation. So... MOBIL "Winterproofing" will get your car ready for safer winter driving with fresh gear oils; a checked battery that won't go dead on chilly mornings; tires that grip and new light bulbs that will throw light right through winter's darkest night.

Free: Join the Safe Driver's Corps. Stop in for your copy of the fascinating booklet "Young Pilots." Put the safe driver's emblem on your windshield.

Tune in every Monday night, 6:00-7:00 p.m., PST, NBC network for the Mobilgas Program, starring Victor Borge, with Benny Goodman's orchestra and famous guest performers. Also "Touchdown Tips" with Sam Hayes giving you winning tips on next Saturday's gridiron classics.

"Winterproof" your car and drive in greater safety.

Here's what "Winterproofing" includes:

- ✓ Engine oil
- ✓ Transmission and differential oils
- ✓ Front wheel bearings
- ✓ Air cleaner
- ✓ Oil filter
- ✓ Battery
- ✓ Radiator
- ✓ Tires
- ✓ All lights
- ✓ Windshield wiper
- ✓ and other exclusive MOBIL DEALER services

TEAKEN GOSSIP

Asa Choate has sold his farm to L. L. Yenni, a resident of this community, and we understand he is moving to Lewiston, where he has purchased a place. His sale Wednesday of last week was very well attended in spite of the sharp wind and snowy ground.

Mr. and Mrs. Ralph McKeenan, Mr. and Mrs. Carroll Groseclose and family and Grover Groseclose were dinner guests at the R. E. Brock home Sunday.

Old man winter is surely trying to work his way in ahead of time. It has been pretty cold most nights and the snow on the ground just can't seem to leave us.

Ray Lougee made a business trip to Kendrick and Lewiston on Thursday, and then took a load of cattle to Lewiston for Marion Groseclose on Saturday.

Wm. J. Groseclose returned to his home in Julietta with Ray Lougee Saturday, after spending some time helping with work on his farm here. Dal Groseclose is moving his cattle to pasture land near Julietta this week.

Processed Beans

In accordance with new ceilings for processed beans that reflect labor and ingredient cost increases incurred by processors in recent rises, retail ceilings on such products as canned pork and beans and vegetarian beans, will advance from 2c to 3c on No. 2 cans, when grocery stores receive first shipments at the new price, OPA announces.

LONG-RANGE SUGAR RATIONING PLAN UNDER ATTACK

By Charles R. Stark, Jr.
Sugar rationing for years to come may be the lot of the United States if plans suggested by Howard R. Tolley, a former department of agriculture head, materialize.

Mr. Tolley gave up his government job to become director of the division of economics and statistics of the food and agricultural organization of the United Nations. In that position he can swing a lot of influence among some of his former colleagues in Washington, possibly enough influence to make his plans click unless the new congress can take care of the situation.

This year, according to the Willett & Gray crop estimate, the western hemisphere will produce 11,169,000 long tons of cane sugar, plus 1,540,000 long tons of beet sugar. That is the greatest amount of cane sugar produced in 10 years in the western hemisphere and the most beet sugar since 1940, when the New Deal took a hand to cut down plantings.

Production in the world this year will be 28,433,000 long tons of cane and beet, about one-third of the amount being beet sugar, with Europe producing 8,067,000 long tons, the largest crop since 1940-41.

With all of this production, here and abroad, the American people will receive 73 pounds of sugar per person as against a pre-war consumption of 98 pounds. Tens of thousands of tons of the difference went to Yugoslavia through UNRRA this year — and Yugoslavia has been doing everything possible to irritate the United States.

Under the plan proposed by Mr. Tolley the United States will raise the normal consumption of sugar in other countries, regardless of any famine condition which may or may not exist. It will be at the expense and through the sacrifice of the people of the United States.

Specifically the plan proposes "that by the year 1950 the total American supply of sugar (and syrups) shall be depressed by 12.6 per cent under the total pre-war consumption." The plan fails to take into consideration the fact that the population figures are expected to show an increase of 13,500,000 by 1950, which would make the percentage of decrease to the individual exceed 12.6 per cent.

