Choir Sings At Moscow

A group from the Juliaetta Methodist Church choir sang at Moscow Sunday, for the dedication of the new wing of the Gritman Memorial Hospital.

Choir members taking part were Eugene Taylor, Roy Ramey, Mrs. Phil Johns, Mrs. Robert Hutchinson, Mrs. George Eggers, Mrs. Gary Eggers, Mrs. Adrian Johns and Leah Gilliam. Mrs. M. C. Halliday accompanied them on the piano.

Hanging Baskets Add Color

The hanging flower baskets which made their appearance Sunday at the front of the Juliaetta Cash Grocery, adds a great deal to the appearance of the Main Street, as well as giving everyone assurance that spring is here — contrary to the belief of many.

The weather of the past few weeks has certainly not promoted the feeling that spring is here — but perhaps it has now arrived.

Buffet Dinner Honors Senator

A buffet dinner was given in the home of Mr. and Mrs. James Muscat Friday evening, honoring U. S. Senator Frank Church and his party Friday evening, preceding the Commencement Exercises at Kendrick.

Those in his group were Senator Church, Cecil Lovell, Henry Curtis, and Ward Hower.

Other guests were Mr. and Mrs. Bob Magnuson, Dee and Dana and Mr. and Mrs. Gerald Ingle, Kendrick, and Mr. and Mrs. Dennis Racicot.

Purchase Juliaetta Mill, Inc.

A deal was consummated last week whereby the Mead & Howard Lumber Co., Inc., became the owner of the Juliaetta Sawmill, Inc. The consideration was not made public.

Mead & Howard say that they have not yet reached a decision on what disposition will be made of the mill itself.

We Could Use Warm Weather

We here could certainly use a bit of warm weather. Gardens are at an almost complete standstill and flowers slow to come into bloom. The only things that seem to be doing real well are lawns and weeds!

OPEN HOUSE ON MAY 27TH

An Open House honoring Mr. and Mrs. Carl Fliger on their Silver Wedding Anniversary will be held on Sunday, May 27, between the hours of 2:00 and 5:00 p. m., at the Zion Lutheran Church in Juliaetta.

Hostesses for the occasion will be the Fix Ridge Club.

A "Money Tree" is planned.

WEDDING TOLD

Mr. and Mrs. Roy Glenn, Kendrick, announce the marriage of their daughter, Sally Jane Glenn, to Jack Gary Browning, son of Mr. and Mrs. Jack Browning of Juliaetta.

The young couple, who kept their marriage a genuine secret, were married at Coeur d'Alene, Idaho, on June 24, 1961.

STORE RE-OPENING TO BE SATURDAY

Kendrick's new department store, to be known as Thurber & Oldemess, will be held this coming Saturday, May 26.

This new store occupies the building owned by L. S. Thurber, and vacated by Malos' Department Store following the big fire of some three months ago.

The interior of the building has been completely renovated and redecorated — and every item in its stock is brand new — nothing being left from the old Malo stock.

The announcement ad for the new firm will be found on another page in this issue.

SOUTHWICK FOLK ARE BUSY ONES

BY MRS. DON CANTRIL

Southwick Day Is Coming

Southwick Day is scheduled for this Sunday, May 27, at the Southwick school — and we hope all our friends and neighbors will be present for a day of reminiscing and visiting.

Plan to come — and don't forget your hot or cold dish, and your table service. Punch and coffee will be served.

Phones Going In

Installation of the new phones was started Tuesday, so news will be short — due to the fact that your reporter's phone was disconnected early Tuesday morning.

Graduates Honored

The Southwick Community Church honored the area graduates and their families with a Sunday evening supper at the Aid Hall, and a special service at the church. Gifts were presented to the graduates, and one to Mrs. Darwin Tarry, who was a special guest for the occasion.

Bible School Dates Set

The Daily Vacation Bible School Dates have been announced as June 4 to June 13. Theme and teachers will be announced later.

OLD SCHOOLHOUSE NOW HISTORY

Sunday afternoon a big bulldozer and a Michigan loader belonging to Goodfellow Bros., contractors at Wenatchee, Wash.; a dump truck owned by Ed Nelson and another one owned by Oral Craig completed the job of leveling the old Kendrick High and grade school — built in 1912, and the space the building occupied is to be leveled and converted into a parking lot by the V. F. W.