In a booklet issued by Lamborn & Co., Inc., of New York, large brokers in sugar, attention is called to the fact that in 1946 the government approved, through the state department, the allocation of hundreds of thousands of tons of sugar from our sources of supply for movement abroad. Much of this sugar went to Russia, Poland, Yugoslavia and other countries behind the "iron curtain," and the booklet points out that shipping sugar could mean, in the future, exactly what shipping scrap iron to Japan meant in the past.

"Millions of dollars worth of fruit in the United States," the booklet continues, "have gone to waste because of the sugar shortage. Farming communities have suffered not only the loss of fruit but the food values the canned or preserved fruit would have given."

"Housewives have been handicapped in preparing satisfactory meals and in doing their baking because of an inadequate supply of sugar. Labor in the food processing industry has been thrown out of work because of the sugar shortage."

"The total production of sugar in 1947 in those areas normally supply-

REENLIST IN THE ARMY — LIVE AT HOME!

Now you can enlist in the Recruiting Service of the U. S. Army and if you are qualified, you may be assigned a station in your own home town. This is an outstanding opportunity for those who want security, good pay and a chance for an ample retirement. This job can be yours if you are qualified and classified as recruiting personnel. Work — commute home daily — same as civilian worker. There are only a few of these openings! See your local recruiting station today — ask about enlistment in the recruiting service.

LEWISTON, IDAHO

PORTER BLDG. 622 MAIN

ing the United States will be tremendous — over 9,000,000 tons. How much of it will you get? And how much will our Washington bureaucrats send to other shores? "Relief for famine is one thing. But appeasement never succeeds, whether the appeased is friend or foe."

Under present plans of the department of agriculture there will be no new sugar stamp until the first of the year. The two canning stamps which were to have expired the first of November have been extended another month because many sections of the country could find no sugar which could be bought. —The Spokesman-Review.

U. S. Patent Office Resumes

The United States Patent office has returned from its "World War tour" to Richmond, Virginia, and the organization is now back home in Washington. It was chaperoned on the final trip from Richmond back to Washington by 1,000 employees.

Ordinarily the number of applications for patents in peacetime averaged about 2,500 a week. But the war side-tracked and held up most applications. Now the Patent office faces an accumulation of 118,000 applications.

Our American industries never did sell the United States "down the river" through cartel agreements between manufacturers in opposing nations; neither did they transfer patent rights in combinations of separate firms for the purpose of maintaining so-called "pools" and monopolies. The fact remains that there never has been a scandal in the Patent office.

A patented invention gives the inventor "the exclusive right to make, use and vend" an invention for the term of 17 years throughout the United States and its territories.

As a matter of fact we have the patent law system to thank for most of the progress and rapid development of "production" in the United States.

Bilbo On The Spot

If half of the batch of charges against Senator-Elect Theodore G. Bilbo of Mississippi are half true, he will likely be expelled from that body to which he was recently elected. The newspapers and columnists are reporting that the Bilbo election was "tainted with fraud," and achieved by force and violence and the use of criminal, extra-legal and illegal tactics. Bilbo is notorious. He admits that he is a member of the Ku-Klux-Klan; he is accused and will have to defend himself against specific charges that he was bribed by war contractors and carried on a campaign for reelection in which he engaged in bribery of the voters.

A "Soapy" Fairy Story

Household scouring powders and cleaners have been removed from price control, says an OPA dispatch, but soap and other soap powders have not. The supply of these products is in approximate balance with demand. The action was effective November 1.

NOTICE OF SPECIAL MUNICIPAL BOND ELECTION

Pursuant to the laws of the State of Idaho and pursuant to Ordinance No. 100 of the Village of Julietta, Latah County, Idaho, PUBLIC NOTICE IS HEREBY GIVEN, that a special municipal bond election will be held in the Village of Julietta, Latah County, Idaho, at the voting place hereinafter designated, on the 10th day of December, A. D., 1946, beginning at the hour of 9 o'clock A. M. and closing at the hour of 7 o'clock P. M. of said day, for the purpose of taking a vote of the qualified electors of the Village of Julietta, Latah County, Idaho, who are taxpayers of said Village, upon the following question, to-wit:

"Shall the Village of Julietta, Latah County, Idaho, issue negotiable coupon bonds in the amount of \$8,000.00 to provide funds with which to construct, reconstruct, enlarge, extend, repair, alter, and improve the water works system and plant of the Village of Julietta, by purchasing the necessary materials, by drilling a well, installing a pumping plant, constructing, reconstructing and improving the water storage plant and water distribution system of the Village of Julietta, Idaho, as prescribed by Village Ordinance No. 100, approved the 15th day of October, 1946."