Two years ago Baker-Lind Post of the V. F. W. at Kendrick purchased the old school building and the gymnasium, with the agreement that the school building was to be torn down and the ground leveled within a two-year period. Many were of the opinion that the V. F. W. had "bitten off more than it could chew," but this proved erroneous, as the job was completed Sunday, and well within the specified time.

The dirt in the lawn at the front of the building was hauled to the baseball grounds, where it was used for fill in the low spots surrounding the new pump house, and in other low areas. The huge chunks of concrete rooted out were hauled to the "elbow bend" at the foot of the hill on the north side, and used for fill to widen this spot.

The walls in the basement proper of the old building were 16 inches thick, and deeply set into the ground. They provided a real test of power and ability for the heavy machinery in use. The old boiler room was left intact, and most of it will be used as a warehouse by the V. F. W.

Only real loss of the day was the beautiful spruce tree which stood in the south portion of the lawn. That, too, was removed to provide more parking area. It seems a shame that it had to be destroyed, but its size and the season of the year made transplanting impractical.

Anyway — the old schoolhouse is no more!

GRANGES MEET SATURDAY EVE.

The Kendrick Grange met Saturday evening, May 19, with 27 members present.

During the business session it was voted that the Grange will have a booth for the Locust Blossom Festival and sell pie, cake and coffee.

It was also decided they would sponsor a Juvenile Grange float for the parade that day.

It being the last meeting before Memorial Day, memorial services for departed members were held.

Juvenile Grange

Seventeen members were present for the Juvenile Grange. Three new members, Cindy, Jimmy and Janie Fey were given the obligation. During the business session it was voted to cooperate with the Subordinate Grange in constructing a float for the Locust Blossom parade.

Two members were selected to assist with refreshments after Grange each meeting.

During the social period games were played and prizes awarded the winners.

JR. RED CROSS

The last meeting of the Jr. Red Cross for the season was highlighted with talks given on the World's Fair by three seniors, David Eldridge, Alice Wright and Rona Armitage.

They told of the interesting and educational displays at the Fair, as viewed on their Senior Sneak. Post cards and camera pictures of the Fair were passed among the members. — Jane Westendahl, reporter.

PLANS RAPIDLY TAKING SHAPE FOR ANNUAL LOCUST BLOSSOM FESTIVAL

Plans for the Kendrick Community's Annual Locust Blossom Festival are nearing completion, according to Bill Rogers, chairman for the big annual event — which this year is a co-effort of the Kendrick Community Lions Club and the Veterans of Foreign Wars. They will be assisted, as in the past, by Kendrick business men who are not members of either organization.

The tentative program, as announced by Mr. Rogers follows:

10:00 A. M. Parade — featuring, this year, commercial as well as decorative entries. The parade pattern has not yet been completely worked out. All entrants are urged to register by Friday evening.

10:30 A. M. — Foot races. This year they will be held on Main Street rather than at the ball diamond.

11:30 to 1:30 — Barbecue dinner, in the park, with a section reserved for pioneer visitors. Marvin Long, chairman of this event, says name cards will be issued to all old-timers eligible to sign the guest book. Marvin will be assisted by John Darby of the V. F. W. Both are in their own right, real pioneers.

During the serving of the dinner there will be a band concert, with the K. H. S. band and the Genesee High School band furnishing the

MRS. GIL ERLEWINE NOW TEACHING THIRD GENERATION

Mrs. Gil Erlewine has completed her 34th year of teaching. All of which has been in the State of Idaho. She is now teaching her third generation of students in this vicinity and within one family.

Mrs. Arthur Foster had Mrs. Erlewine as a fourth grade teacher in 1924-25 at Gold Hill. Marjorie Foster Alexander was in Mrs. Erlewine's eighth grade class at Gold Hill. She was in the last eighth grade class that was held at Gold Hill. In 1953-54, Mrs. Erlewine transferred to the Juliaetta Elementary School where she is presently teaching the second grade. This year she is teaching Dale Alexander in the second grade. This is an accomplishment that few teachers ever attain.

According to school records, Mrs. Erlewine started to teach in 1921 at Aspendale. She has taught various schools in Clearwater, Bonner, Nez Perce and Latah Counties.

Jessie Butler Erlewine was born near Kendrick and soon after her parents moved to Missouri. They later moved back to Idaho and Jessie completed her grade school and was graduated from Deary High School. After graduation from High School she attended Lewiston Normal School and there received her teaching certificate.