Said election shall be held in the Village of Julietta, Latah County, Idaho, and a vote upon said question taken within said Village, and the Village Hall of said Village of Julietta has been and is the designated voting place for said election.

NOTICE IS HEREBY FURTHER GIVEN, that each and every person, in order to vote at said election, is required to register, as provided by the laws of the State of Idaho. Ed. H. Taylor, Village Clerk, office at Village Hall, is ex-officio registrar of the Village of Julietta, Latah County, Idaho, and the person with whom all voters must register in order to vote at said election.

Persons may register at any time during office hours beginning with the day that the notice of election is given, and each day thereafter until and including the Saturday next preceding the election, and on Thursday, Friday and Saturday next preceding said election persons may register between the hours of 9 o'clock A. M. and 5 o'clock P. M., and between the hours of 7 o'clock P. M. and 9 o'clock P. M.

The voting at said election shall be by ballot. The ballot to be supplied to the voters for their use at said election shall be in the form set forth in Ordinance No. 100.

Dated at Julietta, Idaho, this 25th day of October, 1946.

ED. H. TAYLOR
Village Clerk, Village of Julietta, Idaho

Namm Believes It Would Work

Return to the American way of living and doing business is the only way under the sun to get back to a truly bountiful economy, Benjamin Namm, president, National Retail Dry Goods association, recently said in Denver.

Namm said the advice of the Baruch committee would have us on the way back now if these five

points named by it had been followed: Increase production; stop increasing the money supply; stop bunking the public that wage increases can come without price increases; allow profit, but not profiteering; avoid favoritism to any one group.

Want to buy, sell or trade anything? Try a small adlet.

Potlatch Chief Sez

PUBLISHED BY THE KENDRICK CO-OPERATIVE CREAMERY

HI, THERE, FOLKS:

About Tasty Meals —
tonight besides meat and vegetable
Are you wondering what to serve
tables?

How about some Potlatch Chief
Cottage Cheese? It's delicious, and
just the thing to complete a good
meal.

Also — Be sure to have plenty
of Potlatch Chief milk on the
table. Milk is a necessity in every-
one's diet, so be sure and keep
a good supply on hand at all
times.

Milk, you know, is just the
thing for that after school snack
for the growing boy or girl —
as well as your own midnight
"lunch."

Bottles! Bottles! Bottles! —

Who has the bottles?
Every day we are getting shorter
and shorter on quart bottles.
Please return them promptly. We
cannot bottle milk if we haven't
any bottles. Look around in the

corners and on back porches and
cupboards, and see if you don't
have a few forgotten bottles. Un-
less you don't mind taking milk
home in a paper sack, please re-
turn those empty bottles.

A soldier and a buddy were
standing on a corner wondering
what to do, when they were ap-
proached by a shabby and badly
inebriated man. Expecting one,
who wore a new uniform, might
be an easy "touch", he asked:
"Shay, ya gotta nicker fer a cuppa
coffee?"

Without a moment's hesitation
the one approached replied: "No,
but don't worry. I'll get along!"

Son: "Pop, I got a licking in
school today, and it's all your
fault."

Pop: "How's that, son?"
Son: "Remember when I asked
you how much a million dollars
was? Well, 'helluvalot' isn't the
right answer!"

NEWS AND SHORTS

Show Begins At 7:00 P. M.

35c Admission 15c

LINDEN

A fair-sized crowd attended the
Hallowe'en program and pie social—
in spite of the downpour of rain
last Thursday evening. The pies sold
well, with \$96.00 clear being realized
from them alone.

Mrs. E. B. Ellison and Miss Eva
Smith were dinner guests of Mr.
and Mrs. Addison Alexander Thurs-
day.

Mrs. John Cuddy went to Kendrick
Thursday, where she is taking special
medical treatments from the doctor.
She is being cared for at the David-
son Nursing home.

Mr. and Mrs. Lester Weaver were
in Moscow Friday on business.