Make Their Home on Gold Hill
Mr. and Mrs. Erlewine make their home on Gold Hill, and they have two sons, Neil and Gerald, both residing at Kendrick.

Besides being a home maker and teaching, Mrs. Erlewine has completed additional courses from the University of Idaho and Eastern Washington College of Education. She is ever improving her teaching methods and this is just one reason that makes Mrs. Erlewine a wonderful and admired teacher.

Her day during the term is a very busy one. She travels from Gold

Hill to Juliaetta. After she gets to school her schedule is as follows:

Opening exercises from 8:50 to 9:00; 9:00 to 9:15, Word study and Reading; 9:15 to 9:44, Music and Reading study. Recess and supervision of Halls or Playground duty. 10:20 to 11:30 Number Drills, Board and Drill work and complete reading. 11:30 to 12:45, noon. School lunch supervision, Hall Duty or Playground duty.

From 12:44 to 2:00 is Phonics, writing, Social studies, Sight reading. This age group has the beginning of science. Recess: Then from 2:20 to 3:00 Word study, such as new words, spelling and oral work. notebooks. 3:00 to 3:10, Committees at work and ready for dismissal. Then Mrs. Erlewine travels home to carry on preparation for the next day and duties of a homemaker.

Mrs. Gil Erlewine is truly a remarkable teacher, the many students that have passed through her classes in her 34 years of teaching have truly received a good education. She is a credit to the profession, loved by her students and School District No. 283 is truly fortunate to have her on their faculty.

WILL THE LOCUST TREES BLOOM?

The question uppermost in the minds of Kendrick residents these days is: "Will the locust trees be in bloom by Saturday?"

It's anyone's guess whether or not they will be — with only the "weatherman" knowing the answer. There seems little doubt but what a few days of warm weather would bring them on — and with a rush — but will we get that warmth?

We believe somebody could make a few dollars by starting a "pool" on that question!

LIONS HOLD ELECTION

The Kendrick Community Lions Club met for their regular session on Wednesday evening of last week, with two items of business: — the election of officers and committee reports for the Locust Blossom Festival on the agenda.

Election of officers was held first, with results as follows:

Robert Watts, president.
Luther Parks, first vice president.
Tom Cox, second vice president.
Norman Lewis, third vice president.

James Muscat, Tail Twister.

Herb. Millard, Alternate Tail Twister.

Bud Elchner, Lion Tamer.

Dick Benjamin, Secretary-Treasurer.

Bill White, director (two-year term).

Committee reports were then received on the Locust Blossom Festival, and a number of minor problems discussed and ironed out.

ENGAGEMENT TOLD

Mr. and Mrs. Harold Roberts announce the engagement of their daughter, Lolita May, to Richard Brian Stuthard, son of Mr. and Mrs. Charles Stuthard of Portland, Ore.

Miss Roberts attended the University of Idaho and Warner Pacific College in Portland. She will continue her studies at Portland State College.

Mr. Stuthard, a member of Tau Kappa Epsilon will graduate from Portland State College this year.

August 18 has been chosen as the wedding date.

The Roberts family, now of Moscow, are pioneer residents of American ridge, and well known here.

FAREWELL PARTY

Friday, during the sixth period, the eighth grade held a going-away party for Kenneth Rosentrater, Kay Gilliam and Susan Webster — as these pupils will not be with us next year as they leave with their parents for other towns.

Games were played and refreshments served. Everyone had a very enjoyable time. — Carol Heimgartner, reporter.

FRIENDSHIP CLUB

The Evergreen Friendship Club met Wednesday afternoon in the home of Mrs. Ben Westendahl, with Mrs. Carl Fliger of Juliaetta as co-hostess.

Members worked on recipe books which will go on sale at the Locust Blossom Festival.

Mrs. Bob Watts demonstrated "Tips on Cake Decorating."

NOW AT HOME

Mrs. Max Dammarell was brought home Wednesday of last week from the St. Joseph's Hospital at Lewiston, where, two weeks previous, she had undergone major surgery.

She is recuperating at the family home, and doing nicely.

Blewett's Grocery in Kendrick is offering a host of Locust Blossom Festival Specials. You can find anything and everything for that picnic lunch in their store. adv.

The Whole Family Keeps... "REAL COOL" WITH AIR CONDITIONING

... We don't dread those
sweltering summer days ahead!

MOM likes the way her housework is so much easier in the cool comfort of the air conditioned atmosphere.

DAD is happy with Air Conditioning because he knows he's providing the finest healthful living conditions for his family and at such little cost.

SIS breathes easier these days with no more allergy discomforts since we've had Air Conditioning in the house.

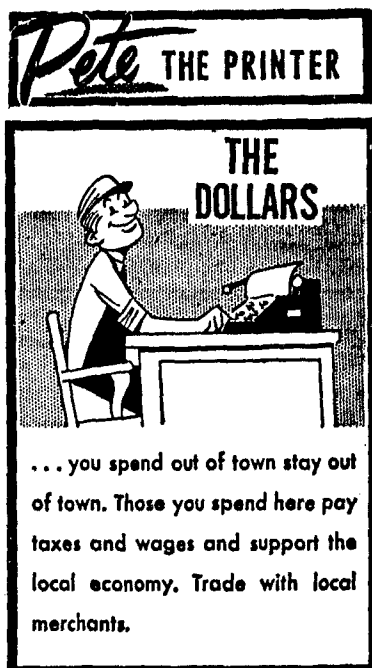

BABY is more comfortable without hot weather irritability and annoying heat rash... and cool, peaceful sleep is no longer a problem on sultry summer nights.

THE WHOLE FAMILY is sleeping easier since Mom and Dad decided Air Conditioning was the best investment they could make for our family's summer comfort.

See or call an Electrical League Dealer or Contractor for full particulars on the unit best suited to Air Condition your home. He'll gladly give you a free estimate.

TO SERVE ON BAPTIST ASSEMBLY STAFF

Miss Elizabeth Dixon has been selected to serve on the Glorieta Baptist Assembly staff in Glorieta, New Mexico. She is a member of the Trinity Baptist Church in Moscow, Idaho, and serves as president of the Woman Missionary Union, editor of the Baptist Bugle and church publicity chairman. She has also served in the Trinity Baptist Church at training Union Director, Baptist Student Union secretary-treasurer, Sunday School class president and Department Training Union Group Captain.

Elizabeth has received the Church Study Course Training diploma, Christian Training Diploma. She was awarded the diploma after completing the specified books in the Church study course. She is enrolled in Seminary Extension offered by the Southern Baptist Seminary and she is enrolled in the Correspondence Bible course given by the Home Mission Board.

Miss Dixon will accept appointment on the Glorieta Staff on June 4. She will leave Moscow on May 19, for Cambridge, Idaho. She will then leave Cambridge with Mrs. Dees, Mrs. Earl Dixon's aunt, and Portia Dees for the World's fair in Seattle, Washington. They will tour the coast of Oregon and California for two weeks. After a tour the group will go on to New Mexico.

WEATHER SAME OLD STORY

There just isn't much of anything new that we can say about the weather in this area — it's the same old story — chilly, damp — and sometimes threaten frost — but that has failed to arrive.

There has been rain and more rain — at times a real downpour, and on one occasion thunder came with the rain — or rain followed the thunder — take your choice. Pastures are doing well, but farmers say most other crops are at a standstill, with sunshine needed to give them a boost.

The Potlatch river, however, has been running quite clear, and should this condition continue, it is within the realm of possibility that we just could have a little bit of good early fishing. Local residents are keeping their fingers crossed on this latter, and hoping for the best.

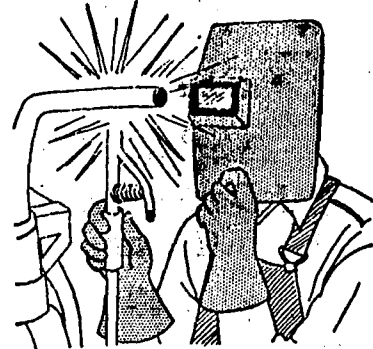

So much rain has slowed logging operations, but they are continuing on a limited basis, say local operators. They, like the farmers, are hoping for good weather.

For Better Farm Living

From time to time readers have posed questions about welding equipment. Usually the queries boil down to this: What welder, gas or electric, is best to use in a farm or home shop?

We'd like to point out the advantages and features of each type of welding for there is no clear-cut answer as to which type is better in all cases. It depends upon individual needs and preferences.

Electric welders are preferred by many because of their speed.