Frank Panning, a former resident
of this ridge, but now living at Port-
land, Oregon, visited several days
recently in the Clem Israel and For-
est Grayson homes.

Mrs. F. C. Lyons returned Satur-
day from a visit at the coast.

Sanford, Alex and Clarence Weav-
er and Arthur Foster returned Sat-
urday evening from a hunting trip,
bringing home two elk.

Mr. and Mrs. Adolph Dennler and
children of Juliaetta and Stella
Weaver of Kendrick spent Sunday
in the home of Mrs. Annie Weaver.

Mr. and Mrs. Arley Allen visited
with Mr. and Mrs. Melvin Garner at
Kendrick, Saturday.

Mrs. H. V. Perryman gave her
pupils a Hallowe'en party Thursday
afternoon. The time was spent in
playing games, and at the close of
the afternoon doughnuts, cup cakes
and cider were served.

Four new children enrolled in the
Cedar Ridge school Tuesday, coming
from Lewiston Orchards. Their en-
rollment brought the total to 18, the
highest for many years.

Mr. and Mrs. H. V. Perryman and
son Gene spent Sunday as guests of
Mr. and Mrs. Cecil Chamberlain on
Big Bear ridge.

Mr. and Mrs. Dan Kechter were
Sunday dinner guests of Mr. and
Mrs. Walton Morey on Big Bear
ridge.

STONY POINT NEWS NOTES (Delayed)

Relatives from California visited
in the Ernest Steigers home on Sat-
urday, October 26.

The women of this community
who attended club at the home of
Mrs. Marjorie Stevens, report an
enjoyable time.

Sgt. William Steigers, who was
stationed on Guam, is now at the
home of his parents. He was on
Guam for eight months.

Byard Parks, Fay Heath and
Kathleen Steigers, all from the U.
of I., visited with their respective
parents over the week-end. The
Newt. Heath family were all at home
together for the first time in six
years.

(This Week)
The Stony Point school held a
Hallowe'en party October 31. A good
time was reported by all.

Mr. and Mrs. F. L. Gibbs (nee
Flora Heath) left for Arizona Mon-
day, to be gone for a short time.

Mr. and Mrs. Cletis Hoisington
were Lewiston visitors Monday on
business.

Mr. and Mrs. Leslie Heimgartner

and family were Sunday visitors in
the George Dennler home on Fix
ridge.

Mr. and Mrs. Orncor and son Gary
visited with friends near Lewiston
Sunday.

ARROW HAPPENINGS

The H. M. Sampson family attend-
ed a birthday anniversary gathering
at the George Anderson home, Oro-
fino, Oct. 27. It was Mr. Anderson's
birthday anniversary, also that of a
niece, Barbara Wilsey.

Mr. and Mrs. Laird have been gone
two weeks on a trip to Pendleton,
Portland and Seattle.

Mrs. Smith is at St. Joseph's hos-
pital, and now much improved. She
has spent several months at the home
of her daughter, Mrs. Mike Schroder.

B. R. Gibbs and family have re-
turned from their trip to Tennessee,
and report a wonderful time.

Ben Krantz and sons Laverne and
Frank, from Montana, visited at the
B. R. Gibbs home a night last week.

Delores Parker of Pendleton is
staying with her grandparents, Mr.
and Mrs. Harry Smith. Mrs. Parker
has a baby daughter, one week old,
named Shirl Ann.

We hear Miss Edna Gibbs was
married to Ronald Yocum Saturday,
and they are now on a Portland
honeymoon.

Fritz Wagner is staying at the
Laird home while they are away.

THESE ARE

THE FACTS

AS WE FACE THEM TODAY!

ANTI-FREEZE . . .

Get it anywhere you can find it. There will be
very little of the "permanent type" available
anywhere. However, we have lots of radiator
alcohol.

TIRES

Buy what you can find, where you can find
it, if you wish to keep on rolling. However, we
get a few now and then — and that Goodyear
is worth waiting for.

HYDRAULIC BUMPER JACKS

Please be patient. Production limited, due to
the war, which is not officially ended.

STORAGE BATTERIES

Conditions are steadily worsening. However,
we do get a few now and then. Please don't
buy one unless you absolutely need it. They
won't keep, you know.