An electric welder takes electricity from a power source and converts it into a low-voltage heavy current. There are two classes of electric welder, A.C. and D.C. An A.C. or alternating-current welder can be operated on 110 or 230 volt line. The welder has a special transformer that is operated from the power source. D.C. or direct-current welders are operated from a direct generator driven by a gasoline or electric motor.

The oxyacetylene or gas welder utilizes oxygen and acetylene in proportions that produce a flame hot enough to melt metal. Whereas this gas type of welder has a lower initial cost than an electric welder, it also has a higher operating cost.

Gas welding is better for brazing, rebuilding surfaces, and heating, and it cuts more easily than an electric welder.

The electric welder is faster. However, because it's more difficult to control molten metal with an electric welder than a gas unit, the work of an electric welder is not as neat.

HAMMERING TIP: To make driving nails easier, bore a small hole in the handle of your hammer with a portable electric drill and fill the hole with wax. Then, the next time you're nailing any material, stick the point of each nail in this wax bed before hammering the nail into wood. You'll find the nails will drive much easier.

MEET THE TEACHERS OF JOINT DISTRICT 283

EDITORS NOTE: The following article is the final in a series which is designed to acquaint the people of Joint School District No. 283 with the teachers of the district, in a brief resume of their work and their educational qualifications. The series is slated to cover all of the teachers now employed by the district.

Roger Christensen was born to Dr. and Mrs. D. A. Christensen of Kendrick in 1938. He attended grade school and high school at Kendrick. After graduation he attended the University of Idaho and was graduated with high honors in 1960.

His first teaching position was at Emmett, Idaho, where he taught science and assisted in athletics. This past year he moved with his family to Kendrick and presently is teaching science at Kendrick High School. Mr. Christensen teaches biology, earth science, chemistry and is the Assistant Coach. Besides his teaching duties he is also Freshman Class Advisor.

Mr. Christensen and his wife (nee Pasty Ann Cuddy) are making their home on American Ridge. They have three children: Jamie Jon, Mathew D., and Michelle Denise.

Roger has several interesting hobbies: Wildlife, photography and the collecting and mounting of mammals. It is truly very interesting to see some of his mountings.

While Roger attended Kendrick High School he was an exceptional student and a fine athlete. He was a member of the Kendrick State Championship track team of 1955. Roger ran the first leg of the 880 relay which placed first in the state meet.

Mr. Christensen belongs to numerous organizations: National Education Association, Idaho Education Association, Local Education Association, Phi Beta Kappa and Phi Kappa Phi.

This week we salute Roger Christensen. He is truly a very fine teacher and a credit to the profession as well as the Kendrick Community.

It happened 100 YEARS ago

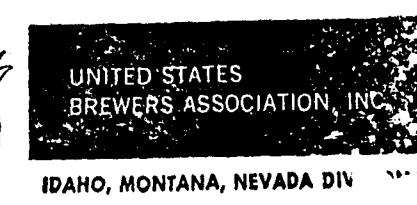

The oldest incorporated trade association in the country, the United States Brewers Association, was organized in 1862... the same year that

IN IDAHO Fort Lapwai, a permanent military post was established as a restraint to Nez Perce Indian unrest. Early settlers and Indian fighters in this period enjoyed beer brought in from breweries on the coast just as Idahoans today continue to find pleasure in beer.

For even then, beer was Idaho's traditional beverage of moderation. Beer still provides enjoyment for Idahoans, and a good living for many of them — not only the employees of the Brewing Industry itself, but also for farmers and other suppliers of the materials brewers use.

TODAY, in its centennial year, the United States Brewers Association still works constantly to assure maintenance of high standards of quality and propriety wherever beer and ale are served.

SELECTING AIR CONDITIONING

Thinking of buying an air conditioner? Here's some questions and answers that may help you. What is Air Conditioning?

Air conditioning does not mean making a refrigerator out of a room. It means revitalizing the air by ventilation, heating or cooling, cleaning and purifying, dehumidifying or humidifying, and circulating it for human comfort.

What is an Air Conditioning unit? An air conditioning unit is made up of three basic components: The compressor or the refrigerant pump circulates the refrigerant on a cycle.

The cooling or evaporator coil enables the refrigerant to collect the heat from the air in the conditioned space.

The condenser transfers the heat collected by the evaporator from the refrigerant to outside the conditioned area by either water or air.

These three components may be in one unit or may be installed in various locations.

What is a ton of air conditioning? One ton of air conditioning equals the cooling effect of the melting of one ton of ice in a 24-hour period.

Why is air conditioning called by horsepower?

Air conditioners are identified by the horsepower rating of the motor driving the compressor. Room units are rated from 1/3 to 2 HP. Central cooling systems are rated from 1 1/2

FISH AND GAME department measurer for the Boone and Crockett club says this beautiful mule deer trophy is tied with a Wyoming entry as the all-time No. 2 rack of the world in the Boone and Crockett club records for typical antlers. Holding the big trophy are Rhea Page (left) and Lorrie Talbott, daughter of Sheriff Ray Talbott of Franklin county, who shot the buck last fall. Conservation officer Glen S. Page of Preston made preliminary measurements of the antlers and sent them into official competition with other all-time records.

HP up. generally speaking, one HP rating is the electrical capacity of the motor that will operate a refrigeration compressor capable of producing one ton. of refrigeration. Another rating is BTU (British Thermal Units). The removal of (Continued on page 5)

AIR CONDITIONING IN OLDER HOMES

It has been predicted that at least half of the air conditioning systems installed this year for central air conditioning of residences will be in older homes.

According to R. T. Paine, Moscow District manager for the Washington Water Power Company, the Inland Empire is beginning to take the same interest in air conditioning that is evident in the eastern and southern states.

"The increased interest was noticeable last year," Paine said, "and this year is far greater. Homeowners are changing their heating systems and finding out that they can add central air conditioning systems at the same time."

Paine added that air conditioning should not be considered as expense since in almost all cases the cost of the system is offset by the increased value of the property that is air conditioned.

"A home never grows old," Paine said, "as long as it changes to meet the needs of its occupants. A century-old house will serve its owners well if it has been upgraded to modern standards so that they are comfortable in it."

A great variety of air conditioners are now available to meet the many different requirements which might be encountered in existing dwellings.

One of the simplest approaches to modernizing by adding air conditioning is in the house equipped with a forced warm air heating plant in good condition. A conversion air conditioner will employ the same fan, filters and ducts to provide year-around comfort at a minimum cost.

"If you are interested in air conditioning your present home," Paine said, "you'll want to keep in mind the best and most economical time to do it is when you are installing a new heating system. A year-round conditioner providing heating and cooling from a single unit is offered by numerous manufacturers. Or the homeowner can take it in two steps, installing an 'air conditioning de-

sign" furnace first and adding a cooling coil and refrigeration unit later.

WATCH ALFALFA FIELDS FOR APHIDS

U. of I. Moscow — Farmers should be prepared to wage a battle again this year against the spotted alfalfa aphid, cautions Roland W. Portman, U. of I. extension entomologist.

"We don't know if the aphids winter over in the fields and go undetected early in the season, or whether they fly in from other areas," he said. For the last three years, Portman has found aphids in the same spots bordering fields in the Lewiston area, indicating they definitely winter over in those spots.

The spotted alfalfa aphid has been found in both the Lewiston area and southwestern Idaho, although only in southwestern Idaho has it attained populations of economic importance. Portman points out that last year the aphid infestation caused an estimated \$30 per acre damage from Hammett west to the Oregon border in three cuttings of alfalfa. In infested fields planted last spring, there's doubt whether the alfalfa will grow this spring. Fall planted fields also suffered heavy plant loss.

"Spotted alfalfa aphids remove an abundance of plant sap. Movement of food from roots to leaves seems to be affected. Leaves drop off and the plant dies," explains Portman. "Sooty mold attacks the abundant honeydew produced by the aphid, making the put alfalfa unpalatable to livestock. In some old, established stands in southwestern Idaho, this sooty mold situation was so serious that the entire lower eight inches of the plants were black."

Control measures are: Plant an alfalfa variety tolerant to spotted alfalfa aphid, such as Lahontan; apply a ground spray of one ounce of actual demeton (systox) in at least 20 gallons of water per acre; or apply two ounces of actual material in 10 gallons of water per acre for aircraft. Do not apply control sprays before the aphids appear.

To prevent plant residues, the last application should be made no later than 14 days before harvest.

4-H CONGRESS SPEAKERS CHOSEN

Four speakers at the annual 4-H Club Congress on the University of Idaho campus, June 17 to 22, were announced this week by Dan Warren state leader in the extension service. Each will discuss a phase of "Focus" the theme of the week's program for about 600 boys and girls representing all counties.

Dr. D. R. Theophilus, president of the university, will talk about "Focus on What the University Offers You." Randall Johnson, Washington Water Power Co., Spokane, will discuss "Focus on What Employers Look for in New Workers." The subject of Dr. Van T. Christoph Gonzaga University, Spokane, is Focus on Self." William Johnston, editor of the Lewiston Morning Tribune, will speak about "Focus on Community Responsibilities."

AIR CONDITIONING BIG STEP IN HOME MODERNIZATION

In a few years any home without air conditioning will be obsolete,

according to Rod Anderson, president of the Inland Empire Electrical League.

"When you start thinking about modernizing your home," Anderson said, "think about air conditioning. With the wide variety of air conditioning equipment on the market today, you should be able to find just the equipment you need to truly air condition your home."

Anderson said that home owners have a choice of room size or central systems that can be connected with existing hot air ducts. Some of these units have a reverse cycle that heats in the winter, as well as cools in the summer. An electric air conditioning system will do more than cool or heat. It will condition the air. It will control the amount of moisture in the air and remove much of the dirt, a real benefit for mother on cleaning day, when she has so much to vacume or dust.

Anderson said that today's efficient air conditioning is relatively easy to install. "Once you put it in," he said, "you have upgraded your home, increased its value, and taken a long step toward having a completely modern home."

Modern Winter Biathlon

The father of the Modern Winter Biathlon is the military ski firing race, or ski patrol. Squads from the armies of European countries have been competing against each other in ski patrol races since 1908.

From these military ski patrol races has grown the Modern Winter Biathlon, which became an Olympic event for the Winter Games of 1960.

Biathlon is primarily a team event requiring the utmost in stamina from all team members. It combines a cross-country ski race of slightly over 12 miles with rifle marksmanship.

Just as the rodeo developed from the daily work of the American cowboy, so has the Biathlon developed from the training of the Infantry soldier. The rifle is the basic tool of the Infantryman's trade and in most European countries the ski is the Infantryman's basic means of transportation during many months of the year. Thus the military ski patrol race was born and from it grew the Biathlon.

The Modern Winter Biathlon is one of the most difficult events on the Olympic program because it combines in one competition two sports which are so different from one another as to require entirely different skills. These two sports are:

(1) Racing on cross-country skis over a 20 kilometer (12.5 mile) course over all types of terrain. Ideally speaking, the approximately circular course is comprised of one-third flat, one-third uphill and one-third downhill terrain, with the start and finish at the same point. The contestant travels at the fastest speed possible over this hard packed, well defined track.

(2) Shooting with a rifle at four different ranges situated along the track. The first range is 250 meters, the second 200 meters, the third 150 meters and the fourth 100 meters. The first three ranges are fired from any position, the last from off-hand standing position. There is approximately equal skiing distance between each range, with all targets normally placed between the third and 18th kilometer of the ski run.

The difficulty of the Biathlon derives not only from the fact that a great deal of stamina and skill is necessary in order to complete the 20 kilometers swiftly, but also and even in greater degree, from the fact that the exhausted state in which a racer reaches each range burdens his shooting ability with a very real handicap. There is the weight of the rifle carried on the racer's back, much in the manner of a pack, and then on each range, the difficulty of quickly regaining normal, relaxed breathing in order to fire accurately. Five rounds are fired at each range.

The first time the Modern Winter Biathlon was raced in the United States, under what are now Olympic rules and conditions, was in the winter of 1956 at the Army's Camp Hale, high in the Colorado Rockies.

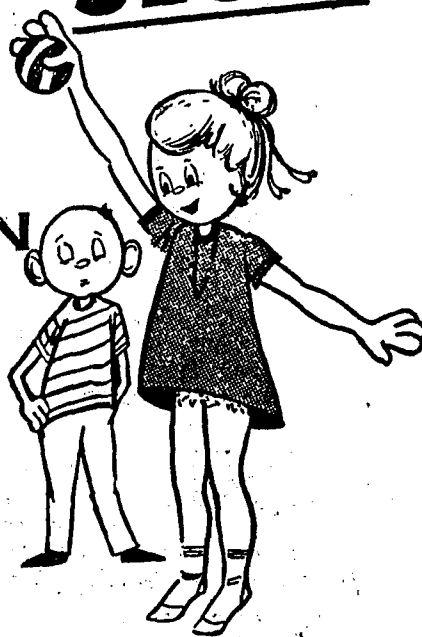

The Olympic Biathlon Team that participated at Squaw Valley, Calif., in the 1960 Winter Olympics, was trained by the Army. The United States has not won an Olympic or World Championship, either in the individual or team effort, during its short history of participation and competition. To field a winning Biathlon team, versatile athletes with the required special skills for these events must be found and made available.

AIR CONDITIONING

(Continued from Preceding page)
12,000 BTU'S equal one ton of refrigeration.

How does an air conditioner work?

How dirty, humid air enters the return grille.

Large-area filters remove dirt, dust, lint and clean the air.

Cooling coil cools air and removes the moisture.

Heat absorbed by refrigerant passing through the cooling coil is returned to compressor to be "pumped" to condenser coil.

Condenser coil disposes of heat by putting it back into outdoor air.

Blower speeds air flow over condenser coil to increase heat rejection.

Blower draws air over cooling coil and circulates to the conditioned space.

The size and type of equipment needed depends on many factors. You must know the dimensions of the room, the area of the walls and glass and the direction in which they face, the construction materials, the amount of insulation in roofs and walls, the number of people normally in the area, and any heat-emitting equipment such as lights, appliances, etc. Whenever possible, avoid exposing the conditioning unit directly to the sun's rays.

TWO HEARINGS ARE SCHEDULED

The Senate Commerce Committee is planning two more hearings into the "Depressed Conditions of the Timber Industry in the Pacific Northwest," it was announced this week by George J. Tichy, manager of the Timber Products Manufacturers Association.

The hearing of particular interest to those in this area will be held on Monday, May 28, at the Lewis-Clark Hotel in Lewiston, beginning at 10 a. m.

The final hearing is scheduled for June 4th, at Portland, Oregon.

The purpose of the hearings is to learn the plight of the timber industry and suggested remedies, particularly such remedies as might be undertaken by the federal government and congress.

The hearing is scheduled to look into the problem of Canadian imports, but the "in-transit" rail transportation and various other problems which concern us will get a full airing. It will be conducted by the Senate Interstate and Foreign Commerce Committee, at which Chairman Warren G. Magnuson of Washington State will preside.

Senator Frank Church, Idaho, and possibly Senator Henry C. Dworshak, Idaho, will represent the interests of Idaho. Also in attendance will be Senator E. L. Bartlett of Alaska.

Those wishing to attend and testify, or those who cannot attend but would like to submit a brief statement for the record, should write or write Senator Warren G. Magnuson, Interstate Commerce Committee, at Washington 25, D. C.

Members of the Latah County Pioneer Association will, for the 22nd consecutive year, meet with the Moscow Elks Lodge No. 249, in observance of Flag Day and Idaho Pioneer Day, Mrs. Harding B. Jones, Genesee, president of the Pioneer Association, announced this week.

The united observance will be held on Sunday, June 3, at the Elks Temple, Moscow. The doors open at 10 a. m. The forenoon will be devoted to registration of pioneers and their guests, informal visiting, and enjoyment of "Pioneer Day Scrapbooks," compiled by Mrs. C. C. Carsson, secretary emeritus, and other pioneers.

At 12:30 p. m. a covered dish dinner will be served. The pioneers will supply the picnic baskets of food. The Elks will furnish table service, coffee, sugar and cream. The formal program of the afternoon will begin at 2:00 p. m., with a featured speaker. Music is still to be announced.

HELLO, THERE, FOLKS:

Well, here it is, Locust Blossom Festival time again — and we hope all of you are planning to come in and spend the day with us. You'll never find a bigger or better one for the price!

When you come to Kendrick for the Locust Blossom Festival, come in for a tank of Union 7600 or Royal Gasoline — drive out with the knowledge your car is getting the finest.

An American and a Russian soldier faced one another across the wall of East and West Berlin. In time they fell into an argument.

"In my country," said the American, "I can go to the door of the White House, ring the bell and say just what I think of Ken-

nedy."
"So what," said the Russian. "In my country I can go to the gate of the Kremlin and say just what I think about Kennedy!"

To make up for the day spent at the Locust Festival in Kendrick, give us a call for Union Products — Gasolines, Diesel Fuel, motor oils, lubricants, greases — get full power and get your work done quicker!

Did you hear about the Texas oil man who had his swimming pool filled with martinis? It was impossible to drown — the deeper you sank, the higher you got!
